"FAIR CE QUE DOIS: ADVIENNE QUE POURRA!"

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JULY 4TH, 1903.

BIRTH.

On the first of July, the wife of L. SUZOR, Esq., of a son.

MARRIAGE.

On June 29th, at the Roman Catholic Church, No. 80, Yamashita-cho, by the Rev. A. Pétier, Miss MEA MARIE MARGARETHE LOTZ of Hayama (near Zushi) to NIKOLAUS MARKUS MORGIN, the Vice-Superintendent of the Satsuma-cho Fire Brigade, Yokohama. No cards. Kobe papers please copy.

SUMMARY OF NEWS.

MR. YAMAZAKI, Japanese Consul at Hankow, died on the night of June 29th.

The German gunboat *Tiger* which was in dock at Nagasaki for repairs, left there on June 29th for Miyazu.

ACCORDING to official investigations, say the Tokyo papers, Japanese residents in Manila numbered 799 on May 31st.

A TRAIN on the Kofu railway ran over a man on June 29th at 2.20 p.m., at the tunnel near Yoshino station. The man was killed.

A TELEGRAM from Fusan states that three Japanese robbers assaulted, on June 25th, a female teacher and attempted to murder her. They were arrested at once.

LIEUT.-GENERAL. TERAUCHI, Minister for War, will be appointed acting Governor-General of

Formosa in addition to his present post, during the absence abroad of Baron Kodama.

TWENTY-EIGHT cases of dysentery were reported on June 20th at the village of Mitsuhamu, Idzu province. The disease shows a tendency to spread.

ELEVEN torpedo boats under the leadership of Captain Kataoka, commander of the Takeshiki fortifications, left Iwahara on June 25th for the Korean sea.

A MAN armed with a sword entered, on the night of June 23rd, the house of a priest at the Buddhist temple Bukenji, near Kanagawa, and stole yen 2.30 and some articles.

ILL-LUCK continues to pursue the cricket fixtures of the Y.C. and A.C. The third match arranged within as many weeks could not take place on Wednesday owing to the heavy gale that prevailed all day.

A TELEGRAM from Maebashi to the *Asahi* states that a suspicious Russian has taken up his stay at Takasaki and photographs the neighbourhood of the military depot. The stranger is receiving official attention.

ON the night of June 28th the pipe of the reservoir of the Water works, Osaka, was fractured. The supply of water in the city was suspended. Repairs were expected to be made by the evening of the following day.

MR. S. KATAYAMA, a prominent socialist and editor of the periodical *Shakai Shugi* (principles of socialism) was punished in the Tokyo District Court on June 30th, with a fine of yen 20 on a charge of having infringed the Press Law.

A TELEGRAM from Chemulpho states that the Japanese warship *Saijen* arrived there on June 26th from northern Korean waters. The drought has continued for a long time and the price of rice is going up.

A CHINAMAN named Leong who was in 1894 sent by the Japanese Government to his country on a charge of having counterfeited Japanese sen 5 nickel coin is reported by the *Yokohama Shimpō* to have recently returned.

MR. HOMMA, Member of the Diet for Nara Prefecture, who was connected with the fraudulent bankruptcy of the Nippon Yarn Manufacturing Co., was sentenced on June 28th in the Nara District Court to six years' minor confinement.

SINCE the strike in Osaka has been settled the jinrikisha coolies appear to have decided to enter into competition with the river launches. On June 26th over six hundred coolies lowered their fares to the same rate as the boat fares.

A CLERK, named B. Yamamoto, of the Metropolitan Police Board attempted on June 24th to commit suicide by drinking poison. The cause is reported to be that he had made away with yen 23 belonging to some of the officials.

A LANDSLIDE occurred on June 24th in the compound of the dwelling of Count Matsukata, Takeya-cho, Azabu, Tokyo, burying three coolies out of thirty who were working at the bottom of the hill-side. The three were rescued and resuscitated.

A COOLIE who was working on board the steamer *Ambria* fell from the deck into the hold on June 27th sustaining severe injuries. He was at once removed to his house where, says the *Yokohama Shimpō*, he is in a dangerous condition.

THE Sōul and Fusan Railway Company have

applied to the Dai-ichi Bank to lend temporarily over yen 1,600,000 needed for the construction of the railway. The negotiations, says the *Yokohama Shimpō*, will probably be concluded in favour of the company's object.

A TELEGRAM from Sapporo states that traffic between Noboribetsu and Horobetsu on the Hokkaido Tanko Tetsudo Kaisha's line was suspended on June 25th owing to a heavy storm and consequent inundations by which the railway for about ten miles was washed out.

THE *Fiji* states that the Hunan Steamship Company, China, will begin business in the middle of October this year. The two steamers which are under construction at Osaka are expected to be completed before the middle of September and will be delivered at Hankow.

MR. WADA, military assistant accountant in reserve, living, at Yawata-machi, Gifu, has been arrested on a charge of having received bribes from a transport agent during the troubles of North China in 1900, at which time he was in active service.

AN earthquake, quite severe in character, was felt in Yokohama on Wednesday morning about a quarter past nine o'clock. The long premonitory and closing vibrations, and the two or three smart shocks that constituted the real "temblor" lasted for quite two minutes.

ABOUT fifty postmen of the Yokosuka Post Office struck on June 26th and demanded an increase of wage. Mr. Okabayashi, the director, however, discharged six of the principal instigators on the following day and then the others return to their usual duties.

S. OCHUMI (30) and J. Takatsuji (23) of the crew of the steamer *Kaga Maru*, were prosecuted on June 29th on a charge of having contravened the shipping law. They deserted from the ship at Seattle, but were immediately arrested by the port authorities when they arrived here.

SOME six hundred fishers quarrelled on June 24th on the sea off Kimitsu district, Chiba Prefecture, with the result that many were more or less injured before the Kisaradzu police appeared on the scene. The cause is reported to be that one of the parties had gathered *Kisago* shellfish against the prohibition of the local Government.

A CAR of the Keilin electric tram-way ran over a baby in the village of Rokugo near Kawasaki on June 24th and killed it. Over a hundred and forty villagers at once made a demonstration at the office of the Kawasaki branch of the Company, on the ground that the drivers were habitually careless, but the police dispersed them. The authorities have summoned the drivers concerned.

THE steamer *Tenryo Maru*, running between Tokyo and Idzu province, went ashore on June 29th off Shinagawa. The passengers were at once landed at a point near the Detached Palace, and no damage was caused to the cargo. It is stated that at the time of the accident there was much fog. A sailing vessel appeared ahead and to avoid collision the steamer altered course and ran aground. The steamer belongs to the Tokyo Kisen (Steamship) Company.

A STEAM pipe in the boiler of the steam vessel *Kosho Maru* exploded on June 30th at 5 p.m. when the ship was about to leave the Ishikawajima ship building yard, Tokyo, where she has been repairing since the 17th. An engineer named S. Morita was killed and two oilers were more or less injured. The cause is not yet ascertained.

CHINA.

Friday, June 26.

The *Asahi Shimbun's* Peking correspondent sends a lengthy analysis of the reasons which have induced Prince Ching to incline to Russia and turn his back on England and Japan. So far as we can discover, the gist of the explanation is that Russia has succeeded in winning to her side certain officials whose influence at Court is paramount, and that Prince Ching, appreciating the fact, thinks it wiser to adapt his steps to those of the dominant party. There is more of the analysis, but it need not be followed.

What remains to be seen is whether Prince Ching is really surrendering his position as rumour would have us believe. We (*Japan Mail*) observe that a few days ago a story was confidently circulated to the effect that he had actually concluded a new convention of four articles with M. Lessar. Now, however, that report has been whittled down to the dimensions of a disposition to make such an agreement. Perhaps we shall be told to-morrow that the Prince is undecided. The fact is that in the presence of a situation undoubtedly grave the news-mongers are naturally busy, and the public must expect to hear many things of an alarming character. For example, on the evening of the 25th instant the now familiar tinkling of the *gogai* (newspaper extra) bell was heard in the streets of Tokyo and on examination the "extra" was found to contain a statement that Japan had resolved to carry the case direct to St. Petersburg and not to shrink from the "last recourse" should her just demands be ignored; which statement was supplemented by a sensational bit of embroidery in the sense that M. Alexieff had officially announced the completion of his military preparations in Manchuria. The whole thing had no basis whatever, but it probably added to the general feeling of uneasiness, and to that extent helped to complicate the situation. We stated in our last issue, and we here repeat our conviction, that the Japanese Government will not appeal direct to St. Petersburg unless the final outcome of the negotiations in Peking is found to impair this country's rights and interests, a contingency which is still very far from certain.

The *Fiji Shimpō's* Peking correspondent says that the customs office will soon be opened at Dalny. There will be little difference between its organization and that of the German office at Kiaochow. Nominally the power of appointing or removing the Commissioner will be in the hands of Sir Robert Hart, but in reality Russia will exercise this authority, as is not unnatural under the circumstances. The rates levied will be the same as those imposed generally in China; and the income will be paid over to the Chinese Government, the preliminary receiver being the Russo-Chinese Bank.

A special correspondent of the *Fiji Shimpō*, Mr. Kamei, who has just returned to Peking from a trip to Manchuria, gives evidence not at all suggestive of any intention in the nature of Russian evacuation. Speaking first of the announcement made by Admiral Alexieff on the 23rd of June, to the effect that the greater part of Shingking having been evacuated, no further occasion existed for travellers to carry passports, which announcement was officially conveyed to the Foreign Representatives early in May, Mr. Kamei denounces it as a pure fabrication, and observes that really even deception has its limits. As to Russia's forces, she has 3,000 in Liaoyang,

a regiment (the 11th) in Kinchow, and she is increasing her troops all the time in Kai-ping, Feng-hwang and Tehling. If all the Powers of the world be blind, they may fail to see what is going on, but the correspondent raises his voice against such a supposition. They well know what is going on, but they merely drift with the course of events, not protesting though even Newchwang still remains in Russian hands.

Saturday, June 27.

It is generally believed in well-informed circles in Tokyo that the Japanese Government, having for a time adopted a waiting attitude, as seemed advisable in accordance with the indications of the situation, has now resumed an active policy, and that in so doing it has the entire sympathy and support of the Elder Statesmen, especially Marquis Ito and Marquis Yamagata. Our readers have doubtless observed that many rumours have concurred in representing the Cabinet as carrying the negotiations direct to St. Petersburg, over the head of Peking, but we repeat our frequently expressed conviction that nothing of the kind has been done, or will be done unless the issue of the conferences in Peking be of a nature calculated to impair Japan's rights and interests. Meanwhile telegrams from Peking to the leading journals in Tokyo indicate that on the 25th instant, the Japanese Representative, Mr. Uchida, in obedience to instructions from Tokyo which reflected the resumption of an active policy, waited on Prince Ching, and submitted to him an emphatic and unequivocal declaration that Japan's resolution was irrevocably taken and that it depended upon China's attitude towards Russia's demands whether a crisis of the most serious nature should be precipitated or averted. Prince Ching, it is added, proceeded at once to the Palace and conveyed to Their Majesties the gist of the Japanese Minister's protest. The belief is that this timely and resolute action had the effect of preventing the conclusion of a Russo-Chinese convention which was then on the very point of being signed.

Sunday, June 28.

A telegram from Shanghai to the *Asahi* quotes the *N.-C. Daily News* as saying that a Russian syndicate has applied for a concession to build a railway from Chingtu to Foochow *via* Hankow. The Tokyo journal's correspondent queries the accuracy of this report in view of the convention between England and Russia which assigns the Great Wall as the dividing line between their spheres of railway enterprise. The *North-China Daily News* alleges that Chang Chih-tung, Shen Kun-pao and Yuan Shih-kai have all approved the Russian application, which thus awaits imperial assent only.

The latest journalistic news from Peking represents Prince Ching as still having interviews and conducting negotiations with M. Lessar.

It will doubtless have occurred to most persons that there is a singular discrepancy between the re-assuring utterances telegraphically attributed to Lord Cranborne on the 25th instant in the House of Commons, and the anxiety felt in Japan about the issue of the negotiations. But of course it will have been observed that Lord Cranborne merely announced the gist of intimations made by China. In fact he might have said, "Prince Ching alleges that everything is going on nicely and that we need not disquiet ourselves in vain." Curiously enough, on the very day when his lordship was thus stilling the British public's alarms, telegrams of the same consolatory nature

were being despatched by Japanese correspondents from Peking. They (especially the *Nichi Nichi's* correspondent) informed us that the Manchurian question was apparently approaching a comparatively satisfactory solution; that Russia had greatly modified her attitude and that a generally innocuous compromise was in sight. But it does not appear that this optimistic view obtains credence in Japan.

The *Nichi Nichi's* correspondent wires from Peking that according to information given by Chang Chih-tung to Mr. Uchida, the protests entered by Japan and England have had some effect, and that the advocates of the latest form of convention with Russia are beginning to "climb down."

Tuesday, June 30.

It is stated that a curious complication has occurred between the United States and Russia. The former Power—we follow the *Asahi's* Peking correspondence—addressed itself direct to St. Petersburg with reference to the opening of Mukden, Tatung-kou and Harbin but was informed that the Russian Representative in Peking had been duly instructed with regard to this matter, and that it would be more convenient were he approached. Washington accordingly directed Mr. Conger to consult with M. Lessar, but the latter declared that he was entirely without instructions on the subject and consequently could not discuss it. The United States Government is represented as feeling that it has been played with in this matter, but our readers will perceive that the story requires a great deal of confirmation.

The *Nichi Nichi Shimbun* published on the evening of the 28th instant a Peking telegram to the effect that in response to Mr. Uchida's protest, Prince Ching had intimated that China's attitude towards Russia's proposals remained unchanged, that her refusal to entertain them was still maintained, and that she expressed her appreciation of the friendly advice given by her neighbour, Japan. The *Nichi Nichi* supplemented this intelligence with a note that Prince Ching's demeanour is believed to be merely superficial and that the resolution he simulates has no basis of reality.

Baron Nishi, formerly Japanese Representative in Russia, and recently occupant of a similar post in Peking, throws oil on the troubled waters through the columns of the *Nippon*. Alluding to the rumours recently circulated that M. Lessar had established special relations with the Empress-Dowager's favourite eunuch, Li Lien-yong, and the powerful influence had thus been brought to bear on Prince Ching, Baron Nishi says that such procedure is commonly adopted by foreign diplomatists in Peking, the only difference between their methods being one of degree. As for the stories that a convention was concluded between the Japanese Government and General Kuropatkin during the latter's recent stay in Japan, the Baron asks whether it is likely that Russia would have sent out the Minister of War to conduct a diplomatic negotiation over the head of her Foreign Office in St. Petersburg. General Kuropatkin, he thinks, came out simply to inspect the state of affairs in the Far East, and with regard to the numerous telegrams that passed between him and St. Petersburg, Baron Nishi reminds the public that in Russia the Minister of War is consulted about matters which elsewhere would be left to the management of local officials, and it was therefore natural that he should have received and despatched many telegrams. The Baron concludes by

expressing the opinion that the present complications will not end in an open rupture. The only thing surprising in his remarks is that he should have taken the trouble to notice the canard about the Kuropatkin convention.

Wednesday, July 1.

It would seem now pretty well assured that the strong remonstrance preferred by Mr. Uchida in Peking on the 25th ultimo produced its intended effect, and that the progress of the negotiations for a Russo-Chinese convention has been stayed. The negotiations are believed to have been carried very nearly to completion, but they are said to be suspended at present. The *Fiji Shimpō* confirms what was stated some days ago in these columns, namely, that Japan has not yet addressed herself direct to St. Petersburg. Japan will carefully observe the normal diplomatic routine, and will exhaust the ordinary remedies before having recourse to the extraordinary. The occasion to appeal direct to St. Petersburg will occur should the Peking negotiations assume finally a form injurious to Japanese interests, but such a consummation has not yet been reached. Meanwhile one or two of the sensational and wholly discredited journals of Tokyo are endeavouring to prove that the nation is all for war, and that the only advocates of a peaceful solution are the members of the Ministry. If that were true, the Katsura Cabinet would deserve such a crown of honour as seldom falls to the lot of any administration. But of course it is a monstrous exaggeration.

It is stated by the Tientsin correspondent of the *Fiji Shimpō* that Russia must have, by this time, a body of a quarter of a million Chinese labourers working under her orders in Manchuria. She has just sent three thousand from Tientsin and two thousand were sent at the end of last month. The total figure mentioned by this correspondent can not, however, be more than a conjectural approximation. It merely reflects the general impression that Russia is showing unstinted enterprise in the Three Provinces.

Thursday, July 2.

The Russian troops in southern Manchuria are being massed, it is said, at Liao-yang, with the object of holding a grand review for the inspection of General Kuropatkin.

The action of the United States Minister in Peking has augmented the perplexity about Russian diplomatic action. Count Cassini in Washington having intimated that Mr. Conger's report of the demands submitted at the outset by M. Plancon to the Chinese Foreign Office was exaggerated or incorrect, Mr. Conger has asked the Secretary of State to inquire into this imputation, inasmuch as his report was based on direct examination of the despatch actually embodying M. Plancon's demands. Such is the latest statement. If then, Mr. Conger saw the original document written by M. Plancon, what is to be said of St. Petersburg's denial that any such demands had ever been submitted? If, as is conceivable, the St. Petersburg Cabinet meant to say that the demands had not been submitted with its consent or approval, then why was M. Plancon left at Peking? Certainly this is one of the strangest mysteries in the modern history of diplomacy.

Friday, July 3.

A rumour is current in Shanghai that a secret convention was concluded between M. Lessar and Prince Ching on the 18th of

June, and that on its ratification by the Emperor of China the withdrawal of the Russian troops from Manchuria will commence. Shanghai is particularly circumspect in publishing this news. We are merely told that such intelligence is said to have been received in a certain Chinese quarter. The 18th of June was precisely the time when assertions were confidently circulated in Tokyo in the same sense. As an illustration of the perplexity into which the average collector of information has fallen, we may place side by side with the above Shanghai story an account sent from Peking by the *Asahi's* correspondent to the effect that on the 19th and 20th of last month, Wang Wen-shao and the Empress-Dowager's favourite eunuch were engaged persuading Prince Ching to conclude with Russia some settlement of the nature of the one that Shanghai supposes to have been made before the 18th. Perhaps it will be reasonable to infer that negotiations for a convention had been carried very close to the verge of completion when Japanese and British remonstrances again made themselves felt.

The *Fiji Shimpō's* Peking correspondent, telegraphing from Peking under date of the 1st instant, represents China as anxious to effect a compromise with Russia on the basis that the latter should have entire control of the sanitation of Newchwang and that the customs revenue collected at that place should be paid into her hands. St. Petersburg, however, is alleged to be altogether discontented with any such terms, while, on the other hand, the Japanese and British Representatives oppose them stoutly on the grounds that the management of sanitary affairs by Russia's sole authority might become an obstacle to the trade of other Powers, and that the payment of the customs dues into her hands would impair the value of the security for the Indemnity. It is difficult to see what these conditions have to do with the evacuation of Manchuria. They seem to point rather to a desire on Russia's part to acquire exceptional authority at the only place open to foreign trade in the three provinces. If she possessed such competence at Newchwang and if the proposals for the opening of Mukden and Tatung-kou were negatived, it might be said without exaggeration that Manchuria was closed *in toto*. Russia must have something of course. Her face has to be saved. But it ought to be something intelligibly connected with the main question.

There is some talk of an insurrection in Chili in the vicinity of Ho-hien.

M. Lessar delayed his departure from Peking until the 2nd instant. The *Nichi Nichi Shinbun's* correspondent says that one of the objects of his journey is to hand over the administration of Newchwang to the Chinese Authorities, as that step would probably have a pacifying effect upon the Powers.

KOREA.

Saturday, June 27.

The Belgian subject engaged to take the place of chief adviser to the Korean Court has arrived in Seoul, having travelled *via* Siberia. It is expected that his engagement will involve the retirement of Mr. Sands. Two or three Japanese journals give a transliterated form of the new adviser's name, but even if all spelled it with the same *kana* syllables we should be uncertain as to the original, and since their orthography is not uniform the nearest guess we can make is "de Wins" or "de Winnue."

The Japanese Representative in Seoul is pressing the Korean Government to discharge its obligation in the matter of the bank-notes question, and is said to have declared that failing the adoption of efficient measures by the authorities, he will employ Japanese police to restrain the lawless actions of the Peddlars Guild.

The opening of Ta-tung-kou seems to be regarded as involving the opening of Wiju, for it is stated by the *Kokumin's* Seoul correspondent that Russia is opposing the latter measure. No one has definitely asked for the opening of Wiju, so far as we know.

The amalgamation of the Seoul-Fusan and Seoul-Chemulpo railways has not yet been accomplished though the resolve to amalgamate was taken by both companies last February. The delay is attributed chiefly to official slowness in making the requisite investigations, but it would seem that one cause of procrastination has been a difference of opinion in the matter of terms, the Seoul-Chemulpo Company asking 640,000 *yen*, which the Seoul-Fusan Company thinks too high. In addition to paying the purchase money, the Seoul-Fusan Company would have to take over the other line's indebtedness to the Japanese Treasury, namely 1,800,000 *yen*, which, however, the Treasury has consented to receive in twenty equal yearly installments without interest. It is anticipated that the profits of the Seoul-Fusan line would amply suffice to discharge that debt.

Monday, June 29.

Seoul correspondents of Tokyo journals agree in stating that Mr. Hayashi, Japanese Representative in that city, has supplemented his previous protest with regard to the bank-note difficulty by informing the Korean Government that its failure to adopt efficient means of repressing the lawless acts of the Peddlars Guild must now cease to be associated with a private complaint and must be counted a violation of the convention made last February by the Korean Foreign Office and Mr. Hagiwara, Japanese Charge d'Affaires. In other words, the question has become international. It is difficult to understand the short-sighted procedure of Korea in this matter. She must know that obligations of the kind now neglected by her can not possibly be condoned, and that she will have to answer, sooner or later, for this violation of her engagements. We presume that she has her own reasons and difficulties, but in the absence of any statement from her side only one conclusion is possible.

Various rumours are circulated about further irruptions of Russian soldiers into the Yalu regions, but the stories have not been confirmed and they differ notably in dimensions. If Russia is the victim of slanderous invention in all these matters, it must be admitted that she is singularly unfortunate.

It is stated that M. Pablov has left, or is on the point of leaving, Seoul for Port Arthur. The conjecture is that he desires to consult with the General-in-command on the subject of the now celebrated timber-felling business.

The affair of the bomb seems to be assuming considerable dimensions in Seoul. Collecting the intelligence sent to Tokyo journals, we find that the story takes this form. Li Yong-ik, being seriously ill, was persuaded to enter the Japanese hospital. This occurred in May, and under skilled

treatment Li had nearly recovered his health when, on the 15th of June, a bomb exploded in the hospital. No one received any injury, but of course some excitement was caused by such a strange incident, and many conjectures were made as to the authors of the outrage. Apparently an organised scheme existed to attribute the act to Japanese conspirators, though, in point of fact, Li Yong-ik's relations with the Japanese had been growing closer and closer of late. On the 19th the Korean Foreign Office addressed a despatch to the Japanese Legation, asking that the assistance of the Japanese police should be given for the purpose of detecting and arresting the guilty party, as the task exceeded the capacity of the Koreans. This being an unequivocal suggestion that the criminals were Japanese subjects, Mr. Hayashi declined to receive the despatch, and in returning it intimated his hope that no effort would be spared to apprehend the culprits. Thereafter a memorial reached the Korean Foreign Office couched in almost menacing language. The memorialists urged that a hospital is a place for curing men's diseases not for compassing their destruction; that if an attempt upon the life of the humblest Korean subject were made by foreigners who had established a hospital in Seoul, the outrage should be strongly resented; that the necessity for protest became imperative in view of the high rank and official importance of the intended victim, and that it was the Government's plain duty to insist upon the arrest and condign punishment of the Japanese miscreants who had placed the bomb in the hospital. This was followed, on the 21st instant, by placards in the main street calling upon all patriotic Koreans to assemble and proceed *en masse* to the Japanese Legation to seek redress. Nothing seems to have come of this projected demonstration, but there appears to be little doubt that the agitators, so far from being friends of Li Yong-ik, on whose behalf they pretend to be acting, are emissaries of the anti-Japanese party under Li Kon-thaik. We need scarcely add that a Russian hand is detected by some people at the bottom of the agitation. Japanese journals begin to show some indignation. Considering the renewal of the anti-bank-note commotion, and now this obviously deliberate attempt to excite popular feeling against their nationals, they ask whether it is altogether wise to treat Korea with so much forbearance, and they instance the Seoul Government's failure to pay for the ship it bought from the Mitsui Company as another example of the *insouciance* with which the Koreans regard their obligations to Japanese subjects. The Tokyo Cabinet is reminded that the Korean and the Chinese problems are altogether distinct, and that to treat the one too deferentially through fear of complicating the other would be a blunder.

News received in Tokyo on the 26th instant was confirmed on the 27th and published in an extra of the *Fiji Shimpō* on the latter evening. It is to the effect that according to a report sent to the Head Quarter Staff in Seoul from the officer commanding at Kang-ke in Pyong-yang-do, a detachment of 150 Russian soldiers reached Song-ching on the 25th, and 70 of them having taken up their quarters in that place, the remaining 80 moved on to Pyok-tong. The expression used in the telegram is unequivocal—"Russian troops"—, but we find much difficulty in crediting it, for Russia

is explicitly bound by convention not to send troops into Korean territory without previously consulting Japan. Song-ching, where the irruption is said to have taken place, is about 170 or 180 miles from Wiju on the upper waters of the Yalu. It is the principal centre of the timber-felling industry, being the place where lumber rafts are put together for the purpose of floating down the river. We learn from the *Asahi* that it lies opposite to Tung-hwa-hsien, of which district Russia applied to China for a twenty-five years' lease last fall, and failing to obtain a reply, was lately reported to be treating the area as her own. One can easily suppose that if lumber enterprise is seriously occupying Russian attention, a point regarded with sceptical eyes by many folks, both Tung-hwa-hsien and Song-ching would be visited by many of the persons engaged in the work, and from that supposition it is an easy stage to assume that some body of workmen presenting an appearance of organization and therefore readily mistaken for troops, have crossed from the Chinese side to the Korean. Very precise information is needed to convince moderate folks that Russia is actually moving troops into Korean territory in defiance of her conventional pledges. What must be admitted, however, is that she has chosen a singularly injudicious time for this suspicious and easily misconstruable activity. If it were in her sincere purpose, as we believe it is, to avoid serious complications with Japan, she might well postpone her lumber fever to a more convenient opportunity. Korea is the sorest point at which Japan can be touched and Russia must be well aware of the fact.

Tuesday, June 30.

The geography of late intelligence from Korea requires correction. It will be remembered that, according to a report forwarded from a Korean military outpost, a body of Russian troops, numbering 150, had appeared at a place on the Yalu, where 70 of them took up their quarters, the remainder moving farther down the river. We now find that the Korean outpost, Kan-ke, is situated on a branch of the Yalu near the north-eastern frontier of Korea; that the place where the alleged Russian soldiers made their appearance was Cha-syong, which lies on the southern bank of the Yalu, a long way down from Kan-ke, and that the place to which 80 of them moved subsequently was Pyok-dong, which is a station on the Yalu between Cha-syong and Wiju. If this news be correct, it would seem that Russia is taking military possession of the whole course of the Yalu. But the Russian Representative in Seoul denies that any soldiers or any considerable number of Russian subjects have arrived at Cha-syong. Fifteen may have come there, he is understood to have said, but they could not have been soldiers. The Korean Foreign Office also is reported to have obtained information that the Russians did not come to Cha-syong, on the southern bank of the river, but to a place opposite it on the northern bank, which, being in Manchuria, is within their legitimate sphere of movement, and that only 5 of them crossed, not to Cha-syong, but to So-san, which lies below Cha-syong. Evidently the incident is of small importance, but the exact details can not be known for some days as all these places on the upper reaches of the Yalu lie beyond the range of telegraphic communication.

Wednesday, July 1.

There is much talk of opening Wiju to

foreign trade. This subject has been upon the tapis for some time, and it is now reported from Seoul by correspondents of the leading Tokyo journals that the Korean Government has made up its mind to take the step. M. Pavlov, however, is showing opposition. He has urged the advisability of deferring action until the Manchurian question is solved, to which suggestion the Korean Government is reported to have turned a deaf ear. It seems impossible to avoid the conclusion that Russia aims at excluding the commerce of the world from regions lying within the shadow of her southern advance. There is, however, no prospect of evading absorption by her except to create a substantial interest for non-aggressive nations. If that could be done in Manchuria there might still be a possibility of China's retaining the district—not that such a consummation would be any advantage to Manchuria—, and if Korea has the good sense to avert troublesome contingencies by a timely step, she is to be congratulated on her prudence. We may assume that she moves in obedience to Japan's advice, for even with such an object-lesson as Manchuria at her gates her own perspicacity would scarcely rise to the occasion.

Thursday, July 2.

One of the questions at issue between Japan and Korea appears to have been settled. The Foreign Office has announced to the Japanese Representative in Seoul that instructions have been given to the Finance Department to pay over one-half of the total sum—400,000 yen—due to the Mitsui Bussan Kaisha in connexion with the purchase of the *Yang-nan*. It is not stated that the money has actually been paid but only that it will soon be paid.

The Emperor of Korea having issued a proclamation to the effect that any continuance of the agitation fomented by the Peddlars' Guild against the circulation of Japanese bank-notes would expose the ring-leaders to the punishment of transportation, the trouble has subsided and the promoters of the disturbance have disappeared.

With reference to the project of opening Wiju to foreign trade, it is now alleged that M. Pavlov, in an interview with the Emperor of Korea on the 30th ultimo, urged the unseasonableness of such a measure while the question of the evacuation of Manchuria is still under discussion, and suggested that the opening of Wiju, unnecessary at the present time, should be deferred until at least three years after the settlement of the Manchurian complication. The Korean Government, however, is represented as disposed to think that the only way to check the supremacy of Russia in that region and to prevent frontier troubles in the future is to open Wiju.

If Russia's action in this matter be not misrepresented, she is still further discrediting herself. For the reasons assigned by M. Pavlov are obviously inconsequential. Only one valid excuse offers for the maintenance of Russian troops in Manchuria, namely, that peace and order can not otherwise be preserved. Even that excuse, too, can not easily be held as applying to the Yalu region, for Russia has no special interest there unless she contemplates building a line from Liaoyang to Feng-huang, which would be an unauthorized extension of her sphere of railway influence. Granting, however, that the presence of her troops furnishes a guarantee for the preservation of good order, why should their presence be held to militate against the opening of Wiju? On the contrary, it ought to constitute an argument in favour of opening

the place. It is exceedingly difficult to avoid the conviction that Russia's policy is to prevent every expansion of foreign trade throughout Manchuria and even northern Korea, and to keep all those regions in their present undeveloped state until she can gradually bring them within her own effective sphere of influence. Such an ambition may be legitimate enough from a purely imperial point of view, but it is too obviously selfish to escape opposition from other nations. Russia is not an exponent of the open door. Her authority, when she can exercise it efficiently is directed to the exclusion of all commerce except her own. Therefore all Powers interested in finding new markets or in securing those they already possess, must regard her expansion with aversion. Japan especially is compelled by something more imperative than mere considerations of trade to take whatever measures may save the line of the Yalu from becoming a Russian possession.

Friday, July 3.

Rumours from Korea are contradictory. On the 1st instant it was stated in Tokyo that the Russians said to have arrived at Cha-syong had taken their departure. On the 2nd telegrams arrived alleging that, according to a report from the Korean officer in command on the north of Pyong-yang-do, there are 3 Russian officers and 13 or 14 privates in Cha-syong, and they openly announce themselves as forerunners of a much larger number who will take steps to acquire land and erect houses.

Two leading Tokyo journals say that in the sequel of negotiations the Russians at Wiju, who had seized a Japanese timber raft and hauled down her colours, have now restored her and replaced the flag.

The abortive coronation ceremonies in Seoul are beginning to be again talked of. September is indicated as the probable time of their performance, but no one treats the matter seriously.

SIR HIRAM WILKINSON.

The honour that has been conferred upon Mr. Justice Wilkinson does not come as a surprise, though that circumstance will not lessen the gratification with which his many friends will hail the announcement. Mr. Wilkinson was born at Belfast on 13th June, 1840, was educated at Queen's College (B.A., LL.D.) and was called to the bar in 1872. He entered the Consular Service in Japan as Student Interpreter in 1864 and became Vice-Consul in 1877, Acting Assistant Judge, Shanghai, in 1879-80, Crown Advocate in 1881, and was British Commissioner for Settlement of Claims after the Canton Riots, 1883. He was Judge of H.B.M. Court for Japan, succeeding Judge Mowat and acting till 1900. He has been Chief Justice of the Supreme Court for China and Korea since 1900.

Sir Hiram Wilkinson will be remembered largely because of his connexion, as one of the prosecuting Counsel, with the well-known Carew case, but he was an active figure in the life of the community while he occupied the bench here. To him fell the duty of closing H.B.M. Court for Japan, and he succeeded Sir Nicholas Hannen in Shanghai after the death of the latter. We wish him many years of health and activity to enjoy the well-deserved honour now conferred on him.

THE JAPANESE PRESS.

Saturday, June 27.

Of course the leading Tokyo papers have something to say about the situation. The *Jiji* declares that they are equally in error who allege the conclusion of a new agreement between Russia and Japan, and who affirm that the crisis has assumed a critical character. It is nevertheless certain that things can not be left as they are, and that if Russia continues to menace China, the negotiations must be carried a stage further. In thus carrying them, however, Japan will not move alone. She will endeavour to have the company of Powers whose identity of interests links them to her, and although the result may involve some complications it is altogether premature to affirm that a perilous stage has already been reached.

The same journal in a leading article advocates the advisability of contriving that China shall have a perfectly clear conception of what is involved in acceding to Russia's demands. Up to the present England and Japan have been merely warning China in general and vague terms, whereas Russia holds up for her inspection actual menaces or tangible promises. Let Japan now say frankly to the Peking Government, "If you make such and such concessions to Russia, we shall require you to make such and such concessions to us also." Then China will know explicitly what alternatives she has to choose between.

One's disposition is always to pity the weak. China is in such a miserable plight that we sympathise with her, not the less because we recognise that her humiliation and her impotence are due not to her own incapacity but to the corruption and blindness of her Manchu rulers.

The *Kokumin Shinbun* observes that foreign politics would be comparatively easy were they not complicated by domestic politics. If Japan's house had been in order when foreigners first came, the *Ansei* Treaty would have worn a different aspect. But just as there was all kinds of divisions then, so there are now Elder Statesmen, and party leaders, and naval and military men, and statesmen in office. It is impossible to bring them all into line. The Government must take its courage in its hands and do what it deems best, irrespective of clashing views.

The *Nippon* talks of the disease called *kyoro-byo* (Russo-phobia). It laughs at the world's simplicity. Men judge solely by the event of the hour. One reverse discredits a country in their eyes; one victory exalts it to the skies. When Napoleon the Third won successes in Italy, France was in everybody's mouth; when he suffered defeat at Germany's hands, his nation's prestige fell at once to zero. So when England began to suffer in South Africa, her decrepitude was freely discussed; but when she turned the tables there was a chorus of applause. Yet the inherent strength or weakness of nations does not change in a moment. Conditions do change, however. The disastrous retreat of the French from Moscow created a belief that Russia was impregnable. Nevertheless the great Napoleon owed his calamity to climate not to faulty strategy. If the nations have left Russia severely alone since that time, it has not been because they feared her, but because her inaccessible and not over valuable territories offered few temptations. Where are the evidences of Russia's strength? Where are the records of any succession of victories won by her? She has herself now made her territories acces-

sible by railways and valuable by development, and the time has come when the question of her partition takes its place among the practical issues of the era.

The *Yomiuri Shinbun* insists chiefly on Russia's responsibility, and declares that the hearts of the country's soldiers and sailors are now in Manchuria. It declares that in forcing Japan to restore Liaotung in the name of Far-Eastern peace, in then seizing it herself, and in making it a basis for the conquest of all Manchuria, Russia may be said to have "wiped her dirty boots on Japan's face." If war results, the guilt will be hers.

Monday, June 29.

The *Jiji Shimpō* claims that Japan's attitude in connexion with the Manchurian problem is in accord with civilized progress whereas Russia's procedure belongs to the opposite category. Therefore the world's sympathy must be with Japan. The latter should now submit her protest direct to Russia, a course which will certainly have the approval of England and the United States. Russia, if resolutely approached, will probably appreciate the situation, but the springs of international relations lie often in such occult regions that no issue can ever be confidently predicted. It is necessary, therefore, that the nation should be prepared for every emergency and that it should await the result with resolute mind.

It is seldom that the *Jiji Shimpō* uses such strong language in discussing an international problem.

The *Kokumin Shinbun* also, which, like the *Jiji*, invariably adopts a moderate and circumspect tone, now writes in altogether exceptional terms. Under the title *Kokumin Kwakusei no Jiki* (the time for the people to comprehend), it publishes an article the gist of which is that, however peaceful Japan's intentions and desires may be, she must know that if she yields to Russia in Manchuria, she yields also to her in China and yields also to her in Korea. China is not a country that has any respect for good faith. She turns her face in whatever direction the strength lies. Korea is merely a parasite of the big. It is useless to treat with either of these countries unless force be put in the foreground. The Manchurian problem is not an affair that concerns the distant future. It is a very present and pressing question. It is not a problem that concerns warriors and heroes only. It is a problem that concerns the livelihood of the people. Let Japan once bend the knee to Russia at this crisis, and all the political influence that she has been at such pains to build up in China and Korea will disappear as spring ice melts under an ardent sun. Japan will then have to blame herself for having of her own accord forfeited her right to be heard in the Far-Eastern councils of the nations. The time has clearly come for Japan to understand what is involved; to decide what her interests and her prestige demand, and to defend them at all hazards. Let this occasion be lost and Japan will become a veritable clam, shut up for ever in a little corner of the Far East.

The *Nippon* suggests that Marquis Ito and Count Inouye stand in the way of a strong foreign policy, and urges that they be put aside. But the *Junmin* denies that view, and denies it with justice, we believe.

Viscount Tani comes out with arguments of unexpected timidity. He thinks—to put the matter in a nut shell—that England has no intention of ranging herself on Japan's side in war, and that a fight with Russia would be interminable. He does not be-

lieve that Japan could take Port Arthur, and he says that without taking it she could not invade Manchuria. He is persuaded that Russia's railways will promote Japan's wealth. Finally he declares himself in favour of a purely defensive policy in the north and a progressive policy in the south with which purpose he would leave Manchuria to Russia, bring Korea entirely within Japan's sphere of influence, reduce the country's armaments and work chiefly for trade development.

THE SEVEN PROFESSORS.

There is some talk of an agitation to secure the punishment of the Seven Professors, who are held by certain persons to have abused their academical position when they published such a memorial as that recently presented to the Foreign Office. On the other hand it is contended that the Professors acted, not in their professorial capacity, but merely as individuals. The latter view, we imagine, will gain currency. So long as the Professors refrain from any attempt to stir up public agitation, we fail to see why they should not convey their opinions on national questions to the Government with just as much freedom as any other subjects of Japan do. It is true that the law forbids educational officials to deliver political lectures or to exercise the franchise, and possibly these interdicts may be construed as indirectly affecting all political action. But that, we think, would be a very extreme estimate. Every intelligent Minister of Foreign Affairs must be glad to learn the views entertained in educational circles at moments of international crisis, and if educationists are not allowed even to pen memorials, it is difficult to see how they can make known their views. Whether these seven scientists behaved in a thoroughly judicious manner is a question apart. The law can not exact judiciousness.

One of the seven professors, Mr. Tomii, speaking through the columns of the *Yomiuri*, denies that he is in favour of war as the sole course at this juncture. What he advocates is merely a strong policy based on a firm determination to fight if the ends of justice can not otherwise be attained. He further declares that he is fully cognizant of what war with Russia would mean, and that when the news of the Anglo-Japanese Alliance arrived, he fondly hoped that now for five years at least the peace of the East was assured. He is therefore an advocate of peace, but not of peace at any price, and while holding that the country's armaments have primarily a defensive aim, he holds also that the first line of defense lies in the zone of offensive operations, and that if Japan is not able to guard her interests in Manchuria and to keep the aggressor from her outposts, she can not hope to hold her position within her last lines. It would be merely inviting misfortune did Japan, whose interests are much more than commercial, range herself in the wake of nations which have commercial interests only. The prime origin of all this trouble was Japan's quiescence in the face of German aggression in Shantung. Her attitude encouraged the later enterprises of Russia in Liaotung and Manchuria. But the past is past. The one thing to be done is to avoid similar mistakes. Russia has unequivocally violated her engagements in Manchuria. She has not withdrawn her troops, and if she does not withdraw them,

Manchuria becomes a part of her empire and Korea is inevitably menaced. These things must be averted. Japan must not shrink from any sacrifice that will prevent the great catastrophes plainly threatening her. As to the question of Russian troops to guard the railways in Manchuria, it is possible that Russia will not agree to withdraw all her soldiers. If so, a body of international guards should be organized at China's expense, until China herself is entirely equal to assume the responsibility.

The *Nichi Nichi Shinbun*, however, confines itself to combatting the arguments of the seven professors. It tells them that while people may admire their patriotic fervour, everyone must see that their position is flagrantly incomplete. They propound theories but do not formulate facts. What is to be done with Manchuria if Russia be driven from it? That they do not say. Apparently they advise nothing beyond a kind of romantic battle on China's behalf. They do not even suggest how Russia is to be expelled. Then they talk of Japan having some slight superiority of armaments now, which she will not have a year hence. Do they then imagine that a war with Russia would be a matter of days and months only? Have they forgotten the South-African War? And have they also forgotten the fifth Article of the Treaty of Alliance which requires Japan to take counsel with her ally before resorting to any conclusive measures? They talk of Russia sending disguised troops into Korea. What are disguised troops? Men without arms and without uniform. Can the entry of such persons into a friendly country for trade purposes be regarded as a *casus belli*? Further, it is altogether too much to require, as the professors would require, that Russia should not keep a single soldier in Manchuria for the protection of her railways, and it is little short of an insult to China to allege that her forces are incapable of preserving order in Manchuria. The writer in the *Nichi Nichi* declares that if wrong were done to Japan and if real occasion for fighting presented itself, he would be among the first to advocate appeal to the sword, but he declines to associate himself with publicists who urge war without being able to establish a cause for war, and who are such Russo-phobes that they doubt their country's ability to hold her own a few months hence.

DINNER TO BARON KODAMA.

On the 27th ultimo Mr. E. C. Davis, who represents Messrs. Samuel Samuel and Company in Japan, gave a dinner at the Imperial Hotel in Tokyo by way of farewell to His Excellency Baron Kodama, Governor-General of Formosa, who is about to visit Europe and Africa. Twenty-two covers were laid, among those present being Sir Claude MacDonald, Mr. Asada, Baron Shibusawa, Mr. Matsuo, Mr. Soma, Mr. Soyeda, Mr. Okura, Mr. Sakatani, Dr. Goto, Mr. Megata, Mr. Takahashi, Professor Nitobe, Mr. Sufu, Major Ozawa and Mr. Yokoyama. After the toast of the Emperor of Japan had been proposed by the host and that of the King of England by Baron Kodama, Mr. Davis made a graceful speech, eulogising the work done by the Governor-General in Formosa, comparing it with that of Lord Milner in South Africa, and saying that no one could be better qualified to make an instructive and intelligent inspection of the difficult conditions existing in the Transvaal.

He called upon those present to drink Baron Kodama's health, and to wish him a prosperous and successful voyage. Baron Kodama, in reply, said he was very sensible of the honour done to him and that he begged to express his hearty thanks. He had already a son in London who had received much kindness at the hands of the great firm that Mr. Davis represented, and now the father was going to trespass still further upon the good offices of Messrs. Samuel Samuel and Company. Nevertheless when he remembered the important relations the firm had established in Formosa, he felt that his visit to London might be the occasion for pleasant and mutually instructive conversation, and he therefore looked forward to it with much enjoyment.

The dinner was altogether a very brilliant affair, one of the decorative features being a very beautiful *menu* having a likeness of Baron Kodama photographed on the cover. The party broke up at 10 o'clock after a very enjoyable evening.

THE TEA SUBSIDY.

There is some discussion in connexion with the question of continuing the yearly subsidy granted by the Government of Japan in 1897 for the purpose of extending the market. The subsidy comes to an end this year, and it appears that six foreign firms engaged in the Yokohama tea-trade have addressed to the Chamber of Commerce a document condemning the subsidy and urging that steps should be taken to discountenance its renewal. The signatories of the document claim that the money has not been applied to the end for which it was originally destined: instead of seeking to open new markets, the Japanese tea-men have employed the fund mainly to facilitate direct export of the staple by their own nationals. To illustrate this contention the following account of the manner of expenditure is given:—

Sum expended in Russia for extending Yen. market	10,000
Expenses of office in New York	15,908
Expenses of office in Chicago	11,560
Expenses of office in Montreal	10,300
Expenses of samples museums in New York and Montreal	8,900
Expenses of commission sent abroad	2,500
Miscellaneous outlays	5,332
Central office of Association	2,800
Advertisements	3,000

It is evidently wrong that only three thousand *yen* should be devoted to advertisements, which are the principal instruments for achieving the purpose in view, and it is equally wrong that offices should be opened in places where markets have already been secured. If the recipients of the subsidy had been sincerely desirous of extending the market, they would have worked in cooperation with the foreign tea-men of Yokohama, whereas they never consulted the latter at all, and so far from finding new markets or extending the sales, the fact is that in the past 7 years the export of Japanese tea has fallen off by one-third. On the other hand, Japanese direct exporters now handle 7 million pounds out of the total 40 millions. It would appear that Japanese men of business are not in favour of renewing the subsidy, for although they discount the foreign complaint on the ground of jealousy, they agree with it in denying that the tea-men have accomplished anything really useful.

DR. HATOYAMA ON MANCHURIA.

On the 28th ultimo the *Toho-kyokai* (Oriental Countries Association) held a meeting and listened to an interesting address from Professor Hatoyama on the burning question of the day. Professor Hatoyama being one of Japan's leading publicists, his utterances on such a subject have much interest. At the outset he laid down the proposition that if Russia remains in permanent possession of Manchuria, she will surely stretch out her hand to Korea, and as that result would be a menace to Japan, the latter is entitled, in the interests of self protection, to demand that Russia's forces shall be withdrawn from Manchuria. Thus far Doctor Hatoyama was satisfactorily explicit. But when he passed on to consider the practical method of enforcing such a demand, his language seemed to imply that no conclusive step could be taken. It might be possible, he said, that in the event of an open rupture, Japan's navy would beat the Russian squadron now in these waters, but thereafter Port Arthur would have to be attacked and a campaign in Manchuria would have to be undertaken. What would that involve? What force would be required for the purpose? And even assuming that Japan succeeded in expelling the Russians from Manchuria, the question would then arise, what should be done in the sequel. Would Japan, having fought in defence of the principle that Manchuria must be preserved to China, garrison the district with her own forces? She might be justified in doing so as far as Russia is concerned, for all moral obligation towards the latter empire was wiped out when the Great Northern Power, having formed a combination of States to drive Japan from Liaotung, then seized the place and made it a basis for appropriating the whole of Manchuria. But Japan would have to consider the rest of the world as well as Russia. She could scarcely hold Manchuria, and to leave it to its fate would be simply to leave it to Russia ultimately. Further, the force needed to garrison Manchuria had to be considered. In Dr. Hatoyama's opinion not less than ten Divisions would be required, and thus Japan must either denude her home territories of troops or largely increase her army. But she is already groaning under the weight of her armaments. She is obliged to borrow money for purposes of naval increment, and the 100 millions devoted to that purpose during the next ten years will remain an undischarged debt though the ships built with the money will have become nearly obsolete. Pursuing such a policy, the financial fate of Italy would stare Japan in the face. It is indeed a bitter thing for her to see Russian armies holding the territory from which she was driven after winning it in war, but diplomats have to exclude sentiment as far as possible from international complications.

Dr. Hatoyama's lecture is much abbreviated by the vernacular press, and doubtless to that abbreviation must be attributed the hiatus apparent in his argument; namely, that while he regards Russian occupation of Manchuria as an inevitable menace to Korea and while he therefore asserts Japan's right to demand the evacuation of the former, he nevertheless contends that to enforce such a right would be to overtax Japan's strength. This discrepancy would probably be filled correctly by saying that he advises his country to concentrate her strength upon guarding Korea. Manchuria covers 362,000 square miles of

territory; Korea only 80,000. The latter is less than one-fourth of the former's area. Dr. Hatoyama makes that comparison, and we can only infer that he counsels the guarding of Korea and the abandonment of Manchuria to its fate.

GENERAL KUROPATKIN.

The *Nippon* alleges that when General Kuropatkin visited Inasa at Nagasaki, he was much surprised to learn what close relations had always existed between that place and Russia. Inasa, indeed, used to be spoken of as a special Russian settlement and the term was not inaccurate. General Tamura, who accompanied the Russian statesman, remarked to him that Inasa enjoyed considerable prosperity prior to Russia's tenure of Port Arthur, but that it had now fallen upon evil days. To which General Kuropatkin made answer that when he reached Port Arthur he would consult with Admiral Alexieff as to the best means of restoring Inasa's condition. He then went on to say that his trip through Japan had produced a most favourable impression on him, and that he was convinced that the mutually repellant sentiment existing among the two peoples would be materially softened by closer acquaintance. It was his intention to labour with that object on his return to Russia.

The *Nippon* remarks sententiously that there will be opportunity before long to furnish proofs of the sincerity of these statements. We (*Japan Mail*) would first like to have proofs whether the General made such statements. He came here with the reputation of being distinctly anti-Japanese, and if his visit has dispelled that mood, there is reason for congratulation.

THE "YOMIURI" ON RUSSIA.

We find an article in the *Yomiuri Shinbun* on the question of Russian duplicity. The Tokyo journal cites in particular the recent statement made by Count Lamsdorff to the American Ambassador in St. Petersburg—namely, that M. Lessar had been instructed to deal with the question of opening Manchuria—and cites also the public proclamation made on the 23rd of April by Admiral Alexieff and conveyed to the Foreign Representatives in Peking three days later by M. Plancon, to the effect that southern Shinking had been evacuated and that passports would no longer be needed by foreign travellers. We need scarcely say that the *Yomiuri* uses very sweeping terms about Russian deceptions. The *Yomiuri* never bates its breath where the Great Northern Power has to be attacked. But there is one feature of our contemporary's article about which we should like to ask a question. The *Yomiuri* is very severe upon Japanese officials who by crediting Russian statements allow themselves to be taken in. Now, without attempting to discuss the broad question whether Russian statements are credible or not credible, we should like to know from the *Yomiuri* what it would have Japanese diplomats do. Has the writer of the article in the *Yomiuri* ever tried how his relations with his friends and acquaintances would fare if he declined to believe a word they said? If men are to associate on amicable terms they must repose some faith in each other's sincerity. That is a necessity. Those that take advantage of it to practise duplicity are the main sufferers in the long run.

THE EMPEROR OF GERMANY AND COUNT MATSUKATA.

On the 25th ultimo Count Arco-Valley gave a brilliant banquet to celebrate the conferring of the Grand Cordon of the Red Eagle on Count Matsukata. The German Representative made one of his graceful speeches. He had been commissioned by the Kaiser, he is reported to have said, to express regret that pressure of business had prevented His Majesty from meeting Count Matsukata as frequently and conferring with him as intimately as he could have wished on the occasion of the Count's visit to Europe. In presenting to the Count the Grand Cordon of the Red Eagle, the Kaiser wished it to be understood that a tribute was thus offered not merely to the recipient's distinguished position as one of the Elder Statesmen of Japan, but also to the sincerely friendly sentiments entertained towards him by His Majesty.

Count Arco Valley spoke in German and English, and his words were translated into Japanese by Dr. F. Theil.

Count Matsukata, whose reply was rendered into English by Professor Megata of the Finance Department, said that he profoundly appreciated the honour paid to him that evening by His Gracious Majesty the Emperor of Germany, and that he desired to express his grateful sense of the kind language used by His Excellency Count Arco Valley. That the Emperor of Germany should have thought worthy of such recognition any small services he, Matsukata, had been able to render to the cause of progress, was a distinction for which he could not be sufficiently thankful, but that His Imperial Majesty should have accompanied the honour with an intimation of friendly sentiment was an act of condescension which no words at his command could sufficiently acknowledge.

JAPAN AND SIAM.

Mr. Inagaki, Japanese Representative in Bangkok, has been making strenuous efforts to bring about the establishment of a direct line of steamers between this country and Siam. He maintains that there can not be any substantial development of trade without some improvement of the means of communication. Tokyo newspapers report that the Osaka Shosen Kaisha has been induced to undertake the extension of its Formosan line to Siam, and that arrangements are now under discussion with the Formosan officials.

In a lecture delivered by Mr. Inagaki before the Japan Economic Society on the 28th ultimo, he insisted that Siam could be of the greatest service to Japan in supplying raw materials and food stuffs. Her production of sugar, hemp and gum is very large, and whereas her export of silk ten years ago was only 250,000 *yen*, it is now to millions. The Siamese Government has this year decided to devote a quarter of a million *yen* to agricultural experimental stations, and there can be no doubt that if Japan sent seeds of raw materials to be grown in that country, fine results would be obtained. It is important that a country like Japan should have a source of supply which would certainly remain neutral in time of war, and Siam is essentially such a source. This question of food supply will one day be as important for Japan as it is already for England, and its solution seems to lie in the direction of Siam.

POLITICAL NOTES.

It appears that, after all, the total loss of parliamentary strength by the *Seiyun-kai* in connexion with the recent commotion is only 25 members. A circular has been issued by the standing committee, warning the members against taking an exaggerated view of the procedure of the "Old Friends Association" (*Kiuyu-kai*) which has been organized by the seceders, and in the context of this warning the circular states that the number of secessions during the session of the Diet was 12, the subsequent number 6, to which, if 7 expulsions be added, an aggregate of 25 is reached. The Committee claims that the Party still commands 170 votes in the House.

On the other hand the *Kiuyu-kai* held a meeting on the 27th instant in the Maple Club and listened to a long speech from Count Itagaki. Apparently the Count intends to emerge from his seclusion and take a leading place once more on the political stage. At the outset of his speech he admitted his partial responsibility for the unfortunate position into which his hearers had fallen, and said that he appreciated his duty of helping them under the circumstances. Then he went on to emphasise the prime importance of having a basis of principles and being independent of persons. And then he announced the principles which he regarded as basic, namely, liberty, equality and fraternity (*jiyu heito hakuai*), the abolition of nationalism, of imperialism, of communism, and the promotion of accord between the rich and the poor, the capitalist and the labourer. He entered into some details as to the means of asserting these principles, namely by enacting factory laws, by making railways the property of the State, by a system of protection for labourers, by improving the emigration system and by adopting a graduated method of taxation. The Count finally advised that political business and party business should be separated, and that the latter should be entrusted to a committee composed of two representatives from each prefecture, while the former should be left to the leader and the members of parliament.

All this seems to indicate the formation of a new party under the leadership of the Count. But there is still some hesitation, and for the moment things may not be carried further than the organization of a Club called the *Shako Club* (Social Club) which will collect to itself all the wandering and rejected elements of the *Seiyun-kai* and will endeavour to weld them into a compact and capable whole.

If rumour be correct Japanese political parties are likely to fall once more into the condition of paralyzing division that marked their condition a few years ago. Appearances indicate that a section of the Progressists are likely to follow the example of the *Seiyun-kai* seceders, though it is not yet clear whether any effective project for amalgamating all the seceders under one banner has been formed. Dr. Hatoyama and Mr. Takata Sanaye are spoken of as probable leaders of the Progressist disaffection, and there is talk of Viscount Watanabe standing side by side with Count Itagaki at the head of the new party. Viscount Watanabe was Minister of Finance in the last Ito Cabinet, and he created a sensation by his very pessimistic views of the country's monetary condition. He is certainly a man of strong opinions, whatever be the quality of his convictions. We can not conceive anything less hopeful than the outlook for the *Seiyun-kai* seceders under Count Itagaki's standard.

The platform they have adopted is without any practical significance. "Liberty, equality and fraternity" may have had much real significance in France of the eighteenth century, but such terms are a mere empty shibboleth in Japan of the twentieth. Count Itagaki's programme is nothing more than the assertion of personal rights; a doctrine which labours under the disadvantage of having no opposition. We imagine that the *Seiyun-kai* leaders have only to sit quiet and watch this vain and desperate struggle to manufacture some solid planks out of purely academical material. But every one interested in Japan's modern history must hope that at this late stage of his career Count's Itagaki's name will not be associated with a conspicuous failure.

WEDDING CELEBRATION IN TOKYO.

On the afternoon of the 26th ultimo a brilliant party was given at the Naval Club in Tokyo by Surgeon-General and Mrs. Takagi to celebrate the marriage of their eldest son Dr. Takagi Yoshihiro and Miss Arishima. The weather was unfortunately unpropitious, but the spacious rooms of the club afforded ample accommodation for the guests although they numbered some twelve hundred, including Ministers of State, high officers of the Navy, leading representatives of the nobility, prominent men in the mercantile community and several of the Tokyo foreign residents. Various amusements were provided to occupy the interval between the arrival of this large number of guests and the opening of the banquet rooms where a sumptuous cold collation was provided, with ample sitting accommodation for the whole party. The universally popular Surgeon-General and Mrs. Takagi, Dr. Takagi and his bride, Miss Takagi and the two Messrs. Takagi—all of whom, it was noticeable, wore foreign costume—were indefatigable in their efforts to promote the pleasure of their guests, and the result was one of the most successful reunions ever witnessed in Tokyo. Needless to say that the healths of the bride and bridegroom and of Surgeon-General and Mrs. Takagi were enthusiastically drunk. We may mention that two of Surgeon-General Takagi's sons were educated in England for the medical profession and that they gained the highest scholastic distinctions in competition with British students. The elder, Dr. Takagi Yoshihiro, whose marriage has just been celebrated with so much eclat, is already a famous physician in Tokyo, and, in spite of his comparative youth, occupies the important position of Assistant-Chief Surgeon at the Tokyo Hospital. Dr. Takagi's younger brother returned from England about a year ago, and a brilliant career may be predicted for him considering the academical honours he has earned and the experience he gained at St. Thomas Hospital in London. The Surgeon-General's third son, Mr. Takagi Shunzo, is best known to foreigners for his proficiency as a player of lawn tennis, in which pastime it is doubtful whether he has any superior in Tokyo. He, too, has distinguished himself greatly in his scholastic career, which has been essentially commercial. He sets out soon for Siam to commence mercantile duties. Surgeon-General Takagi is certainly to be congratulated on the singular success that has attended his method of rearing and educating his sons.

THE FIRST HIGH SCHOOL.

The graduation ceremony at the First High School in Tokyo took place on the 1st instant. The graduates were:—

FIRST DIVISION.		
English Law 45.	French Law 37.	German Law 36.
Literature 45.		
SECOND DIVISION.		
Engineering 61.	Natural Science 10.	Agriculture 9.
THIRD DIVISION.		
Medicine 61.		

It is noticeable that ever since the China-Japan War the number of students taking up engineering has increased and the number taking up natural science has diminished. Among the above graduates there was one Chinese and one Korean.

The Principal, Mr. Kano, in his report stated that the number of graduates at the School since it became a feeder of the University had totalled 4,055, and he particularly noticed that among this year's graduates there were two foreigners.

Baron Kikuchi delivered an address the principal points of which were that self-culture should be the constant aim of students; that nothing was more important than the study of foreign languages, and that although there were many men of learning in Japan, there were few that commanded public confidence. Baron Kikuchi, ever since he accepted the portfolio of Education, has applied himself to combat the evil habit so common among Japanese students, namely, neglect of study once examinations have been passed.

EARTHQUAKES IN BRITAIN.

Within the last three months the English papers have recorded that the Midland counties have been visited by two shocks of earthquake. The first was on March 24, and affected an area of more than 13,000 square miles. It was felt throughout Derbyshire and Staffordshire, from Preston to Harrogate, and from Grantham to Evesham. The epicentre is supposed to have been in Dovedale. The second was experienced in many villages in the neighbourhood of Derby, but the inhabitants of the town itself were at the time unaware of anything out of the way having occurred. Professor Milne recently said that if we select the well-marked earthquake regions of the earth's surface, and assume that the seismicity—or quake-frequency—is one-third of that in Japan, then we are forced to the conclusion that there are many districts in which hardly half an hour passes without a shock. Great Britain is crossed by earthquake waves of which the man in the street is quite unaware, for the same authority declares that the British Isles are traversed by such waves on the average more than twice a week. The duration of the waves varies considerably. It may be as short as three minutes or as long as three hours. The fiery Scot may boast of the antiquity of his race. But to the period of its residence in Scotland an inexorable limit was set by the play of seismic forces during the formation of the early Tertiaries, when volcanoes and earthquakes alike played their part in giving to these islands a reputation as unenviable as Japan at present enjoys. But, fortunately, there is no comparison between the 3,364 small shocks in the two years 1892-1893, which gently titillated Central Japan, and the twelve earthquakes in a single month of 1844 at Comrie, in Perthshire.

FOREIGN INSURANCE COMPANIES.

It is announced that an order has been issued calling upon all the representatives of foreign insurance companies in Japan to lodge security to the minimum extent of a hundred thousand *yen*, the money, or whatever form the security takes, to be placed with the Bank of Japan through its agents. In the case of life insurance the new regulation says that should the legal reserve called for by the volume of a company's business in Japan exceed a hundred thousand *yen*, the excess must be lodged, but that in the case of fire insurance and marine insurance a hundred thousand *yen* will be the maximum at present. Japanese insurance companies are required to lodge twenty-five thousand *yen* only, but the contention of the Authorities is that a radical difference exists, because in a Japanese company there exists effective machinery to enforce payment of unpaid instalments of capital, whereas in the case of foreign companies the shareholders are entirely beyond Japanese reach. The officials of the Department responsible for the measure—the Department of Agriculture and Commerce—further observe that the deposit of this money will improve the credit of foreign companies and thus tend to augment their business. The number of companies affected in Yokohama is 36 fire-insurance companies, 18 marine, 6 life and 5 fire and life.

The order issued to foreign insurance companies is in accordance with the provisions of Imperial Ordinance No. 380, (September, 1900), Art. 5 which reads:—

"When it is deemed necessary the Minister of State for the department concerned will require foreign (insurance) companies to deposit a substantial amount of money as security.

"Should foreign companies be ordered to make a deposit as security such valuable bonds, etc., as the Minister may permit can be substituted for cash."

THE MEXICAN DOLLAR.

The Mexican dollar, for so many decades the working coin of Far Eastern traders, is now a thoroughly discredited servant of the public and ere long will sink entirely into oblivion if Mexico can carry out her new currency scheme. At present free and unlimited coinage of silver prevails in Mexico, and as a result the Mexican dollar is only worth what it can fetch as a piece of silver in the market place. The object of the proposed new currency system is to give Mexico money having a certain fixed value, on which the business interests of the country can depend. To accomplish this a new Mexican dollar must be minted. \$100,000,000 of these dollars will be coined and they will be made legal tender for every debt and account collectable in Mexico. To accomplish this, however, there must be a gold deposit of \$25,000,000, guaranteeing their value. The new Mexican dollar will be a 50-cent dollar and the Mexican Government will use the \$25,000,000 gold deposit to maintain its value at that figure. The present Mexican dollar will no longer be recognized in any legal sense as Mexican money. It will be treated as merchandise, its value depending on what it can be sold for as silver. Free and unlimited coinage of silver will be abolished. The only Government issue will be under the provisions guaranteeing the new \$100,000,000 50-cent dollars. Nobody knows how much Mexican silver money is now outstanding. Since Mexico first started the

issue, there has been coined \$2,400,000,000. More than a majority of these dollars are outside of Mexico. They have been shipped out of Mexico as silver, not in any actual money capacity whatsoever. Under the proposed fiscal system these Mexican dollars cannot return to Mexico except as merchandise, and subject to an import tax. As stated above, the \$25,000,000 gold deposit will be used to give the new \$100,000,000 Mexican dollars a fixed 50-cent value. If, for any reason, under some extraordinary conditions, the new Mexican dollar should decline a fraction below 50 cents, and bankers and shopkeepers should for any reason decline to make exchange with buyers on the fixed 50-cent basis, the Government will immediately enter the market as a buyer. It will use its reserve deposits of gold and buy whatever volume of coin is offered at even the slightest fraction below the guaranteed parity. As there will be \$25,000,000 of gold available, 50,000,000 of the Mexican dollars (one-half of the entire issue) can be thus immediately withdrawn from circulation. The demand for money for current uses will force the remaining 50,000,000 to remain at parity. The Government will reissue the dollars which it has bought as soon as normal conditions again prevail.

OSAKA EXHIBITION.

The 1st instant was the day fixed for distributing prizes to the successful exhibitors in the exhibition at Osaka. His Majesty the Emperor was represented by Prince Fushimi, who read a brief address in the Imperial name, expressing gratification at the industrial progress evidenced by the exhibits and urging the necessity of increased efforts. The full list of medals and certificates is too long to publish, though it furnishes an interesting indication of the most successful enterprises in Japan. The numbers of awards were as follows:—

Gold Medals	24
Silver Medals	103
First-class Medals	505
Second-class Medals	2,360
Third-class Medals	7,570
Certificates	25,858
Total	36,490

These awards were made out of exhibits totalling 276,478. Baron Otori, Chief of the Awards Committee, stated in his report that the exhibits were more numerous by 107,380 than they had been at the former Exhibition; that the number of awards was larger by 18,781 on the present occasion, and that the foreign exhibits totalled 12,064.

DEATH OF SIR CHICHEN LO FENG-LO.

The *North China Daily News* announces the death of Lo Feng-lo, formerly Chinese Representative in London. The event took place at the deceased's native place, Foochow, on the 28th of May, and the cause was paralysis, which malady had already declared itself sufficiently to compel Mr. Lo's retirement from his diplomatic post. During the latter part of Li Hung-chang's distinguished career, namely, from 1885 onwards, the Viceroy's two most prominent and able lieutenants were Lo Feng-lo and Wu Ting-fang, and the record achieved by these two men bears witness to the acumen of their patron's choice. Our Shanghai contemporary does not mention the age of the deceased diplomatist, but as he is said to have been one of the pioneer students

of the Foochow Naval School, established in 1870, he can scarcely have reached the sixties at the time of his death, and therefore his removal from the scene of his eminent usefulness must be regarded as unhappily premature. Doubtless his extremely studious habits told upon his physique. He was a most accomplished Chinese scholar, and Englishmen who had the good fortune to converse with him will bear testimony to the accuracy and purity with which he spoke their language. The Government of Queen Victoria conferred on him a Knight Commandership of the Victorian Order, and he thenceforth became known in British phraseology as Sir Chichen Lo. Undoubtedly he ranked among the leaders of modern Chinese thought, and as his influence was always thrown into the scale of enlightened progress, his demise is a serious loss to his country.

ROMAN CATHOLIC MISSION FUNDS.

In the year 1902, according to the *New World*, \$1,319,608.93 was contributed by Roman Catholics in aid of foreign missions. France stood at the head of the list with \$771,939.58. "The departments of Alsace-Lorraine contributed \$79,276.18. All Germany gave less—\$67,055.14, still Germany has missions of her own and sustains them. Switzerland gave \$18,549.26, Austria, \$12,130.70; Holland, \$17,712.62, while Belgium donated \$70,054.94, or more than Italy and Austria combined. Italy gave \$59,403.32, England, Ireland, and Scotland, \$28,138.59, of which Ireland contributed \$20,199.88; Spain, \$31,115.01, and Portugal, \$6,993.01. Unexpected showings are made by several countries usually considered non-Catholic, if not non-Christian. We actually see \$1,082.79 donated by Catholics in the diocese of Constantinople. Burmah and Korea both contributed; Jerusalem gives \$332, Syria \$123.75, India about \$500. Africa surprises by donating \$5,707.81, being nearly twice as much as given by Canada—\$2,785.70; and yet Africa is largely heathen as yet. Mexico gave \$5,466.42 last year. Central America and the West Indies, \$922.27; Colombia, \$102; Venezuela, \$521.38; Guiana, \$78; Ecuador, \$37.28; Peru, \$710.44; Bolivia, \$200; Brazil, \$1,836.23; Chile, \$7,739.91; Uruguay, \$4,836.40, and the Argentine Republic, \$23,709.94.

"Our own republic remains to be considered," continues the periodical from which we are quoting. "The statement may occasion surprise, nevertheless it is true, that in the matter of giving the United States actually ranks next to France. In 1902 this country gave \$85,408.44 to the Catholic foreign missions, besides maintaining all her home charities. Certainly there is a great difference between France's \$771,939.58 and the United States' apparently pitiful \$85,408.44; nevertheless it must be remembered that in our country the salaries of the priests, bishops, and archbishops are paid by the people, while in France the State pays these, for the most part. The largest sum given by any diocese of the United States, \$28,086.31, was forwarded by Boston; the smallest sum given by any United States diocese was \$2.00 by Cheyenne, an amount equalled by Alaska. Probably the smallest amount given by any American diocese was donated by San Jose, Costa Rica, which we observe with astonishment, cheerfully contributed sixty-four cents."

THE BUDGET.

We read in the *Nichi Nichi Shinbun* that when the Cabinet endeavoured to carry out such reforms as would have effected a total economy of a million *yen* in Departmental expenditures, each Department raised objections and showed cause why it ought to be excluded from the scheme. Under these circumstances no course presented itself except to divide the sum of a million proportionately among the Departments, each being required to economise a certain percentage of its outlays. It will be apparent that in such circumstances there is very little chance of the Ministry being able to carry out the programme advocated by the *Seiyu-kai*, namely, to substitute administrative economies for public loans. An impression prevails, and the *Fiji Shimpō* confirms it in a leading article, that the real root of Japan's financial difficulties is to be sought in the feudal sentiment governing the procedure of the Departments, each of which fights simply for its own hand without any reference to the general question of finance. If there existed anything like effective community of desire to co-operate with the Treasury, things would be very simple.

NOTES ON CURRENT EVENTS.

The Department of Home Affairs, after some delay, has refused to approve the application of the *Tokyo Densha Tetsudo Kaisha* to raise their fares from $1\frac{1}{2}$ *sen* to 2 *sen* per section after the conversion of their system from horse traction to electricity. This decision is in accord with public sentiment, for although the fares of the Company, even at the increased rate, would still be considerably less than one half of the *jinrikisha* charges over the same route—and these charges, we may observe *en passant*, have already been reduced in consequence of competition with the horse trams—it is nevertheless felt that the Company can anticipate an excellent dividend without any appreciation of fares.

Baron Utsumi's intention of resigning is confirmed. The *Fiji Shimpō* says that it would have been carried into effect sooner had not the Cabinet been in some doubt as to its own fate. But that doubt having been now resolved, the Minister for Home Affairs must be allowed to take the rest demanded by his enfeebled condition. It is observable that while publishing this statement, none of the newspapers offer any suggestion as to Baron Utsumi's probable successor.

The King of England has conferred the Military Knight-commandership of the Bath upon Lieut.-General Fukushima, who thus becomes Sir Yasumasa Fukushima.

Vernacular newspapers state that the Finance Department is experiencing much embarrassment in the compilation of next year's Budget. Owing to the reduction of the Land Tax and the demands of the Departments on account of new enterprises, a deficit of 13 or 14 millions presents itself, and further taxation seems to be the only resource. We do not understand this statement unless it be intended to include the contention that the funds for naval increment can not be obtained by floating bonds. According to the Cabinet's original scheme the proceeds of the extra land-tax would have gone to naval increment, and therefore their loss should not affect the general budget. Then, what is meant by new

undertakings? Why should there be new undertakings if funds to carry them out are not available?

One of our local contemporaries, to whose remarks on the conclusion of the Osaka Gas Company complication we recently alluded, is apparently indignant because we attributed to it a statement that certain privileges had been granted by charter to the Company and then arbitrarily withdrawn. In an article protesting against our comments, the following sentences appear in close juxtaposition:—

Everybody * * * must fail to understand how * * * after showing that the charter practically granted nothing, we can be accused of conveying the idea that some privileges granted under it have been arbitrarily withdrawn. We argued that the charter granted no privileges.

The fact remains that the rights acquired by the Osaka Gas Company under the charter—such as they were—have been limited by the Osaka Municipality.

The transfer of the McBain properties to the Nippon Yusen Kaisha was completed on the 15th ultimo. It occupied 15 days, and throughout that time no suspension of the McBain business occurred. It is stated that this smooth and well-managed process of transfer elicited much applause among foreign observers. The fact is that the Directors of the Nippon Yusen Kaisha have adopted the wise course of carrying out the whole transaction with a minimum of change. They have made scarcely any alteration in the staff by whom the McBain business was carried on, and thus, with the exception of the fact that the McBain house-flag has been replaced by the Japanese Company's, things remain apparently unaltered. The *Fiji Shimpō's* Shanghai correspondent reports that whatever jealousy might have been excited in British shipping circles by the intrusion of a stranger into the sacred circle, is averted by the reflection that the new-comers are not Germans. The great foreign shipping firms are disposed to avoid competition, and the Osaka Shosen Kaisha is represented as thinking that the presence of the Nippon Yusen Kaisha upon the scene will be an assistance rather than a hindrance.

Four officials of the Department of Communications have been arrested on charges of receiving bribes and of making away with funds entrusted to their care. They are men occupying petty positions, the highest being a former secretary of the Railway Bureau, but there has been much talk lately of some such measure impending. Simultaneously with this arrest comes news that the three officials of the Department of Agriculture and Commerce who were undergoing preliminary examination on an accusation of corrupt practices connected with the Osaka Exhibition, have been remanded for public trial, a *prima-facie* case having been made out against them.

There has been an extensive robbery of jewelry at the Osaka Exhibition. It occurred on the evening of the 28th. Several men seem to have broken through the glass roof, receiving some injury to their persons in the attempt. Having effected an entrance, there was nothing to interrupt them. They went to work quietly, selecting valuables of little bulk—among others the celebrated twenty-five hundred *yen* pearl—and they managed to get away with twenty thousand *yen* worth of gold watches, rings, chains and so forth. Several previous attempts at robbery in the exhibition were

all unsuccessful. There is naturally much talk about responsibility in this case. It is almost certain that the thieves will be apprehended.

The Rev. William Elliot Griffiths, who for the past ten years has been pastor of Ithaca, New York, announced from the pulpit on May 31st his intention of retiring from that position. His resignation will take effect on the last days of September this year, and in the future, although he does not intend to discontinue preaching, he will devote most of his time to literary work, more particularly American historical literature.

It is almost impossible now-a-days, says the *China Mail*, to take up a Manila newspaper which does not contain one account or more of serious disturbances of the peace by Filipino insurrectionists. With the exception of Manila itself there does not appear to be any place in the Islands where United States law is absolutely unquestioned by the native population generally, and from the slow progress made in the work of pacification it would appear that the Americans have before them a similar task to that which has been carried out by the Dutch in Sumatra. The latest piece of news is to the effect that the town of Bay in Laguna was raided on the 1st June by a hundred ladorones. The gang raided the town in broad daylight, and, the municipal police, some twenty-five in number, having decamped in the greatest fright, proceeded to loot at their leisure, and got clear away with valuable booty.

There was a violent hail storm in Tochigi Prefecture at 5 p.m. on the 30th ultimo. The hail-stones are said to have accumulated to a depth of 5 inches, and to have remained unmelting until the following morning. Much damage was done to crops.

Mr. Munakata Sei was relieved of his office as Governor of Miyagi Prefecture in consequence of charges preferred against him in connexion with the text-book scandal. He spent some time in prison, but when brought up for trial, was acquitted. The Government has now appointed him to be Governor of Kochi Prefecture, and we observe that the *Chuo Shinbun* vehemently condemns such an appointment, on the ground that having barely escaped criminal conviction, he is unfitted to occupy a high post. We have not followed carefully the record of Mr. Munakata's trial. It is not possible, indeed, to follow such matters carefully in Japan without actually attending the law courts, for the reports published by vernacular newspapers are altogether meagre and unsatisfactory. But on general grounds of justice it seems unwarrantable that a man should suffer permanently from a false accusation. Since Mr. Munakata was acquitted after a careful trial, his innocence must be taken to have been proved, and under such circumstances there can be no valid reason for continuing his exclusion from office. The outcry against him is due, we suspect, to another cause. During the recent elections he was much spoken of as having interfered in the Cabinet's behalf, and naturally the latter's enemies are ready to attack him on all occasions. The quality of the assailants' methods may be inferred from the fact that in the case of another Governor (Yamaguchi Prefecture), now removed from office they attribute his misfortune to the fact that he preserved a neutral attitude at the time of the elections.

The Directors of the Tokyo Tram Com-

pany have again applied for permission to raise their fares, but have submitted on this occasion a more moderate table of augmentations. On the face of things it seems unreasonable to expect that passengers should travel by electric cars for the same fare as that paid on a horse tram, but without full details it is impossible to form any clear judgment about the propriety of the Company's application. We observe that the *Yomiuri Shinbun* writes strongly in opposition to the Company's requisition. It makes two apparently effective points. One is that the Horse Tram Company must have foreseen for years that it would have to convert its system to electricity sooner or later. Instead of making provision for the necessity, it steadily swallowed its immense dividends year after year, and it now contends that having to increase its capital for the purpose of converting its system, it should be allowed to increase its fares also. But of course the partial fallacy of that argument becomes apparent after a moment's reflection. The second and, as we venture to think, thoroughly sound point is that the scale of charges now proposed by the Company is very complicated and would be extremely troublesome in practice. The tendency in Europe and America is entirely towards a uniform charge in such business, and though Tokyo may not be sufficiently advanced for such a method, needless confusion at all events may be avoided.

The Welcome Society is showing much vigour. After several years of a somewhat struggling existence it now proposes to largely extend its operations. A person thoroughly versed in foreign and Japanese affairs and in foreign languages will be engaged, but exactly for what purposes the circular now lying before us does not state. We presume, however, that his duties will be chiefly of an advisory nature, in other words, he will make suggestions and be consulted about all matters connected with the convenience and comfort of travellers. It is further proposed to compile maps in English, French, German, Russian and other languages and to place them at the disposal of tourists; to establish branches of the Society in various places; to investigate and devise means of correcting any conditions that impede or embarrass foreign travel in Japan; to organize a corps of competent guides and interpreters; to publish instructions for the assistance of inn-keepers in their treatment of foreign tourists and to despatch officials of the Society for the purpose of supplementing these instructions. To carry out this programme the Society needs an income of 7,700 *yen* yearly. It has already secured 1,700 *yen*, and the Committee now desire to raise a capital fund of 100,000 *yen*, the interest of which will furnish what is needed. It is to be hoped that success will crown these efforts. The Welcome Society may justly be regarded as one of Japan's sources of wealth, for every improvement it effects in facilities of travel helps to attract foreign tourists.

A certain Mr. Maruyama Moshin, of Akita Prefecture, has presented to the Government a representation said to have the approval of all the principal men engaged in the Japanese oil-producing enterprise. He notes that whereas the import of kerosene at the beginning of the *Meiji* era was only 7,200 *yen*, the consumption now amounts to 23 millions annually, and since there are 850,000 households in Japan, two-thirds of whom may be expected ultimately to use oil as an illuminant, the remainder being supplied

with electric light, the consumption will by and by be about 60 million *yen* worth annually. Niigata prefecture is the most prolific. Last year it produced 1,600,000 *koku* of crude oil, valued at 7 or 8 million *yen*. There are oil-bearing strata in 18 other prefectures, independently of Hokkaido and Formosa. Supposing each of them to be one half as prolific as Niigata, the total production might be between 60 and 70 million *yen* worth annually. It is thus of prime importance that this source of wealth should be developed. Of course our readers will be prepared to learn that Mr. Maruyama advocates official assistance. In 1900 the Government obtained the Diet's sanction to devote a certain sum annually to investigating the country's oil fields, with the object of furnishing indications which might be useful to private enterprise. Mr. Maruyama contends that these investigations have been limited to surface surveys and that they have failed to furnish any trustworthy information as to the output that might confidently be expected. He therefore advocates a much larger appropriation so that what he calls *sakusei-chosa* (well-digging explorations) may be substituted for the *yuden-chosa* (oil-field explorations) hitherto carried on. He would have one or two stations in every prefecture, and he evidently thinks it within the competence of official experts to furnish absolutely accurate and trustworthy data for the guidance of capitalists who are willing to invest money in such enterprises. It is exhilarating to observe the splendid faith that some Japanese repose in official competence.

A correspondent writes from Melbourne:—May 19th.—The last and greatest excitement we have been through is a railway strike in Melbourne. It lasted a week, and has caused a good deal of inconvenience and loss of work and money which, of course, would have been tremendously accentuated if the strike had lasted longer. The trouble was that the railway men wanted to join the Trades Union and the Government put its foot down, and said no. The result was the strike. There has been a good deal of retrenching business going on in the railway department, which began the trouble in the first instance, and roused the men a bit, but the refusal to allow them to join the Trade Hall was the finishing touch. I have only read of strikes, never been actually in the middle of one—it was most interesting. All the trains stopped and traffic on the roads increasing every day, prices going up and up for food, and wood, and coal. Hands turned off at the warehouses and shops by the hundred; trade was practically at a standstill. Volunteers for drivers and stokers were taken and trained into their work, but only a very few trains were run in the day. Every day though the train service improved, public opinion was all with the Government and supported it in every way, and the Government has won. The strikers gave in unconditionally, and on the whole it is a good thing it has all happened, because it will settle the labour party which has been practically ruling and having its own way in everything, to the detriment of the people. Of course it could not have come at a more trying time when the whole country is suffering from the drought—or the effects of it I should say. I wonder when Victoria will be free from distresses—it has never been since 1893.

YACHTING.

The fresh northerly breeze, shifting later to north-easterly, and the moderately lively sea which prevailed on Saturday afternoon should have rejoiced the hearts of yachtsmen, but *nyubai* weather was again experienced and the drifting rain not only made matters exceedingly uncomfortable to crews—especially in the smaller craft—but so obscured the view that very little of the racing, except the latter part, could be observed. It says a good deal for the enthusiasm at any rate of the "Larks" that out of a fleet of fourteen which started no fewer than ten went round the course, which included a trip to the Lightship.

Four 39-raters started to race twice round the Lightship and the Widow Buoy. Though *Golden Hind* had a little of the stuff that she likes there was not enough and *Mary* led all round and finished an easy winner. *Haidee* gave up. *Maid Marion* must have had something the matter with her gaff-topsail for she came back under plain sail and jib-topsail and was a long distance out of it. *Mary* wins first prize and two record points, *Golden Hind* second with one point. Following are the times:—

	Finish.	Corrected.
	h.m.s.	h.m.s.
<i>Mary</i>	4.27.25	4.27.25
<i>Maid Marion</i>	4.46.55	4.42.10
<i>Golden Hind</i>	4.42.20	4.37.35
<i>Haidee</i>	gave up	

The cruising class made one trip round the Lightship, the Widow Buoy and the Nagahama Buoy with the result that *Spray* showed her heels to everybody, while *Asagao* in third place hung on with the most dogged pertinacity to *Nina*. The only other craft that at all threatened to have a look in was *Wanderer* but she finished 1m. 20s. outside her handicap. *Molly* gave up. Times:—

	Corrected Club.	Corrected Arb.
	h.m.s.	h.m.s.
<i>Wanderer</i>	5.08.16	5.01.40
<i>Daimyo</i>	5.04.05	5.12.05
<i>Nina</i>	4.57.20	5.00.20
<i>Molly</i>	gave up	
<i>Surprise</i>	5.16.35	5.09.50
<i>Asagao</i>	4.29.26	4.50.05
<i>Spray</i>	4.57.45	4.57.45

Asagao is therefore first and has 2 record points, *Spray* second and *Nina* third with one point.

Nine 21-raters got away to round the Tsurumi Mark (twice) and the Lightship. Little could be seen of their earlier doings, but *Winsome* had a lead out of the harbour which she lost in the windward work. *Pele* was first past the northern mark, *Vixen* second and *Winsome* third. They maintained this order till after passing Tsurumi the second time and easing sheets for home, when *Winsome* overhauled *Vixen* and finished second. Times:—

A telegram from Okayama prefecture states that the judicial authorities on the morning of June 29th searched the houses of Mr. Kumagai, Manager, and Mr. Kamiya, chief of the Chugoku Railway Company. The charge against them has not been reported.

DOMESTIC POLITICS.

THE disintegration of the *Seiyu-kai* continues. Secession of the whole of the Hakodate local branch is announced, and there is talk of the Osaka branch adopting the same course, while other branches also are showing restlessness. Hakodate is so much removed beyond the centres of political influence that the disaffection of its politicians is not specially important, but Osaka is quite another affair. If Osaka goes, the blow will be severely felt by the Party. Meanwhile, talk of Count ITAGAKI's return to the leadership of a re-constituted Liberal party grows louder. The veteran chief, though at first averse to entertaining any such proposition, seems to be now not unwillingly submitting his reluctance to persuasive influences. We can not, for our own part, regard these incidents and prospects with very serious attention. So long as Marquis Iro consents to remain at the head of a party no other leader can hope to rival his influence. And indeed the fact seems to be receiving practical recognition, for even as we write news reaches us that Mr. KATAOKA KENKICHI and his fellow-seceders have resolved to abstain, for the present, from any attempt to organise a new party; they will be content with a club, where political views may be exchanged, friendly relations cemented and the course of events observed. It seems probable that this hesitation will ultimately prove the prelude to re-absorption into the *Seiyu-kai*. If the initial velocity of their first disruption does not suffice to start the seceders in a completely new orbit, they will gradually yield to the old attraction and resume their places in a re-organized Iro system.

In connexion with all this commotion there is a point specially interesting, whether it be regarded as an indication of Japanese character or as a feature of the time. It is the obvious impatience of the younger generation to displace the older. Frank confession of the tendency is made in some quarters, but even though careful reticence were observed, there could be little doubt of the fact. Many of the comparatively untried politicians and diplomatists of the country think that their elders have become antiquated, have fallen out of touch with the time, and should be set aside in the interests of the country. What is the origin of such a sentiment and how far is it reasonable? In Occidental countries public confidence is unexceptionally reposed in men of mature age and ripe experience. Grey hairs constitute a title to high office instead of being considered a disqualification for it. That is so in China also, whence so much influence has been exercised on Japan's creeds and customs. Indeed, nowhere in the world does old age command such profound respect as in China, and nowhere do we see more numerous instances of veterans serving their country to the end and falling at last in duty's tracks. It would seem, then, that the temper of the Japanese is abnormal in this

respect. Perhaps we should have been prepared to find it so. That the so-called "Elder Statesmen" have a record justifying any such revolt against their preeminence, would be a plainly extravagant assertion. On the contrary, they have a record of extraordinary achievements. What they have accomplished will rank in history high among the greatest feats of courageous and sagacious leadership. They are the men whom a great national convulsion brought to the surface, and who retained their prominent place by sheer force of ability through long years of notable change and progress. It is not, therefore, because of any deficiency on their side that their continued dominance might have been expected to provoke discontent. There are, we think, certain special reasons. Perhaps one of them, though certainly the least important, is that they have not dissociated themselves from the past as fully as the past has receded from the vista of the younger generation. It often happens that changes of which a man is part lose something of their true significance in his eyes. Memory interferes with his sense of proportion. Sir HARRY PARKES was an example. He never realized the metamorphosis that Japan had undergone. The outlines of her original proportions remained so visible to him through all her new garments that he under-estimated her acquired strength and over-discounted her titles to consideration. Sometimes it seems as though the Elder Statesmen fall into a similar error. They do not completely understand the international place won by their country chiefly through their own illustrious exertions, and they are consequently disposed to ask less for her than she deserves to receive. But a much more potent reason, we imagine, is that the rapidity of the country's progress has created an atmosphere of impatience. Where the times move fast, men naturally want to move with them. Nothing has been permanent in modern Japan except the overlordship of the Elder Statesmen. It has become incongruous with its circumstances in the eyes of eager ambitious youths. Besides, these Elder Statesmen themselves leaped into prominence at an early age. They did not wait for the slow processes of time to remove their seniors from their path, and thus the example they set reinforces the teaching of the rapid mutations they inaugurated. It might be too much to say that restless craving for change has produced a fever in the blood of young Japan; but the statement would not be a very great exaggeration. Finally there is the influence of tradition. The peculiar altruism of Japanese social philosophy used always to impose upon the old the duty of making way for the young. We have seen this custom cited as an evidence of Japanese indolence. It does not present itself to us in that light. When a man of 50 or 60 steps aside in Japan and retires from active life, the proceeding is

regarded as one of surrender to the next generation not as the assertion of any claim to idle maintenance. May we not assume that the graces of such a tradition have more influence with the rising generation than its unpracticality?

THE OSAKA GAS BUSINESS.

IT appears to be worth while, in the interests of accuracy, to point out some evidently erroneous impressions entertained with regard to the Osaka gas business. An arrangement, as our readers know, has been concluded between the Gas Company and the Municipality after nearly nine months' discussion. It is an arrangement which, on the one hand, confers certain privileges on the company, and, on the other, secures certain royalties for the Municipality. Both parties seem satisfied, but one of our local contemporaries, commenting on the matter, says:—"It would appear henceforward that a charter issued to a company by the authorities is not of much value under the present system when local interests are involved. * * * Companies can not be blamed if in future they look upon charters as but of small value." These words convey, and are plainly intended to convey, that some privileges already granted by charter to the Gas Company have been arbitrarily withdrawn, and that the credit of all charters in Japan is thereby impugned. Error dies hard. This very point was made more than once by foreign newspaper critics last year when the Osaka gas question first came upon the tapis. The Mayor of the city then took great pains to correct the misapprehension, and we published the gist of his explanation. Perhaps, since the false idea has been again ventilated, it will not be amiss to reproduce portions of what we wrote last November:

What really happened has been very clearly explained by the Mayor of Osaka. The Osaka Gas Company applied, in the first place, to the Governor of the City, who does not represent the Municipality and who has no title to grant any final permission for using the streets and roads of the city. The application (presented on February 18th, 1899) contained the words:—"It will be necessary to lay iron pipes in the ground and along the sides of the streets of Osaka city and the neighbouring roads * * * It is requested that the above may be approved" (*Osaka shigai oyobi sono kinyo no doko chichu mata wa kawu ni tekkan wo fusetsu sezaruru yezu* * * * *muji no gi on kiki-oki a-nar-taku*). To this the Governor of Osaka made answer on July 1st, 1899:—"The petition is approved and the following provisions must be observed * * * (1) Application for permission must be made and it must be accompanied by a map, by a written statement of details of work and by a plan. * * * Before sending in this application the Osaka City Authorities must be consulted (*negai no ken kiki-oki sorojō tsugi no kajo wo mamoru deshi* * * * *1. * * * aumen, oyobi kaji shiyo-gaki sekkei-zumen wo soye negai-ide kyoka wo uku deshi* * * * *negai isuru maye Osaka-shi to kyōgi wo nasu deshi*, XIV. "Even after the gas-pipes are laid, the company may at any time be required, at its own expense, to change their position or to remove them altogether should such a step be deemed necessary in the public interests" (*gas-kau fusetsu-go to iyedomo koyeki-jō hitnayo to mitomuru toki wa nandoki nitemo kashu no hiyō wo motte kore wo iten seshime moshiu wa tori-harawashi-muru koto aru deshi*). These quotations make it plain that the Company merely obtained administrative sanction to take the preliminary steps of its enterprise, and that even such sanction was accompanied by a provision reserving the right to order alterations or removals of the pipes. Before pipes were laid, the

Municipal Authorities had to be consulted. The Municipal Authorities and the Governor are distinct. It is not within the power of the Governor to grant to any company the definite privilege of using the streets and roads unless the consent of the Municipality has been obtained; and in consideration of giving consent the Municipality is entitled to demand some compensation for such use. At the close of 1901, the Company, having followed the routine prescribed above, obtained the necessary permission to lay pipes in a section of the city. The Municipality does not seek to withdraw that permission. What it claims is that permission to use the streets and roads in a part of the city can not be called permission to do so in every part of the city; and that when the Company seeks to have its privilege thus extended, it must be prepared to comply with the demands of the Municipality, made in the interests of the public.

From this it will be clear that there has not been any question of altering a charter, and that the strictures of our contemporary have no basis of fact.

Another point also calls for brief comment. Our contemporary says:—"Besides the precedent that has been established for the rights of public companies to be limited by municipalities, there is also the further precedent that municipalities have the right to claim royalties from public companies." We have shown that no such precedent as the former has been established at all. As to the latter, municipalities possess that right in nearly all civilized countries and have possessed and exercised it for several years in Japan, as would be plain to the editor of our contemporary did he examine the charters granted to electric railway companies, for example, since 1900.

POSITION OF JAPAN IN THE FAR EAST.

AT a meeting of the American Academy of Political and Social Science, held in Philadelphia on March 7th, Mr. TAKAHIRA, Japanese Representative in Washington, delivered a very interesting lecture on "The Position of Japan in the Far East." He took a very fine view of that position, not in the sense of claiming for his country any special status or any exalted title, but in the sense that she is the channel through which the invigorating current of the new civilization may find its way to the nations of the Far East. To show how clearly this idea is brought out, we quote some sentences from the lecture:—

Japan has never had an intention to take advantage of the misfortunes of her neighbours or to seek for territorial aggrandisement, but the sincere desire of her government and people is to have all neighbouring countries realise that mutual interests can best be promoted by the maintenance of peace, the promotion of commerce and industry and the strengthening of the ties of interdependence. It is not meant by this that a race coalition should be formed hostile to the interest of other countries; such a coalition as has been typified in the expression "Yellow Peril." My meaning simply is that a country to be truly prosperous should have peaceful and prosperous neighbours. That naturally leads to interdependence, not political, but social and commercial, and establishes the surest guarantee of peace to all concerned. Some portions of the world have been compared to an armed camp, each country watching the others and each jealously apprehensive of encroachment. Under such conditions men prosper not because of this policy but in spite of it. It is no part of the ambition of Japan to establish such a state of things in the Far East, least of all to combine with her neighbours for aggression or even for defence. She wishes them to be peaceful and prosperous, because that is the most certain means by which her own peace and prosperity can be assured; and she desires them to appreciate at its full worth the advantage of interdependence, because their relations

and their relative positions are such as to render it an indispensable pre-requisite to mutual prosperity.

* * * It is not out of place here to call attention to statements which have appeared in different publications expressing the fears of certain over-anxious persons regarding the modernization of Asiatic peoples. (Here follows a quotation from an article written in 1893). In this group of wonderful hypotheses may be found the only basis for the fear of a so-called "Yellow Peril" to which I have already alluded. The usual corollary is that Japan has the desire to control China thus rejuvenated, and to lead her myriads against the rest of the world. So far as China is concerned, the best answer to such arguments is her present condition, ten years after the foregoing article was written. As for Japan, her conduct throughout the Boxer troubles and the course she has pursued since those unfortunate events, have shown the world that she has the same cause to uphold in China and the same interests to protect as other civilized nations. It is therefore self-evident that so long as China maintains a correct position towards the civilized world she will retain Japan's friendship; but that she cannot rely on Japan for support when she assumes a wrong attitude. * * * While we are thus labouring for ourselves, our most earnest desire is that the kindred people who are our neighbours shall labour in the same manner for themselves and endeavour, as we have done, to raise themselves above the hardships and miseries of their present condition. That sums up, in a word, Japan's position among Eastern nations. We are in duty bound and in interest forced to do all that lies in our power to assist our neighbours in the path which we have followed, and in performing this task we esteem peace and the preservation of the kindest and most cordial relations with all as an essential pre-requisite to success.

These utterances have, of course, a certain academical sound, but as an exposition of Japan's position, coming from one of her responsible officials, they are undoubtedly valuable. A man's interpretation of his neighbour's mood is generally a reflection of his own. There has not been any period of the world's history since mediæval days when racial prejudice prevailed more strongly among Western peoples than it prevails to-day, and naturally these nations expect to detect the same sentiment on the side of its Oriental victims. It is not an unreasonable expectation. Within easy reach of Japan's hand are materials which might be welded by her into a stupendous military machine. No observer with any experience doubts that the Chinese are capable of being converted into good soldiers, or that well equipped and well led they could stand in any field. Assuming Japan to be ambitious of imperial aggrandisement, and assuming that the racial prejudice of the Orient towards the Occident is as strong and effective as that of the Occident towards the Orient, it is quite within the range of possibilities that the Japanese should be found one day at the head of an almost irresistible hegemony of Eastern peoples. Some such apprehension may fairly be assumed to have influenced Russia and Germany when they combined to expel Japan from Manchuria, and that the same apprehension is almost overwhelming in Russia's case seems to be the only way of explaining her subsequent aggressions in Manchuria, which could scarcely fail to strain Japan's patience to breaking point. A hard task is imposed on Japan to prove herself true to the creed that Mr. TAKAHIRA enunciated at Philadelphia. But she is trying.

Another important matter briefly discussed by Mr. TAKAHIRA is the question, so perplexing to many foreign observers how was it that from a congeries of semi-inde-

pendent States, each struggling for its own hand, there suddenly emerged in 1867 an imperial Japan, homogeneous and compacted under one SOVEREIGN? Mr. TAKAHIRA's explanation seems to give prominence to the system of instruction in the Chinese Classics received by *Samurai* at the various schools established by the feudatories, where he says that the doctrine of loyalty to the EMPEROR was taught with such insistence that it permeated the national life and thus prepared the nation for the restoration of administrative functions to the Throne. There will be differences of opinion as to how far Confucianism may be credited with the effects ascribed to it by Mr. TAKAHIRA. Students of history have been disposed to attribute greater influence to the revival of Shinto, and for our own part we think that contact with foreign nations was the most powerful factor of all. Without this last, the course of events would probably have been very different. The TOKUGAWA might have fallen, but the Shogunate would not have fallen with them: it would have passed into Satsuma's hands.

There was recently acted in a Tokyo theatre a drama called "The surrender of Yedo Castle." That was one of the most remarkable pages in Japan's modern history. KATSU AWA NO KAMI, afterwards Count KATSU, was the principal figure. The *Shogun*, KEIKI, entrusted to him the duty of surrendering the almost impregnable stronghold which the TOKUGAWA had occupied for nearly three centuries, and entrusted to him the still more arduous duty of reconciling his comrades as well as the Yedo citizens to the surrender. The words the playwright puts into the mouth of KATSU as a conclusive argument in favour of an act which must have revolted all the instincts of the Yedo *Samurai*, are that internecine strife would place Japan at the mercy of foreign countries. That, we believe, was the conviction chiefly operative in the minds of the *Samurai* and the feudatories. Kagoshima and Shimonoseki had taught them the total impotence of any section of feudal Japan to make head against Western aggression. Had the victims of the lesson been any other clans save Satsuma and Choshu, the nation would not have learned so quickly. But after the TOKUGAWA, these were the two most powerful units of the feudal system, and when they went down like puppets before a small exercise of Occidental might, the inference was too plain to be mistaken. As for the TOKUGAWA the record of their foreign politics had been a uniform series of concessions and humiliations. If, then, neither the *Shogun* nor any of the feudatories could save Japan, evidently no resource offered except the union of the whole nation under one head. Of course the revival of *Shinto* doctrines had prepared the way by re-investing the SOVEREIGN with his old sanctity, some of which had been impaired by the successive aggressions of the FUJIWARA, the TAIRA, the HOJO, the ASHIKAGA, and the TOKUGAWA. But

the grand motive force, we think, was the menace of foreign aggression.

At the conclusion of his interesting lecture Mr. TAKAHIRA welcomes America's appearance on the Far-Eastern stage as the sovereign of the Philippines. "We know," he says, "that the aims of the United States are identical with our own, and we feel certain that her great influence will be thrown in the balance for peace and prosperity to all."

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

Though cruelty to animals is constantly complained of in the newspapers in this country, in an article published in the *Chūō Kōron* written by Mr. Katō Setsudō, entitled "Japanese Religion and Animals," conclusive proof is given that the maltreatment of animals is quite contrary to the religious belief of the great majority of Buddhists and Shintōists. The following quotations from Mr. Katō's lengthy article will suffice to show what is the traditional national feeling on this subject. Japanese ideas in reference to the position occupied by animals in the universe were to a considerable extent derived from China and India. They may be grouped under two headings:—(1) The regarding of animals as distinct objects of worship in themselves; (2) the regarding of them as agents of gods or divinities, whose function it is to represent those gods or divinities on special occasions, and hence as entitled to be worshipped on this account. Under the first heading there are objects of worship and of dread that are semi-human and semi-brute in the conception of the Japanese. I refer to the various *Tengu* on land, and to the sea Dragon-gods (龍神 *Ryūjin*), and to the Shintō hobgoblin known as *Sarudahiko-no-kami*. The latter, though resembling a human being in some parts, has wings and the bill of a bird. There are hobgoblins which bear the name of *Karasu-Tengu* (crow-elves). These imaginary beings are said to reside in high mountains, and various local names are given to them. The *Kyōto* elf is said to dwell in *Kuramayama*; the Mount *Hiko* (*Kyūshū*) goblin is known as *Buzen-bō*; that of *Sanuki* (*Shikoku*) is called *Zōzu Gongen*; that of Mount *Atago* (*Yamashiro*), *Tarōbō*; that of Mount *Akiba*, of *Yenshū*, is known as *Fanjakubō*; in the North-East the hobgoblins of Mounts *Chōkai* and *Haguro* bear the names of *Chōkai Gongen* and *Haguro Gongen*. These beings are said to be the authors of the great calamities from which men suffer, and to be able to protect men from fires, earthquakes, and the like. The dragon-gods are said to control the rainfall and to cause droughts when offended. There are eight of these dragon-kings (八大龍王, *Hachi-dai-ryū-ō*). The *Zempōji* in *Uzen* is noted for the dragon worship that goes on there. At Lake *Towada* in *Rikuchū* there is a dragon-god known as *Nansembō*, and one called *Hachirō* at the place bearing that name in *Ugo*. These objects of worship are at once anthropomorphic and zoomorphic, and the fact of their existence shows that, according to the religious conceptions of the Japanese, animals are feared, and invoked, but are certainly not persecuted or despised. (2) Coming to objects of worship said to be in the service of the gods and closely connected with them, there are the various *Benten* and *Inari*. There is the Lake *Biwa* *Benten*, and the *Aki* (*Itsukushima*) *Benten* and there are *Benten* connected with a great many lakes. In every case a huge serpent is supposed to carry out the orders of the god. The fox acts as the agent of *Inari* and human names are applied to this animal. Thus there is a *Gengorō kitsune* and a *Tarō kitsune*. The god of Mount *Mitsumine* (*Chichibu*, *Musashi*) is represented by a wolf; which is the case also with the *Tajima* *Yabumyōjin*. Wolves are stated to be in the employ of various other local deities and written charms against burglary are issued in their names.

Other animals specially selected to serve gods are the rat, in the employ of *Daikoku*, the centipede in the service of *Bishamon*; the wild bear in the employ of *Marishiten*. In some silk districts where rats do much ravage, serpents are invoked against them, and there are temples that issue labels which serve as serpent-charms against rats. Such are the *Yamazumi Yashiro* (*Iwaki*), the *Iwashiro Yunomyōjin*, and the *Hirano Myōjin*. There are special gods for horses and cattle in some provinces. For horses in the *Ō-U* provinces there is the *Batō-kwanon*; in *Mizusawa* (*Rikuchū*) there is the *Komagata Jinja*, and in *Rikuzen*, the *Takekoma Jinja*. The *Kii Kumano Jinja*, the *Hōki Daisen Yashiro*, and many other shrines make the protection of cattle from disease and accidents their special business. Not only are there hundreds of cases of animals being elevated to the rank of co-operators with gods, but there are clear traces of human lives having been at some time or other sacrificed in order to appease the anger of semi-divine and semi-zoic beings. Even at the present time a ceremony is performed at the *Sakatomyōjin* in *Kazusa* which looks like a remnant of actual human sacrifice. On a certain day lots are cast among the devotees who attend the temple in order to ascertain who is to be sacrificed. The person chosen is laid on a large chopping-board and the priest goes through the form of pretending to cut the victim three times with a huge knife which he holds in his hand. It is stated that the same practice is in vogue at the *Munakata-Myōjin*, in *Chikuzen*. The instances of human beings being offered to half-animal gods have doubtless been rare, but the offering up or presenting of animals to gods is in some parts quite common. At the *Suwamyōjin* in *Shinano* a ceremony involving the offering up of some 75 wild boar and deer is frequently performed. The choice of animals for such a purpose adds to their dignity in the scale of the universe.

* * *

In writing on the influence of Indian religions on society in the *Shinjin*, Mr. Yokoi *Tokio* says that Indian Buddhism is in many respects superior to Japanese Buddhism. It maintains a high standard of education. Its charity is of the most liberal kind. It assigns a higher place to woman than she occupies in this country and it allows no idol worship beyond the worship of *Shaka's* image. This creed deteriorated as it travelled eastward. It got corrupted in *Tibet* and was still further altered for the worse in *China*, and in *Japan* it appears as quite a different religion in many important respects. It is questionable, proceeds Mr. Yokoi, whether in the original teaching of *Shaka* too much stress is not laid upon individual culture and welfare and too little importance attached to society. It is rather in its philosophy than in its strictly religious teaching that Buddhism goes astray. Disregard for state interests has in *Burmah* and elsewhere been markedly shown by devout Buddhists. The attitude of Buddhism to this life is too often one of indifference or despair. The world is bad and can be made no better. To live apart from it, and to welcome the hour of death as a release from bondage is the mental state to which all must desire to attain. There are many points of resemblance between devout Buddhists and Christian mystics and hermits—abstraction, communion with the unseen world, quiet meditation, utter indifference to secular things of whatever kind,—strict self-denial and abstinence—this according to many devout Buddhists and earnest Christians is the highest kind of religious life that can be passed in this world. But religion of this kind can not answer political purposes, and hence from the time of *Luther* and *Calvin* onwards the necessity of connecting religion with the State and of making its voice heard in the counsels of nations were insisted on. It is the peculiarity of Buddhism to which I have referred that makes it unsuited to us as a basis of political ethics to-day. It is not designed for alliance with the State either directly or indirectly, as it does not lay itself out for working reforms in society in the way that modern Christianity does. . . . But in Indian Buddhism there are signs of a new adaptation of

the creed to the wants of the age. At a huge meeting held not long ago in *India*, attended by some 3,000 representatives from various parts of the country, a distinctly national spirit manifested itself, and there were indications that the religion may still be utilized for the awakening of dormant patriotism in the breasts of people who have long been subjected to a foreign yoke.

* * *

The suicide of a student of the First High School at the *Kegon* waterfall in *May* last has been made the subject of much comment in religious magazines as well as in the press generally. The circumstances were peculiar and of some interest. The lad was 18 years of age, a nephew of Dr. *Naka Michiyo*, called *Fujimura Miso*. He was greatly interested in philosophy and had spent much time in the study of various authors with the hopes of finding some comforting explanation of man's position in the universe. But nothing that he met with satisfied him, and in a fit of despair he determined to put an end to a life that had no longer any joys for him. Before taking the final leap he wrote his name and the following words on a tree from which the bark had been removed:—*Yayū (悠々) taru kana! Tenjō ryōryō (遠々) taru kana! Kokon go-shaku no shōku (小驅) wo motte kono dai (大) wo hakaran to su. Horishio no tetsugaku tsui ni nanra no authority ni atai suru mono zo! Baryū no shin-sō (真相) wa tada ichi gen ni shite tsukusu, itaku (不) fukakai (不可解). Ware kōno urami wo idaitte, hanmon (煩悶), tsui no shi (死) wo kessuru ni itaru. Sude ni gantō ni tatsu ni oyonde, kyōchū nanra no suan aru nashi. Hajimete shiru, ōi naru hikuan (悲觀) wa ōi naru rakkwān ni itchi suru wo.* "Alas, how distant all things seem! How vast are the limits of the great Universe! The diminutive being called man (*hit*, with a body only measuring 5 feet) has in all times tried to comprehend this immensity (in vain). Of what value as an authority is the philosophy of *Horace* now? The real state of the universe may be fully described by one word, 'incomprehensible.' Out of regret for this, in the anguish of my soul, I have at length resolved to die. And when presently I shall be standing on the rock that overlooks the falls, no anxiety of any kind will disturb my mind. I shall discover for the first time that the depths of woe and the very highest bliss may blend with each other."

"Who can read these lines," asks the *Hochi Shimbun*, "without shedding a tear of regret for the fate of a promising student?" Some time ago, continues this journal, a great friend of mine in a fit of despair similar to that of *Fujimura* hung himself in the *Shiba* Public Garden. He too had come to regard life as possessing no value. What is the use of it all? ask such persons. Why go on struggling if there really be nothing worth living for? The descent to the depths of despair is hastened by various circumstances, and one cannot but feel deep pity for those who have not the strength to rise above their grief. . . . It is a question worth serious consideration as to how far the teaching of certain philosophers is conducive to extreme pessimism. Prior to the *Meiji* era some of our *daijō* forbade the use of the writings of *Lautz* and *Chwartz* in schools on account of the depressing effect of the doctrines of these sages on the minds of young men. At a time when the teaching of these philosophers was all the fashion in *China* the State suffered severely. Men permeated with the spirit of this philosophy forsook their kindred and their dwelling-places and either fled to the mountains or committed suicide, to show their contempt for the life they were expected to live. The state of mind which brought about *Fujimura's* tragic end is not one to be encouraged. The following is an epitome of the comments of the *Kirisutokyo Sekai*, the *Fukuin Shimpo* and the *Kōye* on *Fujimura's* death.

The *Kirisutokyo Sekai*.—That in this flippant

* The meaning seems to be that the extremely pessimistic view which the writer of these lines had felt forced to adopt made him welcome death as offering the happiest of all exits from the perplexity, regret, and baffled soul-longings which he experienced.—(WRITER OF SUMMARY).

age one so young as Fujimura should be found taking life so seriously is certainly very striking. His extreme earnestness elicits our admiration. But how irrational were his expectations! How can finite beings understand the infinite? What philosophy is there that can explain to us the mysteries of the universe? These things the most highly developed and the best instructed minds cannot fathom; much less the intellect of a student in his teens. The teaching of certain Western philosophers, Spinoza, for instance, can bring no peace of mind. This is only to be found by believing in Christ. Mere philosophy can satisfy no inquiring mind. Turning to another side of this incident, it is our duty to condemn suicide, as a wrong committed against society. Our lives are not our own to be destroyed at will. They belong to the community in which we live. To encourage suicide or to justify it is to undermine society. In ancient times there were two influences that tended to render suicide popular. One was Buddhist, and is embodied in the phrase *jakumetsu iraku* (to get rid of one's desires and attain to happiness by death); the other was the insignificance of human life when any great principle or cause is at stake, insisted on by the Bushidō. Suicide is a form of selfishness, a refusal to take part in bearing the burdens of society or of the family, and to regard persons guilty of self-murder with veneration is perverted sentiment.

The *Fukui Shimpō*.—The suicide of Fujimura was the result of his having no religious convictions. There are two conceivable ways of saving such a man as Fujimura. (1) To turn away the mind from the serious questions with which it is troubled by inducing him to gratify his carnal desires; (2) or to give him a full and lucid explanation of the subjects on which his mind is dwelling. Since Fujimura was not the kind of man to follow the first of these courses, it is a pity that no attempt was made to bring religion to bear on him.

In the *Koye* (No. 288) under the title *Shomen Tetsugakusha* Mr. Mayeda Chōta, the well known translator of L'Abbe Ligneul's French works, discusses Fujimura's case at some length in the following strain:—

There are two kinds of despair among earnest-minded young men. (1) There is the despair caused by perplexity, by the apparent hopelessness of finding out which of the many conflicting theories of life is true. Not a few young men are altogether without a standard of truth; hence their perplexity. (2) There is the despair caused by the pessimistic views of certain Western philosophers. Unfortunately at the present time it is with German philosophy only that most Japanese students are acquainted. And the general tendency of this teaching is to encourage contempt for the lives that are passed by ordinary men. With the materialistic philosophers, who are mostly studied, the belittling of human life by dwelling on the humbleness of man's origin is habitual. That there should be found among us lads who have a desire to get rid of life before they have entered on its struggles, is a phenomenon whose origin is to be found in the nature of our education. We develop the intellect, but we leave the moral faculties to fare as they will. There is little attention paid to the formation of character in our schools. What profit is there to our young men in the dreamy theories, the mystic speculations, the gloomy forebodings of German philosophers? It is not surprising that minds so neglected as many of those of our young men are should lose all balance and impel their possessors to commit such acts as that of Fujimura. We do not think that there will be many imitators of this lad, because there are not many that are as earnest as he was. . . . There are not a few who think that having adopted Western material civilisation, Japan has all she needs. But in our view what she requires more than ships, arms and machines are men of character. Until as a nation we get to know what is the real significance of this our human life, what are our relations to God and to our fellow-men we shall not make a proper use of the various equipments which we have imported from the West.

Is modern Imperialism compatible with Christianity? This question is put and answered by Mr.

Ebina Danjō in the *Shinjin* and by Mr. Tanabe Motojirō in the *Fukui Shimpō*. By somewhat different courses both writers reach the same conclusion, namely that there is nothing antagonistic in the principles of Imperialism to the teaching of Christianity; but, on the contrary, the former may be said to be a carrying out of one of the leading precepts of the latter. Here is the gist of Mr. Ebina's article, which deals more particularly with Imperialism in the United States. That a democratic country like America should be all aſre with Imperialistic ideas sounds rather paradoxical. But the fact is the Americans believe that they are all kings; and being a nation of kings, they feel qualified to govern the world (*Karera jimin mina ikko no kōtei nareba, sono danketsu shitaru kokka ga sekai no tōtō tōran to hōsuru wa shizen no dōri nari.*). The origin of this conviction we consider to be religion. They consider that when they are extending their empire they are setting up the kingdom of God in places where His rule is unknown. They regard themselves as sons of God, and they seek to bring others into the same relationship. Now this consciousness of relationship to the Almighty we take to be the foundation of American Imperialism, and it imparts to it a moral tone. The Kingdom of God then is no other than the kingdom set up by the sons of God (*Kami no kuni wa sunawachi Kami no ko tachi no kuni to nareri*). Let not my meaning be mistaken. In saying this my principal object is to instil into the minds of my fellow-countrymen the notion that they too are sons of God, and that, supported by the confidence which the knowledge of this imparts, they should proceed to act on Imperialistic principles in as earnest a manner as do Americans and Europeans. We have hitherto regarded ourselves rather as slaves than as kings. We need the self-confidence which consciousness of kingly birth invariably brings. In order that we may become true Imperialists we must relinquish those elements of religion that are racial or local and adopt what is universal. If, instead of slavishly repeating articles of faith after the missionaries, our young men would proceed to act on the principle that according to the teaching of Christianity they are all sons of God, and entitled to enjoy the privileges attached to this sonship, we should possess at once a very fine type of Imperialists.

Many people, says Mr. Tanabe, find a difficulty in reconciling Imperialism with Christianity. In the first place the principle is associated with a certain amount of violence and bloodshed, which is barbaric rather than Christian. In the next place, since the Imperialism advocated in each country can only be carried into practice at the expense of other countries, instead of conducting to the harmony and brotherly love taught by Christianity, it is apt to become, and does become, a source of envy, hatred and perpetual strife. There are consequently not a few people who seriously doubt the Christianity of ardent Imperialists, says Mr. Tanabe. Many Christians hold that ordinary political Imperialism and Christianity cannot work together; the former employing methods which are condemned by the latter, but it seems to me that in this as in so many other things we have to go with the times. The tendency of the age being all in favour of Imperialism, Christians cannot hope to successfully resist it. Taken in its broadest sense Imperialism is only another form of that time-honoured and widely observed law, the survival of the fittest. That the world should have passed on from competition for precedence among individuals to competition among states is not surprising. Expressed in other words the present contest of nations is between diligence and idleness; it illustrates the Buddhist principle of *ingwa a-hō* (cause and effect). It may also be said to be the will of Providence that success should reward diligence and failure be the result of idleness. We firmly believe that competition will end in the survival of what is just and true, and Christianity has no other object in view but to contribute to the triumph of good over evil. For Christians to regard themselves as important factors in bringing about this end is most desirable. The Kingdom of Heaven is a kingdom of righteousness and in whatever home Christianity reigns, the inmates

of that house may be called Imperialists of the highest type. Imperialism, as we understand it, is the spread of the gospel far and wide, the setting up of a kingdom of righteousness.

"Japanese Defects and Christianity" is the title of an article that appears in No. 1033 of the *Kirisutokyō Sekai*, contributed by Mr. Matsumoto Masukichi, the substance of which we give below:—(1) *We should like to see Japanese portioning out their time in the way foreigners do.* They mix up this thing with that, work with play. (2) *There is too much fatalism with Japanese.* This is shown by certain forms of speech in common use, as has been pointed out by Dr. De Forest. Instead of *Shikata ga nai* we would feign hear "I hope," and instead of the *Sayō nara* (If it be so) "Good-bye." Fatalism and pessimism go hand in hand with us. (3) *Japanese are given to saying what is not strictly true.* How often every day do we hear such expressions as *uso wo ossharu na*; *uso deshō*. The English: "You tell a lie" makes a different impression on the ears of Americans and Englishmen to what we feel when we hear the above charges* (4) *Japanese morality is defective in not laying more stress on the duties of superiors to inferiors.* However important loyalty to superiors and filial piety may be, they do not make up for the lack of corresponding virtues in the case of superiors. Such words as *kenri* (rights), *jiyū* (liberty), *gimu* (duty or obligation), *sekinin* (responsibility), and the like are modern inventions and are not found in the language used to express the old Chinese ethical code. (5) *Ideas on the importance of the individual are in a very undeveloped state.* The term *Kojin Shugi* (Individualism) is quite new, and for such English words as self-assertion, self-realization and rational self, we have not as yet been able to find suitable Chinese compounds. This is owing to the fact that the ideas themselves are unknown among us. Because individualism is undeveloped among us, in a Japanese house there is no privacy; separate rooms are as a rule considered unnecessary. We are no advocates of ultra-individualism, but such a harmony of egoism and altruism as is propounded by Herbert Spencer we believe to be very desirable, and we should like to see this realised in Japan. (6) *The idea of personal immortality, the perpetuation of the individual, is not found in the normal Japanese mind.* Since so little importance is attached to the individual in this life, it is not to be expected that there should be any belief in his continuity after death. It is only quite recently that now and again a writer has been found among us who refers to immortality in society, that is, to the perpetuation of certain characteristics or qualities of various communities,† but there are very few Japanese as yet who believe in personal immortality (*Kojin no reikon fumetsu wo shinjuru mono wa imada hanahada sukunashi*). (7) *The idea of regarding God as a Heavenly Father and of endeavouring to please Him day by day was quite unknown to our forefathers, and is only familiar to a very small number of modern Japanese.*

Most of the above defects are to be traced to the pantheistic notions with which the Japanese mind has been imbued for centuries and which still exercise considerable influence over it, and to the imperfectly developed state of Japanese society. The remedy for these defects is to be found in Christianity, which has it in its power to impart entirely new conceptions of life and to supply new moral motives and incentives.

"Christianity and the Individual" is the title of an article in the *Kirisutokyō Sekai* from the pen of Mr. Yokoi Tokio, formerly President of the Dōshisha, now a member of the House of Representatives. There is no denying, says Mr. Yokoi, that among a very

* It is maintained by some scholars that "fit" would be a more correct rendering of *uso* as used in such sentences as the above. "Don't tell fibs" is constantly heard among us along with such expressions as "drawing a long bow" or "telling a stretcher" and the like; and these phrases are not offensive by any means.—(WRITER OF SUMMARY.)

† In a former Summary we epitomized an essay by Mr. Ukita on this subject.—(WRITER OF SUMMARY.)

large number of thinking men the present state of society in this country causes great despondency. Look where one will in the political world, there is corruption. More than 20 years ago Japanese politicians were extremely anxious to possess a Constitution and to see legislative assemblies established, maintaining that the date fixed for the opening of the Diet had been made needlessly late, but events have since proved that even now the nation is not educated up to the proper use of representative institutions. In the business world things are no brighter. Since the close of the China-Japan war affairs have been gradually growing worse and worse, owing to the existence of a number of insecure companies. Not a few business concerns are groaning under the burden of accumulated debts. In the Japanese Christian world the outlook is equally depressing. Twenty years ago there was deep earnestness everywhere, but to-day all is dark (*ima mitsushin no yami ni ōwarete shitsubōshi*). Though there are still pastors and evangelists, their preaching is spiritless and many of them are objects of pity (*Bokushi, dendo no shoku wo mochii-nagara, toku kotoba ni ikioi naku, awa-remubeki mono ga hanahada ōi*). The youths of to-day are not what they were 20 years ago. On every hand things look unpromising. As regards religion, it is by no means an easy thing to obtain its inmost life and essence. Earnest minds often search long before they find satisfaction, and what satisfies one will not satisfy another. I met in Rangoon a Scotchman who was working earnestly as a Buddhist priest. Originally he was an engineer by profession and a Roman Catholic in belief. But while still in Scotland he found it no longer possible to believe in the Christian miracles. At that time he was suffering from lung disease and went to India for his health. Deeply impressed by reading "The Light of Asia," he decided to become a Buddhist. I asked him what induced him to follow this course. He said that peace of mind was only to be obtained by cultivating indifference to all things that stir man's various passions; that all man's unhappiness comes from unruly passions; that where these are all repressed there is peace. It seemed to me that his position differed nothing from that of those Christians who believe that the essence of Christianity consists in renunciation. Buddhism is pantheistic or atheistic and Christianity is monotheistic; but there is a point in which the views of Christian ascetics, monks and certain religious orders agree precisely with those of the earnest Buddhist priest. According to this conception the world being full of evil, the highest good can only be obtained by entire separation therefrom. And so it happens with such minds that everything is sacrificed to personal religious development. Instead of religion entering such minds to enlighten, guide and prompt them in all the various avocations of secular life, the minds are cut off from all connection with the outside world and shut up by themselves. To me it seems that religion, in order to fulfil its true function, must be brought to bear on society. And this can only be done when men possessing deep religious feeling mix freely with their fellow-men and endeavour to raise them to their own level.* With such men religion becomes a foun-

* An English writer, in commenting on Schopenhauer's views, says:—"His heroes are the Christian ascetics of the Middle Age, and the followers of Buddha who turn away from the Sansara to the Nirvana. But our modern habits of thought are different. We look askance at the doctrines and we have no great enthusiasm for the heroes. The system which is in vogue amongst us just now objects to the identification of nature with evil, and, in fact abandons ethical dualism altogether. And if nature is not evil, where, it will be asked, is the necessity or the benefit of renunciation—a question which may even come to be generally raised, in a not very distant future, on behalf of some new conception of Christianity. And from another point of view, let it be most fully and frankly admitted that renunciation is incompatible with ordinary practice, with the rules of life as we are compelled to formulate them; and that, to the vast majority, the doctrine seems little but a mockery, a hopelessly unworkable plan, inapplicable to the conditions under which men have to exist." This, we take it, is the sentiment to which Mr. Yokoi gives expression in his eloquent fashion in the article epitomized above.—(WRITER OF SUMMARY).

tain of ever vigorous life. Conscious of possessing a high ideal, they will fearlessly make their influence to be felt in all quarters and so become instruments for the purification of society.

THE RUSSIAN PRESS.

(SPECIALLY TRANSLATED FOR THE "JAPAN MAIL.")

The Russian papers in the Far East seem to be fascinated at present by Manchuria for as they are not allowed apparently to print any up-to-date news about it, they make amends by publishing sketches, historical, imaginative and otherwise, about that interesting corner of China. The *Vladivostok* is at present publishing a series of "Manchurian Sketches" and the *Dabuy Vostok* of May 22nd has an article on "Melomania in Manchuria."

THE GIPSY PEST.

The Siberian Railway will probably serve to make the Chinese and perhaps even the Japanese better acquainted with the gipsy. Nagasaki was favoured by a visit from a particularly greasy-looking gang of them in the fall of 1901, and it may expect another invasion, for the arrival of what may prove to be the vanguard of a new horde of these strange wanderers is reported in the *Dabuy Vostok* of May 23 which says that on May 19 a gang of gipsies were dumped in Vladivostok Railway station and that they afterwards caused much annoyance in the town by their importunate begging. One would have imagined that Russian officialdom should have been able—if it is anything so stern as it is represented by popular novelists—to have gently dissuaded them from making a public nuisance of themselves.

The following leading article appears in the *Noroe Vremya* of May 10 under the heading of "Dangerous tendencies in Japan:—

"The new situation of affairs in the political world requires the augmentation of the Fleet; consequently we trust in the zeal of our sons, who will not delay in bringing about the realization of our hopes."

Thus spoke the Mikado on the occasion of the luncheon given on board the *Asama* in Kobe harbour after the conclusion of the recent naval manoeuvres.

The Emperor of Japan may rest assured that his subjects will not be wanting in zeal in the direction indicated, for, according to a telegram received by the *Times* from its Tokyo correspondent, the new programme of naval expansion provides for the building of.....

(Here the writer gives the gist of the Naval programme which is already well-known to the *Japan Mail*. Translator.)

In this manner and notwithstanding the overwhelming calls on the Budget from other quarters, notwithstanding the unsatisfactory condition of the country's finances in general, the Japanese Parliament approved of the building of eight new war vessels. The price of these eight war vessels with their full equipment cannot fall below sixty or seventy million *yen*, i.e. about one third of the total ordinary revenue of Japan. If Russia followed Japan's example in this matter she would have to set aside for the purposes of her fleet no less than six hundred million roubles!

With such a tremendous strain, a strain quite unproportioned to its strength to bear, it is not to be wondered at that Japan is suffering from financial troubles. The country is passing through a serious economic crisis and it can only get through this crisis in safety by discontinuing this unproductive expenditure on its army and navy.

But neither the Japanese authorities nor the Japanese nation—judging by the way in which their views are reflected by the Press—care to consider this serious aspect of the question: on the contrary they welcome with heartiness this increase of the nation's warlike strength.

The *Noroi Krai*, of Port Arthur publishes every day interesting translations from the Japanese periodical press. These extracts reflect very well Japanese impetuosity. Japan may outlive her present fit of feverish enthusiasm for preëminence in warlike strength, but assuredly, after the review of the Fleet, at the termination of which the Mikado

asked the country to make new sacrifices for the increase of its maritime strength, a wave of enthusiasm ran through all Japan. The local papers marvelled at the rapidity with which the fleet had grown to its present dimensions, recalled the last review and compared the ships which took part in it with the ships which took part in the recent great review.

"In the face of the whole world we display the result of our unwearied efforts to become a maritime power." So says the *Nichi Nichi*. There took part in the review 70 vessels with a displacement of 200,000 tons. Of course in the number of these vessels were some of minor importance but the figure "70" filled the Japanese heart with pride. "The Fleet is the foundation of our warlike power and we must incessantly add to it, without allowing our attention to be distracted by any obstacle that we meet with in our way."—thus Japanese publicists lecture the Japanese nation.

But, to maintain itself in a position of power, a country needs something else than fleets and armies.

In order that the strength of a nation be not evanescent but be built on a firm and lasting foundation, it is necessary that the nation reserve its strength and that its energy be not exhausted. It is to be feared that in the Land of the Rising Sun, these truths are not welcomed. That land puts forth all its efforts in order that it may increase more and more its armaments. And against whom are all these efforts directed? They can only be directed against Russia. But a war cannot occur between two nations unless there is a serious collision of interests between their respective Governments. The present policy of Russia does not, however, give occasion for any such collision of interests. In Manchuria we are only guarding our railways on which we have spent enormous sums of money. Our action there cannot be a menace to Japanese interests. On the contrary it will assist Japanese interests. Our presence in Manchuria will on the one hand provide a new market for Japanese goods and furnish on the other a vast field for the (commercial) enterprises of the Japanese nation. Japan claims to be closely interested in Korea and we have never questioned that claim. Japan's position in Korea may be very bad for Russia but Russia does not quarrel about the matter.

Whence comes, then, this great danger which tends to force Russia and Japan to enter on a duel. The peaceful policy of the Russian Government excludes the possibility of any kind of aggressive action on our part. Consequently Japan must rid her head of the nonsense that Russia is only awaiting a favourable opportunity to pounce on her. Once she does so, she can understand that it will be quite safe to reduce the expenditure on the maintenance of her warlike strength.

If Japan realizes that she need only be anxious about the increase of her own national prosperity and need not aimlessly increase her army and fleet, then Japan has undoubtedly a great future before her. If on the contrary she is seized by a jingoistic spirit and regrets the counsels of plain common-sense, then a sad end is very near for her. Without any war, the enormous burden of expenditure which her army and navy entail will overwhelm her in irretrievable ruin.

AN EXTRAORDINARY CANARD.

In another number of the *Noroe Vremya* a very singular piece of intelligence from Vladivostok is published. It is to the effect that at a point on the Korean coast, about two days distant from the Russian frontier, two Japanese vessels recently put in an appearance and commenced unloading stores of various kinds. A kind of depot was then constructed and a number of soldiers landed to protect it, while in the meantime the ships returned to Japan in order to bring out another load of stores.

The *Noroe Vremya's* correspondent seems to be under the impression that this is the beginning of a base of some kind to be used in case of trouble between Japan and Russia and he is indignant at the Japanese establishing it "right under our nose."

FROM THE "NOVOI KRAL."

On the 9th inst., General Alexieff gave a dinner in honour of the English Admiral, Sir Cyprian Bridge.

A new daily paper, the *Harbinski Vestnik*, has appeared at Harbin. Its aim is to promote the relations, especially the commercial relations, between Russia and China, and, though it is at present published in Russian only, it will appear from the month of August in Russian and Chinese. The first number appeared on the first of June (R.C.).

The census that has been made for the town of Port Arthur gives the following figures. The whole town, that is to say the old town, the new town and the "Tiger's Tail" has 42,065 inhabitants, 34,313 men, 4,297 women and 3,455 children. Deducting the army there remains 28,480 inhabitants. There are at Port Arthur 17,709 Russian subjects, 23,494 Chinese subjects, 678 Japanese subjects, and 38 Asiatics other than Japanese or Chinese. There are 246 non-Russian Europeans in the town and 143 Russian Jews belonging neither to the army or navy.

The Russian population, including the army and navy, is composed as follows: 8 ecclesiastics, 1,171 noblemen, 32 large merchants, 73 merchants, 1,884 shopkeepers, 14,022 peasants; 342 individuals have no fixed employment.

The Japanese population includes 67 merchants, two masons, 32 carpenters, one sail-maker, 3 joiners, two manufacturers of various machines and instruments, 4 ship's painters, 46 of various other occupations.

A census of the population of Harbin will soon be taken. It is estimated approximately at 20,000 or 22,000, without counting the army or the or the native population.

The rumours regarding the seizure of the forts at the mouth of the Liao river originated in the fact that 500 men who were marching towards the post situated at the south of the Peninsula made temporary use of the said forts in order to rest themselves.

The *Siberskaia flagn* complains that Southern Manchuria,—Mukden, Kirin and Harbin are invaded by English merchants. It urges the establishment of Russian manufactories in Manchuria in order to meet this competition.

It is announced from the Liaonian post that three Russian merchants who were traversing that part of the country in order to buy cattle have fallen into the hands of the brigands, who tortured them. A Chinese, devoted to the Russians, saw this and travelled 30 versts to the Liaonian Station in order to convey the intelligence to the commander, who at once sent a party of 50 Cossacks to the rescue.

"BRASSEY'S NAVAL ANNUAL."

Since the renewal of interest on the part of the British people in their Navy and the almost universal recognition of its paramount importance as the chief means of insurance against foreign aggression, the number of persons who read and refer to *Brassey's Naval Annual* must have undergone a very marked increase. Yet it is essentially a technical work, concerning itself with a great deal which if the ordinary man reads about he can hardly be expected to understand. Take the edition for 1903 which has just come to hand. The usual articles on the progress of the British and foreign navies and on comparative strength, manœuvres, marine engineering, lists of war ships, chapters on armour, projectiles and guns, the naval estimates, can be appreciated only, it might seem, by persons who have more or less knowledge of naval matters. There are, however, certainly a great many people who for one reason or another do very intelligently study the information thus furnished. For one man who a few years ago could discuss with knowledge the comparative powers and speeds of various vessels in the British and foreign navies, there are now we should say, ten of the same category.

Moreover this volume contains special articles which should certainly appeal to the more general reader. Such for example is that by

Lieut. Carlyon Bellairs, R.N. (retired)—who will be remembered by not a few people in Japan as an enthusiastic yachtsman—on submarine cables; and the chapters by Sir R. Vesey Hamilton, and Mr. Bellairs as to Lord Selborne's new education scheme, possess an interest that will, we imagine, be understood by the British taxpayer however little he may know of ships and guns.

We gather from the preface that the editor (Mr. T. A. Brassey) fears the large and continued increase in the naval estimates will produce a reaction which will have most serious consequences on the future defence of the empire. Indeed, he says, the result of bye-elections may be taken to indicate that such a reaction has set in, and he points out that it is unwise for those responsible for the administration of the Navy to take full advantage of the liberality of Parliament. Britain, he adds, is practically maintaining her fleet on a war footing in time of peace. Additions have been made to the battleship strength of the British Mediterranean Fleet which are not justified by the increase in the preparations of possible enemies in Mediterranean waters, for the French have a smaller force in commission and in reserve than they had a few years ago. But the objection to increase, we note, has reference chiefly to manning and to naval works. Under the former head the estimates for 1903 were augmented to the tune of £619,800, and under the latter of £402,000. The manning policy which compels the country to keep a large number of ships in commission in time of peace in order to give the necessary training to the *personnel* has, according to Mr. Brassey, thrown a heavy burden on the resources of the country, the financial effects of which on the charge for pensions are as yet hardly felt; immense sums of money are being lavished on naval works, and while at Portsmouth and at Chatham obsolete ships crowd the basins and building slips are empty, it is proposed to establish another dockyard on the Firth of Forth. In view of the exertions being made elsewhere little reduction of the shipbuilding vote is possible, but very large economies, it is thought, could be made by reducing the number of men in the permanent force, by the creation of an adequate reserve, and by restricting the excessive expenditure. One cannot but feel that there is great weight in all this, and that a little more parliamentary criticism of the estimates might be wholesome.

On opening this work attention is immediately caught by the fine plates which, while enhancing its value, undoubtedly ornament it. Of British vessels there are here represented the battleship *Russell* and the armoured cruiser *Monmouth*, each a splendid specimen of her class. There are two Russians—the battleship *Pobieda* and the cruiser *Askold*, both of which are now on this station. Of the former it is remarked that she presents a huge target, far larger than any other ship at the Spithead review, where she represented the Russian navy. Two German battleships, the *Kaiser Barbarossa* and the *Wettin*, are illustrated; one U.S. battleship, (the *Maine*)—which, to judge from the plate, offers target area about equal to the *Pobieda*; an Austrian battleship built for Chile, but dispensed with by that Power, of which experts write in terms of praise. There are also nearly a dozen excellent plans showing the extensions and new works proposed in harbours and dockyards.

The general review of the position by Lord Brassey emphasises the opinions expressed by the editor as to the increase of naval expenditure and endorses his call for the exercise of economies. The writer insists most strenuously that Britain's sea power must be maintained, because it is upon her Navy she depends for the protection of her commerce. Yet, he says, it is by wisely husbanding resources in peace that the country may be possessed of more elastic resources in the contingency of a great naval war. Leaving out the United States as a possible foe he compares Britain's naval expenditure with the money spent on the same object by France, Russia and Germany, and finds that the aggregate of the latter for 1903 (which is probably swelled by extraordinary expenditure) is £34,288,000, while Britain expends £38,143,000 on herself and her possessions.

And yet British warships are built more cheaply than those of any other Power. Examples are given to illustrate this—the case of the *Majestic*, 14,000 tons, costing £895,504, and the French *Charlemagne*, 11,108 tons, which cost £1,096,432—and the report of the French Committee is cited which shows the great difference against France in respect of the cost of both labour and material. Lord Brassey finds that the battleships now being produced by Britain offer little scope for criticism, and he writes approvingly of the large cruisers that are being built. At the commencement of the present year Britain had under construction ten battleships of 156,000 tons and 22 large cruisers of 221,800, as against the six battleships of 89,200 tons and eight cruisers of 92,800 tons building by France, Russia's six battleships of 87,900 tons and three cruisers of 20,000 tons, and Germany's six battleships of 76,400 tons and three cruisers of 27,600 tons.

Comparing strength, he calculates that Britain's power in ships in commission in European waters shows a decided superiority over any conceivable combination, and, including the new and more powerful battleships about to be laid down, she will be nearly equal in battleship tonnage to the combined strength of France, Russia, and Germany in 1907. Moreover she has an unchallenged superiority in all classes of cruisers, and not least in those of the most powerful type. While near home her superiority is indisputable, in China her squadrons are approximately equal to those of Russia in battleships and large cruisers, and the treaty recently negotiated with Japan secures the support of a powerful ally in case of need with a fleet of six first-class battleships and six first-class cruisers. On this subject we extract the following:—

The additions to the battleship strength of the various navies during the past year have not been very numerous. Germany is almost the only Power that has succeeded in carrying out its programme, and, as a consequence, the German Navy stands now, for the first time, second to our own in completed first-class battleships. In this, the chief element of naval strength, we are more than up to the two-Power standard. We have 33 first-class battleships completed, as compared with Germany 12, France 10, Russia 9, and the United States 9. In completed battleships of the first class, we are equal to a combination of any three Powers; but if we include vessels under construction, we have 43 ships to a total of 56 for France, Germany, and the United States. In second-class battleships, a Franco-Russian combination would outnumber us by two to one.

During the year there are to be laid down for the British Navy three first-class battleships, for Germany two, for the United States five (three of 16,000 tons and two of 13,000 tons), while two battleships of 16,000 tons are reported to be in contemplation for the Russian Navy. The position in 1904 will probably be as follows:—

Battleships	England.	Germany.	United States.	France.	Russia.
1st Class—					
Built	38	14	12	11	11
Building...	8	6	12	6	6
Total...	46	20	24	17	17

In completed first-class battleships we shall therefore be equal to a combination of any three Powers. The position in 1905 cannot be calculated with any degree of certainty. The following is a probable estimate of the numbers of completed battleships. No estimate can, of course, be given of the numbers under construction, which are dependent on the programmes adopted a year hence:—

Battleships 1st Class	England.	Germany.	United States.	France.	Russia.
1st Class—					
Built	40	16	12	11	11
Building...	17	13	13	6	6

The above estimate for the United States is a liberal one. In 1905 the British Navy will, in first-class battleships, still be practically equal to a combination of any three Powers.

In the important class of armoured cruisers, which in the latest designs are approaching the battleships in offensive and defensive power, the present position is satisfactory. We have (including the protected cruisers *Powerful*, *Terrible*, and *Diadem* class) twenty completed to a total of ten for Germany, France, Russia, and the United States. In 1904 the position will probably be as follows:—

1st Class Cruisers	England.	Germany.	United States.	France.	Russia.
1st Class—					
Built	30	3	2	6	3
Building...	12	2	9	5	?
Total...	42	5	11	11	3

The programme of construction for the British Navy as regards battleships and first-class cruisers appears sufficient to meet the efforts which are being made elsewhere. A larger number of medium sized cruisers are needed for the protection of commerce.

There is an interesting reference to the need for concentration. The essential principle to be followed in order to make the most effective use of our sea power is concentration on the decisive points. The naval force of France is concentrated in the Mediterranean, that of Germany in Northern waters, that of Russia in the Far East. In Britain's case to maintain naval forces, consisting of vessels useful only for peace services, in waters where we have no rivals is a waste of money. It is due to the Admiralty to say that the changes they have made in the distribution of ships are in the right direction, and that the policy of concentration in home and European waters has been begun. Reductions are suggested in the Atlantic squadrons and even in the China squadrons. The complements in the China seas number some 8,000 men and the cost of maintaining the squadrons is £1,430,000. A reduction should be possible by the gradual withdrawal of small vessels. On other stations, says Lord Brassey, the flags of the leading maritime Powers of continental Europe are rarely seen and many British vessels might be withdrawn without prejudice to our interests. Their crews would materially help in the manning of the powerful battleships and cruisers now in hand. Finally the writer says the suggestion that complements should be permanently retained but with reduced numbers merits the serious consideration of the British Admiralty. The full numbers for ammunition parties and for manning every gun in secondary armaments can hardly be indispensable in peace service, and complements could be promptly raised to a war footing from the Reserves.

Passing to the efficiency of the *personnel* the writer refers to the new education scheme. The altered character of the modern navy had long ago called for a corresponding change in the subjects and methods of professional training. To discuss the ultimate developments in relation to the position of officers would be premature, but he thinks it is difficult to believe that engine room duties can be interchanged with those of navigation and command. The promotion of engineer officers to the highest grade should be appropriately found in the dockyards and in Admiralty appointments.

The *personnel* of the great fleets for 1902 is given as follows: Great Britain 122,900, France 53,000, Russia 62,000, Germany 33,500, United States 37,800, Japan 31,000. The permanent force of the British navy is satisfactory; in ships, in sea officers and men, inspired by the best traditions of the past, and highly trained, we may compare not to our disadvantage with the combined strength of France, Russia and Germany, and such a combination is too improbable to call for serious consideration. It is inconceivable, says Lord Brassey, that the foreign policy of the empire should be so ill-directed as to bring into array against us the united naval forces of the three chief Powers of Europe.

Great stress is laid on the necessity for strengthening the reserves. The permanent force which has in ten years increased by 50,000 men, involving an additional annual charge of £4,000,000 may be reduced to 100,000, when by availing themselves of the many resources they possess the Admiralty shall have brought the Reserves to a full standard of strength. And that standard he puts also at 100,000 men.

Lord Brassey devotes several pages to repairs and boilers, a reference to naval works, and a discussion of the colonies in relation to the Navy but we will not enter upon those subjects here. We have dealt briefly with the progress of the British Navy so that the chapter on that subject by the editor need not be treated at any length. The usual accounts are given of trials of ships already launched; and new ships planned or under construction are described, in some cases in considerable detail. Special attention is given to the *Duke of Edinburgh* and the *Black Prince* which were laid down this year,

and are the first cruisers designed since Mr. Philip Watts became Director of Naval Construction. Briefly, these vessels are of 13,530 tons, will have a speed of 22½ knots and an armament of six 9.2-inch and ten 6-in. guns—possessing the protection of a second class and the armament of a first class battleship combined with the speed of a cruiser. The chief innovations as compared with the *Drake* class (of which one, the *Leviathan*, is coming out to the Far East) are the substitution of four 9.2-in. guns for six 6-in. guns and the adoption of a central citadel for the protection of the secondary armament. A decrease of two-thirds of a knot in the estimated speed has to be accepted in order to provide for the additional protection. In fact, the *Duke of Edinburgh* more closely approaches the battleship type than any vessel hitherto called a cruiser. Owing to the refusal of the Admiralty, for the first time for some years, to give drawings of new ships we are deprived of the great assistance which plans afford towards an understanding of the technical details furnished, but it may be stated that three 9.2-in. guns may fire ahead and three astern without interfering with each other's sighting. The new ships can deliver in one minute 17,120 lbs weight of metal with an energy of 828,800 foot tons, as compared with the *Drake's* 15,840 lbs and 766,720 foot tons, and the *Devonshire's* 10,000 lbs and 488,400 foot tons.

We pass over the section devoted to gunnery with the remark that the *Crescent*, flagship on the North American Station, secured the highest results in 1902, her scores being: 6-in. guns—average of rounds per minute 5.79, average of hits per minute 4.37; 9.2-in. guns—average of rounds per gun per minute 0.83, average of hits 0.75. We have not space to deal with the chapter on Foreign Navies, or with that on Comparative Strength at greater length than we have already given to the subject. But we note that the decision to establish a naval base at St. Margaret's Hope, on the Firth of Forth, is not regarded with approval. If Dover harbour, say the writers, on which £3,500,000 is being spent, was not intended to serve as the coal depot and supply base for the squadron that may be required to operate in the North Sea in the event of war, this work should never have been undertaken. So far as repairing resources are concerned private yards should be available for His Majesty's ships in time of war, and as to the proposal for a North Sea squadron it is pointed out that in the Channel and Home squadrons there are no less than sixteen battleships, ten of the first and six of the second class, as against which the Germans have eight of the first class, and the French two of the second class and two of the third. It is suggested that the number of sloops and gunboats (11), besides river gunboats in commission in China, is excessive and the view is expressed that a few light draught fast cruisers would be more effective.

CONCERT AT THE PUBLIC HALL.

The concert given at the Public Hall on Thursday evening by Messrs. Horace Britt, 'cello, H. Nell, violin, and H. Jebe, viola, attracted a very good audience, and that all were music-lovers was soon demonstrated by the hearty applause with which they rewarded the performers at the close of the different items. It has often seemed to us a great pity that some other means of showing appreciation of good music rendered by clever musicians could not be evolved than that of clapping hands. Just as the senses are stirred to their depths by the pulsations of divine melody and the whole body is alive to the witchery and the mystery of the musician's art, comes breaking upon the ear the harsh, discordant battery of hands striking hands, smashing—yes, there is no other term—smashing the whole airy fabric of our dreams to the ground, blotting out the delicate, half-realised memories of the finer passages irrevocably, and destroying at a blow the chords of sympathy and understanding but a second before vibrating between player and hearer. But fashion has decreed that we must thank musicians in this noisy, barbarian fashion and so the torture

must continue, we suppose, till a more rational era dawns. This, however, is a digression. Mr. Horace Britt, in the course of Thursday's concert, showed himself to be a master of his instrument, combining a breadth of feeling with a most sympathetic touch as rare as it is charming; his tone is broad, pure, and expressive, his intonation certain, especially in the higher registers of the instrument: his *technique*, in one word, may be pronounced perfect. All the difficulties as presented in Popper's "*Tarantella*" and *Fantasia* on a Russian folk-melody, were overcome with comparative ease. The clearness of attack, double-stopping, delicate harmonics, and the nuances demanded for an artistic rendition of the above-named works, were most admirably and carefully rendered. In the smaller selections, mainly arrangements for 'cello and other instruments, Mr. Britt showed himself in perfect sympathy with the composer's ideals. He was particularly successful in Bizet's *Adagio* (presumably taken from "*L'Arlesienne*" suite) and Chopin Nocturne No. 2. Fauré's *Romance* and Saint-Saëns popular song "*Le Cygne*" were effective arrangements. We sincerely hope to have the pleasure of hearing Mr. Britt again and if favoured we should like to hear a few more representative composers of the violoncello-school, viz., Goltermann, Davidoff, Swert, etc., or he might introduce us to the 'cello works of Beethoven, Hummel, Lindley, and the late lamented virtuoso Piatti. These interspersed with a few *arrangements* would form an attractive and artistic programme. Mr. Britt was most ably supported by Messrs. Jebe and Nell. Mr. Jebe showed his powers as an executant in two well-written violin trifles from the pen of Mr. Britt; Mr. Nell gave a correct, if unemotional reading of Thomé's well known "*Simple Aven*." Mrs. W. T. Payne and Mr. N. G. Maitland contributed the vocal numbers of the programme. Mrs. Payne was in fine form, and her rendering of Flegier's "*Love-song*" was charming; the song was further enhanced by the addition of violin and 'cello obbligati. An encore being demanded Mrs. Payne kindly acquiesced and delighted her listeners once again. Mr. N. G. Maitland gave an artistic rendering of Clay's well known "*I'll sing Thee Songs of Araby*." Miss Mendelson and Mr. Mason acquitted themselves right well as accompanists.

During the concert Mrs. Payne and Miss Mendelson were the recipients of lovely sprays of flowers. We append the full programme:—

PART I.

1. 'CELLO SOLO.....(a) *Adagio*.....G. Bizet.
(b) *Gavotte*.....D. Popper.
MR. HORACE BRITT.
Messrs. H. NELL and H. JEBE.
2. 'CELLO SOLO.....Nocturne.....Chopin.
MR. H. BRITT.
3. SONG....."A Love Song".....Flégier.
MRS. PAYNE.
(Cello and Violin Obligato.)
4. VIOLIN SOLO.....(a) *Berceuse*.....H. Britt.
(b) *Danse Hongroise*.....
MR. H. JEBE.
- Messrs. H. NELL and H. BRITT.
5. 'CELLO SOLO.....(a) *Le Cygne*.....S. Saëns.
(b) *Tarantelle*.....D. Popper.
MR. H. BRITT.

PART II.

1. 'CELLO SOLO.....Meditation from "*Thais*".....Massenet.
MR. H. BRITT.
2. SONG....."I'll Sing Thee Songs of Araby".....F. Clay.
MR. N. G. MAITLAND.
3. VIOLIN SOLO....."Simple Aven".....F. Thomé.
MR. H. NELL.
- Messrs. H. JEBE and H. BRITT.
4. 'CELLO SOLO.....*Romance*.....G. Fauré.
MR. H. BRITT.
5. 'CELLO SOLO.....*Fantasia* on Russian Melodies.....D. Popper.
MR. H. BRITT.
- Messrs. H. JEBE and H. NELL.

Local theatre-goers, says the *Straits Times*, who remember Harry Hall, once with the Willard Co. and afterwards with the Pollards, will be interested to hear that he is now in Natal with a juvenile opera company of his own, and contemplates coming to the Far East in the course of the next few months.

THE FOURTH OF JULY.

We are asked to say that, owing to the absence of Mr. Griscorn, who is visiting the Osaka Exhibition, no reception will be held at the Legation on the Fourth of July.

The Baseball game between the Peers' School and the Y.C. & A.C., will begin at 2.30 p.m. on the Fourth of July, after which Tea will be served in the Pavilion, to which the community is invited.

Fireworks will be displayed at 9.15 p.m. at the usual place, opposite the Grand Hotel. The Tokyo City Band will play at the Club Hotel during tiffin and dinner on the Fourth of July. A special menu has been arranged.

THE PLAGUE.

Dr. J. M. Atkinson, Principal Civil Medical Officer, informed a representative of the *Hongkong Daily Press* on June 18th that there was no doubt the plague epidemic is on the wane in Hongkong. Amongst Europeans it had not been of a virulent character, only four out of 27 attacked having succumbed.

Governor Sufu issued on June 26th a prefectural notification to the effect that any person who finds a dead, or traps a live, rat in this city must remove it within twelve hours to a police station, the office of the disinfecting committee or of the chief of the sanitary association; and any one who contravenes the warning will be punished by police detention or a fine.

A telegram under date June 24th from Mr. Kurino, Minister at St. Petersburg, according to the *Official Gazette*, states that the Russian Government has notified the cancelling of the notification that Nagasaki is a plague-infected place.

The steamer *Kaga Maru*, which is detained at the Nagahama Quarantine station because of plague case, will be released on June 29th at 2 p.m.

The steamer *Kaga Maru*, which was detained at Nagahama Quarantine station in consequence of a plague case, came into harbour on June 29th at 2.30 p.m. after the completion of quarantine. The passengers in the cabin were allowed to land on Saturday and those in the 2nd class and steerage on Sunday.

The plague mortality throughout India continues to decrease, though it is still double what it was this time last year. During the week ended the 4th June there were in all 8,676 deaths, 7,352 of which occurred in the Punjab.

RECORD BIG-GUN SHOOTING.

"Straight Shooting" writes to the *Daily Express* as follows:—

"With regard to the great interest in the heavy gun prize-firing which is carried out in H.M. Navy, I send you the extraordinary results made from the 12in. Mark VIII. guns mounted in barbettes, which were accomplished by the two captains of turrets in H.M.S. *Goliath*:—

Ship steaming twelve knots.

Range, 1,750 yards to 1,400.

Time allowance, 3mins. run for each captain of turret.

W. Dellar, C.G.I., of the after barrette—Seven rounds, six hits on target.

G. Richardson, P. O. G. I., from fore barrette—Six rounds, six hits on target, in 2mins. 32 secs.

"I think that for captains of turrets, shooting with these guns in the Navy—viz. thirteen rounds, twelve hits in 5 mins. 32 secs.—this is at the present a record not likely to be beaten considering that the guns in the barbettes, which are mounted in pairs, were both used on the run, firing alternately, or, as it is termed in the service, independent firing, right gun commencing.

NEWS OF THE WEEK.

Two convicts of the Maebashi jail escaped on the night of June 28th.

The battleship *Wisconsin* arrived on June 28th at Kobe from Yokohama.

The date of Imperial Ordinance 380 should be Sept. 27, 1900, not 1890 as stated on Thursday.

Two cases of cholera appeared on June 27th in the mill of the Nishinomiyama Cotton Spinning Co., Hiogo.

Sixty-two Chinese students from Shan-tung province arrived at Nagasaki on June 29th, and immediately left for Yokohama.

During the month of June, 235,946 tons of coal were sold at Moji of which 185,662 tons, were exported abroad.

K. Tashiro, head man of the village of Tamafu, near Utsunomiya, was arrested on July 1st on a charge of embezzlement.

About 780 feet of telephone wire was cut and stolen on July 1st at a place near Tsurumi on the line between Tokyo and Osaka.

A hundred and twenty German officers and fifteen hundred soldiers arrived on June 26th at Nagasaki from Tsin-tao en route for home.

A case of suspected cholera was reported on June 29th at the Exhibition, Osaka. The patient is a man who appears to be about 26 years of age.

A telegram from Shimonoseki states that six hundred and sixty-seven soldiers arrived there on June 28th from Formosa by the steamer *Saikyo Maru*.

Mr. J. Adam, Interpreter of the French Legation in Tokyo, says the *Nichi Nichi*, was to leave on July 2nd for home by the Siberian Railway.

K. Ito, President of the Yokoshiba Bank, Chiba Prefecture, was arrested on June 30th on suspicion of fraud. Subsequently his dwelling was searched.

A telegram from Taipei states that heavy rains prevailed on June 25th causing severe damage to railway buildings, etc. The new crop of rice has been brought into the market.

Early in the morning of June 28th a young man entered the Buddhist Temple Daigan-in in Shiba park, Tokyo, and having threatened the chief priest, Y. Otani (83), stole yen 4.

Two cases of dysentery appeared in the High Female School, Yamanashi prefecture, on June 24th. The appearance of 22 cases of the same disease was reported on the same day in Tochigi prefecture.

The *Niroku* received a telegram under date of July 1st from Tientsin stating that three Norwegian steamers have been engaged to transport ammunition and provisions from Port Arthur to the Yalu River.

Prince Kan-in, President of the Domestic Industrial Exhibition, arrived at Osaka on June 28th to be present at the ceremony of presenting the prizes and rewards exhibitors. He proceeded to the Hanaya Hotel.

A woman named Hana (24) attempted on June 25th to commit suicide by jumping into the well of an unoccupied house at Shinsaka-machi, Akasaka, Tokyo. She was rescued by neighbours. Insanity is reported to be the cause.

A farmer named T. Murakami living at the village of Daishoin, Nii, Matsuyama, murdered on June 29th a man named H. Mumebara by shooting him. The offender was at once arrested. The cause is understood to be a dispute.

The *Asahi* states that a telegram from London was on June 26th received in Yokohama to the effect that the 5 per cent. Japanese bonds of the

yen 50,000,000 War Loan have fallen 5s. 1¼d. from the previous quotation, the present price being £102.11.6.

The *Asahi* states that Viscount Torio and Kajeda, of the Privy Council, recently submitted their opinions in writing regarding international questions to their colleagues, who are now examining them in their private capacity.

Mr. M. Nagasawa, chief of the rural office of Hongo, Tokyo, died suddenly on July 1st at 1.30 p.m. in the municipal office as he was congratulating Mr. Ozaki, the newly appointed Mayor. He had suffered from heart disease.

The circulation of forged notes seems still to go on in Tokyo. On the night of June 30th a man bought a quantity of cleaned rice for yen 1 at the shop of a rice dealer named Kobashi, at Shitaya, giving a forged yen 10 note and receiving change of yen 9. He was arrested at once.

The competition between the Kwansei Railway Co. and the union of steamship companies, says the *Jiji*, grows more serious. The latter has decided to lower to yen 80 the fare for the trip between Osaka and Tadotsu and this rate will be in force from June 29th.

The interment of the ashes of the late Marquis C. de Nembrini Gonzaga took place on Tuesday forenoon at the Yokohama Cemetery. There was no ceremony but a number of friends stood by while the casket was lowered into the stone receptacle prepared for it.

K. Murata, director, and K. Onda, clerk, of the Chuwo Warehouse Co., Tokyo, who had been charged with embezzling over yen 30,000 belonging to the company, were each sentenced on June 29th in the Tokyo District Court to five months' imprisonment with hard labour.

The owners of the two gold watches recently found by the Kagacho police claimed their property at the station on June 26th. One belonged to Mr. A. E. Caro, of Messrs. Pollak Bros., who lost it on May 23rd, and the other belonged to a Formosan woman recently staying in this city.

U. Iwasaki, a farmer, (38), living at Kawasaki, attempted on June 25th to murder his wife Kane (29) and Taki (58) a relative, by attacking them with a large iron stick. The offender immediately absconded. Both women are in a serious condition. Jealousy is said to be the cause.

A Peking correspondent of the *Niroku* had occurred, at Kaifong district, Honan province. Over five hundred rioters attacked the U.S. missionary church and inflicted severe injuries on two missionaries. The governor of the province had despatched two hundred soldiers to the scene to put down the mob.

A dried-fish dealer named T. Takashima (38) living at Kuroe-cho, Fukagawa, Tokyo, attempted on June 28th to murder his mother and his wife with a large knife. He then committed suicide by cutting his throat. His wife succumbed to her injuries, but the old woman will recover. The cause of the tragedy is reported to be poverty, the man's mind having become unhinged.

The Government is reported, according to the *Asahi*, to have decided to pay a subsidy of yen 30,000 for a tea shop at the St. Louis Exhibition for which K. Aisawa and other tea merchants had applied. For the encouragement of the tea trade, the Government is said to have decided on paying a subsidy of yen 70,000 to the Central Tea Guild. The *Asahi* states that the amount is arranged for in the Budget for the coming year.

S. Fujita (19) office boy of Mr. F. W. Horne, No. 70, and M. Wakui (31), godown man of Messrs. Hutchison & Co., No. 183, were arrested on June 29th by the Kagacho Police on a charge of theft. It appears that the former on the 23rd stole six blank cheques of the Chartered Bank belonging to his employer, filled one up for yen 50 and appended the forged signature of Mr. Horne. He then drew the money at the shop of

the Chinese exchange Van Tai, No. 72, and spent it in Magane-cho. On examination at the police station it was found that he had also stolen some mechanical instruments from the stock of his employer and sold them through the other accused.

A train of the Tokaido Railway collided on June 30th with an omnibus at a point between Kisogawa station and the bridge over the Kiso river. The horse and one of the two omnibus-men were killed and the other was severely injured. The cause assigned is that the horse was startled by the sound of the train and jumped on the line.

The charge against Mr. Yasui, Member of the Diet for Okayama Prefecture, who was arrested on June 23rd at the Hokoku Hotel, Osaka, is stated by the *fiji* to be that he was concerned in the counterfeiting of *sen* 5 nickel coins for Korea. Just before his arrest he had made a contract with a trader named T. Nukii, residing at Shansang (Korea) to supply 500,000 pieces and received in advance *yen* 2,550.

S. Nakasawa and J. Tasaki, formerly employees of the Singer Manufacturing Co., No. 80, Yokohama, who collected in the end of May this year *yen* 336 for 6 sewing machines and also *yen* 56 from customers in Kawagoe during their service in the firm, were charged with fraud by the manager of the company in the Yokohama District Court, through the Kaga-cho police. They were, however, discharged on June 26th by the public procurator on the ground that the evidence against them was insufficient.

The time schedule for the trains of the Nippon Railway Company, between Ueno and Awamori has been amended and will be in force from July 11th as follows:—down-trains: leaving Ueno station, Tokyo at 10.40 a.m. and 7.45 p.m. arriving at Awamori at 7.10 a.m. and 4.31 p.m. of the following day respectively; up trains: leaving Awamori at 11.05 a.m. and 7.30 p.m. and arriving at Ueno at 7.50 a.m. and 4.15 p.m. on the following day respectively.

Prince and Princess Rupprecht had audience of the Emperor on June 30th at 10.30 a.m. At noon of the same day Prince Kuni held a banquet at the barracks of the 3rd regiment of infantry (Imperial Guards) at which the Bavarian Prince and over twenty others were present. Among them were Count Arco Valley, German Minister, Herr von Erckert, Secretary, and Major von Etzel, Military Attaché of the German Legation, Lieut.-General Terauchi, Minister of War, and Viscount Tanaka, Minister for the Imperial Household.

Mr. Edward H. Loftus, secretary of the Siamese Legation in Washington, has just been decorated by the King of Siam with the 4th Class of the Order of the White Elephant in recognition of his services last autumn during the visit of the Crown Prince to the United States. This Order is a higher step than the 4th Class of the Crown of Siam which was conferred on Mr. Loftus in 1897.—The King has been pleased to give and grant unto Frederick Bray, Esq., His Majesty's Royal licence and authority that he may accept and wear the Insignia of the Fifth Class of the Royal Siamese Order of the White Elephant, conferred upon him by H.M. the King of Siam, in recognition of his valuable service as tutor to H.R.H. Prince Chakrapongse.

Attention has at last been turned to the problem of Thibet, says the Simla correspondent of the *Daily Mail*, and action is being taken by the Government of India which is likely to have exceedingly important results. The 32nd Pioneers and a company of Madras Sappers have been sent to rebuild the road up the Teesta Valley to the frontier. A railway from Siliguri, the present terminus of the Northern Bengal State Railway to the spot, 11 miles distant, where the Teesta Valley route debouches from the Himalayas into the plains of India, has been surveyed, and mention begins to be made in the Indian Press of the Torsa Valley route, through independent Bhutan territory, by which it would be possible to push

a mountain railway right up to Thibet, since it avoids the snowy passes over which the Jeylep road must climb.

Details of the escape of a convict from Maebashi prison show that a small saw had been smuggled in to the prisoner in a book bound in foreign style. With this, early in the morning of June 29th, and in stormy weather, he cut a hole in the floor through which he got out of the cell. Having made a ladder with pieces of bamboo and other materials that were left out of the workshop of the prisoners, he escaped by scaling a brick wall 20 feet in height. He is the leader of a gang of robbers who infest the districts surrounding Tokyo.

A sensational action for libel has just come off at Saigon. It was brought against the *Opinion*, a newspaper there, which had attacked certain officers in Laos, an up-country province in Cochin-China, for putting down a rising among the natives with a severity which bordered upon cruelty. The evidence led brought out these circumstances, as well as the fact that the officers, in doing so, had merely carried out the instructions of their superior officer, now dead. For the defence it was urged that the *Opinion* did not defame the two officers but merely showed up a system of government which allowed such atrocities. The jury returned a verdict of acquittal.

The opening paragraph in the *American Silk Journal* for June reads:—

Every conceivable reason is assigned for the very decided slump in the silk trade that occurred in April, just when all seemed going along swimmingly, and the only question was: How on earth are we going to meet the demand and take care of our deliveries as per contract? The bottom fell out between two days, as it were, and the "authorities" have been engaged ever since in ventilating their respective theories as to the cause. Travelling men went out with high hopes and an amazing collection of samples, but in a number of instances "cut it short" and returned far ahead of their schedules. The most rational cause assigned is that the normal output of our large and splendid equipment of high-speed looms is about double the consumptive capacity of the home markets, and we have suffered from an acute attack of over-production.

Baron Sone, Minister for Finance, notified in the *Official Gazette* on July 1st that during one month from August 1st to 31st the exchange rate of foreign money shall be observed at the Customs according to the following table:—

	Yen.
British India Rupee	0.654
{ Shanghai Tael	0.144
{ Tientsin "	1.204
{ Hankow "	1.172
Mexico Dollar	0.856
Manila "	0.845
Great Britain { Silver "	0.825
{ H'kong Silver.1 ..	0.825
Siam tical	0.514

The exchange rate for those foreign moneys that are not provided for in this table will be subjected to the process hitherto adopted.

The forty-seventh annual report of the Missions to Seamen is to hand. We note appreciatively the increasingly large value of the work done by this institution, and as to Japan we quote what appears to be the only extended reference to ports in this country. Says the report:—

British crews in Japan have great cause for gratitude to the Bishop of Osaka, who has opened a very suitable Seamen's Institute and boarding house for crews of all nationalities frequenting Kobe. The small British and American community there have been very generous. But the Chaplain urges an appeal to the home public for £150, to build on a wing for more sleeping-rooms. The ships are well served by the Chaplain in that heathen port, who well writes that "numbers of missionaries who leave the homeland every year to carry the glorious Gospel message to the nations of these far-distant lands, would find a much more ready reception of their message could they point to the godly, righteous and sober lives of the European sailors who frequent heathen ports."

AMERICAN MATTERS.

A movement has been started to raise \$30,000 to provide the battleship *Ohio* with a silver service.

Mexico has entered into a treaty with Santo Domingo, Argentine, Peru, Bolivia, Guatemala, Salvador, Paragday and Uruguay to submit all controversies between these countries to arbitration.

In the case of John Burke, a child of seven years, who, through his father, sued the Borden's Condensed Milk Co. in the Supreme Court, Brooklyn, to recover for personal injuries, the jury returned a verdict for \$10,500. The boy was run over and permanently crippled.

The Order of Locomotive Engineers commenced with twelve members thirty-nine years ago, and now numbers over 40,000 in the United States and Canada. In 1887 the insurance department was established, conducted on the assessment plan, and it has paid over \$12,000,000 in benefits to widows and orphans.

Railway speed records were broken on May 24th when the Lake Shore's Twentieth Century Limited, hauled by engine No. 603, ran from Toledo to Elkhart, 133 miles, in 114 minutes. This is two minutes lower than any previous time. At intervals along the run the speed averaged seventy-two, eighty and ninety miles an hour, the general average being seventy miles.

The U.S. War Department is giving serious consideration to a proposition that has come through Colonel Clarence R. Edwards, chief of the Bureau of Insular Affairs, from Brigadier General Henry T. Allen, chief of the Philippine constabulary, looking to the improvement of that service. General Allen believes that a fine career offers in the constabulary for graduates of the American military schools who have any special aptitude for military work. He believes that 15 or 20 such young men annually could be placed in the constabulary as officers to the advantage of the service.

A writer in the London *Daily Mail* comments on the pronounced difference of public taste in the matter of periodical literature in England and in America. London, he says, is flooded with "weeklies," a class which in New York is comparatively sparsely represented, particularly in the field of literature and criticism. In monthly journalism, America leads, he admits, in the matter of illustration, but falls slightly behind in purely literary quality. In the matter of heavy reviews and quarterlies he easily claims the lead for England. Are these facts, it may be asked, really indicative of a difference in public taste?

An American watch-manufacturing syndicate, composed of the American Waltham Watch Company, the Elgin National Watch Company, the Keystone Watch Case Company and the Crescent Watch Case Company, representing a combined capital of \$14,000,000, has bought out the American Watch Case Company, Limited, of Toronto, Canada, thereby controlling the entire watch trade of Canada. Prominent watch and jewelry manufacturers throughout the country regard the formation of the combination as preliminary to a movement to control the watch business in the United States as well, because they say the capital represented in the combination could buy out the Canadian company many times.

Rear-Admiral David Smith, U.S.N., retired, died at his residence in Washington on May 27th, after a long illness. He was a native of Scotland, born in 1834, but came to the United States at an early age, was graduated from Phillips-Andover Academy and Harvard University and in 1859 entered the engineer corps of the navy. He served creditably through the civil war and at its close, while assistant chief of the naval bureau of steam engineering, prepared valuable data on the work of the confederate commerce destroyers, upon which the government based its case before the Geneva Conference. Admiral Smith was the best known, perhaps, for his work in connection with the ventilation of war ships by the exhaust

method and for his inventions for standardizing engineering instruments of precision.

Will our "reformed poet in the frock-coat of a Secretary of State" send a protest to Russia against the massacre of Jews at Kishineff, asks the New York *American*, a Democratic paper whose editor, Mr. Hearst, was recently elected to Congress. If he will not do so, the same paper proceeds, then Russia's rulers will hear from Congress, and "they will know when they hear from Congress that they are hearing from the power that makes treaties and declares war. Let Mr. Hay bow as politely as he chooses to the bear with the bloody paws," adds *The American*, warningly, "that bear knows that there is a power over Hay, and from that power Russia will hear." This will explain the Reuter's message which reached Japan in the last week of June.

The fire loss of the United States and Canada for the month of May, compiled by the *Journal of Commerce*, shows a total of \$16,366,800. This is an unusually heavy sum for May, although not of course as large as the figures for May, 1901, in which month the Jacksonville conflagration occurred. The following table will show the losses for the first five months of the years 1901, 1902 and 1903:

	1901.	1902.	1903.
January	\$16,574,950	\$15,032,800	\$13,166,350
February	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,300
May	22,286,150	14,866,000	16,366,800
Totals.....	79,336,150	76,850,500	69,080,900

The *Mexican Financier* says of the plan to maintain a 50-cent dollar in Mexico:—"The scheme of the government will be the logical perfection of the experiment made by India from 1893 on. Mexico goes India one better. Instead of leaving the amount of money in circulation to be controlled simply by governing the new supplies, the purpose is to regulate the demand as well, by providing a gold exchange fund which will draw in money when it is redundant, if that condition should ever come to pass, and let it out again whenever it becomes scarce. As the government's operations along this line will be determined by the weakening or strengthening of exchange on abroad, they will be virtually automatic, and will not only keep the exchange steady from the start without any of the troubles and inconveniences India had to endure, but will also create a uniformly elastic currency, responsive in the highest degree to the varying needs of business."

The following table is taken from an article entitled "Railroad Mileage and Wealth," which appears in the current *World's Work*:

	Population.	Miles of railroad.	Internal commerce.	Wealth.
1850...	23,191,826	9,021	\$2,000,000,000	\$7,155,780,000
1860...	31,443,321	30,626	3,500,000,000	16,159,616,062
1870...	38,558,371	52,922	6,250,000,000	30,068,518,507
1880...	50,155,783	93,262	7,750,000,000	43,642,000,000
1890...	62,622,250	166,703	12,000,000,000	65,037,091,197
1900...	76,308,387	193,345	18,000,000,000	94,300,000,000
1902...	79,000,000	201,839	20,000,000,000	100,000,000,000

From the foregoing table it will be seen that in 1850, when the population of the United States was already more than 23,000,000, but the country was suffering from an utter lack of transportation facilities, having only 9,000 miles of railroad, the national commerce of the United States amounted to only \$2,000,000,000 per annum, while the total wealth of the country amounted to only a little more than \$7,000,000,000. In the fifty-two years that have elapsed from that time down to 1902, the railroad mileage of the United States has grown from only 9,000 to almost 202,000 miles, or more than 2,000 per cent. During this same period the population increased from 23,000,000 to 79,000,000, or only about 230 per cent., while the internal commerce of the country grew from \$2,000,000,000 to \$20,000,000,000, an increase of 900 per cent., and its wealth increased from \$7,000,000,000 to more than \$100,000,000,000, or over 1,400 per cent.

"Ere another century shall have gone to join the eternity of time," says the Baltimore *Ame-*

rican, "New York will be the capital of the world in all the word capital implies. What she has accomplished in two hundred and fifty years—and in considering her accomplishments we must remember that the greatest of them date back no farther than the last half-century—is but her beginning. She is just rounding into that form which will enable her to bring to the Western Hemisphere and centre about her busy thoroughfares the reins by which all the tangible and intangible affairs of men are managed, and once she holds those reins she will dictate the fortunes of the globe, commanding in all those matters which make for the temporal, spiritual, and intellectual enrichment of mankind. New York is to-day, at her two hundred and fiftieth anniversary, upon the threshold of that era of greater power and influence. Because of her achievements the nation is proud of her; for her greater development it looks with keen interest, rejoicing that a people so young have had it in them to work wonders at sight of which all other peoples stand aghast."

The hen's egg is a popular and a nutritious food of high value, and, according to the *National Provisioner*, the American hen is very busy now. She has on hand what is called the "egg season." That is the period of the hen's highest activity and productiveness. The season runs from April 1 to July. Then the farmer's barn is a noisy locality. During that period the fresh-meat man is heard to constantly complain that "the meat business is rotten." The eggs are, however, fresh and the most numerous. The dullness in the fresh-meat line is the result of the egg and meat competition for the table. The poultry product wins and gives sympathetic tone to the ham and bacon market, as ham or bacon and eggs travel together or in omelette form as a breakfast food. The extent of the spring competition of eggs with fresh meats may be gauged by the fact that from about the middle of March until June 15 there are about 750,000,000 eggs handled daily by the jobbers of the United States. For the season of ninety days named that would amount to 67,500,000,000 eggs. The egg season furnishes an overproduction for consumption. The price is then low. The surplus find their way into cold storage for fall and winter use. The Lenten season gives fresh meats its hardest forty-day pull. Meats could forgive pisces a lot of Fridays for the slowness of their blow as compared with the egg competition of Lent. Cold storage has been responsible for the all-the-year competition which meats feel from eggs. The incubators also help poultry by relieving the setting hen.

LAW CASES.

HANS PITZ v. J. F. WAGEN.

This action, instituted by Mr. Hans Pitz, wine merchant of Switzerland, against Mr. J. F. Wagen, No. 163, Yokohama, applying for a decree of bankruptcy, came up in the Yokohama District Court before Judge Kato on June 26th.

Mr. Hidaka was present for plaintiff and Mr. Kumakura for defendant.

Plaintiff's Counsel explained to the Court the reason for his application and the opposing counsel denied the statements made, after which the case was adjourned.

J. W. HALL v. F. STANILAND.

The hearing of this case was resumed in the Yokohama District Court before Judge Kano on June 30th when Mr. V. Blad and Misses J. Clausen and Preisler were examined as witnesses.

Mr. Blad stated that in connection with the sale of the ground and building of the private hotel No. 2, Bluff, he did not interfere as a broker or commissioner, but merely acted as adviser to Misses Clausen and Preisler when they enquired as to the price, etc., of the property. The ladies were his friends. He remembered that the enquiry was made in May last year, that the property was sold to the ladies by Mr. Staniland for yen 30,000, and that their enquiry of him was whether the investment was prudent and the price reasonable. In this trans-

action he did not consult with Mr. Staniland or his representative in behalf of the ladies. He knew Mr. J. W. Hall, of whom he asked his opinion about the price of the property, as Mr. Hall was fully conversant with such matters. The ladies received from the seller a letter in which he stated the details of the property and furniture and the items of the contract of sale. The witness remembered that the letter was shown or described to him by the purchasers, but he could not remember the details of the letter.

Cross examined, the witness said that he did not know number of *tsubo*, etc., of the property.

Miss Clausen stated that she purchased in joint account with Miss Preisler the ground and building of the private hotel, No. 2 Bluff, from Mr. Staniland for yen 30,000 in the end of June last year, the contract of the transaction being dated June 28th, 1902. Information as to the sale of the property she heard from a lady who was a friend of Mr. Staniland as well as of the witness. The name of the lady is Mrs. Harrington, now living at Karuizawa. In May last she saw Mr. Staniland to enquire as to the sale of the property, and subsequently she received a letter from that gentleman in which he described the details of the property and proposed the conditions of the sale. She did not remember whether she showed the letter to Mr. Blad, of whom she, however, asked in a friendly way about the price, etc. The contract of purchase was then made through Mr. de Becker. She never knew whether the advertisement of the sale of the property had appeared in the local papers. She did not see Mr. Hall about the transaction.

Miss Preisler was then examined on nearly the same points and similar replies were given.

The case was again adjourned till July 6th.

LEI CHIEN HSING v. J. C. HARTLAND.

The hearing of this case was resumed in the Yokohama District Court before Judge Kano on July 1st when a Japanese named Wakabayashi was examined as a witness.

The witness stated that he was entrusted by plaintiff and Kwang Ho Chong to collect the rent of the buildings in dispute and always delivered the money collected to plaintiff, during the years from October 1895 to January 1898. He was now collecting the rent and had been doing so since October 1902. The money was also paid to the plaintiff. He thought that the property belonged to plaintiff and Kwang Ho Chong. The ground rent he remembered to have been yen 40 per month in 1895 and it rose to yen 44 after October 1897. The two Chinamen purchased the buildings from Ah Wai, comrade of Messrs. Jardine, Matheson, & Co.

Plaintiff's counsel applied to the Court for leave to examine Ah Wai as a witness. The Court decided to do so on July 8th.

SIMON, EVERS & CO. v. K. YAMADA.

The following is a summary of the formal judgement delivered on June 27th in the Yokohama District Court in the case instituted by Messrs. Simon, Evers & Co. against K. Yamada, sugar dealer, in which case a verbal decree was given on the 15th.

Defendant is ordered to pay to plaintiffs yen 1,597.17, with interest at the rate of 6 per cent per annum from June 28, 1902, until payment is effected. The other claim of plaintiffs is rejected. The costs are ordered to be borne by the parties. On the security of yen 300 being deposited in the Court, plaintiffs will be permitted to seize temporarily the property of defendant.

Having summarized the statement and the evidence introduced by counsel of the parties the Court gave as the reasons for judgement: (1) The contention of the defendant with reference to the contract in which a clause saying "damage caused by sea-water shall be borne by plaintiffs but that by staining caused by the contents shall be borne by defendant" had been privately and arbitrarily inserted by plaintiffs was not sustained. (2) According to the statement of an expert, M. Masuda, the sugar in dispute was originally of inferior quality even if not

damaged by sea-water. As to 1,000 bags of sugar which were the first batch to arrive and which plaintiff had sold by auction on the premises of No. 25, plaintiffs did not introduce any evidence in Court. Inspection of Mr. Dodds with reference to the damaged sugar was not recognized because of the fact that no one applied to the Customs on May 1st, 2nd and 3rd for a permit to inspect sugar at the shed of the Midoricho Godown. Indeed, it could not be possible to inspect the goods or to take out samples from the shed without the permission of the Customs. By another statement of Mr. Dodds who inspected the sugar of the 2nd batch, it appeared that the damage was not caused by sea-water and the action of defendant in declining to take delivery was unreasonable. (3) The defendant's contention that he proposed on May 22nd, 1902, to plaintiffs the cancellation of the contract and that consequently he had no responsibility, was groundless, because having illegally refused to take delivery of the sugar for which he was responsible under the contract, he could not escape the responsibility by a mere proposal of its cancellation.

FIRES.

An outbreak of fire occurred on June 25th at Hiroshima, destroying three houses, including a notary-public's office.

Early on the morning of June 25th fire broke out in the office of the Geological Society in Tokyo. It was put out before any serious damage was done.

Fire broke out on the night of June 26th at Kita-nijo, Sapporo, destroying four houses.

Fire broke out about 2.30 a.m. on June 29th at No. 70 Yamashitacho, known as the Banquet Bar. The Satsumacho and Police brigades turned out promptly and two streams from the hydrants dealt with the flames but not before part of a partition, the ceiling and the roof and some furniture had been destroyed. The origin is unknown.

Fire broke out on June 28th in the house of a man named M. Matsui, at Shiwo-cho, Osaka, destroying two houses. Matsui's wife and child were burned to death.

An extensive fire occurred on June 29th at the village of Nishino-ura, Fukuoka prefecture, destroying 370 buildings. Details have not yet been received.

Fire broke out on the morning of July 1st, at Saru-cho, Shirokane, Tokyo, destroying three houses.

CORRESPONDENCE.

MISSIONARIES IN CHINA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the *Japan Times* of June 17th, is an article by a German named Ular, in which he blames the Christian missionaries especially for "abusing Chinese manners and customs to secure their own personal pecuniary gain" and adds, "Missionaries are the plague of China, and their reasons for going there are very evident."

An alleged instance of dishonesty is given, which it is admitted that the American court pronounced to be unproved, and a case of blackmail only.

What is the standing of the author of these statements, or what proof can he offer to substantiate the charges, I do not know, but there is testimony to the contrary that can not be outweighed or refuted.

In a book entitled, "Is there Anything in It," by Gilbert McIntosh, is given the opinions of men who have made a study of the matter and were able to speak from personal observation. In reply to the question "Are the missionaries responsible for the convulsion which has taken place in China?" and, "Has their influence been such as to lead to this uprising?" the Hon. John W. Foster, formerly Secretary of State of the United States, subsequently Counselor of the Chinese Government, says:

"It would take more space than I can devote in this article to show that the presence of missionaries in China had little to do with these troubles. My observation is that the mass of the people of China

do not object to their presence and work. In almost all instances the opposition and riots against them have been stirred up by the literati, the office holders and the office seekers.

"After two visits to China five and six years ago, I said that I regarded China as the most hopeful field for mission work in the world. The late disorders, the murder of missionaries, and the destruction of mission properties, have not changed my opinion. Out of all these disasters will come peace and order, a better government and more efficient protection, and a wider door for the entrance of Christian teachers.

"China stands in great need of Christianity. The teachings of Confucius, among the wisest of non-Christian philosophers, have had unlimited sway for twenty-five centuries; and this highest type of pagan ethics has produced a people the most superstitious and a government the most corrupt and inefficient. Confucianism must be pronounced a failure. The hope of this people and its government is in Christianity."

President James B. Angell, LL.D., Minister of the United States to China, 1880-1881, says:

"Some very exaggerated statements concerning the part which the presence of Christian missionaries has played in causing the recent disturbances in China have been made by writers who could not have been familiar with the facts, or who are prejudiced against the missionaries.

"The immediate provocations of the hostility of the Chinese officials seem to have been the reform movement of the Emperor in 1898, and the aggressive policy of certain European powers. The spirit which has animated the Chinese has been predominantly anti-foreign rather than anti-Christian. A Boxer proclamation before me assails the foreign merchants, engineers, builders of telegraphs and railways as fiercely as it attacks missionaries. As there are more missionaries in the interior than foreigners of any other class, more demonstrations have been made against them than against other foreigners. But engineers and consular officers, and finally the Legations have been attacked.

"By their hospitals and schools the missionaries have made many friends among Chinese who have not adopted Christianity. It is the established policy of the missionaries to pursue a conciliatory course, to imbue their disciples with loyalty to the government, with a love of peace and order. . . . But my opinion is that missionary activities alone would not have involved foreign powers in any serious trouble with China. There is no evidence that the difficulties arising from this cause have recently been any graver than they have been for many years. But when it appeared to the Chinese that the European powers wished to seize their territory, they were led to make an indiscriminate warfare on all foreigners and on all Chinese who attached themselves to them."

Hon. Charles Denby, United States Minister to China from 1885 to 1898, says,

"I made a study of missionary work in China. I took a man-of-war and visited almost every open port in the empire. At each one of these places I visited and inspected every missionary station. At the schools the scholars were arrayed before me and examined. I went through the missionary hospitals. I attended synods and church services. I saw the missionaries, ladies and gentlemen, in their homes. I saw them all, Catholic and Protestant, and I have the same opinion of them all. They are all doing good work; they merit all the support that philanthropy can give them.

"I do not stint my commendation, or halt or stammer about work that ought to be done at home instead of abroad. I make no comparisons. I unqualifiedly, and in the strongest language that tongue can utter, give to these men and women who are living and dying in China and in the far East my full and unadulterated commendation. My doctrine is to tell, if I can, the simple truth about them, and when that is known, the caviling, the depreciation, the sneering which too often accompany comments on missionary work will disappear; and they will stand before the world as they ought to stand, as benefactors of the people among whom their lives are spent and forerunners of the commerce of the world."

Hon. John Barrett, late United States Minister to Siam, says:

"The King of Siam, who is admittedly one of the ablest statesmen in Asia, once said to me that the American missionaries had done more to advance the welfare of his country and people than any other foreign influence. He has confirmed that statement by pursuing a most friendly course towards the missionaries and assisting them, both financially and morally."

"From careful study of the scope of missionary labor, not only in Siam but in China and Japan, during a period of nearly six years, I am convinced beyond question that the missionaries are doing a great and good work for the advancement of both the moral and material interests of these Asiatic lands.

"The explanation of much of the anti-missionary talk is found in the superficial gossip of the treaty ports of Asia. The average traveller hears this talk and goes away with a prejudiced opinion. On the other hand, those who study carefully the work of the missionaries, not only in the treaty ports, but in the interior, and weigh carefully in the balance all adverse and favorable conditions, agree that the missionary field should not be limited, but rather extended.

"When we criticise the methods of missionary zeal, we should be no less severe in our censure of the methods of commercial exploitation. If the former leads, occasionally, to the development of ignorant anti-foreign feeling in the interior, the latter too often is the cause of intense anti-foreign agitation fostered by the unwarranted seizures of territory and ports by foreign nations.

"America's supreme effort in non-Christian lands beyond her borders must be for the conservation of the allied forces of Christianity and commerce, which are the handmaidens of civilization the wide world over."

Hon. George F. Seward, formerly Consul-General and subsequently, from 1876 to 1880, Minister to China:

"I have seen a good deal of criticism in print, statements made by various individuals, of the missionaries who are now suffering so severely in China. It has even been said that they should have stayed at home, and that their presence is largely responsible for the outbreak in China. These critics make too much of missionary work as a cause of trouble. There are missionaries who are iconoclasts, but this is not their spirit in great measure. They are men of education and judgment. They depend upon spiritual weapons and good works. For every enemy a missionary makes he makes fifty friends. The one enemy may arouse an ignorant rabble to attack him.

"During my twenty years' stay in China I always congratulated myself on the fact that the missionaries were there. There were good men and able men among the merchants and officials, but it was the missionary who exhibited the foreigner in benevolent work, as having other aims than those which may justly be called selfish. The good done by missionaries in the way of education, of medical relief, and of other charities, cannot be over-estimated. If in China there were none other than missionary influences, the upbuilding of that great people would go forward securely.

"During the twenty years that I was endeavouring to serve our government and people in China not an American missionary suffered death from the violence of the Chinese. I have the profoundest admiration for the missionary as I have known him in China. He is a power for good and peace, not for evil."

Hon. John Goodnow, Consul-General at Shanghai, when speaking of the value of missionaries during his last home visit, confessed to some misgiving on his own part when he went to China as to the permanent value of foreign missionaries, but facts had compelled him to a change of view, and without any attempt at eloquence, he made facts eloquent in a statement and defence of the surpassing value to China and the world of the labours of the missionary body.

Hon. T. R. Jernigan, U.S. Consul-General, Shanghai, says:—

"There are about eleven hundred American missionaries in China representing the Protestant Churches of the United States and following their respective callings in the different provinces of the Empire. Many of these missionaries I know personally, and I have visited some at their homes and attended the services they conduct in their chapels. They need no witness to testify in their behalf. Their work is not done in a corner; all can see it, and those who go to learn the truth and will speak and write it are the best witnesses to the Christian character of the missionary and the efficiency of his work.

"My experience as a United States official in Japan and China covers a period of six years, and during that period no case has come before me for advice or settlement, involving directly or indirectly the interest of the Christian churches, when it has ever been made to appear that the missionaries were not influenced in their conduct by the highest principles of right and humanity.

"There ought to be no patience with the sentiment that goes out to the great outer world, which is separated by the seas from this ancient Empire, depreciating missionaries and missionary work. It is a sentiment that does not commend those who indulge in it, and cannot be supported by evidence that would be admissible in any court of justice. . . . Wherever an American mission chapel may be found in China there the words of Christ are taught; and around the home altars of American missionaries, the Christian virtues are practiced and the customs and teachings of home inculcated. . . . It should be remembered that the ensign of commerce follows close in the wake of the banner of the

cross, and he who would strike down the hand that carries the latter injures the interest of the former."

In this connection the opinions of the Chinese is also important. The Governor of Shantung Province, Yuan Shih-kai, says in a letter to the missionaries, encouraging their return to their stations:—"You Reverend Sirs have been preaching in China many years, and, without exception, have exhorted men concerning righteousness. Your church customs are strict and correct. In establishing your customs you have been careful to see that Chinese law has been observed. How then can it be said that there is disloyalty."

In a Proclamation issued on the 11th of October 1901 the Governor of Shansi says, "I the Governor, having made myself acquainted with the facts, find that the chief work of the Christian religion is in all places to exhort men to live virtuously. From the time of their entrance into China Christian missionaries have given medicine gratuitously to the sick and distributed money in times of famine. They regard other men as they do themselves and make no difference between this country and that. Yet we Chinese have treated them with injustice and contempt for which we ought to feel ashamed. Contrasting the way in which we have been treated by the missionaries with our treatment of them how can any one who has the least regard for right and reason not feel ashamed of this behaviour? How strangely singular it is that we Chinese, followers of the Confucian religion, should not appreciate right actions, which recall the words and the discourses of Confucius, where he says, "Men should respond with kindness to another's kind actions! "By so doing we allow those who follow the Christian religion to stand alone in showing what is true goodness in our time. Is not this most dishonourable on our part?"

In an "Open Letter to the British Public" prepared by the leaders of a reform party among the Chinese there occurs the following, "You have been told, both officially and privately, that the whole affair (the Boxer troubles) was directly or indirectly occasioned by foreign missionaries and their converts. This is absolutely false. Your missionaries, if left to themselves, will make many more friends than enemies in China. It is charged that by their indiscreet acts they have stirred up the wrath of the Celestials against them. I beg leave to tell you that this is not the fact. I cannot recall having heard that in a single case the charge against them has been substantiated and brought home to the offenders. It is easy, of course, to make criticisms, especially when the accuser wishes to find some excuse for his hatred of the accused; but the public want absolute and tangible proof before they will give their credence and judgment."

On the 11th of November last the Rev. Griffith John, D.D., of Hankow, was informed that His Excellency Chang Chi tung would be glad to see him. At an interview which took place on the 14th Dr. John reports:—"We had some interesting conversation on missionary matters. I endeavoured to place the principles and policy of the Protestant Church in China before him in as clear light as possible, and he expressed himself as perfectly satisfied."

His Excellency also called upon Rev. W. A. P. Martin, D.D., LL.D. (who was for more than thirty years President of the Imperial University at Peking) and talked with him over two hours on educational matters. The services of Dr. Martin were requested in the establishment of a new university at Nanking and he has been engaged as a lecturer in the Normal college for Mandarins.

Rev. W. M. Hayes, D.D., of the Tungchow Presbyterian College was chosen by His Excellency Yuan Shih-kai to be the head of the University at Chinan-fu.

When the Foreign Allies and the representatives of the Chinese Government met in Peking in 1901 to devise terms of peace, the Chinese Plenipotentiaries, Prince Ching and His Excellency Li Hung-chang, wrote to the British Plenipotentiary, Sir Ernest Satow, to invite Rev. Timothy Richard D.D., LL.D., to go up and arrange about the settlement of the troubles in Shansi. The plan proposed by Dr. Richard was not only adopted but various delegations waited upon him to ask his assistance in the establishment of schools and colleges in other provinces. For the support of the work which is being carried on by Dr. Richard, the Viceroy Chang Chih-tung sent a third contribution of \$3,000, the Governor of Kiangsu province sent \$1,000, the Governor of Kiangsi province sent \$500, and the provincial Judge of Chihli sent Taels 500.

From Sir Claude M. McDonald, K.C.M.G., H.B.M.'s Minister and Commander-in-Chief of the Beasged in Peking.

"To the Chairman of the General Committee
(Rev. E. G. Tewksbury).

British Legation, Peking,
August 15th, 1900.

Dear Mr. TEWKSBURY,

I want to express to the American members of the Committee of General Comfort, my high appreciation of the good work they did during the siege,

and of the ready and loyal manner in which they anticipated my every wish.

With such men to work with, work becomes a pleasure, and is bound to be crowned with success. This remark applies to all the American missionaries who took part with me in the siege. Their work and support were unstinted, intelligent and most loyal, and I have no hesitation in saying that I consider that their presence in the Legation saved the situation.

Yours very truly,

CLAUDE M. McDONALD.

An application has recently been made to the Agent of the American Bible Society at Shanghai by one of the professors in a government college for a grant of fifty English Bibles for the use of the students. The author writes, "I told my superiors here that the main difference between the Chinese classics and the Bible is, that the teaching of the one is superficial and the other deep seated: one is seed sown on stony ground and the other on good ground. I have thought upon the present condition of poor China over and over again and always came to the conclusion that we need Bibles more than anything—guns, machinery, and what not."

Still further testimony could be furnished, if necessary, but methinks the above is sufficient.

Yours, etc.,

H. LOOMIS.

WHICH IS TRUE?

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The following extracts from your columns bearing on the attitude of educated Japanese to Christianity seem to me of special interest:—

L'ABBE M. STEICHEN.

Rev. D. NORMAN.

Weekly Mail, March 14th, 1903.

Weekly Mail, June 27th, 1903.

"It is on this account that it is so rare to meet with a Christian in higher circles: the neophytes apostatize generally in proportion as they attain to important positions. Poor students, orphans and lepers are willingly left to the missionaries. A portion of the common people will even be abandoned to them; but the best society will be for a long time to come closed to them."

"My humble, honest opinion and belief, after reading the Religious Summaries in the *Japan Mail* for some years, and after talking with many teachers and students and educated men in Japan, is that scholars in Japan will come and are beginning to come to that intellectual position occupied by the great majority of highly educated men in America and England, viz., a belief in the Supernatural and in the Divinity of Christ."

On the attitude of the Japanese higher classes to Christianity the scholarly, sober-minded, unvarnished utterances of L'Abbe M. Steichen carry greater weight than the hope-for-the-best tone which characterises Mr. Norman's letter. As regards the state of educated opinion in America and Europe in regard to Christian supernaturalism among the millions of church-goers and the millions of non-church-goers, it is just possible that reading men in this country have their own independent sources of information. We realize that it is extremely difficult for missionaries and clergymen to find out what men of the world actually think, as silence on these subjects has become the etiquette of society, and to give expression to unorthodox sentiments in the presence of clergymen is considered bad manners. And the time at the disposal of these gentlemen for general reading is necessarily limited so we find that one half the world is often quite ignorant of what the other half is thinking. But in the matter of truth and error numbers are an uncertain guide. It often happens that few are wise and many foolish. The notion of giving prestige to Christianity in Japan by seating it on the shoulders of "President McKinley, President Roosevelt and the late Sir Oliver Mowat" savours too much of modern advertising methods to please.

"A SEEKER FOR SOLID FACTS."

June 26th, 1903.

CRUELTY TO ANIMALS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR:—It is certainly very pleasing to note the continued appearance in your columns of communications in regard to the proper treatment of the lower orders, and to note that the Tokyo Society for the suppression of cruelty is struggling for incorporation.

Suggestions have been made looking toward the erection of drinking fountains for Yokohama horses. So far so good, but it is a mere drop in the bucket. This is good in its way, and not to be lightly esteemed, but the evil is a national one, one of truly imperial dimensions, and to be successfully alleviated only by a change of heart that shall be national.

A nation is not born—nor re-born—in a day. A

generation, however, is a unit that counts. One generation is at present in school. It is accessible and impressionable, and any real advance in the direction of suppression of cruelty to animals must be made along the line of the training of the youth.

I have profound respect for the school system of this country. It is by no means a perfect system, but it is doing magnificently, and there are greater, stronger, and richer countries that might be congratulated if they had one so good in so many respects.

The common school teacher, in spite of many moral and intellectual limitations, is at present the real making force in New Japan. What the Educational Department decrees to be taught, will through him be disseminated throughout the length and breadth of the land. I have read a number of series of school readers and of moral instructors, and while I have seen articles pointing out the usefulness of animals and their sagacity, I do not remember anything inculcating kindness and consideration for them.

There is a possibility that in a short while an entirely new set of readers, prepared by competent men, will be put into the hands of the young of this country. Is not this the day of opportunity? If in each volume of the set of eight readers even one article dealing with this subject were inserted, not simply telling a little story of some lad who did not pull his cat's tail, but in various and clever ways impressing the truth that it is immoral to overload a horse, immoral to become angry and beat it in the face or kick it in the belly, immoral to use harness of a kind that is bound to gall the shoulders, immoral to tie up an ox by the nose-rope in such a way that its head is drawn a foot or two above normal, immoral to tie strings in the nostrils of gulls or around the bodies of dragon-flies, and use them for playthings,—if something of this kind were done, we might expect some tangible results somewhat commensurate with the wide scope of the evil. The results would not all come at once, but their coming would be inevitable, and with ever increasing ratio.

I have no doubt that the Tokyo Society, if it has vitality enough to survive the difficulties of obtaining corporate birth, could accomplish the above proposal with the greatest ease.

Sincerely yours,

SOJOURNER.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

AMERICAN SQUADRON AT KIEL.

London, June 26.

The Kaiser has arrived at Kiel and invited the Admiral and Commanders of the U. S. Squadron now there to lunch with him.

ROOSEVELT AND LIPTON.

President Roosevelt sent General Corbin to meet Sir Thomas Lipton at the entrance to New York bay and has invited him to luncheon at the White House.

THE FINANCE BILL.

The Finance Bill has passed the third reading.

JUSTICE WILKINSON KNIGHTED.

Later.

Mr. H. S. Wilkinson, Chief Justice of the Supreme Court at Shanghai, has been knighted.

THE CHINESE SITUATION.

Lord Cranborne states in the House of Commons that the Chinese Government has intimated that arrangements between China and Russia are being negotiated which will preserve Manchuria for China, without the loss of the latter's sovereign rights, the treaty rights of the other Powers being duly respected.

BRITISH DECORATIONS FOR CHINA.

London, June 26.

Mr. R. E. Bredon, Deputy Inspector-General of the Chinese Customs, and Mr. G. Mobsby, the Yangtze pilot, have been made Companions of Saint Michael and St. George. Mr. C. J. Dudgeon, of Shanghai, has been knighted for his services in connexion with the commercial negotiations with China.

THE GERMAN ELECTIONS.

In the second ballots in the elections for

the Reichstag the Social Democrats have made further gains. They have carried the whole of Saxony except one seat.

THE MULLAH'S MAGAZINE.

London, June 27.

The British gunboats *Merlin* and *Hussar* and the Italian gunboat *Volturmo* have sailed from Aden for Baraida to ascertain whether a magazine for the Mullah exists there.

BALFOUR'S LEADERSHIP ESSENTIAL.

Speaking at the Constitutional Club Mr. Balfour (? Mr. Chamberlain) said that both Mr. Balfour and himself could afford to laugh at insinuations of personal rivalry; but that on the eve of a great controversy he desired to declare that Mr. Balfour's leadership was essential to the union and to the success of the Unionist party.

RUSSIA AND THE UNITED STATES.

London, June 28.

Russia has notified America that she profoundly regretted President Roosevelt's intention to forward an American petition in favour of the Russian Jews, arising out of the Kichineff massacres. Russia will return the petition, if sent, as she objects to interference in her internal affairs.

SOMALILAND.

General Manning reached Bohotle on the 26th from Damot.

THE KAISER AND AMERICAN FRIENDSHIP.

Later.

At the banquet given to the American Naval officers at Kiel, the Kaiser in toasting President Roosevelt and the United States, said he rejoiced that his hopes that Prince Henry's visit would lead to a better understanding between the two countries had been fully realised. Germans all admired President Roosevelt, and readily grasped the hand extended across the ocean in hearty friendship.

THE GERMAN SOCIALISTS.

The Social Democrats secured 82 seats in the new Reichstag compared with 58 in the old.

NEWS FROM SOMALILAND.

London, June 29.

The Mullah with his fighting men crossed halfway between Damot and Bohotle. This move was due to our hold in the Mudun district and the pressure of the Abyssinians who are advancing from the South. The Mullah's flight would have become a general rout if a column of sufficient strength could have moved from Bohotle.

RAILWAY DISASTER IN SPAIN.

London, June 30.

A train fell from a bridge into the river Najerilla, Spain, and 30 passengers were killed and 60 injured.

THE HUNGARIAN CABINET.

Count Kuehn Hederwarz has formed a new Hungarian Cabinet.

BRITISH BUDGET.

The House of Lords passed the Budget unopposed.

THE SPANISH RAILWAY WRECK.

One hundred persons were killed at Najerilla, and 70 are still beneath the ruins. There were harrowing scenes.

CAPE POLITICS.

London, July 1.

The Cape Assembly has ratified the convention establishing a South African Customs Union. An amendment opposing preferential treatment for Great Britain was rejected by the casting vote of the Speaker.

REINFORCEMENTS.

150 more Bombay Grenadiers have left Aden for Berbera.

AFFAIRS IN SOMALILAND.

Later.

A despatch from General Manning says that deserters deny that there are any white prisoners in the Mullah's camp.

Colonel Rochefort wires that the Abyssinians, after forced marches, surprised the Mullah's horse and spearmen on the 30th May and that after a slight resistance the horse fled. The Mullah's uncle and 1,000 spearmen are reported to have been killed. All his live stock and 1,000 camels were captured.

AFFAIRS IN SOMALILAND.

London, July 2.

Mail advices from Aden refer to a possible interval of four months before active operations in Somaliland are resumed. Meanwhile future plans will be determined. Experienced persons consider that the feeling of uneasiness cannot cease while arms continue to be imported through Italian territory. Future plans may possibly partake of a political more than a military character.

TURKEY AND BULGARIA.

Later.

The relations between Turkey and Bulgaria are again causing a certain amount of anxiety. Extreme resentment has been excited in Bulgaria by the incessant persecution of Bulgarians in Turkey under the pretext of searches for arms and explosives, and by the concentration of a large force on the frontier. Bulgaria has now sent 3,000 troops to the frontier.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE CONGREGATIONS.

Saigon, June 25.

The Chamber of Deputies has adopted a project of law forbidding the dissolved congregations to teach within the commune where their ancient establishment stood, and requiring that teaching congregations must have the same diploma as lay institutions. The session was tumultuous. The Opposition quitted the hall and prepared a manifesto protesting against the tyranny of the majority.

THE BUDGET COMMISSION.

Saigon, June 26.

The Budget Commission has elected for President M. Doumer and named reporting commissioners for the budgets of the various Departments. The Chamber adopted without debate the project concerning railways.

SERVIA.

King Karageorgevich has arrived at Belgrada, where he was cheered.

FRENCH RELIGIOUS SOCIETIES.

Saigon, June 28.

On the demand of the Prime Minister, M. Combes, the Chamber has rejected by 285 votes to 269, the demands *en bloc* of the teaching congregations of women.

SOMALILAND.

It is reported from Jiboutil that the Mullah of Somaliland has destroyed five posts between Burao and Bohotle. Nine English officers were killed and 42 wounded. Two thousand native soldiers were taken prisoners.

[This last news is strangely at variance with Reuter's telegram of to-day.—Ed. J.M.]

THE MONETARY COMMISSION.

Saigon, June 29.

The Monetary Commission which the

American Government has convened, has been opened. The American delegates asked that Indo-China and China should accept the system newly adopted for the Philippines.

THE CONGREGATIONS.

Speaking in the French Senate in the course of a debate upon a project of law relating to the construction of schools, M. Waldeck-Rousseau criticised the manner in which his successor in the Presidency of the Council has dealt with the Law of the Congregations, especially in rejecting *en bloc* all applications for authorization.

THE SOMALILAND RUMOUR.

It is stated in London that the news of a check in Somaliland finds no confirmation.

SPANISH RAILWAY DISASTER.

Saigon, June 30.

A serious railway accident has occurred near Bilbao, Spain. There were 100 killed.

RUMOURS.

Rumours of an English massacre are persistently circulated at Djiboutil.

NEW FRENCH CABLE.

Saigon, July 1.

The French Chamber has passed the project for the construction of a cable from Saigon to Pontiniak via Pulo Condore.

(FROM THE "DEUTSCHER JAPAN-POST.")

THE KAISER AND THE AMERICAN FLEET.

Berlin, June 27.

Emperor Wilhelm went to Kiel and paid a visit to the American admiral's ship. On board the Emperor's yacht *Hohenzollern* a banquet took place. The Chancellor, Count Bülow, the American Minister and officers were present. The Kaiser drank the health of President Roosevelt.

Kaiser Wilhelm and President Roosevelt have had a telegraphic correspondence apropos of the American squadron's visit at Kiel.

THE NEW REICHSTAG.

The second ballots in the German Reichstag's elections have taken place. Members of the new Reichstag are:—52 Conservatives, 19 Imperial party, 99 Centre, 9 Anti-Semites, 52 National liberals, 31 Liberals, 6 South-German democrats, 81 Social democrats, 2 Farmers' league, 6 Bavarian peasants league, 17 Poles, 5 Hanoverians, 9 Alsacians, and 9 Independent members.

Dr. Oertel, the leader of the Farmers' league, and Bassermann, the National Liberal chief, have been unsuccessful. Prof. Hasse, a celebrated National Liberal chief, has been rejected and will not be a member of the German Reichstag. Prince Herbert Bismarck has been elected. The Liberal-Progressive chief, Eugen Richter, is elected.

There seems to be more hope for the commercial treaties.

The German Government expects a Parliament will despoised to it, in spite of the growth of the Socialists' party.

SERVIA.

Kaiser Wilhelm wired to the new King of Servia, that he hoped his government would be one of peace and progress and maintain good relations with the other Powers.

In Servia the cabinet will remain in office.

WRECK ON THE AFRICAN COAST.

The Woermann line steamship *Lulu Bohlen* was wrecked on the coast of Liberia (Western Africa). The crew and passengers were saved, mail and cargo lost.

THE ACCIDENT IN SPAIN.

In a railway accident between Bilbao and Saragossa 170 men succumbed.

RUSSIAN MINISTERIAL CHANGES.

It is rumoured that Russian Minister of Finance Witte has been promoted Chancellor. His successor will be Marshal Suchomlinov.

LITERARY GOSSIP.

Mr. Maurice Hewlett has completed the historical novel upon which he has been working during the last two years. It deals with the love story of Mary Queen of Scots, and is largely based upon recent historical discoveries, which shed an entirely new light upon the well-worn

theme. The story began serially in the *Paid Mail Magazine* for June.

The front of the house known to postmen and directories as No. 6, Wine Office Court, Fleet Street, has been condemned as unsafe, and will shortly be removed. Goldsmith lived there, after leaving Green Arbour Court, from 1760 to 1764, and it is possible that there he wrote "The Vicar of Wakefield."

This is the title of a small pamphlet which has been sent us by the publishers, W. Brewer & Co., Hongkong. It is a reprint of a lecture delivered before the Odd Volumes Society of Hongkong by the Rev. E. J. Hardy, M.A., Chaplain to H. M. Forces in the Colony, but more widely known to fame as the Author of "How to be happy though married." The little brochure contains many witty stories closely packed between much good advice upon a subject which has engaged the attention of the world from the very dawn of creation.

The election of Lady Huggins and Miss Agnes Clerke to the Honorary Fellowship of the Royal Astronomical Society will recall to recollection the wonderful career of Caroline Lucretia Herschel, the sister of Sir William Herschel and his principal assistant, who discovered between 1786 and 1797 no fewer than eight comets, five of them with undisputed priority. Miss Herschel received the gold medal of the Astronomical Society in 1828, and on her ninety-sixth birthday Humboldt transmitted to her in the name of the King of Prussia the gold medal for science.

Grieg has been telling an interviewer what he conceives to be his musical mission. Bach and Beethoven, he says, have raised temples and churches on the heights, he on the other hand has tried in the words of Ibsen to build homes for human beings, or, to put it another way, he has "noted down the popular music of his country." "In style," says the composer of "Peer Gynt," "I have remained a German 'romantic' of the school of Schumann, but at the same time I have explored the rich treasure of the folk-songs of my fatherland, and from these hitherto unexplored manifestations of the Norwegian genius I have tried to create a national art."

The many thousands of readers of the "Adventures of Sherlock Holmes" will be glad to hear that what happened on that eventful day on the Reichenbach Fall was not the end of his adventures. How he escaped, why he was silent, and all that has happened to him since will appear in another series of Adventures to be commenced in the *Strand Magazine*. Sir Arthur Conan Doyle has received letters from all parts of the world asking him to give some more of these fascinating tales, and it will be a great delight to everyone to know not only that these will be published but that the great Sherlock is still in the flesh with all his wonderful faculties unimpaired.

In an article on "Historical Houses" in the May issue of the *House*, a writer calls attention to a curious relic of the days when the Northumbrian pastor was compelled to live in a fortified house if he wished to preserve his worldly goods from the plundering bands of moss-troopers who were continually crossing the Scottish Border and raiding the homesteads of defenceless villagers. One of the best examples of these fortified rectories, originally built in the fourteenth century, still exists in Rothbury. It is described in a list of fortlets in 1542 as a "toure and a little barmekin, being the man'con of the p'sonage of Rothbury." It has walls 1 ft. thick at the base and 6 ft. at the top. It has turrets at the corners and a chamber with a stone floor into which the rector drove his cattle at night or on the approach of the raiders.

Regarded from the strictly literary point of view as an anthology of devotion, the Prayer-book of the Church of England is probably unsurpassed in any language, says a writer in the *Spectator*. It is finer, we venture to think, than the missal from which so many of its choicest flowers are culled, for the merit of a collection

depends upon selection as well as upon comprehension. The long list of Christian names, repetitions, and ejaculations which charmed the Medieval ear, and still find a place in the Roman Liturgy, can hardly be said to have any value from the point of view of literature in the present day. In judging of devotional literature, as in judging of sacred music, the critic is apt to be carried away by the force of association. The words of the Morning and Evening Services are charged for most of us with the devotional memories of a lifetime. We are no longer competent to criticise their composition, any more than we are competent to decide on the correctness of feature possessed by those for whom we care the most. On the other hand, it is only great literature which arrives as a rule at this unassailable position. Besides, it is not with the whole Order of Common Prayer that the ordinary reader is familiar; and in the backwaters of the Book we find passages as fine as those over which use has spread the glamour of religious custom.

Mr. Thomas Henderson, of Marlow, sends to an English journal the following extract from a letter of Carlyle's, written when he was a bachelor to a friend of his named David Hope, who was disappointed in a love affair with a Literary Lady:—

"... She was a person of genius, if I mistake not; and much as I admire, not to say idolise, that characteristic in a mistress (*sweetheart* as we call it), I confess I should pause before recommending it to any honest man in a wife. These women of genius, sir, are the very d—l when you take them on a wrong tack. I know very well that I myself—ever I marry, which seems possible at best—am to have one of them for my helpmate; and I expect nothing but that our life will be the most turbulent, incongruous thing on earth—a mixture of honey and wormwood, the sweetest and the bitterest—or, as it were, at one time the clearest sunny weather in nature, then whirlwinds and sleet and frost; the thunder and lightning and furious storms—all mingled together into the same season—and the sunshine always in the *smallest* quantity! Judge how you would have relished this; and sing with a cheerful heart, *Even let the bonny lass gang!*"

The extract affords matter for melancholy contrast with Carlyle's sentiments after the death of his helpmate.

LATEST COMMERCIAL.

IMPORTS.

Clearances in Yarns have improved and a firmer tone prevails, with a gradual advance. Deliveries of Grey Shintings are good, and several sales—presumably last December—January purchases—are reported at advances on rates then current. Little demand for Whites. Fancy Cottons and Woollens are quiet but a more hopeful feeling prevails.

COTTON PIECE GOODS.

INDIGO.

A slightly better feeling prevails. There have been some dealings in Madras qualities, but little or no demand exists for Calcutta or Java sorts.

	PICUL.
Java, Medium to best	280.00 to 330.00
Calcutta, Medium to best ...	200.00 to 285.00
Madras (Korpa), Medium to best	135.00 to 165.00
Madras (Dry Leaf), Medium to best	100.00 to 140.00

EXPORTS.

RAW SILK.

There is very little change in the Raw Silk situation. A retail business is doing at quotations. The tone of the market is weak, but holders will not as yet accept the inevitable and take such prices as buyers can afford to pay. Supplies are coming in more freely, and the quality of the silk this season is very good. The last season closed on the 30th June with total available supplies for the year of 80,000 piculs. From all appearances we shall have equally as much silk during the season now begun, and everything points to a lower range of prices in the near future.

QUOTATIONS.

FISH OIL.

Favourable news about the new summer catch sent prices down to about yen 6.70 per picul, at which figure a few thousand cases were taken up by exporters. For prompt delivery the present quotation is about yen 7.00.

COPPER.

The brisk demand from China has maintained prices at yen 34 to yen 35 which are considerably above European market values.

ITCHING HUMOURS

SPEEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excoriations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED,

Are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

CUTICURA Remedies are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27 St. Charles Lane, London. French Depot: 6 Rue de la Paix, Paris. Porrazo Davo and Co., Genoa, Italy. Proprietors, U.S.A.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JULY 11TH, 1903.

DEATH.

On July 6th, at the Yokohama General Hospital, JOHN GODDARD, in the 80th year of his age.

SUMMARY OF NEWS.

CAPTAIN Y. SHIKANO and five other Navy officers were on July 7th promoted to Rear-Admiral.

It is stated by the native papers that the Empress is again indisposed, having caught cold.

MR. H. YOSHIDA, proprietor of the *Yamato Nippo*, Nara, was arrested on July 7th on a charge of having obtained money by threats.

It is expected that the Emperor will be present at the graduation ceremony of the Imperial University, which is to take place on July 11th.

On July 4th gas exploded at the Horonai Coal Mine, Hokkaido, with the result that seven persons were killed and five others were severely injured.

On the morning of July 7th, a passenger train collided with a goods train on the railway between Kogoji and Tajima, near Nagoya. Some damage seems to have been sustained by both

but no details have been received. Fortunately no person was injured.

THE warehouses and factory of the Compania General de Tabacos at Manila were burnt down on June 25th. The loss is estimated at \$3,000,000 gold.

A CASE of suspected cholera was reported on July 7th in Tokyo. The patient is a blacksmith named G. Sudzuki (43), living at Ikenohata, near Uyeno Park.

A NUMADZU correspondent reports that the Dzu-so Railway was put up on July 7th for sale by tender for yen 250,000, which is the amount that the line owes to two banks.

THE *Jiji* states that the income of the Osaka Shosen Kaisha on the first half year's business amounted to yen 3,340,808, and the various expenses to yen 2,430,507.

A PEKING correspondent of the *Niroku* states, under date July 2nd, that two Japanese merchants have been arrested by Russian soldiers in Kirin on suspicion of being military spies.

A TELEGRAM from Chemulpo states that a Russian warship accompanied by four torpedo boats arrived there on July 5th from Vladivostok. Five Japanese police officers left on the 6th for Wiju.

A RATHER severe shock of earthquake was felt at 1.58 p.m. on July 6th in western cities, including Kobe, Osaka, Kyoto and Nagoya. The duration was about two minutes. No damage was reported.

DURING the first half of this year, the production of the Besshi Copper Mine amounted to 4,000,000 *kin* (2,362 tons). Of this quantity, 1,500,000 *kin* was sold for home use and the remainder was exported.

THE summer vacation of Government offices will commence on July 11th and end on Sept. 10th. During that term, no petition will be accepted in the courts excepting in such cases as claims on drafts, seizure of property, or other urgent matters.

THE Russo-Chinese Bank in China has been informed by wire from its head office that at its general meeting of shareholders everything passed off satisfactorily. A dividend was declared of 15 roubles on the old shares, and 3.75 roubles on the new shares.

THE Portuguese Government, desirous of strengthening its influence in the Orient, has decided, it is reported, to create embassies in China and Japan, and Senhor Castello Branco has been appointed as the Ambassador to Peking. British policy will be supported.

A WOMAN named Shidzu (32) living at the village of Nagaka, Shizuoka Prefecture, on July 3rd, murdered her two children, one four years old and the other two years, by strangling them with a cord. She then committed suicide by hanging herself. The cause is reported to be poverty.

MR. KAWASUMI, Secretary of Chiba Prefecture, was arrested on July 6th just as he returned from the Osaka Exhibition. Judicial officials subsequently searched his dwelling. The *Asahi* says that the charge is alleged to be in connexion with the text book affair. Two members of the Prefectural Assembly were examined as witnesses.

A TELEGRAM from Sapporo to the *Yorodan* states

that a German was arrested there on July 7th on a charge of having assaulted a Japanese with a revolver. It is alleged that he had intended to purchase the Teshiwo forest, belonging to the Department of the Imperial Household, but was disappointed. The failure seems to have affected his brain.

THE Osaka Shosen Kaisha has chartered the steamer *Kanasawa Maru* (gross tonnage 1,293 tons) owned by the Kagoshima Steamship Company for the term of one year. She is to be used on the service between Osaka and Chinnampo, Korea, and was to start on the first voyage from Osaka on July 7th.

THE engine of a goods train on the Nippon Railway was derailed at 11 a.m. on July 6th and turned over at a point near Oji, Tokyo. A guard was injured by the accident. It is reported by the Tokyo papers that part of the railway where the casualty happened was under repairs. On the approach of the train a pointsman gave the signal to stop, but it seems to have been unnoticed.

A MAN named G. Sugimoto (28), Kita-tsuru, Yamanashi prefecture, who was sentenced to death on a charge of having attempted to murder his parents on the night of October 12th last year, having inflicted severe injuries on them with dynamite after a dispute as to succession to property, was executed at 9 a.m. on July 7th in the Ichigaya jail, Tokyo, in the presence of Public Procurator Maruyama of the Tokyo Appeal Court.

DURING the month of June, states the *Official Gazette*, the trade of Formosa amounted to:—

COMMODITIES.		Yen.
Exports	1,409,045
Imports	831,852
GOLD AND SILVER.		
Exports	7,202
Imports	450,741

ACCORDING to official investigations, says the *Jiji*, the amounts which Japanese emigrants abroad remitted through branches of the Specie Bank, the Post Office, the agents of Emigration Companies, etc., during the year 1902 was as follows: Hawaii, yen 5,248,615; the United States and Canada, yen 4,986,205; Australian Colonies, Singapore, and Hongkong, yen 207,849; Peru, yen 2,100; Korea, yen 751,865; China yen 75,000; and Saghalien, yen 400,000.

THE C. M. S. *Haean*, which arrived at Shanghai from Newchwang and Chefoo on July 3rd reported: Fine weather and light southerly wind. At 10.15 a.m., off Shawsheishan, observed signals and noticed shipwrecked crew ashore on the island. Anchored and sent boat ashore and took off Capt. and Mrs. Jensen and 9 men of the crew of the American ship *Carrier Dove*, which was wrecked on the bank north of Tsung-ming. One man had been lost in leaving the wreck on the night of July 1st.

It is announced that Rear-Admiral the Hon. A. G. Curzon-Howe, second-in-Command of the Channel squadron, leaves England on July 24th to relieve Rear-Admiral H. T. Grenfell C.M.G., as second in command on this station. Rear-Admiral Greenfell is retiring on account of ill-health and went home on the *Empress of India*. Rear-Admiral Curzon-Howe has been to China before and, remarks a contemporary, is probably one of the most popular officers of the navy. He is a cousin of the Viceroy of India and a grandson of the great Admiral Howe.

POLITICAL NOTES.

Friday, July 3.

Movements of leading statesmen are attracting much attention, but what they mean exactly the Tokyo press, with one exception, does not undertake to say. The exception is the *Chiuo Shinbun* which alleges unequivocally that Count Katsura, dissatisfied about the compilation of next year's Budget, has tendered his resignation. In other quarters the resignation of Baron Sone is spoken of, while in others again, questions of foreign policy are supposed to be under consideration. In short, the one thing certain is that some interesting subject is being discussed in political circles.

Saturday, July 4.

To-day the general view is that the Premier has actually signified his desire to retire. The reasons assigned by him are that although the parliamentary crisis was happily tided over, great difficulties present themselves in compiling next year's Budget on the lines prescribed by the entente with the *Seiyun-kai*, and owing to these difficulties the course of administrative business is impeded, while, on the other hand, the Premier does not find his health sufficiently robust to deal with the situation. The Emperor is stated to have suggested that instead of retiring for the sake of respite, Count Katsura should lay aside his duties for a time without retiring from office, and it is understood that, in deference to the Imperial wishes, the Count has gone to his villa at Hayama.

Since none of the Elder Statesmen would be very willing to form a Cabinet at the present juncture and since a party Ministry is equally inconceivable, there prevails an impression in some quarters that the difficulty will be overcome by a brief retirement on the Premier's part. But conjectures are divided. Thus the *Asahi Shinbun* apparently expresses its belief that Count Katsura's decision to retire is immovable, and that he will be succeeded by Marquis Ito, but our contemporary makes the reservation that everything depends on Marquis Ito. The *Yomiuri* and the *Chingai Shogyo* alone are entirely convinced that there will be a change of Premier. They think that Count Matsukata will succeed Count Katsura, and that there will be only one or two changes of portfolios, the main body of the Ministry remaining as at present. But no other newspaper adopts a tone of confidence. The *Kokumin Shinbun* merely relates the seemingly certain facts that Count Katsura has sought permission to retire on the ground of needing rest, and that the Emperor advised him to take rest without quitting office. Whether he remains or retires, says that journal, the great point is that he should decide quickly. But, of course, it can not be concealed that everything depends on Marquis Ito. In his dual capacity of the most prominent among the Elder Statesmen and the leader of the principal political party, Marquis Ito commands the situation. The *Nichi Nichi* speaks in virtually the same strain as the *Kokumin*, so far as the facts are concerned, but attaches no credence to the idea of a change of Cabinet. It says that after a short rest, probably of a week's duration, the Premier will return to his post, and that, if business summons him, he may return sooner. The *Fiji Shimpō* also thinks that there will be no Ministerial reconstruction, one reason for that view being the patent consideration that the other portfolio-holders have not tendered their resignations. Of course there are some

journals—the *Chiuo*, the *Jimmin*, the *Nippon* and the *Niroku*—which regard the Premier's doings as a mere feint. Perhaps it is not necessary to make any detailed allusion to their comments, the gist being briefly that Count Katsura wants to derive a new lease of life by demonstrating his opponents' unwillingness or unreadiness to replace him.

Sunday, July 5.

The air continues to be full of rumours about the Cabinet crisis. Two newspapers, the *Asahi Shinbun* and the *Shogyo Shimpō*, supplement previously circulated tales with a story that on the 25th ultimo Marquis Yamagata, Count Katsura and Admiral Yamamoto met at the Premier's residence, and agreed to address to Marquis Ito a suggestion that he should abandon his leadership of a political party and return to his old place among the Elder Statesmen. Marquis Ito, they say, did not give any definite answer, and Count Katsura being thus convinced that he must henceforth treat the Marquis as an opponent, which attitude would be incompatible with successful discharge of his duties as Minister President of State, tendered his resignation. This is an interesting story, given for what it may be worth.

The vagueness of the crisis provokes some hostile criticism, which finds powerful expression in the columns of the *Fiji Shimpō*. The public does not know what may be the real cause of the event. It can scarcely be foreign politics, considering the confident and stalwart tone of the supposed official organs during the past two weeks. Neither can it be that the interference of the Elder Statesmen has become intolerable. There are no signs of anything of the kind. If, again, it be merely a difficulty about compiling a satisfactory Budget on the lines of the entente with the *Seiyun-kai*, the Cabinet has nothing to do except to follow its own judgment and take the risk of consent or dissent on the part of the Diet next session. What, then, can be the real dilemma? Every one is perplexed, and the Ministry owe it to themselves as well as to the public to substitute some solid facts for the hazy rumours and suspicions now filling the air.

Something of the same tone is adopted by the *Asahi Shinbun*. It justly observes that when the Cabinet agreed to a compromise on certain financial lines, it should have been prepared to give practical effect to the agreement, and it can not now plead surprise at the results of its own procedure. The *Asahi* seems to think that some coldness between Marquis Ito and Count Katsura is responsible, and on that text it preaches the doctrine that a Cabinet protected by Marquis Yamagata has no warrant for expecting Marquis Ito's assistance. Our contemporary's conclusion is that Japanese statesmen are too apt to regard their responsibility as a retail commodity instead of as a wholesale. They treat it in instalments, and are ready to sacrifice it *in toto* on account of some petty transaction. Similarly the political parties subserve their public duties to personal considerations. When the nation looked to see Count Katsura and Marquis Yamagata vigorously asserting the country's rights *vis-à-vis* Russia, it suddenly witnesses a Cabinet crisis about some scarcely intelligible and evidently minor perplexity. That is radically different, our contemporary thinks, from the principles governing the procedure of English Ministers.

These journals seem to fairly represent the state of public opinion.

Tuesday, July 7.

An impression appears to be gaining ground that the real reason of the Cabinet crisis is not altogether a difficulty connected with compiling the Budget, but is rather the fact that an intolerable situation has been created by the persistent interference of the Elder Statesmen. The Ministry has to bear the responsibility of all results with which its procedure is connected, yet the Ministry is not left a free hand, being compelled to act in deference to the counsels of men that do not hold office. That state of affairs is indeed said to be the cause of the drifting policy attributed to Japan by many observers. Those in power are supposed to be paralysed by interference which they can not resent without creating a crisis in domestic politics, and can not obey without doing violence to their own convictions. Hence it is alleged that Count Katsura desires to surrender the reins of authority to those that are really pulling them though not riding in the coach. As to the stories that one of the sources of embarrassment is the method of dealing with the portfolios of Education and Home Affairs, whose holders have been condemned at the bar of the Diet, the theory is emphatically denied, on the ground that the Cabinet is absolutely a unit and that every member is determined to stand or fall together. It need scarcely be added that public opinion is awakening to a full appreciation of the disastrous contingencies threatening a house divided against itself at such a juncture in the country's foreign affairs. The *Asahi Shinbun* declares that the bible of Japanese morality is patriotism, but that the statesmen of the hour do not seem to consult its pages at all. Meanwhile it does not appear that the Premier has actually submitted his resignation. When he does, his act will be at once imitated by all the Ministers. It is the hour of excursions and alarms. Leading statesmen and politicians are going and coming with much diligence, but the issue is still obscure.

Wednesday, July 8.

Public opinion begins to incline to the belief that Marquis Ito may consent to form a Cabinet. It is generally agreed that two alternatives alone offer, namely, the withdrawal of Count Katsura's expressed wish to retire, and the assumption of responsibility by Marquis Ito. Whatever other resources or combinations presented themselves, seem to have proved abortive. The point of uncertainty is Count Katsura's determination. Should it prove impossible to induce him to remain in office, there will be nothing for it except the organization of a Cabinet under Marquis Ito, though the latter is understood to be reluctant. As is usual at a time of such crisis all the movements of prominent personages are accurately recorded by the press and variously interpreted. What is certain is that Marquis Ito had a long audience with the Emperor on the 6th instant. His Majesty is slightly indisposed, and Marquis Ito was received in the inner chambers of the Palace. Perhaps it is unnecessary to add that the enemies of the Katsura Cabinet seek to persuade the public that this crisis was devised by the Premier solely for the purpose of embarrassing Marquis Ito and the *Seiyun-kai*. These newsmongers detect in the conduct of others the motives by which they would themselves be influenced in like circumstances.

The *Asahi Shinbun* insists that it will be correct to assume Marquis Ito's acceptance of the Imperial commands to form a Cabinet, and offers its own conjecture as to the com-

position of the new Ministry, namely:—Foreign Affairs, Mr. Kato; Home Affairs, Baron Suyematsu; Finance, Mr. Hara Kei; Army, Baron Kodama; Navy, Admiral Yamamoto; Justice, Mr. Matsuda Masahisa; Education, Mr. Okuda Yoshito; Agriculture and Commerce, Baron Kaneko; and Communications, Mr. Tsuzuki Keiroku.

Thursday, July 9.

The uncertainty about the Cabinet continues. Marquis Yamagata has been summoned by the Emperor and Baron Ito Miyoji has also been at the Palace, but conjecture is silent as to the results of these visits. The *Fiji Shimpō* is of the opinion that Count Katsura's temporary withdrawal from State business having been recommended by the Emperor, no mandate is likely to have been given for the organization of a new Cabinet. At the same time the *Fiji* itself is evidently uncertain, for it says that the situation may result in an Ito Ministry, though that issue can not be expected immediately. Certain journals attack Count Katsura on the assumption that he had no real intention of leaving office, and that he is merely seeking to obtain a new lease of power on better terms. The higher class of newspaper, however, is much chagrined that such a crisis should have occurred at such a time, for although in truth the nation is of one mind about foreign affairs, the outside world necessarily draws a different conclusion when it sees that great international problems are subserved to petty questions of domestic policy. The war with China, these publicists say, was probably precipitated by precisely that kind of false inference, for the Chinese Government, misled by its Tokyo Representative's report of Japan's unsettled condition, imagined that war would be impossible to her. From that point of view a Cabinet crisis in the face of a great foreign complication, not only accentuates the latter but also augments its dangers.

Friday, July 10.

Things remain still unsettled, but it appears to be thought in well-informed circles that an arrangement will soon be effected. Rumour now says that the main difficulty of the situation is Marquis Ito's dual position as the chief of the Elder Statesmen and also the leader of a great political party. In the former capacity he is necessarily consulted by the Ministry, not merely because of his prestige and because of the title he has established to a voice in all State affairs of importance, but also because most of the men now in Power have served under him in some capacity. In a word, the Cabinet looks for council and assistance from him in the management of public affairs. On the other hand, as a party leader he appears to assume an attitude of opposition, and to be swayed by the views of his followers who are hostile to the Ministry. It is practically impossible that he should continue to discharge both functions, and as a matter of sentiment, if not of national necessity, it is almost equally inconceivable that any Cabinet appointed by the Sovereign should treat Marquis Ito as an opponent and exclude him from its councils. It comes to this, then, that either the Marquis must abandon his party leadership or that the present Cabinet must step out of a situation which it finds unworkable. The *Fiji Shimpō* puts all this very plainly in a double-headed article, and adds that the Emperor himself has conveyed or addressed direct to the Marquis a very gracious message, eulogizing his great services and laying such stress on the honour-

able position occupied by him as the most prominent of the Elder Statesmen and as the Throne's principal adviser, that it will be difficult for Marquis Ito to retain his leadership of the *Seiyū-kai*.

If this analysis of the situation be correct—and the *Fiji Shimpō* seldom errs in such matters—the crisis is one of the most interesting that has hitherto occurred in Japanese domestic politics; so interesting and momentous that we hesitate to comment on it until the issue is definitely known. What must be evident to every one, however, is that Marquis Ito is confronted by a grievous dilemma. If he steps down from the leadership of the *Seiyū-kai* and resumes his old position at the head of the *Genrō*, the question will arise, "Why did he ever assume the former?" Thus his prestige in the political field will be gravely impaired. If, on the other hand, he continues to lead the Party, there will be no recourse except that he should form a Cabinet, and in that event it is thought he must reckon with the opposition of the House of Peers. The solution of the embarrassment is not apparent. It is noticeable that nearly all the leading journals interpret it in the same manner as the *Fiji*. We observe that Baron Ito is taking an active part in the complication. Rumour assigns to him the view that Marquis Ito's retention of the two positions is impossible.

KOREA.

Monday, July 6.

All the leading Tokyo journals report that on the 26th of June a Japanese raft floating down the Yalu in charge of two Japanese subjects and nine Koreans, was attacked in the neighbourhood of Kanke by a party of Chinese free-booters, numbering thirty. The Japanese resisted, and were both wounded, one of them severely. How things fared with the raft these accounts do not state. It is curious that the free-booters should be interesting themselves in such property as timber rafts. They can scarcely hope to find it very saleable.

It is stated that the British Representative in Seoul has received instructions from London to associate himself with the Japanese Minister in pressing for the opening of Wiju. Rumour, however, persists in attributing an objecting attitude to M. Pavlov.

The Japanese Representative is said to have informed the Korean Government that the state of affairs on the northern frontier seems to indicate the absence of any effective administrative control, and that, such being the case, Japan may be obliged to take measures herself for the protection of her subjects' lives and properties. The proximate cause of this very outspoken announcement was the attack reported to have been made a few days ago by armed banditti upon a Japanese timber-raft, when two Japanese subjects were wounded. But it may be assumed that Mr. Hayashi had other things in mind also. Korea's helplessness to protect herself or her people against foreign disturbers of the peace has been very conspicuous during the past few months. Feeble protests seem to be the limit of her capacity, and the Japanese have justification in concluding that if they are to enjoy any unmolested share in such enterprises as that part of the country invites, they must not trust solely to Korean impotence for the preservation of law and order. The Koreans may plead, of course, that for all normal incidents they are sufficiently equipped, but that Russia's manner of acting does not fall

within the category of reasonably foreseeable events. Such an excuse has much academical validity, but for practical purposes it avails little.

A Japanese shipping company, the Hori Kaisha, which has its head-quarters in Chemulpo, is reported to be about to open a regular line of cargo steamers between that place and Wiju, the vessels touching at Chinnampo on the Ta-dong and Anju *en route*. It will of course be understood that as Wiju is not an open port these ships can not fly the Japanese flag. They will run in the names of Korean subjects.

The Seoul correspondent of the *Asahi Shimbun* reports that M. Stein, Russian *Chargé d'Affaires* in Korea, has called on the Japanese Minister and offered a courteous expression of regret for the seizure of a Japanese timber-raft by Russian subjects. The *Chargé* attributed the incident solely to an error on the part of the persons that seized the raft, and explained that instructions had immediately been sent for the restitution of the property to its owners. There was no idea of interfering, he said, with Japan's rights or privileges. That is a happy ending to a disagreeable occurrence, but we remain in ignorance as to the precise character of the mistake made by "the man at the front." May it be concluded that while recognising Japan's right to engage in the lumber business on equal terms with Russia, there is no intention of acknowledging any such right on the part of other nationals, and that the Russians intend to be themselves the guardians of this monopoly? If so, what becomes of Korea's sovereignty in the districts affected?

From the same source we learn that the Korean Minister of Foreign Affairs has tendered his resignation. The reason assigned is that he finds himself unable to deal with the situation. His attempts to obtain some satisfactory explanation from Russia as to the doings of her subjects along the Yalu, and as to the support officially given to them, have proved entirely abortive, and are now supplemented by the question of opening Wiju, for which Japan is pressing, whereas Russia's resistance is resolute. I Toh-chai, the present Minister of Foreign Affairs in Seoul, has been in office since last February. During the three years preceding his assumption of the portfolio there had been 12 occupants of the post, so that their average tenure of power was 3 months. Thus Mr. I Toh-chai's five months of office constitute quite a distinguished record. The outside world does not take much notice of the extraordinarily frequent changes in the personnel of the Korean Ministry, though they are significant of the political unrest existing in Seoul.

The Korean Foreign Office, in consequence of Mr. Hayashi's representations, has issued instructions to the Governor of Seoul in the sense that as the free circulation of Japanese bank-notes—those of the First Bank—is guaranteed by the Convention of last February, steps must be taken to guard against any attempts to mislead ignorant people into refusing or discrediting the notes.

The old saying *cherches la femme* is verified by correspondence in the columns of the *Kokumin Shimbun*. We there read that the unrest in Korean politics is due primarily to an attempt on the part of Lady Om's partisans to obtain for her the status of Empress. This faction is headed by Li Kon-Thaik, Chief of Police, who is bitterly opposed to Li Yong-ik. The latter used to be spoken of as a strong friend of Russia. It will be remembered that on Nov. 30th, 1902, he

fled for refuge to the Russian Legation, a petition for his trial and punishment having been presented a few days previously by the Prime Minister, the Minister for Foreign Affairs and other officials. The petitioners demonstrated their earnestness by kneeling at the Palace gate during the day and the night of the 28th and the 29th of November, and on the 30th Li found asylum in the Russian Legation, whence he was carried by a Russian gun-boat to Port Arthur a few days later, namely, on December the 17th. But before his departure he received pardon and was restored to his post as Director of the Imperial Estates, and after his return he rapidly recovered influence. Since then his political complexion has been uncertain, but his tendency seems to have been steady gravitation towards Japan. Li Kou-thaik, on the contrary, is essentially Russo-phil, and rumour now says that he and his supporters, together with Lady Om, are willing to make sweeping concessions to Russia in exchange for support in raising Om to the position of Empress. The purveyors of this intelligence allege that the Yalu enterprises of Russia were planned by M. Waerber with the Om party during his residence in Seoul as envoy to the Coronation commemorations, which never came off, and that an important chapter of Korean history is now unfolding itself.

Tuesday, July 7.

It will be remembered that the Korean Government recently detailed an official to accompany Baron Gunsburg to Yong Ampho for the purpose of investigating matters relating to the timber industry. The *Asahi Shimbun's* correspondent says that this official, Mr. Cho Song-kyo, was despatched without any definition of powers, and that Mr. Hayashi, Japanese Representative, has thought it necessary to warn the Seoul Authorities that some inconvenient complications may result from the mission, inasmuch as the Russian concessionaires will be apt to claim as established rights any arrangements effected with Mr. Cho's connivance. Underlying this caution we seem to detect a suspicion that Cho may be persuaded, by easily conceived means, to show undue complaisance towards the other side.

Wednesday, July 8.

It is reported by the *Fiji Shimp'o's* Seoul correspondent that the Russians are now engaged laying a line of telegraph—a cable for the Yalu—from Antung to Yong Ampho. There has not yet been any intimation that Korea is a consenting party to the formation of a Russian Settlement at Yong Ampho, and this is the first we hear of a line of telegraph. If these things be true, Russia's procedure along the line of the Yalu is curiously arbitrary and aggressive. We are reluctantly compelled to say that she appears to feel little compunction about the effect such doings must produce on the Japanese nation. From the outset Russian enterprise in the Yalu Valley seems to have been treated with comparative indifference in Tokyo, but our own frequently declared estimate was that troublesome consequences must be anticipated. A *résumé* of the Russian press published in our issue of the 6th instant, showed that Russians view the Yalu Valley as included in their country's sphere of influence, and that they justify the despatch of troops thither by alleging that Japan also has sent large numbers of armed men to protect her lumber business, and that she has troops in all the ports of Korea. That is simply untrue. Japan, we believe, has adhered

conscientiously to the terms of the Komura-Waerber Memorandum of 1896, which accurately fixes the number and distributions of her armed force in Korea. No action taken by her in recent years can furnish a valid precedent for the despatch of Russian troops to the Yalu Valley. The most resolute of Russia's partisans must admit that she seems to be disturbing the peace of the Orient to a degree not justified by any reasonable doctrine of imperial expansion.

Leading Tokyo journals publish telegrams from Seoul dated the 6th instant, saying that the Korean Minister of Foreign Affairs, replying to Mr. Hayashi's application for the opening of Wiju, suggested that a conference of the Foreign Representatives be held to consider the question. Mr. Hayashi, however, answered that no such conference was necessary, and that he must press his former suggestion. We trust that Japan will adhere resolutely to this line of policy. It seems to us to be the only direction in which a peaceful solution of present difficulties may be sought.

The *Asahi's* Seoul correspondent states that several Chinese subjects have been engaged for some time in the lumber industry of the Yalu Valley, and that conspicuous among them is a large company said to have intimate relations with Viceroy Yuan. The Russian concessionaires are endeavouring to effect a union with this company, and have already concluded partnerships with some of the other Chinese exploiters. Considering that the Russians are reported to be levying heavy transit dues from all non-Russian timber-rafts floated down the river, these efforts to amalgamate with the Chinese seem rather superfluous. But perhaps we are here confronted with illusory rumours.

Thursday, July 9.

It would seem from the latest Korean intelligence that the Russian telegraph from Antung to Yong-Ampho has been actually concluded and is now in working order, the Korean Government not having been in any way consulted. Unquestionably this is a most flagrant violation of Korean sovereignty. If anyone can carry his imagination to the point of conceiving a European continental Power landing a cable at some convenient point in British territory and establishing a station there without previously consulting the British Authorities, he will be in a position to estimate what this latest Russian move means. Moreover, Japan is directly affected for she has a convention with Korea binding the latter not to construct, or permit the construction of, any line of telegraph calculated to interfere with Japan's telegraphic concessions. Mr. Hayashi has therefore lodged in Seoul a protest against this action on Russia's part, and we are compelled to confess that it is very arbitrary action. In fact Russia's procedure in the Yalu Valley has betrayed a conspicuous degree of indifference to Japanese sentiment. In Manchuria she had vested interests to guard, and she had also an acquired title which constitutes some excuse for resolute procedure. But in the Yalu Valley she has been at once aggressive and defiant. Further, this incident at once recalls the very resolute action adopted by the Korean Government last year when a Russian line of telegraphs, destined ultimately to connect with Yuensan, was carried across the Tumen to Kyong-hing. The Korean Authorities actually went to the length of pulling up the posts and tearing down the wires on that occasion. That they will quietly submit to Russia's Yong-Ampho enterprise is

therefore improbable. The incident furnishes, however, an unequivocal confirmation of the news so long doubted, namely, that Russia had taken steps to establish a settlement at Yong Ampho.

The truth is that the Korean Government seems to be in a state of trepidation which may perhaps be excused in the case of a helpless Power finding itself between the devil and the deep blue sea. The Japanese Representative having applied for the opening of Wiju, and being supported by his British colleague, received for reply from the Korean Foreign Minister that there being a difference of opinion in the Corps Diplomatique as to this measure, he was unable to formulate any decision. To that extraordinary confession of impotence Mr. Hayashi is said to have retorted that, Korea being absolutely competent to settle such a question without reference to any outside Power, the pretext that Wiju could not be opened because Russia objected was wholly untenable. Russia's objection had nothing to do with the matter, and since such a statement on Korea's part must be interpreted to mean that on her own side there was no objection, in other words that she, the only party whose consent was essential, gave that consent, Mr. Hayashi should consider that Wiju had been actually opened. We trust that Mr. Hayashi has really taken that line, for though we are all in favour of peace and amity, there is no possibility of disguising the extremely objectionable character of Russia's procedure. She is taking the law into her own hands and establishing herself in the Yalu Valley by methods which virtually ignore Korea's sovereignty and secure for Russia a monopoly of privileges to which other States are entitled to lay equal claim, and, at the same time, she is endeavouring to utilize the respect these other States entertain for Korean sovereignty as a weapon for restricting their opportunities and promoting her own selfish interests. All that is very unsightly, and Russia can not reasonably expect that such procedure will be tamely endured.

Friday, July 10.

It is reported by the *Asahi Shimbun's* Seoul correspondent that some of the Chinese engaged in the timber-felling industry seem to have effected an understanding with the Russians, for the rafts of the former are allowed to pass unmolested down the Yalu. Rafts flying the Japanese flag are also respected, but all others owned by Korean or Chinese subjects are liable to seizure. It had been announced by the Russians that gasts thus confiscated would be purchased at one-third of their market value, but rumour alleges that the promise has not been fulfilled, and that the rafts are lying anchored near Antung. Evidently the whole business of timber-felling in the Yalu Valley is complicated and confused. That the Japanese have a legitimate share in it seems certain, though their concession was obtained, not direct from the Korean Government, but by partnership with a Chinese-Korean firm which had secured a grant. Others are probably cutting timber without a license of any kind, but it is none the less interesting and significant that the Russians should have constituted themselves the police of the Valley.

The dividend of the Nippon Beer Brewery for the first half year will be declared on July 15th at the rate of 12½ per cent (25 per cent per annum, which is the same as in the previous year.)

CHINA.

Monday, July 6.

It is stated (*Nichi Nichi Shimbun*) that in consequence of the news of Japan's resolute remonstrance in Peking, the St. Petersburg statesmen are earnestly discussing the situation; and that they are divided into two parties, one, it may be presumed, advocating a conciliatory policy, the other an uncompromising.

The same journal alleges that Peking is in a state of considerable perplexity, and that there are many goings and comings between the Palace and the Foreign Office.

There appears to be a rivalry between England and Germany with reference to a concession for the Tientsin-Paoing Railway, the Germans being anxious to have the line regarded as a continuation of the road from Tientsin to Chinkiang, while the British desire to make it an extension of the Shan-haikwan-Tientsin line. A Belgian syndicate also is in the field. Railways being now the most important and effective instrument in giving practical reality to the theory of spheres of influence, this competition is natural. There is already a line from Tientsin to Paoing *via* Peking, but the proposed new road would run direct between the two towns, thus following one side of a triangle instead of two.

Wednesday, July 8.

A telegram to the *Fiji Shimpō* from Peking says what might have been expected, namely, that although the adoption of a strong attitude by Japan recently restored confidence to the Chinese Government, news just received in Peking as to a Cabinet crisis in Tokyo has thrown everything back and renewed the old vacillation.

The Port Arthur conference came to an end on the 5th instant, according to a *Nichi Nichi* telegram. It was attended by General Kuropatkin, Admiral Alexieff, General Wogack, the officer commanding in Siberia, the officer commanding in Manchuria, M. Lessar, M. Pavlov and the manager of the Russo-Chinese Bank in Peking. The result of the conference is not accurately known, but rumour alleges that General Kuropatkin was found to incline to the views held by Mr. de Witte, which means, presumably, that he advocated a pacific policy. The correspondent predicts that after M. Lessar's return to Peking the decision of the conference will make itself felt.

Thursday, July 9.

A Chefoo correspondent of the *Fiji Shimpō* wires that at first the conference at Port Arthur adopted a conciliatory tone. The majority of those present were of the opinion that in view of Japan's resolute attitude, it would be better for Russia to take the initiative by withdrawing her troops from Manchuria and restoring the civil administration. When, however, the conference received news of the Cabinet crisis in Tokyo, a change of sentiment ensued, and it was resolved that the *status quo* should be maintained.

News of a somewhat similar nature comes to the *Kokumin Shimbun* from Peking. That journal's correspondent says that the fact of Japan having renewed her protest against Russia's demands has not yet been reported to the Throne, the official recipients of the protest being in doubt as to whether the Tokyo Government can be credited with a strong policy, seeing that on the very morrow of its protest the Cabinet appears likely to be upset.

But it should be noted that the statement as to the Port Arthur conference having

come to a conclusion on the 5th instant is now corrected, and we learn that the council will continue in session for a few days longer.

The *Nichi Nichi Shimbun* has news from Peking that the Russo-Chinese negotiations, which were interrupted for some time, have been renewed, and that Prince Ching is in a very difficult position owing to the pressure brought to bear on him by the Court.

The *Asahi's* Peking correspondence confirms the above views. It declares that Japan's recent protest in Peking did not produce any effect upon either China or Russia, and that Prince Ching continued his policy of awaiting the course of events. The news of a Cabinet crisis in Tokyo coming at this juncture has greatly increased the perplexity of the Chinese and diminished the value they attach to Japan's attitude, so that, on the whole, matters are now completely under Russian control.

Friday, July 10.

Telegrams from Peking dated the 8th instant say that in reply to questions addressed to him by Prince Ching, the Japanese Representative declared that whatever changes might take place in the Japanese Cabinet, the policy of the nation with regard to Manchuria was fixed and unchangeable, and that Japan could not be a consenting party to any concessions made by China to Russia over and above those already given by treaty or convention. One telegram (*Nichi Nichi Shimbun*) adds that on receipt of this reply Prince Ching changed the attitude he had assumed when informed of the Cabinet crisis, but it appears to us that the wish was father to the thought in the case of the correspondent sending this item of intelligence.

FOREIGN CAPITAL IN JAPAN.

While publicists have been talking of the unsatisfied need of foreign capital to develop Japanese enterprises, a considerable quantity of that commodity has been steadily finding investment in this country. Tokyo journals publish figures showing the result of investigations undertaken by the Yokohama Customs. They indicate that the total foreign capital placed in Kanagawa prefecture alone is 24,226,500 *yen*. How that figure is obtained we do not exactly know, nor can we tell whether it includes the value of the real estate held by foreigners in the former settlement and on the Bluff at Yokohama. But the compilers of the statistics estimate that an income of 10 per cent. is obtained from these investments, and on the assumption that an equal amount is placed throughout the whole of the rest of the empire, they calculate the income thus derived by foreigners to be 4,845,300 *yen* annually. Another list is given showing some of the principal figures included in the above returns:—

Name of Enterprise.	Capital Yen.	Amount paid up by foreign share holders. Yen.
Nihon Electric Joint Stock ...	200,000	128,000
Tokyo Spinning	100,000	6,250
Murai Brothers	10,000,000	2,000,000
Japan Distillery	800,000	400,000
Yokohama Silk	1,000,000	55,000
Okagawa Mining	5,000	2,400
Osaka Gas	4,000,000	455,250
Total	16,105,000	3,047,900

Assuming that these investments give a return of 8 per cent., the income derived from them is 243,832 annually, and it is thought probable that another million *yen* of capital is invested in Japanese names,

giving a further return of 80,000 *yen*. But our readers will observe that the account is somewhat confused, for the above list, while professing to give the details relating to Kanagawa investments, includes the Osaka Gas Company, and, moreover, the return is estimated at 10 per cent. in one case and at 8 per cent. in another.

INSURANCE IN TOKYO.

Mr. Morimura of the Nisshu Insurance Company, is represented as interesting himself very actively to place the fire insurance business of Japanese companies on a sound basis. The gist of his contention is that rates have been lowered by competition to a point below the limit of safety. In support of that view he declares that, according to statistics, the number of wooden houses destroyed by fire in Tokyo during the ten year period ended in 1902 was 0.834 per cent., whereas the rates now charged by insurance companies are only from 0.6 to 0.7 per cent. Of course that can only mean that a big conflagration, which might occur at any moment, would plunge several companies into irreparable disaster. As to this figure of 0.834 per cent., the detailed demonstration is not given. Mr. Morimura confines himself, so far as the *simmin* (from which we take these facts) shows, to recording the statistics compiled in 15 wards of Tokyo during the decade 1893 and 1902. The figures are these:—

	Total Number of Houses	Number Burned.	Per-centage.
Kojimachi	97,083	287	2.09
Kanda	214,185	5,150	24.04
Nihonbashi	464,423	542	1.17
Kyobashi	227,353	922	4.06
Shiba	193,687	2,876	14.85
Azabu	80,498	175	2.17
Akasaka	63,070	453	7.18
Yotsuya	69,598	280	4.02
Ushigome	121,618	271	2.23
Koishikawa	100,171	154	1.54
Hongo	128,191	1,881	13.61
Shitaya	146,990	1,637	11.14
Asakusa	228,791	2,394	10.46
Honjo	194,702	650	2.34
Fukagawa	146,244	735	5.03
Totals	2,486,604	18,403	7.40

From this table it appears that the average rate of destruction is 7.40 per thousand, and if insurances are now offered at 0.7 or 0.6 per cent., it is obvious that companies must select their risks, and that many of the houses consumed are of such a nature as to be uninsurable. The figures given seem to be of little use. The only conclusive statistics for such a purpose would be those showing the losses of property actually insured. Evidently if the above table were taken for guide, insurance would be out of the question in districts like Kanda and Shiba, where the life of a building seems to average only 4 years and 7 years respectively.

JAPANESE EMIGRATION.

At the recent meeting of the United Chambers of Commerce in Osaka a representation was presented and unanimously voted for submission to the Government, in the sense that a large emigration company should be formed to take charge of all enterprises of that nature in Japan. We do not find any statement as to the function which the Authorities are invited to discharge in connexion with the proposed company, but it may be presumed that something in the nature of pecuniary assistance is urged. The *Fiji Shimpō* advocates the advice of the Chambers in a whole-hearted manner.

It notes that there are a hundred thousand Japanese settlers in foreign lands and that they send home ten millions of *yen* annually. Ten millions of *yen* amount to the total value of any staple of Japanese export, with five exceptions, and as the money remitted by emigrants represents nett gain, that sum is the equivalent of a very large item of foreign trade. The *ji* advances various obvious reasons in favour of the organization of a big company: as that work in connexion with the business could be done cheaply; that better arrangements could be made for the assistance of distressed emigrants; that a more favourable position would be occupied for making contracts with employers; that extended investigations facilitating choice of suitable localities would be possible; that the emigrants themselves would feel more secure under the protection of a big company, and so on. The proposed capital is half a million *yen*, which does not sound very formidable. Probably what close observers will find most interesting in this project is the indication it affords of a new expansive impulse. Emigration is a weapon of imperialism second only to railways, and as the Japanese Government does not suffer its people to go out unguarded into the wilderness as the Chinese Government does, this country's emigrants retain a political complexion. We presume that China and Korea would be the principal fields of the proposed company's enterprise.

THE STOCK MARKET.

An easier feeling prevailed in the stock market on the 3rd instant. It appeared to be thought that although the issue of the Manchurian problem was still in doubt, things had taken a more pacific turn, and, further, the climatic conditions suggested a good rice crop. The following figures were eloquent:—

	Selling price on 1st July.	Se ling price on 3rd July
Kansei Railway	44.60	44.75
Kyushu Railway	58.80	58.95
Tanko Railway	78.90	79.90
Densha Railway (Horse Tram)	81.40	82.20
Electric Railway (Tokyo)	56.30	60.30
Street Railway	60.00	61.40
Yusen Kaisha	83.20	83.20
Toyo Kisen Kaisha	32.00	32.45
Tokyo Exchange	175.70	177.00
Sobu Railway	57.10	59.00
Keihin Electric Railway	44.30	45.80
Tokyo Gas	83.30	84.60
do. New Shares	68.80	67.60
Tokyo Electric Light	79.80	82.50
do. New Shares	69.00	70.60
Kanafuchi Spinning Company	40.40	40.85

But this happy mood was not of long duration so far as stocks were concerned. It is inconceivable that in the absence of any definite news fresh apprehensions about Manchuria should have arisen, but the prospect of unexpected Ministerial instability probably shook public confidence, for all the shares above quoted suffered a sudden decline. None, however, showed any marked fluctuation except the Keihin Electric Railway, the Tokyo Electric Railway and the Tokyo Electric Light Company, of which the quotations fell by 2.10 *yen*, by 1.80 and by 1.80 *yen*, respectively. It is possible, however, that the high quotations of the 3rd instant represented the usual excessive swing of the pendulum and that the present figures may be counted tolerably fixed for the time at all events. Rice, however, continues to fall steadily owing to the favourable weather.

TOKYO LAWN TENNIS CLUB.

The Spring Tournament of the Tokyo Lawn Tennis Club, which commenced at the close of May, has just been brought to a conclusion. Mr. Takagi, the winner of the Autumn Tournament, did not show his usual fine form, owing to indisposition caused by excessive study. He succumbed to Mr. Chapman, who is playing a splendid game this season. Much interest centred on the last round of the gentlemen's singles, when Mr. Barclay and Mr. Chapman met. But it happened not to be Mr. Chapman's day, and Mr. Barclay, playing in his usual unerring style, won with unexpected ease. Miss Squire, although obliged to cede heavy odds to all her competitors, again won the ladies' singles, thus coming out at the head in two tournaments running. The prizes were presented by Mrs. Barclay after the conclusion of the gentlemen's doubles, which were won by Messrs. Barclay and White after a most exciting struggle with Messrs. Kabayama and Clarke. Mr. Clarke's play at the net was very fine, and the game was closely contested throughout, 89 all being called. The following is the score the game having been 90 up in every case:—

GENTLEMEN'S SINGLES.

FIRST ROUND.

Mr. Barclay (x 10) beat Capt. Brinkley (x 30) by 90 to 71.
Mr. White (x 35) beat Mr. Lera (x 45) by 90 to 86.
Viscount Dejean (x 40) beat Mr. Nabeshima (x 35) by 90 to 69.
Mr. Takagi (scratch) beat Mr. Clarke (x 30) by 90 to 81.
Mr. Birnie (x 20) beat Mr. von Erckert (x 40) by 90 to 57.
Mr. Wilson (x 30) beat Mr. James (x 35) by 90 to 79.
Count Hirokawa (x 30) beat Mr. Kawakami (x 50) by 90 to 52.
Mr. Brindley (x 30) beat by default Mr. Ferguson (x 35).
Dr. Mechlenburg (x 40) beat Mr. Vickers (x 35) by 90 to 78.
Mr. Romero (x 45) beat Mr. Gasco (x 45) by 90 to 55.
Mr. Panafieu (x 33) beat Mr. Arsenieff (x 50) by 90 to 62.
Mr. Chapman (scratch) beat Mr. Tanaka (x 20) by 90 to 60.

Mr. Martinie (x 45) beat Mr. André (x 45) by 90 to 59.

SECOND ROUND.

Mr. Chapman (scratch) beat Mr. Takagi (scratch) by 90 to 68.
Dr. Mechlenburg (x 40) beat Mr. Panafieu (x 35) by 90 to 83.
Mr. Brindley (x 30) lost to Mr. Barclay (x 10) by default.
Mr. Martinie (x 45) beat Count Hirokawa (x 30) by 90 to 61.
Mr. Romero (x 45) beat Viscount Dejean (x 40) by 90 to 83.
Mr. White (x 35) Scratched to Mr. Birnie (x 20).
Mr. Wilson (x 30) a bye.

THIRD ROUND.

Mr. Wilson (x 30) beat Mr. Birnie (x 20) by 90 to 54.
Mr. Mechlenburg (x 40) beat Mr. Romero (x 45) by 90 to 80.
Mr. Chapman (scratch) beat Mr. Martinie (x 45) by 90 to 76.
Mr. Barclay (x 10) a bye.

FOURTH ROUND.

Mr. Barclay (x 10) beat Dr. Mechlenburg (x 40) by 90 to 62.
Mr. Chapman (scratch) beat Mr. Wilson (x 30) by 90 to 81.

FIFTH ROUND.

Mr. Barclay (x 10) beat Mr. Chapman (scratch) by 90 to 62.
Mr. Barclay thus won the prize.

GENTLEMEN'S DOUBLES.

FIRST ROUND.

Messrs. Kabayama and Clarke (x 40) beat Messrs. Chapman and James (x 35) by 90 to 68.
Messrs. Brindley and Brinkley (x 60) beat Mr. Tanaka and Count Hirokawa (x 50) by 90 to 87.
Messrs. Takagi and Gasco (x 45) beat Messrs. Birnie and Arsenieff (x 70) by 90 to 83.
Messrs. Von Erckert and Vickers (x 75) beat Messrs. Lowenthal and Romers (x 90) by 90 to 80.
Messrs. Barclay and White a bye.

SECOND ROUND.

Messrs. Barclay and White (x 45) beat Messrs. Takagi and Gasco (x 45) by 90 to 83.

Messrs. Kabayama and Clarke won from Messrs. Brindley and Brinkley by default.
Messrs. Von Erckert and Vickers (a bye).

THIRD ROUND.

Messrs. Kabayama and Clarke (x 40) beat Messrs. Von Erckert and Vickers (x 75) by 90 to 81.
Messrs. Barclay and White a bye.

4TH ROUND.

Messrs. Barclay and White (x 45) beat Messrs. Kabayama and Clarke (x 40) by 90 to 89.

MIXED DOUBLES.

FIRST ROUND.

Miss W. Squire & Mr. Gasco (x 65) beat Miss Squire and Mr. von Erckert (x 40) by 90 to 73.
Miss R. Squire and Mr. Lowenthal (x 70) beat Mrs. White and Viscount Dejean (x 70) by 90 to 64.
Princess Koudacheff and Count Hirokawa won from Mrs. von Erckert and Mr. Romero by default.

SECOND ROUND.

Miss H. Takayanagi and Mr. Wilson (a bye) by default.
Miss W. Squire and Mr. Gasco (x 65) beat Miss R. Squire and Mr. Lowenthal (x 70) by 90 to 73.

THIRD ROUND.

Miss H. Takayanagi and Mr. Wilson (x 80) beat Miss W. Squire and Mr. Gasco (x 65) by 90 to 60.

LADIES SINGLES.

FIRST ROUND.

Miss Squire (scratch) beat Mme. von Erckert (x 20) by 90 to 50.
Miss W. Squire (x 20) beat Princess Koudacheff (x 15) by 90 to 83.
Miss R. Squire (x 25) beat Mme. André (x 30) by 90 to 75.
Miss H. Takayanagi (x 50) beat Mrs. White (x 30) by 90 to 54.

SECOND ROUND.

Miss W. Squire (x 20) beat Miss R. Squire (x 25) by 90 to 82.
Miss Squire (scratch) beat Miss H. Takayanagi (x 50) by 90 to 86.

THIRD ROUND.

Miss Squire (scratch) beat Miss W. Squire (x 20) by 90 to 81.
Miss Squire thus won the Ladies Singles for the second time in succession.

THE RUSSIAN FAR-EASTERN PRESS.

What strikes us in reading translations from the Russian local press in the Far East is that the editors do not possess a strikingly accurate knowledge of Japanese and Korean affairs. The *Novi Krai*, for example, as quoted by the *Japan Times*, alleges that Japan has about 2,000 troops in Seoul and that they are used by the Japanese Government to bring pressure on the Korean Government at convenient opportunities. Now as to this question of troops, if the editor of the *Novi Krai* examined the conventions, he would know that the number of Japanese troops in Seoul is limited to 400; that Russia is entitled to have a similar number, and that the whole matter was settled by agreement between the two Powers in 1896. He would also know that the question of the final withdrawal of Japanese and Russian troops from Korea stands on an entirely different footing from that of the Russian troops in Manchuria, since a definite date has been conventionally fixed for Manchurian evacuation, whereas no such date has been fixed in Korea's case. He would also know that the presence of a maximum of 2 companies of Japanese troops in Seoul, 1 in Fusan and 1 in Gensan, does not partake of the nature of military occupation in any degree, these troops being explicitly designed for the protection of the settlements, and being, in fact, in precisely the same position as were the English and French troops formerly quartered at Yokohama for a similar purpose. He would know, finally, that when he talks of the rendition of the civil government by Russia at Newchwang being a proposal not more reasonable than the departure of the Japanese from Chemulpo, Masampo and

so forth, the parallel is merely farcical, for what the Powers object to is not the presence of Russian subjects in Newchwang but the arbitrary assumption of administrative control there by the Russian Government. It is not likely that repartee such as that indulged in by the *Novi Krai* will help to smoothe the situation. One good point, however, our Port-Arthur contemporary does make, namely, that Russia having connected Newchwang by rail with the centre of her empire, has acquired a special interest in the sanitation of that town. But that is not a sufficient reason for delegating the sanitary authority entirely to Russia. If it can not be left with the Chinese, let it be exercised by a Consular board on which all the Powers are represented.

NOTES ON CURRENT EVENTS.

There has been another case of suicide at the Kego Waterfall. At 8 a.m. on the 3rd instant, a youth of 22 years of age named Takita Minosu, of the Waseda College, threw himself into the cataract and perished. Since the example of this form of suicide was set by Fujimura Misao in the beginning of June, it is said that he has found seven imitators. Two were saved, but six out of the whole eight, including Fujimura, found a grave in the cataract. The police, in searching for Takita's body, are said to have come upon the corpse of Fujimura, which had not previously been discovered. Fujimura was a true victim to the unknowable. He killed himself because his philosophical studies had taught him that human intellect is wholly unable to grapple with the problem of existence. His successors in the same appalling escapade were probably infected by his example rather than distraught by their studies.

We are surprised that the *Japan Times* should take any notice other than wholly incredulous of a report wired to the *Osaka Mainichi* by its Vienna correspondent to the effect that Baron Rosen, prior to the conclusion of the *entente* between the *Seiyu-kai* and the Cabinet, informed his Government that no *entente* could be anticipated, and that, owing to her political and economical embarrassments, Japan would not be in a position to adopt a vigorous line of action about Manchuria. Without seeking information at the Russian Legation, we venture to express absolute unbelief in any story of the kind. Among all observers Baron Rosen might be confidently selected as the least likely to fall into such an error. The tale does equal injustice to his well proved acumen, his accurate knowledge of Japanese affairs and the invariably pacific character of his diplomacy.

The heavy rains of the past few days caused some floods in Shizuoka and Ibaraki prefectures. It is stated that the crops have suffered more or less injury, but as rain at this season is in the natural course of events and does not find the rice in a damageable condition, no very serious results are likely to have taken place. We may mention in this context that the weather, which, during a part of June was so unseasonably cold as to inspire apprehensions for the harvest of rice, is now considered to have taken a favourable turn, though still not warm enough. The country wants heat from this onward, though another week or ten days of rain would be in the ordinary course of events.

Public attention is now directed to Port Arthur, where General Kuropatkin, M.

Lessar and M. Pavlow are now holding a conference. It is a singular fact that rumour has not attempted to invade the privacy of this council chamber. Experience led us to anticipate that various long-eared persons would have found their way to "the presence" and edified the public with exciting tales. Are we to conclude that an element of sensation-manufacturing is absent, namely, the Chinese vendor of intelligence who in Peking is always ready to "fill up" any solvent correspondent? This gentleman is of course excluded from Port Arthur, and thus secrecy can not be converted into a seed-plot of false intelligence.

On the 6th instant the graduation ceremony of the Tokyo Languages School took place. There were 119 graduates, namely, 26 in English, 17 in French, 28 in German, 18 in Russian, 21 in Chinese, 1 in Korean and 1 in Italian. Baron Kikuchi, Minister of State for Education, delivered a brief address insisting on the necessity of the study of foreign languages as a measure of Japanese progress. He considered it a matter of sincere congratulation that the number of graduates showed a steady annual increase, and that the capacity of the school had been developed.

Mr. Sawayanagi, Chief of the Common-School Section in the Education Department, in a lecture delivered before the Tokyo Educational Society on the 6th instant, combated the contention that the compilation of text books might be advantageously left to private enterprise, which contention is based on the grounds that as manners and customs differ in each prefecture, there should be a corresponding latitude for difference in text books, and that in free competition only can the doctrine of the survival of the fittest find full application. The lecturer challenged any one to point to any country in the world where such a method of procedure is adopted. He insisted that the aim of wise educationists must be to correct manners and customs which are opposed to the most enlightened principles, and that the idea of abandoning to the operation of virtual chance a matter of such vast national importance was quite extravagant. He finally marshalled his reasons for advocating State compilation, one of them being that whereas the cost of text books under the present system is 0.39 *sen* per page, the Education Department could compile and publish them for 0.2 *sen* per page, or little more than one half of the price.

It appears that the Tokyo Street Railway and the Tokyo Densha Railway (former horse-tram line) are to be amalgamated. They have been finally brought together through the exertions of Baron Shibusawa and Baron Senge. The terms are that the present capital of the Street Railway—3 million *yen*—and that of the Densha Railway—5 millions—are to form the initial capital of the joint concern. Thereafter, an addition of 12 millions will be made, and these twelve millions will be allotted thus:—namely, 8 millions to the holders of the initial stock in equal portions, and 4 millions to these holders in the proportion of one half to each. Thus it will be seen that, in fine, the shareholders of the Street Railways will possess 9 millions in the amalgamated concern and the Densha shareholders will possess 11 millions. It is expected that all the arrangements for increasing the capital will be concluded by the end of October.

The Mitsu Bishi Bank, in which so many foreigners have now a direct interest, continues its system of limiting its dividend to 5 per cent. half-yearly and carrying to next account all profits over-and-above that figure. Thus the last half-yearly statement published by the Bank shows that its surplus fund now aggregates 1,672,946 *yen*, being more than half as large again as its capital. It is possible for a bank which is virtually the property of one family to proceed upon such remarkably conservative lines, and doubtless the Mitsu Bishi Bank has its reward in the large measure of confidence that the public repose in it.

Tokyo journals announce the arrival in Tokyo of a lineal descendant of Confucius, namely, Earl Kung Shao-lin. He is accompanied by Mr. Fung Ten-nien, Commissioner of Education in Shantung, and by 50 students who are to enter Japanese schools.

It is stated that the conferences which have been for some time conducted by the Department of Communications with the object of effecting a reduction in the charges for telegrams between Japan and Europe, have been brought to a satisfactory conclusion, and that the reduced rates will be published in a few days.

The Rev. Dr. Price, the accomplished Principal of Bexley College, lecturing on "Education in the Future," emphasised the unwisdom of relying on subjects and methods simply because they are old. It would be absurd, he said, to prefer a candle now that we have the electric light, and he quite agrees with the Chambers of Commerce and business men who are denouncing the old-world system of training boys who will have to earn their bread by trade. A little Latin and less arithmetic did very well for our grandfathers, but they fail, and fail utterly now. In view of the special business training which the Americans and Germans are giving their sons, it is, said Dr. Price, simply cruel to send a boy to a school in which old methods survive, and in which teachers drone out instruction to a crowd. Pupils should be educated as individuals, not as herds. A distant acquaintance with the "dead languages," and several sciences, and a neglect of other subjects absolutely necessary mean nothing less than the pupil beginning his commercial education after he leaves school. In all but the most elementary schools, book-keeping and shorthand should be subjects of instruction.

It is announced that a telephone line has been constructed from Mayebashi to Takasaki, and that it has been brought into connection with the general system from Tokyo.

COLLISION NEAR SHANGHAI.

While the French Mail tender was on her way up from Woosung on Thursday evening, at about 8.30, (said the *N. C. Daily News* of July 4th) she ran down and sank a small steam launch belonging to the Imperial Japanese cruiser *Akashi*. The accident took place in the lower reach, a few yards astern of the Japanese cruiser *Suma*. The cries from the launch were heard on board the latter vessel and boats were at once sent to her assistance. The tender also stopped and assisted to take the men off. The French tender was not damaged but the launch sank in about two minutes. No lives were lost, most of the men being picked up by the *Suma's* boats. We have been unable to ascertain the cause of the collision. Probably the launch was hidden by the stern of the *Suma* until the tender was too close to avert a disaster.

THE POLITICAL CRISIS.

THE Japanese public evidently consider that the origin of the present political crisis is the Budget. Japan seems to be condemned, or to have condemned herself, to a series of national troubles about the paltriest fiscal problems, and the inevitable consequence is that the world has learned to regard her as almost a bankrupt nation. Can any greater incongruity between cause and effect be conceived than that the Ministry of a powerful empire should acknowledge its incompetence to make provision for a sum of five hundred thousand pounds sterling in the annual budget, and that it should give force to the acknowledgement by retiring, or threatening to retire, from office? Since 1896 the yearly revenue of the State has been increased by some 90 millions of *yen*, and now the problem of finding the one-hundred-and-eightieth part of that sum is not only capable of wrecking a Ministry, but has already been responsible for a dissolution of the House of Representatives. Probably the Japanese will awake some day to a perception of the fatal effects of their financial mismanagement, but considering the intelligence they show in other branches of statecraft, and considering the marked ability they displayed in grappling with big fiscal dilemmas in ante-Diet days, there is not much difficulty in fixing the responsibility for the present lamentable state of affairs. We express our deliberate conviction that the principal achievement of the Diet and of the political parties has been to inflict terrible injury on Japan's financial credit. If any shred of that credit survives, the fact is due to causes entirely unconnected with fiscal management.

CHINA.

IT is plain to any one perusing the accounts sent by correspondents in Peking that if the diplomatists know what is really going on, they manage to conceal their knowledge most successfully. The *Asahi's* correspondent, writing as lately as the 28th of June, formulates three theories which were current in Peking at that date. The first was that the original seven demands of M. PLANCON remained intact, being proffered equally by M. LESSAR; the second, that M. LESSAR had supplemented these seven by four or five additional articles; and the third that he had privately withdrawn the seven demands and remodelled them into three or four new ones. This third rumour seems to have been chiefly current at the end of June, but evidently nothing certain was known except by the Russian Legation and by Prince CHING. The latter's policy is one of singular reticence and distrust. He appears to treat the Japanese Representative with most frankness, but on the whole his attitude lends itself to the interpretation that he sees China's best chance of comparative safety in moving hand-in-hand with Russia, and avoiding all

outside interference. That is explicable enough on the hypothesis that the Prince does not look for any active assistance from the Powers against Russia, but that he anticipates rather the necessity of having to give to them some *quid pro quo* for everything he concedes to Russia. Under the influence of such a conviction he would naturally seek to envelop his concessions to Russia in the utmost obscurity and, if possible, to hide them altogether within the corners of a secret convention. He would also be disposed to placate Russia by a show of deference to all her wishes, one of which, frequently expressed, is that no other Powers should be suffered to interfere between two empires having such a long conterminous frontier and so many special mutual interests. Perhaps it is a triumph of clever diplomacy on M. LESSAR's part to have educated such a mood in Prince CHING, but from the point of view of England, Japan and the United States the situation is rendered somewhat hopeless by the fact that they are trying to save a State which does not behave as though it wanted to be saved. One may endeavour to pull a drowning man from his peril, but the task becomes complicated if he declines to grasp the hand held out to him. Prince CHING, of course, does not look at the matter in that light. He seems to think that salvation for China lies wholly in her own efforts, and that any assistance rendered to her by others will ultimately be found to be that of the honest broker. Can we wonder that he should think so? Does experience warrant him in thinking anything else? Where his mistake lies, we venture to opine, is in his comparative estimate of advantages. He imagines that he can do better with Russia alone than by admitting others to the council chamber, which method of procedure is diametrically contrary to the policy successfully pursued hitherto by his predecessors at the Foreign Office, the policy of playing off one State against another. Prince CHING's plan must end in exasperating all except Russia, and if he imagines that by completely isolating his country he will render her an object of practical compassion to Russia, he greatly mistakes the latter's character as written in the pages of history.

THE EMBARRASSING SITUATION.

IT may not be true, as rumour alleges, that one cause of the present Cabinet crisis is a difference of opinion between the Ministry and the Meiji statesmen on the subject of foreign politics, but if Japanese publicists are perplexed, we can entirely sympathise with them. The only incontrovertible fact of the situation is that Russia occupies Manchuria. Diplomacy can not hope to accomplish anything beyond a simulated change in the nature of her occupation; a change from palpable military tenure to industrial tenure secured by mili-

tary potentialities. Unless her railways be pulled up and their traces obliterated, she will continue to possess in Manchuria a substantial interest as well as an unquestionable right of guarding that interest, and the exercise of her right must ultimately render China's sovereignty illusory, in the whole vast region. But to destroy or appropriate her railways, drive out her garrisons and educate her to a mood of self-effacement—who will undertake that task? We may not doubt that the leaders of the Japanese nation have considered the problem with profound and anxious care, though the result of their reflections has neither been announced nor made visible in their policy. What must present itself to them in the forefront of every survey is that no Power, nor even any combination of Powers, is capable of crushing Russian ambition so long as the arena of combat is confined to Asiatic soil. Among all the States in the World Japan is most favourably situated for making the attempt, yet even Japan's efforts would ultimately be paralysed by the fatal impossibility of reaching her antagonist's base. Russia's position is strategically ideal. Every repulse would drive her towards not away from the source of her strength, would multiply the military exigencies of her assault by extending his area of occupation, and would force her no nearer to a radical surrender. It is not necessary to begin by estimating the consequence that defeat would entail for Japan. If it be evident, as we think it is, that even a series of striking successes would not effect her purpose, would not permanently secure Manchuria to China, then one may exclude the disaster of defeat entirely from the account. The demonstration depends upon two considerations. First, there is the fact that no repulse in the Far East would induce Russia to accept humiliating terms; no beating in Manchuria would persuade her to pay an indemnity and to give substantial guarantees of abstention from future aggressions. Secondly, there is the fact that if Manchuria were restored to China, it would lie just as much at Russia's mercy as ever. China can not be regarded as a factor of appreciable strength for the purposes of this forecast. She can not keep her own citadel in safety, still less her outposts. Were the Japanese inspired by large ambition of empire and did they possess great resources immediately available, they might weld China into an almost irresistible engine of defence or offence. But China herself would have to be a consenting and coöperating party, and that is precisely what she is not and what there is no apparent prospect of her becoming. She could neither be trusted to retain Manchuria of her own accord though it were restored to her, nor could her capacity to retain it under the direction of another Power be educated in time to prove effective. Exceedingly difficult, therefore, is it to discover any permanently satisfactory issue for Japan if she undertook the task of rescuing Man-

churia from the great Northern Power. As for a partial victory, it could only defer the Russianization of the Three Provinces. By a partial victory we understand the crippling of Russia's squadron and the bombarding, let us even say the dismantling, of Vladivostok, Dalny and Port Arthur. Certainly that would postpone the issue towards which events are now hastening. But whether the postponement would be worth the great risks involved in effecting it, is a question inviting careful thought. Anything resembling failure would not only seat Russia more firmly than ever in Manchuria, but would also carry her perceptibly nearer to what for Japan is the really crucial point, the Korean Peninsula. It is very hard to place full credit in the industrial integrity of Russia's lumber enterprise on the Yalu. State policy seems to have a large hand in her doings there. She is establishing a counter-irritant, from which Japan may presently be willing to purchase respite at a high price. No vested interests artificially acquired by Russia in Manchuria can for an instant compare with the vital interests naturally possessed by Japan in Korea. Further, without Korea, without access to the perpetually ice-free ports on the south of the Peninsula, Russia's East-Asiatic development must always be more or less crippled. It would thus seem that the wisest course for this empire is to concentrate its energies on the preservation of Korea, adopting in the pursuit of that purpose whatever measures a really bold and resolute policy dictates; and in the direction of Manchuria to confine itself to securing unrestricted enjoyment of its treaty privileges without obstinately endeavouring to disturb a situation which may be fairly regarded as a *fait accompli*. To the former end, the immediate opening of Wiju, Ta-tung, and perhaps some place on the upper reaches of the Yalu might be insisted on; Japanese steamers might be subsidized to ply from Seoul up the northern river; and Japanese railway enterprise might be extended in the Peninsula. To the latter end, which, after all, is nothing more or less than guaranteeing Manchuria against being enclosed in a ring-fence of Russian protection, Powers other than Japan are interested in contributing, and the task ought not to be very difficult of achievement. In our opinion the real danger of the situation lies in a policy of drift.

A WHITE AUSTRALIA.

IN a series of brochures which have now gone through four editions, Mr. S. COLE, proprietor of the Book Arcade in Melbourne, deals with the question of "A White Australia." He is evidently a man of singularly broad views, entirely free from the racial prejudices so prevalent now-a-days, and his manner of marshalling his arguments is very forcible. The gist of his contention is that to draw a ring fence around Australia with the object of reserving it for a small fraction of the human race, in the face of the

established fact that the growth of the world's population constantly presses on the limits of life-sustaining resources, is unnatural and impossible. Australia is 20 times the size of the British Isles. It represents one-seventeenth of the total superficies of the globe. It is as large as Java, Japan, China Proper, and India put together. It is capable of supporting 400 millions of people. Yet it has only 4 millions of inhabitants, being one four-hundredth of the world's population and one one-hundred-seventieth part of the population of Japan, Japan, China Proper and India. In a century the population of Australasia has grown to 4 millions. In a century the population of Java, Japan, China Proper and India has increased by 200 millions. In the face of such conditions can Australasia be monopolized by the white man? Throughout Asia, Africa, America and Oceania there are over 200 millions of whites settled in the countries of the coloured man. By what law of equity can the coloured man be excluded from the white man's countries? Perhaps the most striking because the nearest object lesson is furnished by Java, which is only 3 days' sail from Australia. Java, though not so large as Victoria, shows an increase of 16 millions of population in 50 years. Victoria shows an increase of one million in the same time, and the whole of Australasia an increase of about 3 millions. Again, Australia can not develop its resources by means of white labour alone. The "Northern Territory" of the island is four times the size of Great Britain and Ireland. It is a fruitful country, fitted for the cultivation of sugar, rice or any other tropical produce. Since it was annexed to South Australia 40 years ago, its population has increased to 1600 Europeans and about 30,000 of other races. In short, this Northern Territory, a much larger area than Java, lies waste for want of suitable inhabitants to cultivate it.

Mr. COLE's forecast is that this selfish policy of a White Australia cannot be maintained in the face of a world clamorously asserting its right to utilize the means of subsistence provided by nature. Australasia will be compelled to abandon its isolation, and when it has to yield to force its plight will be very different from what it might have been had the necessity been recognised amicably and acknowledged with practical sagacity. In support of that prediction he considers nations with which Australasia is ultimately destined to come into close contact, and foremost among them he places Japan. In fact the greater part of the first of his brochures is devoted to a statement of Japan's achievements and conditions, with the purpose of demonstrating her rapid growth and the facts which render her people desirable associates. In our judgment Mr. COLE has compiled an excellent account of Japan. Taken as a whole his essay conveys a trustworthy and comprehensive view of this empire, its people, its institutions and its progress. But as Mr. COLE is fighting a

great battle with opponents who, being already the victims of prejudice, will not hesitate to seize every small opportunity of discrediting his statements, we call his attention to a few inaccuracies into which he has been betrayed by his authorities.

Children in Japan are not taught to write with both hands. We greatly doubt too the correctness of saying that the Imperial University of Tokyo is the largest in the world. Neither is English the language of the Government offices, and it is not quite correct to say that a letter addressed to any of the Tokyo leading dailies in French, German or English will appear in Japanese in the next issue. SIMMO is not the founder of the Japanese monarchy, but JIMMU, and it can no longer be affirmed that the Japanese "use no milk and very little meat." As to the culturable area of Japan, Mr. COLE puts it at an eighth part of her surface. In that assertion he probably follows Professor CHAMBERLAIN in "Things Japanese" who says that 12 per cent. alone is culturable. But the same high authority states elsewhere in the same book that the culturable area is 16 per cent. of the whole. We are not aware that any accurate or even approximately accurate estimate of this figure has been made. The lands actually under cultivation are known to be 11 1/2 millions of acres, in round figures, which is approximately one-eighth of the total superficies; but it is evidently a matter of the greatest difficulty to determine what further space could be brought under the hoe. Perhaps we may be guilty of hypercriticism if we point out that the expression "flower garden" is misleading when applied to Japanese pleasure grounds, but certainly there is reason to condemn as over-favourable the assertions that "every town and village has an abundant water-supply," and that "in large towns there are streams of clear water running on each side of the street." That happy condition, has not been attained. Here again is a fable quoted with apparent credence by Mr. COLE from an ill-informed panegyrist of Japan:—"When a Japanese calls in a physician, he does not expect that he will be presented with a bill for medical services. . . . The doctor never asks for his fee. The strict honesty of the people makes this unnecessary. When he is through with a patient a present is made to him of whatever sum the patient or his friends may deem to be just compensation." How that erroneous conception obtained currency, it is easy to guess, but the error is none the less patent. Three more references will complete this list. Mr. COLE states that about 80 per cent. of Japanese boys and 40 per cent. of the girls attend school. The correct figures are 90 and 71, respectively. He also states that "the Japanese are frequently called 'the French of the Far East' for their quick temper," but certainly that is the very last trait than can properly be cited as prominent in Japanese disposition. Again, he is an ill-informed authority whom Mr. COLE

quotes as saying that "the death sentence is only passed in cases of crime against the EMPEROR," and still more inaccurate is the one who alleges that members of the Diet are elected "on what may almost be termed universal suffrage."

Mr. COLE is not responsible for any of these mistakes. Neither do we mention them as being in any sense cardinal. He is now, we believe, in Japan and he will be able to collect information at first hand for the purposes of his valuable work, thus dispensing with the mass of superficial literature that has been piled up by tourists and book-makers. His brochure can scarcely fail to exercise much influence, for it appeals alike to sentiment and to practical considerations. MARK TWAIN has somewhere described Orientals as the only people in the world that have ever succeeded in inventing a religion and marketing it. We are reminded of the fact by Mr. COLE's note that the founder of every one of the ten great religions of the world was an Oriental, the NAZARENE himself being included, so that the people whom we now despise as inferior beings gave us the system of morality which we count the basis of our civilization. The colours of men's skins, however, have incomparably more influence on the mind of the educated Occidental than any appeal to his reasoning faculties, and therefore Mr. COLE applies himself to show that the white folks must decide either to kill off the coloured folks or to share with them the gifts of nature. No race has or can have a monopoly of the earth's breadstuffs. As for a white Australia, considering that a large belt of the great island lies in the tropics, white people settling there must look in time to lose their skin distinction. Of course to the present generation the contingencies suggested by Mr. COLE appear very remote. They can not easily imagine either Javanese, or Japanese or Chinese sending fleets to force Australian doors open as Oriental doors have been forced by Occidental cannon. Neither can they easily imagine Germany seizing the Dutch colonies, and then laying claim to Australasia as a territory not effectively occupied. But it is impossible to deny that the day of such events is within range of sober conception.

KOREAN CHRONOLOGICAL INDEX.

MR. HORACE N. ALLEN's idea of publishing a Chronological Index of leading incidents in Korea continues to be carried out. He has issued a supplement to the original Index, so that the public is placed in possession of an accurate historical record of the greatest value. The various entries are necessarily short, as becomes an index, but they nevertheless furnish a bird's-eye review of the country's annals from month to month. His supplement covers the interval from January 1st, 1901, to March 1st, 1903. It records a certain measure of progressive effort and a certain measure of failure. We are reminded that there is a Korean arsenal,

now under the direction of a French Captain and Lieutenant of Artillery, but it does not appear that the work done there yet enables Korea to supply herself with ordinary implements of war, for, a year after the advent of the French officers, there is an entry showing the arrival of Mr. BOULD with field guns, mountain guns and ammunition, and in April, 1901, these had been preceded by 10,000 new-type rifles and a million cartridges from Japan. It was in February, 1901, that the Korean Government announced its adoption of the gold standard, an announcement which remains operative on paper only to this day, the people being much more concerned about nickels and "SHIBUSAWA notes" than about gold coins. But another ambition, conceived at about the same time, bore practical fruit; namely, the organization of a band of music for State uses. HERR ECKERT arrived in Seoul on February 19th, 1901, and began to train native musicians, with the result that on September 7th of the same year his pupils were able to play two pieces of foreign music "creditably" at the celebration of the EMPEROR's fiftieth birth-day, and in July of 1902 a Korean national hymn was published, having been adapted by HERR ECKERT. To the category of useful enterprises fairly inaugurated belong also a grant of 200,000 yen annually for 8 years from the Customs Revenue for constructing water-works in Seoul, and a grant of the same sum from the same source for 5 years to establish a light-house system. But in the matter of railway construction the interval covered by Mr. ALLEN's Supplementary Index is almost barren so far as the Korean Government is concerned. In May, 1902, work was formally commenced on the Seoul-Wiju line—Mr. ALLEN writes "Weichu," which, we presume, is more correct phonetically—under French supervision, and in February of the present year the Russian *Chargé d'Affaires* endeavoured to obtain a concession of the same railway for Baron GUNSBURG, who, having set up a residence for himself in Seoul in June, 1902, has been a prominent figure ever since in Korea's foreign affairs. The Japanese Minister opposed the concession, and the Korean Government cut the knot by announcing their intention to do the work themselves, which intention has not yet become effective. The uses of railways, it may be observed *en passant*, are of an elastic nature in Korean eyes. Two wayfarers in the capital, observing that the lines of the electric tram had exactly the shape of a Korean pillow, lay down to sleep on this ready-made bed, and were speedily reduced to a state of permanent slumber. If Russia failed to obtain the concession of the north-western road, Japan was equally unsuccessful in her applications about wireless telegraphic stations. In April, 1901, and again in May, 1902, she sought sanction to establish these along the Korean coast, but she obtained nothing more than a promise that no permission should be granted to any other

Power. In April, 1901, the Russian timber concession was extended for a period of 20 years. The public then imagined that the concession related to Ulneung Island only, but what it really did mean is now one of the mysteries of the twentieth century. It need scarcely be said that the French Syndicate with its proposed loan of 5 million yen appears in these pages from the spring of 1901, and that after furnishing a few entries, it passes quietly out of the field of vision, as indeed it has done in fact. On July 1st, 1901, we find a record which, if *littera scripta* had shadows, might have projected itself far down the pages of history:—"Report of invasion of Chinese on Yalu caused three detachments of Russian troops in Manchuria to be sent to intercept them. Gunboat *Bobre* was sent to the mouth of the Yalu." That was the second act of the drama, the first having been the prolongation of the innocent timber concession three months previously. Lady Om and her aspirations figure, though not very conspicuously, in these records, and we learn that on Sept. 23rd, 1901, she attained the rank of Kwi Pee, but that the EMPEROR turned deaf ears to a petition in favour of making her empress, to which title she has as much right as Dame MARGERY had to become the CELLARER's wife. Of course the iterated and re-iterated fiasco of the coronation celebrations bulks largely in Mr. ALLEN's Supplement. It is redeemed by two items interesting, though hitherto little talked of. One is that at the close of 1901 the Household Department asked for a French expert to establish Government porcelain works, and 4½ months later obtained the services of M. REMON of the Sevres National Manufactory. We can not conceive any productions more radically different than the ceramic ware of old Korea and the porcelain of Sevres. Korea gave experts to Japan at the close of the sixteenth century, and Japan might very well have returned the compliment now, but a master trained at Sevres—we wonder what he will achieve. The second item is that in January, 1902, four Russians arrived in Seoul to establish for the Korean Government glass works and factories for spinning and weaving cloth. Could anything have been less foreseeable a few years ago than that Korea should now be producing French porcelain and Russian glass? We wish that it had fallen within the scope of Mr. ALLEN's Index to tell us something about the outcome of these enterprises. The Quelpart affair is recalled to memory again by these pages, and we are reminded that Russia's special envoy, M. WAEBER, arrived in Seoul on October 16th, distinguished bearer of the only letters of felicitation sent by any foreign SOVEREIGN for the purposes of the "fortieth anniversary." On March 1st, 1903, when the Index closes, M. WAEBER's departure had not yet found a place among the records, and the world is now wondering what he accomplished during his long sojourn. And there we take our leave of a

publication which merits for its author an expression of gratitude on behalf of all interested in the storm centre of Far-Eastern politics.

We may add that by way of supplement to the Supplement Mr. ALLEN adds a most useful list of the personnel of the foreign diplomatic service in Korea, of the Korean diplomatic service in foreign countries, and of the foreign officials of the Korean Customs, together with a table of the decorations that the SOVEREIGN of Korea and his subjects have received from abroad, and the decorations that HIS MAJESTY has conferred abroad.

THE STORM.

In consequence of the violent rains of the past few days, floods are reported from Shizuoka prefecture, all the great rivers, the Abe, the Tenryu, the Fuji and the Oi, having risen from 8 to 12 feet. Bridges have been swept away and farms inundated. The Tokaido Railway, between Hara and Numazu, suffered serious injury throughout a mile of its length, and traffic had to be temporarily suspended. The Zuso Railway also became impassable from the morning of the 8th, and the Toyokawa Railway shared the same fate between Shinjo and Nagashino. In Wakayama prefecture the Hitaka and the Hino both overflowed and brought some mischief.

Quite a severe southerly gale prevailed in this neighbourhood on the morning and forenoon of July 9th. The steamer *Kobe Maru*, which started at 10 a.m., returned at noon finding it inadvisable to proceed further. The steamer *Kannon Maru*, which left at 6 a.m., also returned having sustained some damage on deck. Her ladder was washed away. Other steamers, the *Mike Maru* and *Matsuyama Maru*, which were to leave before noon postponed their departure. It is reported by the harbour police that the steamer *Hokkai Maru* which was to arrive here from Yokkaichi, Ise province, on the evening of the 8th did not come in till a little before noon on the 9th. As the reason for this delay, it is stated that she encountered very heavy weather during the voyage. At Tsurumi and surrounding districts the sea flooded the land, swamping fields and numerous buildings. At noon the depth of the flooded area near the shore was about 12 feet. The rivers in Kawasaki and Tsurumi all overflowed. At Oiso the Sagami river also overflowed and communication was temporarily suspended. A part of Odawara was inundated.

PAPER VERSUS LINEN.

In spite of prejudice, the Japanese paper serviette is making headway, and perhaps it would become even more popular if it were not for its brilliant decoration, which rather jars upon the taste of people who associate the refinements of the table with spotless white linen. But the paper handkerchief has even greater claims upon our approbation. A handkerchief which is merely an ornamental adjunct to a lady's toilette is all very well, but there is no innate daintiness about the *mouchoir* and its uses. The washing of one which has seen the service for which it was intended is by no means a task for the fastidious, and with our increasing knowledge of the spread of disease, it is a question if it is not a reasonable sanitary precaution that all such should be destroyed. If that idea once got into the public mind, the future of the paper handkerchief should be assured. . . . The paper *mouchoir*, which can be burned when done with, appeals to us on the score of economy as well as that of convenience. The convenience of them for travellers is obvious.—*Hospital*.

AMERICAN VIEWS OF MR. CHAMBERLAIN'S BREAK.

Curiously enough Mr. Chamberlain's newly announced doctrine of fair trade is condemned with conspicuous bitterness in America, the home of protection. We take from the *Literary Digest* two extracts illustrating the tone of United States' criticism, one being part of a *Public Ledger* article, the other from the New York *Evening Post* :—

"In a general way it is known that a very large percentage of our exchange of commodities goes on with Great Britain; perhaps few are prepared for the statement that during the last fiscal year, our exports to all the world being valued at \$1,355,481,861, the part that went to the United Kingdom amounted to \$542,001,128—40 per cent. of the total. Nor was this year phenomenal; for the year previous, ending June 30, 1901, the total exports being \$1,460,000,000, the share of the United Kingdom was \$624,000,000—nearly 43 per cent. of the total. The largest items in which England is our heaviest buyer are grain, for which in 1901 she paid us about \$175,000,000; cotton, buying of us that year to the value of \$160,000,000; hams and bacon, \$65,000,000; beef, \$35,000,000; cattle, \$35,000,000; tobacco, \$20,000,000; petroleum, \$13,000,000; and machinery, \$12,500,000.

"The last-named amount is so inconsequential in comparison that it destroys the theory that the 'industrial invasion' of her territory could move England to the proposed action. The prime consideration in Mr. Chamberlain's argument is undoubtedly the fostering of agriculture in Canada, enforced as that cause has been by persistent Canadian appeals and German attacks upon the Dominion's commerce.

"But what part of England's food could Canada furnish? The Board of Trade returns compiled the British imports of Canadian wheat, wheat flour, and maize; in 1901 these amounted to \$16,500,000. The same authority puts the British imports of wheat, flour, and maize from the United States for that year at \$140,600,000. What part of the British appetite could be satisfied by Canada? Consider all available British grain-growing areas and the possibility of their development; how could England feed herself without importing from non-British, and chiefly American, grain-growing lands? No matter what the tariff imposed, all American grain that can be spared will continue to be needed in England. So it will be also with beef, cattle, cotton, tobacco, and the rest. The Englishman will have to pay a higher price for them—that is all. Where the tariff policy to be persisted in, in the course of years the produce of various parts of the empire might be so largely increased as to destroy the English market for the American farmer; but it is fairly inconceivable that Englishmen will submit to the great hardships that they would inevitably have to endure until that time could come."

"The financial and fiscal bearings of Mr. Chamberlain's grandiose but vague schemes will be much discussed. We can only allude to them now. In general, the argument against them is, first, that they are inconsistent with each other. He proposes, seemingly, to protect English manufacturers, yet would do it by making their cost of production higher by means of taxes on raw materials and on food. In the second place, statistics show that England's stake in the trade with foreign nations is about three times what it is in colonial trade. In 1902 she imported from foreign countries goods to the value of \$2,105,000,000; from the colonies, only \$530,000,000. The exports were, respectively, \$870,000,000 and \$545,000,000. What shall it profit England to increase her colonial trade if she hazards the other? Mr. Chamberlain is a very adroit man and a most skilful politician; but we do not believe that he can persuade hard-headed Englishmen to embark on these uncharted seas. They will listen to him, they will admire his restless energy and his fertile resource, but they will be apt to say, in the end, 'Let us stick to our well-tried policy of free markets.'"

THE RUSSIAN PRESS.

(SPECIALLY TRANSLATED FOR THE "JAPAN MAIL.")

Under a heading which may be freely translated as "Reuter's Latest," the *Novoe Vremya* of May 1 (R.C.) publishes the following leading article :—

Scarcely had the rumour of the presentation of an ultimatum by Russia to the Chinese Government died away, than a new rumour concerning aggressive action on our part in the Far East, alarmed the foreign Press. Once again the English papers raised their voice to denounce

Russian grabs, to recommend protests on the part of the Powers, &c.

The reason of this agitation among British publicists was due to the report set in circulation by Reuter's agency concerning the occupation of Newchwang by our troops. It is worthy of note that correspondents of Reuter's agency telegraphed simultaneously on the 5th of May (new style) from New York, Peking, Shanghai, Washington, Tokio and London that this event happened on the 5th of May (new style).

In what way the news of the alleged entrance of a Russian force into Newchwang became simultaneously known in different points in the Far East as well as the West of the Old World and even in both hemispheres, remains so far unknown, and can only be explained on the supposition that Reuter's correspondents are possessed of supernatural gifts, evidently second-sight, telepathy, and other mysterious powers and forces.

But, as in the case of the alleged Russian ultimatum in connection with Manchuria, the information sent by Reuter's agents in connection with the occupation of Newchwang is not only false but so false that it betrays a lack of common-sense in the fabrication of it.

We effectively occupied Newchwang—this information is already known in all probability to most people—not on the 5th of May (new style) that is, nine days ago, but in the year 1900 after the suppression of the Boxers' trouble in Manchuria.

Reuter's agency cannot plead in excuse ignorance of this fact as it has a representative in Newchwang on whose shoulders it is now endeavouring to lay all the blame of spreading false reports. It is said that this correspondent did not understand the movements of the Russian troops and that in consequence he mistook some of these movements for a second occupation.

Of course an explanation such as this does not bear criticism because no movements of our troops at a point which has been occupied by our detachment during a period of three years, can give occasion for the sending of a telegram about our occupation of this point as if we had made an attempt on China's independence, violated our own promises, hurled defiance at the other Powers, &c., &c.

All these idle rumours, based on non-existent facts, possess no significance whatever and might be regarded exclusively in the light of a comic episode were it not for the fact these lying rumours of Reuter's agency were circulated with the object of injuring Russian interests by creating difficulties for us in the Far East, especially difficulties with the United States of America. The endeavour to persuade the North Americans that the aim of our conduct in China is to inflict injury on their interests along the Pacific seaboard of the United States, is apparent in every part of these Reuter telegrams and the English papers earnestly comment on the matter in the same sense.

Fortunately, however, the friendly relations that have for a long time past existed between the Governments of Russia and the United States of North America cannot be shaken by lying rumours. The authorities in Washington are well aware that Russia never fails to discharge obligations which she has once undertaken to discharge, and that if some events happening contrary to her expectations render impossible the fulfilment of these obligations, all will come right in the end. Our continued occupation of Newchwang has nothing at all to do with the obligation which we have taken upon ourselves in the Manchurian Agreement, Article 2 of which speaks only of the date of our evacuation of South-Western Manchuria. Ying-kow and its port, Newchwang, constitute one of the termini of the East China Railway and consequently of the Siberian Railway. To withdraw our troops from this important point and to surrender the civil and military administration to the Chinese authorities is impossible for us until we are satisfied that order will be fully maintained in the neighbouring districts and until the question of sanitary supervision is arranged, for owing to this question of sanitation, all the undertakings in connection with the East China Railway might be exposed to serious danger. The distance between Ying-kow and the

main line is insignificant, and this fact renders it necessary for us to guard that line carefully, were it only to protect the railroad running from Harbin to Port Arthur and Dalny.

Again, it is not for us to evacuate Ying-kow and its port in view of the fact that foreign troops still hold Shan-hai-kwan, the southern terminus of the railway line of which Ying-kow is the north-eastern terminus. The sojourn of the foreign troops in Shan-hai-kwan is not caused by any such weighty reasons as those which oblige us to remain in Yin-kow. Consequently it will be time enough for us to think of leaving Ying-kow when the foreign troops have left Shan-hai-kwan.

All those who know of the real state of things in the Far East must be well aware of the circumstances which make us continue in Ying-kow and we may therefore regard with tranquillity the false reports of Reuter's agency.

But that famous news agency should take care that it does not lower its prestige by the circulation of such absurdities.

The following items are from the Port Arthur paper:—

GREAT FOREST FIRE IN SAGHALIEN.

The news comes from Saghalien that the forests there are on fire. The conflagration has assumed enormous proportions and it is impossible to combat it.

THE QUESTION OF THE YALU.

To the endless protests of the English and Japanese Press regarding Russian action on the Yalu, the Russian Press answers as follows:—

"The valley of the river Yalu has always been included in our sphere in Manchuria. It is important for our forests. As to our right to send soldiers into Korea, need we recall the fact that Japan has sent large numbers of armed men into that country in order to guard the forest exploitations of Japan, who keeps troops in all the ports of Korea?"

The *Novi Krai* then quotes the words which were, according to a Chinese paper, addressed to a Japanese newspaper correspondent in the Russian Legation (? at Peking):—"Japan has acquired a preponderating influence in Korea. Russia does not protest against this, does not oppose it. But in what concerns the question of Manchuria, Japan ought to behave towards Russia in a more polite manner than she is at present behaving."

RUSSIA'S ROLE.

The attitude of Russia in the Balkans is a guarantee of her rôle in the Far East, where the maintenance of the *status quo* in Manchuria is necessary to its safety and tranquillity. Its present position in that Chinese province makes it fully capable of strongly supporting its reasonable claims while at the same time making all just concessions to the interests of other nations.

The *Novoe Vremya* is now publishing in its illustrated supplement a fascinating story called "Preklyocheniya Etenna Jerara" by a certain Mr. "Konan Doolya" under which Russified names our readers will perhaps detect without any difficulty our old friend Brigadier Gerard and his creator Sir Conan Doyle.

SHIP-BUILDING AT PORT ARTHUR.

At the commencement of this month trial runs of the *Raziachchi*, the sixth vessel built in the Nievski Ship-building Yard at Port Arthur, took place. The average speed of four trials was 27 knots.

FRENCH-SPEAKING ANNAMITES.

A Mr. Levitoff, who has been to the Exhibition at Hanoi, writes to the *Novoi Krai* to say that while the Annamites speak French of remarkable purity "it is impossible to find elsewhere men belonging to the Yellow Races speaking so well the language of their conquerors." In the English colonies, the Chinese speak a sort of English and in the same way the Chinese subjects of Germany speak corrupt German. In spite of the large number of schools in the English and German colonies, one never finds in these colonies so large a number of the natives speaking the foreign language so clearly and correctly as in the case in Annam (Note by Translator.—Mr. Levitoff seems to be unaware that there is such a thing as *petit nègre*, and that the experiences of the Ger-

mans with Chinese subjects have not yet extended over a sufficient space of time for us to draw conclusions as to their capacity for teaching the German language to the Chinese).

Mr. Levitoff says that great numbers of Annamite school masters visited the Exposition with their pupils.

RUSSIAN BANKS.

It seems that the establishment at Port Arthur of the Varoslavsko-Kastrovski Bank has not given satisfaction owing to the severe laws restraining the action of banks in Russia and enacted in consequence of repeated failures of banks in European Russia. The bank in question only accepts as security property bringing in a regular income; and cannot, in consequence, offer any assistance to the large number of people who need credit in order to get anything out of the land. It seems, too, that the Russian financial press warned the Bank against the risks it would have to run in the Far East. The *Novi Krai* does not believe that there are any risks. It thinks that the Russian towns in the Far East have far surpassed the expectations that had been formed of their future.

RUSSIAN REVIEW.

Under the heading of "the Review of June 4" (*Smotr Flotu 4 Iyunya*) the *Novi Krai* has a very long account of a ceremony which was really not a review. It consisted simply in a round of formal visits paid by Admiral Alexieff to the different vessels of the Russian squadron that had taken part in the last attack on the Taku forts. The Admiral was of course in full uniform and so were the ships, and there was a lot of saluting and speechifying,—the Admiral doing, by the way, a very big share of the latter, for he delivered an address—generally a very stirring and sailor-like address,—to the officers and men of every vessel he visited.

OPIMUM.

The *Vedomosti* of St. Petersburg begins a very exhaustive article on the Opium Question in Manchuria by saying that it never approved of England's past conduct in China in regard to the Opium trade. It finally concludes that the Russians ought not to make a government monopoly of opium in Manchuria, but that on the country, they ought to do their best to wean the Chinese in Manchuria from this bad habit and to make them in this respect like the Chinese.

PORT ARTHUR.

The *Novi Krai* of June 8 has a lot to say about Port Arthur, and it is satisfactory in these days of journalistic pessimism to learn that the *Novi Krai* is quite pleased with Port Arthur, quite convinced that the fortress city is as strong as need be, and that anybody who ever seeks to molest her will simply be blown out of the water,—for of course he will never get a chance to land. The *Novi Krai* institutes a comparison between Port Arthur and St. Petersburg. Port Arthur is, it says, the eastern door of Russia just as St. Petersburg is the Western. No enemy can ever enter Russia by the east if Port Arthur's defences are all right.

Happily they are all right. Russia has now 35 ships of war to protect this important port and if all ships are counted in as well as the ships at present on their way out to the Far East the number will be 50. The number of troops in Port Arthur is also very great; and, on the whole, Russia may make her mind easy so far as this great eastern door-way is concerned.

IMPERIAL GERMAN NAVAL HOSPITAL.

TWENTY-FIFTH ANNIVERSARY.

Despite the exceedingly unpleasant weather that prevailed on Sunday, a large number of Germans and residents of other nationalities (including many ladies) assembled at eleven o'clock in the forenoon in the Hospital grounds, by special invitation, to celebrate the twenty-fifth anniversary of the establishment of the Kaiserlich Deutsche Marine-Lazareth. The company included Count Arco Valley, German Minister, and the Legation staff; Vice-Admiral Geissler and his staff; Governor Sufu and other prominent Japanese; General Jansen, I. G. A. (retired); Mr. W.

Hagen, acting German Consul-General; Mr. M. Kutschera, Austrian Consul; Mr. L. Casati, Italian Vice Consul, and many other leading residents.

At eleven o'clock the guests were conducted over the hospital and were treated to a very successful exhibition of fire drill, after which in the name of the Insurance Companies Mr. M. Kaufmann made a presentation to a number of the old Japanese employees of the institution.

Afterwards the company assembled in the annexe of the Hospital where several addresses were given. The building was most tastefully decorated with flags. Over the rostrum the figures "25" were displayed in red on white, and the German flags were shown on either side, with the Red Cross emblem.

Dr. H. MATTHIOLUS, Director of the Hospital, made a long report in which he described the history of the institution, and in concluding expressed thanks to the Japanese authorities for having always been so ready to assist those responsible for its management. Dr. Orth translated this into Japanese, after which,

Vice-Admiral Geissler rose and proposed "Hochs" for the Emperor of Japan, which were most heartily given, the band of the cruiser *Fuerst Bismarck* playing "Kimi-ga-yo."

Governor Sufu then addressed the meeting in French, expressing his pleasure to have been of any assistance to the naval hospital authorities, and his wish to render similar service in future when possible, and in conclusion proposed the health of the German Emperor which evoked the usual loyal "Hochs" for the Kaiser, with the national hymn.

COUNT ARCO VALLEY said he should make it his duty to bring Governor Sufu's remarks to the knowledge of the German Emperor. He had officially to say now that he had been ordered by His Imperial Majesty to convey his thanks to the Japanese authorities for their kind offices, and, as a token of appreciation and friendship, to confer upon His Excellency Governor Sufu, the First Class Order of the Crown. This was duly rendered in Japanese, and Governor Sufu, again speaking in French, gave expression to his sense of the honour conferred upon him.

This brought the formal proceedings of the day to a close; afterwards a special tiffin in honour of the occasion was held at the German Club.

It should be said that excellent selections were played by the *Fuerst Bismarck's* band, but the steadily falling rain forbade in a disappointing degree any out-door forms of the celebration.

THE FOURTH OF JULY.

The celebration by American residents of their national holiday was to a regrettable extent marred by the rain that fell steadily all day. The usual visits were paid, however, to the Consulate General, where Mr. E. C. Bellows, Consul-General, received from 9 a.m. till noon. There being no man-of-war of the United States in harbour, the German and French warships did not dress or fire salutes. Many people gathered at the Grand Hotel at noon, however, and listened to the band playing patriotic airs.

A baseball match had been arranged for the afternoon between teams representing the Y. C. and A. C. and the Nobles' School, Tokyo, but by three o'clock (the match should have begun at 2.30 and both teams were on the ground) it had to be admitted that no play could be carried on in the state of the weather and the condition of the ground.

As reported elsewhere, yacht races took place for cups generously presented by the U.S. Minister and his nationals, and it is greatly to be regretted that better weather did not smile on the occasion. To indicate the comparative inclemency of this "Fourth of July" we may say that the temperature fell from 77° on Friday to 64° on Saturday.

The usual display of fireworks was provided for but it had to be postponed eventually to Saturday, the 11th. It is not encouraging to note that a storm warning issued at 8.10 a.m. on the 4th reported a depression off western Kiushiu (750=29.53 in.) with heavy rain; and as the storm was travelling N.E. all central districts were warned.

YACHTING.

The wet weather which attended the racing for the Fourth of July prizes marked also incidentally the third consecutive occasion on which rain has interfered seriously with local yachting. It is satisfactory to state that all the courses were fully sailed, three or four boats finishing in each class, except the 39-raters, where the only contestants to go out and return were *Maid Marion* and *Mary*. The wet, however, was most discouraging and boat after boat which, under more favourable circumstances, would have held on, gave up and came home as soon as they found themselves out of the leading bunch. Small blame, indeed, can be attached to the crews of the 31-raters and "Larks" who failed to see any fun in trying to "catch up" in such weather. Besides being wet the weather was very cold and made the open craft pretty uncomfortable. One "Lark" at least profited, however, by perseverance for though far astern at the Mandarin mark No. 6 (H. A. Poole) kept going and standing out farther than the others got a slant of wind and came in easily ahead of all others. During the afternoon the rain made it difficult to note the relative positions of the yachts in the races.

Two 39-raters started to race for the U.S. Minister's cup, a very handsome piece of silverware from Tiffany's. *Maid Marion*, in the light north-westerly breeze, ran away from *Mary* at the outset but there was little between them at the Tsurumi mark. The wind came more from the northward and they ran spinnakers first to starboard and then to port, *Mary* passing the Lightship with *Maid's* bowsprit up to her quarter. The latter then drew ahead and when they disappeared in the rain seemed to have a fair lead. When, after rounding the Widow Buoy, they again hove in sight *Mary* was standing in towards the Lightship on starboard tack, the *Maid* a considerable distance astern. Ten minutes separated the yachts at the Lightship and on the run back to the Widow Buoy the positions were not altered, *Mary* returning and rounding the Lightship the second time with a very long lead. In the result *Mary* won the prize easily and gained two record points, one point going to *Maid Marion*. Times:—

	Finish	Corrected
	h.m.s.	h.m.s.
<i>Mary</i>	6.02.20	6.02.20
<i>Maid Marion</i>	6.23.25	6.18.01

The cruising class raced round the Lightship to the Widow Buoy and back for the "Fourth of July Cup" presented by the American residents. They got off pretty well together—twelve seconds only separating first from last—and at the Tsurumi mark *Daimyo* was first, *Nina* next, *Molly* third, *Asagao* next and *Surprise* last. It was not easy to distinguish the boats but apparently *Molly* ran up on *Nina* half way to the Lightship. *Daimyo's* lead was not altogether excessive as she was only able to save the prize on *Nina's* handicap by a couple of minutes, taking also 2 record points while *Nina* took one. A protest against *Daimyo* was lodged by *Surprise* who alleged that the former fouled her going out of the harbour. Times:—

	Correct.	Club.	Correct.	Club.
	h.m.s.	h.m.s.	h.m.s.	h.m.s.
<i>Daimyo</i>	5.24.30	5.16.26	5.22.30	
<i>Nina</i>	5.31.30	5.23.26	5.24.30	
<i>Molly</i>	5.41.55	5.24.52	5.31.55	
<i>Surprise</i>	5.47.50	5.30.47	5.32.50	
<i>Asagao</i>	6.04.20	5.41.51	5.46.20	

Nine 21-raters went out for the "Fourth of July Cup" presented by the American residents. *Edna* assumed the lead early in the race and got round the Mandarin mark three minutes ahead of *Winsome*, *Chocho* 30 seconds astern of the latter. In the windward work both *Winsome* and *Chocho* got on more equal terms with *Edna*. These and *Pete* were now the only boats left in the race, all the others having given up at Tsurumi. The second time *Chocho* was in second place and she hunted *Edna* home very closely, having the prize as good as in her locker all the time on her handicap of 8 minutes. Times:—

	Finish.	Correct	Club.	Correct	Arb.
	h.m.s.	h.m.s.	h.m.s.	h.m.s.	h.m.s.
<i>Sunbeam</i>	5.02.15	5.02.15	5.02.15		
<i>Winsome</i>	—	—	—		
<i>Pete</i>	5.05.10	5.05.50	5.05.50		

<i>Edna</i>	4.55.05	4.55.05	4.55.05
<i>Wellings</i>	—	—	—
<i>Stella</i>	—	—	—
<i>Chocho</i>	4.56.15	4.54.53	4.48.15
<i>Yugao</i>	—	—	—
<i>Vixen</i>	—	—	—
<i>Daisy May</i>	—	—	—

Chocho wins with two record points, *Edna* second with one.

Twelve "Larks" started to go round the Lightship, and the Mandarin Bluff mark and a large proportion of them stuck to it very pluckily. At the last mentioned mark Nos. 4, 8 and 5 were leading close together, and this arrangement was only disturbed on the way home by the sudden advantage reaped by No. 6 with the assistance of a change of wind. The result was that No. 6 (H. A. Poole) wins the "Fourth of July Cup," presented like the others by the American residents, No. 4 (W. B. Mason) cleverly shooting past No. 8 (M. Russell) within a few yards of the finishing line and taking second place. Time:—

	h.m.s.
No. 6	5.22.45
No. 4	5.30.00
No. 8	5.30.06

LAWN TENNIS.

The finals in the mixed doubles of the lawn tennis handicaps arranged by the Ladies' Lawn Tennis and Croquet Club took place in the Bluff Gardens on Friday afternoon and attracted a very large attendance. The weather was simply perfect, calm and fairly cool. The games were all splendidly contested, the young ladies in particular putting in some right excellent services. The winners turned up in Miss K. Page and K. van R. Smith (owing 15 in every other game), who beat Miss A. Page and E. W. Kilby by 6-3, 3-6, 6-4. The score however, scarcely does justice to the losers, who played pluckily all through. Mr. G. G. Brady was umpire, and at the close the prizes were presented by Mrs. J. Williamson Jones in a few graceful words.

THE AWAKENING OF CHINA.

The London correspondent of the *Manchester Guardian* writes:—A correspondent sends me evidences of an interesting and, it may be important movement amongst Chinese of the higher ranks. He was introduced to two young Chinese, one studying law in London, the other medicine in Edinburgh. They were with both sent abroad at the expense of a wealthy and progressive Manchurian prince, and I understand that the number of young Chinese abroad just now under similar circumstances, either at the expense of their parents or of wealthy patrons and friends is very considerable, and is rapidly growing. The Manchurian and Mongol princes—the proudest, most ignorant, and most reactionary of all classes in the country—are sending their sons to travel abroad though not as yet to reside and study there. Several of these young nobles are visiting Japan especially for the great exhibition at Osaka and are then going to Hongkong and the Straits Settlements. If this ruling aristocracy could be liberated and educated there might be hope for China even yet. Of young Chinese of a less exalted class, I am told that there are over 800 now studying in Japan, many of whom have been sent there by the viceroys and governors of various provinces at the public expense. Japan of course has the great advantage of being close at hand, of being comparatively cheap to live in, and of possessing a language cognate to Chinese. But the Chinese objection to it, oddly enough, is that the students return from Japan with "revolutionary ideas," and talk, after being a short time there, of popular rights, equality, liberty, and the like. So much concern has this given to the Chinese Government that they have complained about it to the provincial authorities who send the students abroad, and have desired them in future to send as many of the young men as possible to Europe and the United States rather than to Japan. The whole movement denotes a change in the ideals of the Chinese literary class which may produce important consequences for their country.

FIRES.

An outbreak of fire occurred on the morning of June 2nd at Hanabusa-cho, Kojimachi, Tokyo, destroying one house. A strong wind prevailed at the time, and there was great danger of the conflagration spreading, but it was at length subdued by the exertions of the firemen.

Early in the morning of July 2nd, fire broke out at Oishita-machi, Yamagata prefecture, burning down twenty-eight buildings including eight godowns.

On the night of July 3rd fire broke out at Kimuracho, Fukagawa, Tokyo, burning nine buildings, including the Yasuda nail mill, and partially damaging eight others.

Fire occurred on July 3rd at the village of Asahi, near Takata, destroying over twenty houses.

A telegram from Fukuoka states that fire appeared on July 3rd at the Meiji coal mine. The cause and the extent of the damage is not yet reported.

Fire occurred on the night of July 4th on a junk carrying a hundred bales of lime and lying in the canal near Yushima, Hongo, Tokyo. The fire was only put out when the lighter sank. The cause is reported to be rain wetting the lime.

On the morning of the same day fire broke out in the Buddhist temple Saiseiji at the village of Yuki, Minami-tama-gori, Tokyo, destroying the entire building.

Fire broke out on the night of July 7th in the postal car of a Nippon Railway train running between Kuwaori and Shimishi and burned a bag of postal matter.

THE EXPLOITING OF ASIA MINOR.

Mr. Ernest L. Harris, the United States commercial agent at Eibenstock, has sent to the State Department a timely account of the Dagdad Railway, which is being promoted by German capitalists. It will be an extension of the Anatolian Railway, which connects Constantinople with Konia, in Asia Minor, and it is to run through Bagdad and thence to Koweit, on the Persian gulf; approximate cost, \$90,000,000; length of line, 1,800 miles. When it is completed the journey from London to India will be shortened by three days. The title of the construction company is the Imperial Ottoman Bagdad Railway Company; it has a capital of \$3,000,000. The *Chemnitzener Tageblatt* says of this enterprise: "The railway will pass through one of the oldest and richest countries in the world. The most fruitful part of what was once ancient Mesopotamia is that part of the country between Ursa and Mosul. So regular and plentiful are the rains that out of every six or seven harvests only two fall short. In other portions of the country the rain is not so frequent, and the soil must be nurtured by irrigation. The land is adapted to raising wheat, barley, rice and cotton. A territory as large as Saxony and Italy together will be opened to German markets." The promoters are disseminating the idea that with the agricultural development of Asia Minor Germany will cease to be dependent on the United States for cotton and grain. There are extensive oil and bitumen fields in Mesopotamia, and it is calculated that the cultivation of this industry alone would make the Bagdad Railway a paying property. Commercial Agent Harris does not think that the United States need fear the competition of Asia Minor when developed by the Germans. "What India, Egypt and Caucasia fail to do," he says, "Asia Minor will hardly succeed in doing. The influence of the Bagdad Railway will be confined chiefly to the Orient. If it leads to an increased output of grain and necessities of life, the capacity for consumption on the part of the 15,000,000 inhabitants of Asia Minor, will, in all probability, keep pace with the production."

INSTITUTION ST. JOSEPH.

The distribution of prizes to the pupils of the Institution of Saint Joseph took place on July 7th in the afternoon at the Van Shaick Hall. Previous to the ceremony a very entertaining programme was gone through by the boys, consisting of instrumental music, songs, recitations, etc. All reflected great credit, in respect of their training, upon Mons. L. Stoltz, Director, and his staff. The programme came to a close late in the afternoon, and the prizes were then distributed by the Director. In spite of the heavy rain, which seems to be the last effort of the *nyubai*, the hall was well filled by foreign residents, including many ladies.

The following was the programme:—

- L'enfant et le nid de fauvette.....L. Suzor.
Une mauvaise plaisanterie.....{ G. Dutronquoy.
J. Biagioli.
Le petit garçon et le petit chatA. da Silva.
Débuts oratoires du petit GeorgesG. Dubois.
Mon bateauL. Andreis.
"Heup Trilby," Chansonnette de Kücken—
ier Violon: Walter Bischof, William Bischof, E. Andreis.
2me Violon: Ch. Oberlein, H. Bell, J. Mächell, F. Booth, D. Santos, E. James.
Piano: A. Andreis.
Imaginary Possessions.....{ D. Kildoyle.
E. Kildoyle.
William Bischof.
The Guardian Angel:—H. Bamberger, W. Fachtmann, A. Fachtmann, G. Moss, L. Klingen, P. Hornstein, Th. Woodruff.
A Little Boy's SpeechR. Vaughan.
Harry's First EffortH. Klingen.
Sweet and Low:—Chorus by Barnby.
Extraits d'Athalie:—(Déclamation):
G. Richomme, P. Eastlake, J. Weill, F. Eastlake, A. Casati, K. Peacock.
Grüss Gott! Marsch von K. Koinzak
R. Brinckmeier.
Der g'scheidte Damian:
Personen: Grün, BauerA. Argosino.

Viccio. Galop by Ch. Blake.....A. Andreis.
The Rival Orators. (Dialogue).....{ G. Gregory.
G. Binder.
Polonaise-Trio: 1st Violin.....Walter Bischof.
2nd ViolinWilliam Bischof.
Flute.....E. Andreis.

DEATH OF MR. JOHN GODDARD.

We record with regret the death of Mr. John Goddard, an old-time resident whose name will be fresh in the memory of the elders of the community, and whose long connection with the Far East is probably unique. Mr. Goddard came out from England to Hongkong in 1842 (at the age of 18) in connection with Jardine, Matheson & Co., and after a term of employment in China was transferred to Yokohama some 35 years ago. Later he started in business on his own account and later still he became Secretary of the Yokohama United Club. Mr. Goddard left Japan with his wife and family about 1881 and went to Australia where he resided till a little over a year ago when he returned to Japan and had since stayed with his son-in-law and daughter, Mr. and Mrs. Fardel at Kumamoto. His health had been failing for some time, however, and he decided to proceed to a sanatorium, but on his arrival at Hiranuma on Saturday, it was found necessary to take him to the General Hospital. In spite of the care and attention of the nursing staff and the treatment of Dr. Munro, he gradually sank, and passed away on Monday evening. His widow and two younger daughters are now at Kobe; two sons are well known in Yokohama and a third is in Korea. To them the sympathy of the community will be respectfully extended.

The remains of Mr. John Goddard, who died in the General Hospital on Monday were consigned to their last resting place in the Cemetery

on Wednesday. The usual services were held by Rev. Mr. Field, both in the Church and at the graveside. Among those present in Christ Church was Mrs. Fardel, eldest daughter of the deceased, her mother and two sisters being detained at Shidzuoka by the floods on their way up from Kobe. A number of old friends and residents were in attendance. The pall bearers were Messrs. R. D. Robison, J. P. Mollison, J. Walter, B. Gillett, C. H. Allcock, and E. Flint Kilby. Mr. W. Goddard and Mr. H. L. Fardel were chief mourners. The youngest son, Mr. Herbert Goddard, being confined to his room, was unable to attend on the occasion.

FOREST FIRES IN AMERICA.

Forest fires were causing much destruction in various parts of Canada and the United States about the beginning of last month. A New York telegram on the 4th quoted the *Journal* as saying:

Forest fires, caused by forty-nine days' drought, have the entire eastern section of the United States and Canada in their grasp. Thousands of acres of timber land have been laid waste, villages have been obliterated and the danger to life and property is increasing hourly.

Immense districts in Maine, Vermont, New Hampshire, New York and Connecticut, New Jersey and Pennsylvania are broad sheets of flame, and along the southern shore of Long Island, at Amityville, Sayville and Freeport, encroaching as close to New York as Trains Meadows, just outside of Long Island City, the fires have gained such headway as to cause the suspension of all other work to prevent their further spread. Millions in property have been destroyed. Crops have either been greatly retarded or completely burned out of the ground, and handsome estates on Long Island and in the Adirondacks are surrounded by flames. Several well-known summer hotels have been swept away and hundreds are abandoning their homes and fleeing for their lives.

Great squads of men in organized bands are giving desperate battle to the fires wherever they threaten to encroach on civilization. Nothing but heavy rain will change the situation and reduce the growing danger from the fires, and there is no rain in sight. All the comfort the local weather forecaster could give to-night was that the situation might change rapidly within twenty-four hours, but he could see no indication of a change.

Smoke and ashes from fires in this and neighbouring states were the cause of peculiar atmospheric conditions about this city to-day. The sun was obscured and a pungent odour of burning wood permeated the air. The haze hung over the river and the harbour, somewhat impeding traffic, and the trolley and elevated road service was slightly delayed. The same atmospheric conditions prevailed at Utica and other cities in the central part of the state.

A dispatch from Glens Falls (N.Y.) June 4th said:—The fire situation in the Adirondacks to-day is more serious than at any time since the fires began. The heavily timbered sections of the woods extending from Long lake at the foot of Mount Marcy on the north, the Indian lake and Cedar river through to Lake George on the south, is burning.

A Houlton (Me.) telegram of the same date said: The forest fires in Aroostook country have destroyed fourteen miles of the Bangor and Aroostook Railroad, and reports from various sections indicate that two small settlements have been destroyed, at least twenty-four sets of farm buildings have been burned, and the fires, which had almost abated last night, were increasing to-day before a brisk wind.

On the 4th also word was received at St. John's (N.B.) from the sea coast village of Musquash that forest fires on the 23rd and 24th swept that place, leaving but three or four buildings standing. There were 200 people homeless and destitute. The financial loss would aggregate over \$100,000.

Montreal reported on June 4th:—The bush fires in this province have apparently spent their force. To-night the wind is reported to have died away and the fires are not spreading as they have been during the past two days. Rain would soon end the danger, for the fires are now smouldering away. Should, however, a brisk wind arise, the damage done would be incalculable. To-night the fire is right in the outskirts of St. Agathe, where a detachment of the Montreal Fire Brigade was sent this afternoon, in response to an appeal for help. St. Jerome is similarly situated. There has not been any considerable loss of property, besides standing timber, but as far as this is concerned, the damage is very heavy, and saw-mill owners and pulp-mills will be considerably affected.

The smoke along the St. Lawrence to-day was so dense that navigation was practically suspended.

LAW CASES.

CLAIM ON A COMPRADORE.

The Russo-Chinese Bank has filed a suit in the Tokyo District Court against its former compradore Yuen Sih Sung, claiming yen 170,000 as damage sustained in banking transactions for which the Chinaman was guarantor. The *Asahi* states that defendant is now at Kobe and the case was to have been instituted in the Kobe District Court, but by consent of the parties it has been brought in Tokyo.

AMERICAN TRADING CO. v. C. ILLIES & CO.

This case, instituted by the American Trading Co., Ltd., against Messrs C. Illies & Co. who are the agents of Messrs Robert M. Sloman Co.'s steamer *Verona* was resumed in the Yokohama District Court before Judge Kano on July 3rd.

Defendants' Counsel applied to the Court for leave to postpone the hearing of the case on the ground that he had received a power of attorney from the head office of Messrs Robert M. Sloman Co., Hamburg, but it was signed only by the Manager and did not bear the name of the Company.

The Court then decided to adjourn the case till September 28th when Counsel will have proper instructions from abroad.

FUJI BOYEKI KAISHA v. BOSE POLL.

The hearing of this case brought by the Fuji Boyeki Kaisha, No. 245, against Mr. Bose Poll, No. 121, claiming yen 500, began in the Yokohama District Court, before Judge Kato, on July 4th.

Mr. Ideura was present for plaintiffs but defendant was absent beside not being represented.

Plaintiff's counsel stated that in September, 1902, defendant ordered plaintiffs to ship a certain quantity of Japanese curios for Messrs. Borth & Co., Calcutta. Subsequently a certain number of cases were exported on October 4th and November 5th, 1902, the documentary drafts going through the Chartered Bank. The draft for the first shipment, No. 169, amounted to 3,986.02 rupees, and that for the latter, No. 194, to 1,521.50 rupees. Both were at thirty days' sight. In December 1902, defendant requested plaintiff to change the thirty days' sight into ninety days' sight, and at the same time he proposed to pay yen 500 to plaintiffs if either of the drafts were dishonoured. Plaintiffs consented upon receiving a guarantee letter from defendant. In March, 1903, plaintiffs received information from the Chartered Bank that the draft for the first shipment had been dishonoured at Calcutta. Plaintiffs asked the bank in reply, to sell the goods by auction at the port of destination. On March 24th plaintiffs intimated this fact to defendant and asked him to pay the guarantee money but he declined.

Judgment was given in favour of plaintiffs with the costs.

LAW, UNION & CROWN IN. CO. v. VIVANTI BROS.

In the Yokohama District Court on July 4th the hearing of a case instituted by Messrs. Samuel Samuel & Co., as agents of the Law, Union and Crown Insurance Co., against Messrs. Vivanti Bros., who are sub-agents of the company, claiming yen 10,897 with interest at the rate of 6 per cent. per annum from February 3rd, 1903, till execution of judgment, for loss on insurance business, commenced before Judge Kato.

Mr. Akiyama was present for plaintiffs and Mr. Sato for defendants.

Plaintiffs' counsel stated that defendants engaged on October 31st, 1901, to act as sub-agents to plaintiffs who at the time of the contract gave to defendants various instructions regarding the conduct of insurance business, and principally told them not to cover over yen 60,000 upon any one property. In spite of this defendants made a contract with Messrs. Silber, Wolff & Co., to cover the godown No. 183 and its contents, belonging to the firm, on September 13th for yen 30,000, and on September 15th, 1902, for another yen 30,000 for the term of one year, and on October 24th 1902 for yen 90,000 for the term of one month. The three contracts totalled yen 150,000, which

sum was yen 90,000 more than the authorized amount. Defendants however re-insured the risk on the last contract, yen 90,000, in the Sun Fire Insurance Co. On November 8th, 1902, a fire occurred in the godown, partially destroying the building and its contents. Subsequently the insurance money was paid to Messrs. Siber, Wolff & Co. Of this amount yen 21,794 was a loss which arose through the arbitrary conduct of defendants in exceeding their limit of risk, and they must be held responsible. Plaintiffs in a friendly way requested defendants to pay half of this yen 21,794, or say yen 10,897, but the latter declined.

Defendants counsel contended that the placing of a limit with reference to the amount which a sub-agent could cover was a point that showed only the general view of insurance business. Defendants were therefore not always subjected to this restriction in accepting risks. Defendants had very often covered several properties to an amount exceeding this limit and the head office had recognized it. The fire occurred on November 8th, 1902, on the premises of No. 183 and a certain proportion of the loss was paid by the head office. If the fire had not occurred plaintiffs would never have raised any objection against defendants exceeding the limit of risk. The head office had in fact accepted the business secured by defendants when they covered risks over their limit and had never protested.

The case was then adjourned till September 17th.

K. YAMADA v. SIMON EVERS & CO.

The hearing of this case, which is a claim for yen 540 for non-delivery of sugar under contract, came up again in the Yokohama District Court before Judge Kano on July 6th, when the Court ordered the parties to repeat their statements on the ground that a new judge-associate had taken the place of the former official. Counsel for the parties repeated the statements introduced in the Court at previous hearings, and also gave explanations of the evidence, after which plaintiff's counsel applied to the Court for leave to examine Z. Komiya, a sugar dealer, as witness, and defendants' counsel called for the attendance of Mr. J. Dodds and Enomata—these three witnesses were examined in the case of Messrs. Simon Evers & Co. against K. Yamada. The latter counsel further asked the Court to inspect the godown where Mr. Dodds obtained a certain quantity of sugar for analysis.

The Court decided to do so after the summer vacation.

LIBEL SUIT.

The libel case filed by Mr. Hofmann against the *Nippon*, the *Yorodan* and the *Hochu* with regard to their alleged libels upon him, in which the accused were sentenced in the Tokyo Local Court to punishment against, which they appealed, was to be tried in the Tokyo District Court before Judge Mochizuki and Public Procurator Hasama on July 8th.

THE CHARGE AGAINST T. KING.

The preliminary trial of T. King, who attempted, it is alleged, to murder his wife and maid-servant on May 7th in the premises at No. 136 is almost concluded, but the Court doctor is still trying to decide whether the accused was suffering from brain-illness at the time of the alleged crime.

Sentence was delivered on July 7th in the Kyoto District Court on H. Kitabatake, formerly judge of that Court, and J. Tsuda, formerly chief clerk of the Osaka Appeal Court, who were prosecuted on a charge of having received bribes. They were ordered to undergo two years' imprisonment with hard labour, pay a fine of yen 20 and be subject to six months' police surveillance, and one and a half years' imprisonment with hard labour, a fine of yen 15 and six months' police surveillance respectively. The bribes which they had received were ordered to be confiscated.

S. ISAACS v. M. ISAACS.

The hearing of this case, which is an action claiming cancellation of registry as to the administration in the winding up of the estate of Messrs. R. Isaacs and Bro. came up again in the

Yokohama District Court before Judge Kato on July 9th.

Mr. Masujima was present for plaintiff, but defendant was absent and not represented.

Previous to the hearing, plaintiff's counsel asked the Court that the hearing should not be open to the public, but his request was declined.

He stated that plaintiff had established in joint account with Mr. R. Isaacs a partnership association under the name of R. Isaacs and Bro. to carry on business. The firm was, however, wound up on October 26th, 1902, by mutual consent of the partners and the fact was subsequently registered in the Court in accordance with Japanese law. To liquidate the estate, it was necessary to elect an administrator by consent of the partners, but Mr. R. Isaacs arbitrarily nominated Mr. Marcus W. Isaacs as administrator without consulting the plaintiff and registered his name at the Court in June this year.

Judgment was given in favour of the plaintiff.

CUSTOMS APPEALS.

The following decisions rendered by the Minister of Finance were published in the *Official Gazette* of July 4th.

The Minister of Finance gave a decision on June 29th, in the matter of an appeal filed by Messrs. Cornes and Co., No. 50, Yokohama, against a Customs decision. The firm imported a certain quantity of cotton drills on which the Customs imposed duty at the rate of *sen* 01.7 per square yard under No. 311 of the Tariff. The importers appealed contending that duty should be enforced under No. 308 at the rate of *sen* 01.6 per square yard. The Minister decided that duty should be imposed at the *ad valorem* rate of 10 per cent. under No. 322 of the Tariff on the ground that the goods in dispute are not cotton drills (No. 308) or cotton sateens (No. 311) but a kind of cotton tissue.

Another decision was delivered on June 30th in the appeal filed by Messrs. Grösser and Co., Kobe, against the Kobe Customs. The firm imported five cases of cotton drills on which the customs imposed the same duty. The Minister gave judgment on the lines laid down above.

LITERARY GOSSIP.

Judge Oliver Wendell Holmes, son of the author, was one of the Supreme Court Justices to pass on the validity of a copyright held by a Boston publishing house on Oliver Wendell Holmes', "The Professor at the Breakfast Table." The court held that the publisher's claim was not good, as the work had been published serially without copyright protection before appearing in book form.

No definite date has yet been fixed for General Maurice to take over the work of preparing the official history of the South African War. Negotiations have been in progress for the creation of an adequate staff. The late Colonel Henderson recognised that the staff he had was numerically altogether insufficient. In the case of the official history of the Franco-German War practically the whole Prussian General Staff was employed.

Though the late "Max O'Rell" adopted an Irish form of non-de-guerre, and paid several visits to Ireland, he declined to write a book about that part of the United Kingdom. "I have many times been asked why, having written on the subject of England and Scotland, I had no intention of publishing my impressions of the Irish," he wrote in his first book on America. My answer is this—In speaking of a people, I like to touch on their pet transgressions, their faults and weaknesses, and I have never been able to find any in the Irish."

The chief item of interest in a recent sale of rare books and manuscripts, conducted by the well-known London auctioneers Messrs. Sotheby, was a first edition of "The Life and Adventures of Robinson Crusoe," in two vols., filled with contemporary MS. notes relating to the work. Bidding started at £200, and went up by quick

stages to £307, at which price it was secured by Mr. Quaritch. Dryden's "Annus Mirabilis, 1666," the poet Gray's copy with his autograph signature, was sold for £15, but Ruskin's copy of Fenimore Cooper's "Notions of the Americans," with numerous marginal notes and auto-inscription, only fetched 14s.

The Countess of Warwick has just completed her book on "Warwick Castle and its Earls," on which she has been working the last five years, and it will be published immediately by Messrs. Hutchinson. Lady Warwick has drawn largely on the archives of Warwick Castle, and many important documents for the first time see the light. As she observes, "the history of the Castle is coincident with that of England." The work will be profusely illustrated with reproductions of many of the famous art treasures of the Castle, besides portraits of the celebrated personages who figure in its pages.

The June number of the *Pall Mall Magazine* contained the opening chapters of two notable serials; the one is John Oliver Hobbes's "The Vineyard," the other is Mr. Maurice Hewlett's "The Queen's Quair." A quair, as is explained in an author's prologue, "is a cashier, a quire, a little book. In one such a certain king wrote fairly the table of his love-business; and here, in this other, I pretend to show you all the tragic error, all the pain, known only to her that moved it, of that child of his children's children, Mary of Scotland." The illustrations to this intimate presentment of the heart of Mary are particularly interesting, for they are drawn from old paintings and prints.

The first and third volumes of the long-expected "Illustrated History of English Literature," by Dr. Garnett and Mr. Gosse, are just published by Mr. Heinemann. There are to be four volumes in all, and the second and fourth volumes will be published in October. The whole work is to be illustrated in a most lavish way with coloured plates, photogravures, facsimiles, and innumerable text illustrations, somewhat on the lines of John Richard Green's "Short History of the English People." The documents, which have been collected from private and public sources, are of surprising variety. The first volume presents the literature down to Henry VIII., the second goes down to Milton, the third to Johnson, and the fourth to Tennyson.

Among the books which may be expected immediately from the Oxford University Press are "Studies in Napoleonic Statesmanship; Germany" by Mr. H. A. L. Fisher; the second volume of Prof. Oman's "History of the Peninsular War" (down to and including the battle of Talavera); "The Medieval Stage," a study by Mr. E. K. Chambers of the development of the drama, after the invasion of the Barbarians, from its origins in minstrelsy, the *ludi* of the folk and the liturgy of the Church, to the humanist interlude; a history of French versification by Mr. L. E. Kastner, of Owen's College, Manchester, which the author has tried to make concise yet complete; and a work on "Mathematical Crystallography" by Mr. H. H. Hilton.

The Town of Scituate, Mass., hitherto known only through its connection with a famous Jersey cow, is about to challenge attention on other grounds. The High School authorities have taken a fall out of Rudyard Kipling. They refused to allow the recitation of "Gunga Din," at the recent commencement exercises. The verse they most strenuously objected to contains the lines:

"'E'll be settin on the coals
Given drink to poor damned souls,
And I'll get a swig in 'ell from
Gunga Din."

The religious tenet that there is to be no alleviation of eternal punishment is defied by the poet; but the High School authorities of Scituate, Mass., wish it to be thoroughly understood that there will be no "swigs" hereafter. They are probably not interested in the fact that one of their countrymen who prides himself on his literary judgment has selected "Gunga Din" as one of the ten best short poems in our language.

Messrs. Chapman and Hall have completed their excellent "Biographical Edition" of Dickens by issue of "Our Mutual Friend," "Edwin Drood," and "Collected Papers." In the last volume have been brought together a number of Dickens's scattered writings, all the editorial addresses which can definitely be referred to him, and a complete collection of the Prefaces. Concerning the prefaces Mr. Waugh writes: "The present editor owes the idea of their inclusion to the kind and valued suggestion of Mr. Swinburne, who, while expressing a generous encouragement of the present edition, added that it seemed to him highly desirable that all the prefaces contributed to all editions of the works should be reprinted in the final volume." The volume appropriately concludes with the generous appreciation of Thackeray, which appeared in *Cornhill* after Thackeray's death.

A writer who signs himself "Inconnu," in *Today* has some interesting stories of Mr. Gladstone, among them this book-buying adventure in Paris:—As Gladstone entered a bookshop near the Odeon, he found the bookseller engaged in conversation with an extraordinary individual, who held in his hands an old edition of Villon's poems. His dress was ragged and dirty, his face was matted with hair, and he had the eyes of an archangel, with the mouth and jaws of a baboon. Nevertheless, the respectful attitude of the bookseller showed that the man was a personality. Gladstone entered into conversation with him about Villon, and for an hour they talked about early French poetry. Then the stranger shuffled out of the shop. "Who is that gentleman?" asked Gladstone. "He has an extraordinary knowledge of French poetry." "Monsieur, he himself is our greatest poet. C'est Paul Verlaine!" This anecdote was repeated to me by the bookseller himself, who also informed me that Verlaine never knew that he had been in conversation with Gladstone.

AMERICAN MATTERS.

A unique illustration of race feeling has been given at Indianapolis, says an exchange. Mrs. Lulu Hadley, a chambermaid, refused to make up a bed which Mr. Booker T. Washington, the noted negro educator, had slept in. She was discharged, and is now getting letters with money from all over the South. The total of the gifts amounts to \$3,500, including \$1,000 from a New Orleans man.

A New York correspondent telegraphs that Professor Goodspeed, of the University of Pennsylvania, has demonstrated that light is emitted by the human body. In an absolutely dark room and using rays of light emanating only from a human hand he has obtained distinct photographs with a camera containing very sensitive plates and having an exceedingly sharp lens. The exposures did not exceed five minutes.

An epidemic of fraud and corruption seems to have spread throughout the Federal service, and Washington authorities are uncovering nests of dishonesty all over the country. The disease, says the *San Francisco Call*, has extended even to the American consular service in China, where United States officials are accused of selling merchants' certificates to coolies for admission into the United States.

M. George Bethune McCarter, Sr., a prominent Democrat, of northern New York, and one of the first chiefs of the Bureau of Engraving and Printing at Washington, has just died at his home in Salem, Washington County, N. Y., in the 71st year of his age. Mr. McCarter was the man who wrote, on dictation, as private secretary to General John A. Dix, secretary of the Treasury, in President Buchanan's Cabinet, that famous message: "If any man hauls down the American flag, shoot him on the spot."

The report filed by the appraisers appointed by the Surrogate's Court to value the estate left by Mr. Thomas B. Reed, once Speaker of the House of Representatives, and for some years prior to his death practising law in New York

city, shows that Mr. Reed left a personal estate valued at \$431,099, after provision had been made for the payment of debts and the expenses of the administration of the property. The gross personalty amounted to \$629,533.

The threatened extinction of the old line of Josiah Quincy of Boston has been averted by the advent of Josiah Quincy, Jr., born during the month of May in Florence, where the former mayor of Boston and his wife have been for some months. There have been six Josiah Quincys in Boston straight down from that Josiah, son of Edmund Quincy of anti-revolutionary times. Three of those Josiahs have sat in Boston's mayoral chair. The first of these mayors held office from 1823 to 1828.

Because Yale's athletes dislike to be stunted in the matter of riding in parlour cars to and from matches with other colleges, because they demand "good hotel rooms, lush supplies and good living," and because of a variety of other courses unforeseen 20 years ago, the annual budget of expenses has grown from a total of about \$17,000 in 1881 to about \$80,000 now, according to an exhaustive study of the finances of Yale's athletics made by Mr. Clarence Deming of the class of 1872, in an article published in the *Yale Alumni Weekly*.

Five battleships a year is said to be President Roosevelt's naval policy. This, it is believed, will make the American fleet adequate to the needs of the nation within the next few years. Secretary Moody, in a speech following the President at Salt Lake on May 31st, stated that he would name a battleship in honour of the State of Utah if Congress gives him five ships of this type at the next session. This is taken as an administration declaration that President Roosevelt will urge Congress to appropriate money for five more battleships, possibly some armoured cruisers, and certainly for necessary auxiliaries, in the first session of the 58th Congress.

The production of aluminium in the United States during 1902 was approximately 7,300,000 pounds, as compared with 7,150,000 pounds in 1901, the sole producer being the Pittsburgh Reduction Company, which has large plants in operation at Niagara Falls and at Shawinigan Falls, Quebec, Canada, and is installing a large plant on the St. Lawrence river near Massena, N.Y. The chief use of aluminium is for the transmission of electrical currents and for alloys possessing exceptional physical and chemical properties, though a considerable part of the output is manufactured into domestic articles of various kinds. Two growing uses of the metal are for lithographic work and for the production of incense heat by the combustion of the metal as powder.

According to the *Oil, Paint and Drug Reporter*, the total number of oil wells completed during May in the states of Pennsylvania, West Virginia, New York, Ohio and Indiana was 1,498, being an increase of 232 over the number completed during April. The production of these wells at the close of the month amounted to 16,500 barrels, showing an increase over that of the April wells of 1,829 barrels. The number of dry holes reported was 252, which is an increase of forty, although it shows the percentage of failures to find oil to have been a little smaller than in April. The number of wells drilling at the close of the month was 1,390, showing an increase of 215. The number of rigs in the course of erection was 700, showing a decrease of eighty-seven, thus making the total increase of new work under way 128 wells.

Anything in any way connected with the career of one of the nation's leaders in the present or past is always an object of interest. An example of this is the desk formerly used by James G. Blaine in the office of the *Kennebec Journal* at Augusta, Maine. The old desk still does service in the office there, as it did in the days when Blaine wrote the editorials for the newspaper, although it has been removed from its place of honour in the editorial sanctum to be replaced by one of more imposing appearance. It is an object

of interest to hundreds of visitors who often come from a great distance to see it. The desk was made expressly for Mr. Blaine by an Augusta carpenter (the late Abner Fogg), when Mr. Blaine came from Pennsylvania in 1854 to Augusta, his wife's home, to become editor of the *Journal*. The desk is a simple affair, but it is well made, and still serviceable, after half a century's use.

The commerce of Alaska during the fiscal year which ended June seems likely to aggregate over \$20,000,000, exclusive of gold. Thus the figures of shipments from the ports of the United States to Alaska during the ten months ending with April, 1903, aggregate \$9,831,070 of merchandise and \$104,359 of gold and silver coin. During the month of April the total shipments of merchandise to Alaska amounted to \$2,581,784, and as the opening months of the season are those of heavy shipments of Alaska, it is quite apparent that the total shipments to Alaska during this first fiscal year in which their value is measured will aggregate between \$10,000,000 and \$12,000,000. A similar statement of the shipments from Alaska to the United States shows the total value for ten months to be \$10,101,060 of merchandise. In addition to this, the shipments of gold ore from Alaska, produced in United States territory amount to \$4,369,496. The shipments of "foreign" gold ore from Alaska during the period, by which is meant that from the Klondike (Canadian) territory reaching the United States through Alaska, aggregates for the same period \$10,972,454.

Whatever may be said of the unprofitableness of some of America's new possessions, this reproach can hardly be leveled at Porto Rico, which, as shown by the Bureau of Statistics, buys from and sells to the United States close to \$1,000,000 worth a month. The total shipments of domestic merchandise from the United States to Porto Rico in the ten months ending with April were \$9,844,318, and of foreign merchandise \$218,276, making the total value of merchandise sent to Porto Rico from the United States \$10,062,594. The total value of the shipments of domestic merchandise from Porto Rico to the United States in the same period was \$8,744,427, and of foreign merchandise \$89,037, making the total \$8,833,464. In the month of April the shipments from the United States to Porto Rico were \$931,526, and from Porto Rico to the United States, \$1,919,013. These figures indicate that the shipments from the United States to Porto Rico during the fiscal year which ends with the present month will aggregate about \$12,000,000, and those from Porto Rico to the United States nearly an equal sum.

The 13,000 ton battleships, *Idaho* and *Mississippi*, sketch plans of which have just been approved by the Secretary of the Navy, will each have a length of 375 feet, a breadth of 77 feet, a mean draft of 24 feet 6 inches, 10,000 horse power and a trial speed of from 16½ to 17 knots. In submitting the plans, the Board of Construction informed Secretary Moody that it had concluded that the "intent of the act would be best complied with and the interest of the navy furthered under this act, by retaining for the vessels in question, as nearly as possible, the offensive and defensive features of the first-class battleships, and reducing the speed and power and the coal to be carried on trial to the amount necessary, in order that the trial displacement of 13,000 tons may not be exceeded." Each vessel will have a battery of four 12-inch, eight 8 inch, 20 7-inch and 12 3-inch breech-loading rifles, and 20 other smaller guns. The armour protection will consist of a water-line belt of 9 inches, tapering to 7 inches at the bottom and to 7.5 and 4 inches at the ends; seven with casemate athwartship armour, 12 inches and 8 inches on the main turrets, 10, 7½ and six inches on the main barbettes, and 9 inches on the conning tower.

Mr. William Bacon Bailey, Ph.D., instructor in statistics and sociology in Yale University, says that suicide is increasing in the United States. He says:—"Where there is a generally high education of the people there is mental worry and the life is taster, the work is harder for men

to get to the top, the nervous tension is greater, and that may intensify the tendency toward suicide. Professor Bailey furnishes the following table showing the percentage of suicides in North America from 1897 to 1901, according to figures he has compiled:—

	Males. per cent.	Females. per cent.
Under twenty	4.4	13.3
Twenty to thirty	20.5	30.2
Thirty to forty	23.5	24.8
Forty to fifty	20.5	12.2
Fifty to sixty	14.4	8.7
Sixty to seventy	9.3	3.7
Seventy and over	3.8	2.2
Unknown	3.6	4.4
Total	100.0	100.0

As is true in most countries, he says, the number of married slightly exceeds that of the single.

	Total.	Males.	Females.
Single	4,054	3,129	925
Married	4,807	3,817	990
Widowed	679	496	183
Divorced	189	137	52
Unknown	271	202	69
Total	10,000	7,781	2,219

The incorporation of new companies, which has flagged somewhat since the beginning of the year on account of the condition of the American money market and the uncertain attitude of Congress and the courts, was resumed with considerable vigour in May, and the combined capitalization of companies formed during that month was greater than that of any other month in 1903. The total of new companies having a capital of \$1,000,000 or more in the seven principal states was \$395,250,000, as compared with \$209,050,000 last month and \$228,953,000 for May 1902. New Jersey resumes its position at the head of the list this month with a total of \$157,250,000. The month has been a rather notable one for large companies, including the Public Service Corporation, \$25,000,000; the du Pont de Nemour Powder Co., \$50,000,000; the General Asphalt Co., \$31,000,000, and the Kansas City Railway & Light Co., \$25,000,000. South Dakota comes next with a total of \$144,600,000. New York comes third with \$43,250,000 and Maine fourth with almost as much. The aggregates of the companies having a capital of 1,000,000 or more for the several states follows:—

	\$
New Jersey	157,250,000
South Dakota	144,600,000
New York	43,250,000
Maine	35,450,000
Minnesota	7,000,000
Delaware	5,200,000
Connecticut	2,500,000
Total	395,250,000

Writing on June 7th, the *New York Commercial* said:—Never before in times of prosperity has so much money been lost in wages to workmen in this city in the same time in one season as during the building lockout. If the shut-down lasts much longer it will tell on a large number of small storekeepers, whose business is chiefly with the working people. Capital amounting to \$200,000,000 has been tied up during the 32 days of the shutdown. The loss of profits of the 2,000 contractors and builders involved foots about \$8,000,000, with rent and office expenses added. Workmen have lost much more in wages:

	\$
Carpenters, 10,000, at \$4.50 a day	1,440,000
Bricklayers, 7,500, at \$5.25 a day	1,324,000
Plasterers, 4,000, at \$5 a day	640,000
Plasterers' helpers, 4,000, at \$3.50 a day	448,000
Ironworkers, 8,000, at \$4.50 a day	1,152,000
Labourers, 25,000, at \$2 a day	1,600,000
Electrical workers, 2,000, at \$4 a day	256,000
Stonemasons, 1,000, at \$5 a day	160,000
Plumbers, 2,500, at \$4.25 a day	339,000
Boilermakers, machinists, mosaic workers, marble polishers, wood lathers and others, 30,000	3,800,100
Unclassified unskilled trades, 50,000	2,000,000
Total	13,160,000

All this money has been lost to the skilled

trades through the persistence of the Board of Building Trades in supporting a small union of unskilled men, the Building Material Drivers' Union. Truly the tyranny of Labour growth intolerable.

Importations of manufacturers' materials into the United States during the fiscal year which ended in June will be by far the largest in the history of American importations, and will amount to about \$500,000,000. Manufacturers' materials will form 48 per cent of these imports. The fiscal year 1902 was the banner year, its total being \$415,000,000, while the highest figure ever reached prior to 1902 was in 1900, when the total was \$380,000,000. The total of manufacturers' materials imported during the last two months was \$91,000,000, and those of the 10 months ending with April were \$410,608,866. Should the figures of May and June equal those of March and April, they will bring the total imports of manufacturers' materials for the fiscal year above the \$500,000,000 line. The 10 principal articles of manufacturers' materials imported are hides and skins, chemicals, fibres, India rubber, tin, wool, wood, copper, and tobacco. These 10 articles form 70 per cent of the imports of manufacturers' materials. The following table shows the total value of each of these articles, or groups of articles, imported in the 10 months ending with April, 1903, compared with those of the 10 months ending with April, 1893:—

Raw Materials:	1893.	1903.
Chemicals, etc	43,467,044	53,172,504
Copper	850,080	17,242,379

NEWS OF THE WEEK.

Five torpedo boats left Iwahara on July 4th for Yuensang, Korea.

A case of cholera was reported on July 2nd at the village of Araki, Saitama Prefecture.

A case of suspected cholera was reported on July 4th at Arai district, near Matsuyama.

The steamer *Niigata Maru* built at the Mitsui Bishi Yard, Nagasaki, left there on July 5th for Yokosuka.

A coolie who was working on board the steamer *Tamba Maru* fell on July 4th into the hold, and was instantly killed.

The Crown Prince and Princess will leave about July 20th for the detached palace at Nikko to pass the summer vacation.

A case of small-pox was found among the crew of the steamer *Tairen Maru*, which arrived at Shimonoseki on July 3rd.

Owing to heavy rains, damage was caused to the section between Oba and Chinori on the Dzuho Railway and traffic was suspended.

It is officially stated that the training ships *Matsushima*, *Itsukushima* and *Hashidate* arrived at Thursday Island on July 2nd from Sydney.

A woman named Asa (25) living at Kawasaki, committed suicide on July 3rd, cutting her throat with a razor. Insanity is said to be the cause.

The Tokyo papers report that Mr. Jiro Yano, formerly President of the Tokyo Commercial College, will probably be promoted to the peerage.

A case of dysentery appeared on July 4th at Toke-machi, Yokohama. The patient, a baby, was at once removed to the Juzen Hospital, Noge.

A chartered steamer arrived on July 5th at Moji from Manila having on board 1,200 U.S.

soldiers for home. The ship after taking on coal left for Kobe.

A case of cholera was officially reported on July 8th in Ehime prefecture.

Mr. D. C. Worcester of the Philippines Government, Manila, arrived on July 8th at Nagasaki.

Princesses Yasu, Shige, and Suze, daughters of Prince Kan-in, left on July 8th for Kodzu, where they will spend the summer.

On the night of July 7th fire occurred in the engine-room of the Biwa yarn mill, Hikone, destroying the building.

Owing to the storm, a lighter carrying 27 tons of coal sank on July 7th off the landing place near the Yokohama railway station.

Madame Chise Ushioda, president of the Tokyo Ladies' Temperance Society, died on July 4th. She had been suffered from consumption for a long time.

Viceroy Tsên started on June 27th from Canton for Wuchou and Kuangsi to repress the rebellion in those localities. His ammunition was in sixty junks loaded with rice.

According to correspondence from Wiju, says the *Yorodau*, about fifty Russians and many hundred Koreans are engaged in the construction works at Yonampho.

Two stowaways named Niitoyo (17) and Harada (21) were found by the harbour police on board the *Nippon Maru* on July 4th just as she was leaving for San Francisco.

A Peking correspondent of the *Niroku* states that a Military Attaché to the United States Legation left on July 3rd for Teufang and Antong to inspect the action of the Russians.

A telegram to the *Asahi* from Shimonoseki states that a Russian dressing as a Chinese and calling himself a German, left there on July 3rd by the steamer *Keijo Maru* for Fusan, Korea.

The Osaka Shosen Kaisha has ordered the Mitsui Bishi, the Kawasaki and the Osaka Docks to build four steamships of a gross tonnage of 750 tons each. These vessels will be used on the Korean coasts.

An alleged thief was arrested by the Bluff police on July 6th. He is charged with having stolen a gold watch and a nickel watch at the Club Hotel, No. 5. The details are, however, not yet given out.

The dead body of a man was found on July 5th in the well of the prefectural police office compound adjoining the Post Office, Yokohama. The identity of the deceased or the cause of the accident has not yet been ascertained.

Y. Abe (30), chief accountant of the Meiji Life Insurance Co., Tokyo, was arrested on July 7th on a charge of having embezzled about thirty thousand yen belonging to the office.

Vice-Admiral Geissler, Commander-in-Chief of the German Squadron, accompanied by Count Arco Valley paid a visit at 10.30 a.m. on July 8th to Viscount Tanaka, Minister for the Imperial Household.

Heavy rains prevailed on July 2nd at Hamamatsu and surrounding districts. All the rivers overflowed their banks. A part of the bank of the Ota river was broken down leading to damage of the railway, on which traffic was temporarily suspended.

The steamer *Yoshino Maru*, gross tonnage 309 tons, damaged her bottom on an unseen rock on July 4th off Katsuura. The ship was at once run ashore in the harbour. The Osaka Shosen Kaisha's steamer *Oshima Maru* has been sent to the rescue.

Baron Kodama, Governor-General of Formosa, paid a visit on July 5th to Marquis Ito at the villa of the latter at Oiso. The *Niroku* says the object of the visit was to advise the Marquis to

accept the instructions of the throne and organize a Cabinet.

To fill up the vacancy for a member of the House of Peers caused by the retirement of Mr. R. Kimura, Yokohama, elected from among the highest tax-payers, an election will take place on August 28th at the Prefectural Government Office.

In the Tokyo District Court on July 8th an educational official who was connected with the text book affair was sentenced to two months' imprisonment with hard labour and a fine of yen 7. The bribe, yen 500, which he had received was ordered to be confiscated.

A telegram from Shimonoseki to the *Asahi* states that a warrant has been issued for the arrest of Mr. Townsend, second mate of a British steamer, on a charge of infringing the law regarding fortifications. It is alleged that he photographed the sea face of one of the forts.

The body of a woman, apparently about 32 years old, was found on July 1st buried in the sands of the sea shore near the Baniu river, close to the village of Ono. From the injuries on the body it is supposed that she had been murdered and her body then hid where it was found.

A telegram from Nagoya states that on the night of July 5th two men assaulted a policeman named Oguri on the river bank at Shonai, the latter having gone to examine them because of their suspicious appearance. After severely wounding the officer with large knives they ran off.

Two educational officials connected with the text book affair were on July 6th in the Tokyo District Court sentenced to two months' and five months' imprisonment with hard labour and a fine of yen 7 and yen 20 respectively. The bribes which they had received were ordered to be confiscated.

About a hundred and twenty students of the Miyazaki Agricultural College have been dismissed and many of the teachers are about to retire from duty. Unsatisfactory relations between teachers and pupils are supposed to be the cause, as to which, however, no details are given.

The Department of Foreign Affairs has decided to obtain telegraphic information with regard to business conditions in London, Lyons, Hamburg, Odessa and other important foreign markets. Hitherto a telegram with reference to the conditions of raw silk, cotton and tea in New York only has been received every Monday.

A coolie was run over by a train at 11 a.m. on July 6th at Kanagawa station and instantly killed. It appears that the man was working on the railway as the up-train to Yokohama was approaching. He intended to get out of the way but stumbled on the rail and fell immediately in front of the train.

On June 15th tenders for the supply of 33,806 tons of permanent way materials for the Royal Siamese State Railways were publicly opened. The lowest tender was from Belgium. British (9 tenders out of a total of 24), German, Russian, Italian, Hungarian, Dutch, and Japanese tenders were also received—but (remarks the *Hongkong Daily Press*) none from the United States.

The *Asahi* states that a Russian merchant of Port Arthur has applied to the Mitsu Bishi ship-building yard, Nagasaki, to build a steamer large enough to carry 320,000 cubic feet (8,000 tons of 40 c.f.) of timber, to be completed within four months commencing with the day the order is given. The absurdity of this proposal, it is said, will lead to its being declined by the company.

Tokyo papers state that Admiral Baron Yamamoto will give a dinner on July 7th at noon at his official residence to Admiral Geissler, Commander-in-Chief of the German squadron, and his staff; Count Arco Valley, German Minister; Admiral Ito, Rear-Admiral Saito and about twenty other foreign and Japanese officers.

A Tientsin correspondent telegraphs under

date July 5th to the *Niroku* stating that military manoeuvres on an extensive scale will shortly take place at Port Arthur at which General Kuropatkin will be present. The Russian authorities at Port Arthur keep strict watch on foreigners. Soldiers are always escorting persons suspected of being spies. Seven or eight Japanese residents are under suspicion.

A cabinet-maker named Inui (28) living at Maki-cho, Kyobashi, Tokyo, on July 6th, murdered two men named T. Hayashi (35) and Y. Hayashi (35) and attempted to murder a third, a tin-smith named G. Yamada (42), and his wife (28) severely injuring them with a sword. The affair took place in the dwelling of the tin-smith, Kobuki-cho. The offender was at once arrested. The cause is stated to be jealousy.

The ship *Brenda*, which arrived at Sydney from San Francisco on Saturday, 9th May, when passing through the Tonga group, on 18th April, encountered a sea of pumice-stone, which seemed to extend for hundreds of miles in all directions. The *Brenda* sailed for over one hundred miles through the floating mass. The barque *Star of Bengal*, and the steamer *Rotokino* from the South Pacific Islands, report having met huge quantities of pumice-stone.

We learn from a Hongkong journal that *Bringingshaw*, a waler belonging to Mr. Campbell MacMillan, whose chances as an outsider drew numerous backers in the Maiden Stakes and Phaeton Stakes at the Races in February last, but who refused to leave the post when the former race started and was unplaced in the latter, came to an inglorious end by falling and breaking his leg on June 17th after a wild runaway gallop through Wanchai. He was shot.

Early on Friday morning (said the *Hongkong Daily Press* of June 29th) H.M. gunboat *Espiegle* (1,070 tons) was towed out to the quarantine anchorage off Green Island, a case of plague having occurred on board, the victim being James Collins, A.B. It is rumoured in Naval circles that further cases of plague have developed on H.M.S. *Ocean* since her departure for Weihai-wei. The six patients from the *Ocean* are being treated in the isolation ward at the Naval Hospital.

General Ventris, the successor of General Creagh in the North-China command is the son of the Rev. E. V. Ventris of Church Aston, Salop, and entered the army in 1875, obtaining his colonelcy in 1889. He served with distinction in the Nile Expedition and was mentioned in dispatches, receiving the medal with clasps and the Khedive's star. He was with the Egyptian Field Force in 1885-86 as D.A.A. and Q.M.G., and did notable work with the Intelligence Department in India in 1895-97. He attained his Brigadier-Generalship in 1897. Mrs. Ventris is a daughter of Major-General Horatio Nelson Davies.

Captain T. Noguchi (42) an artillery officer living at Oimatsu-cho, Koishikawa, Tokyo, has been arrested by the gendarmerie on a charge of having on the night of June 30th entered the premises of Mr. Tsuboi, an official of the Department of the Imperial Household. It appears that having heard suspicious footsteps the latter went to investigate, armed with a sword cane, and found an individual dressed in white. Receiving no satisfactory reply to his questions he attacked the intruder inflicting wounds on his hand and back, on which the stranger fled. The matter was reported to the police, who traced the stranger through the doctors to whom he had gone for surgical treatment.

By invitation of Mr. and Mrs. G. K. Shimoda, a number of foreigners and Japanese visited their new house in Tsukiokacho, near the Noge Reservoir, on Monday afternoon. Mr. Shimoda, who is a naturalized American citizen, is head of the Shimoda Building Company and a bright and shrewd man of business. The special object of the invitation was stated by the card to be the inspection of a very fine model of an old style Japanese house; three such models were on view and were duly admired. In Mr. Shimoda's re-

sidence, which is half in Japanese and half in foreign style, were shown a number of flower vases and other bronze ware of rare kinds. The guests were most hospitably entertained by Mr. and Mrs. Shimoda.

An unpleasant incident is reported to have occurred in the neighbourhood of Ikuta, Kobe, on the afternoon of 7th July, arising out of the blackballing of a candidate at the new Masonic Club. The candidate blackballed met a member of the balloting committee, and not receiving what he regarded as a satisfactory answer to a question as to whether the committee-man had taken part in the blackballing, struck the committee-man, it is alleged, a somewhat serious blow in the face. The *Kobe Chronicle* understands that complaint has been laid before the procurator, and proceedings are likely to be taken.

A telegram dated Washington, June 19, published by the Manila *Cablenews* states that the official announcement was made that day by Dr. Marchetti, chancellor of the Papal delegation, that the Rev. Dr. Jeremiah Harty of St. Louis, Mo., had finally accepted the Archbishopric of Manila. Dr. Harty has pondered over the Vatican's proffer of the Orient see for nearly two months, and his acceptance has relieved the anxiety of the ecclesiastical authorities and gives universal satisfaction. Dr. Harty is a well known scholar and orator, an able administrator and a patriotic American of pronounced liberal and progressive opinions. It is believed here that Dr. Harty's advent in the Philippines will make for an earlier and amicable settlement of the vexing questions now pending between church and state in the Philippines.

According to the investigations of the Department of Finance, says the *Official Gazette*, the average prices of loan bonds on the Tokyo Exchange during June were as follows:—

Loan Bonds.	Price, yen.
Old.....	19.33
Pension.....	94.47
Naval.....	90.17
Redemption.....	90.78
Military.....	90.78
Five Per cent.....	89.07
Tokyo Municipal.....	96.40
Osaka Harbour.....	91.47
Osaka Water-works.....	93.17
Kyoto City.....	97.00
Kobe Water-works.....	91.00
Nagasaki Harbour Improvement.....	91.73

Mr. Ichihara, Mayor of Yokohama city, at 2 p.m. on July 7th entertained over two hundred prominent citizens at the Yokohama Traders' Club, and delivered a lengthy speech with regard to the improvement of the city. He dwelt on the call for amelioration of the harbour conditions, as the landing places for imported goods; the establishment of sheds and warehouses; improvement of public roads, bridges, and drains and generally of the arrangements for sanitary works, and for education. In conclusion he said that the city is a family, and therefore such disputes as are caused by political contests must be avoided. As Yokohama is one of the most important places of trade in the Empire, the Japanese inhabitants are required to move along with the foreign residents in a friendly way for any purpose that is needed to secure their common interests.

GREEK CHURCH SCHOOL.

The graduation ceremony of the Surugadai Seikio Singakko (Greek Church Mission School) took place at 8 a.m. on the 8th inst. There were 6 graduates. Bishop Nicolai delivered a brief speech in which he expressed his congratulation to the graduates and encouraged them to prosecute their mission by Jesus Christ's word. Mr. K. Mori, one of the graduates, will depart for Russia by Trans-Siberian Railway, to complete his theological studies in the St. Petersburg Academy.

The annual meeting of clergy (Sinpin Kwaigi) of the above church will be held on July 14th.—Communicated.

SUPER-AERATION.

The system of super-aeration which had already made its way in Europe, has now been brought to Japan, as was demonstrated at an exhibition of the apparatus given on Wednesday at No. 14, Water Street. The principle of super-aeration is certainly capable of practical application, and the present syphon and bottling methods appear to lose much by comparison. In the bottle or syphon water charged with gas at a pressure of from 120 to 150 lbs is when one opens the vessel driven out by the gas with the result that a quantity of the gas is, so to say, blown out of the water. The manner of avoiding this fault, which of course renders the water less bright and sparkling, is very simple. The steel cylinders that are supplied contain water impregnated with gas at 200 lbs. pressure per square inch. When the contents of the ordinary syphon are released the water is found to be comparatively lifeless; not so much so the water from bottles, which being poured out under the action of gravitation is not so greatly denuded of the gas with which it was filled. But the liquid in the super-aerated cylinder is not thus discharged. When the water is drawn up by the turning of a handle, it would if at once released be blown out as in the case of the syphon. The chief point of the machine is the fact that the water on being drawn up goes into what is called a draught arm, and falls to the bottom of this receptacle, the gas of course being on top. The handle is now returned to its original position and the water is ready to be drawn off, still fully charged. A mineral bottle inverted is perhaps the best description of the draught arm. There are various points on which, it is pointed out, this system is superior to the old one. Not the least is the ease with which the contents of the cylinder may be kept cool, by placing ice over the coil of pipes communicating with the cylinder. Each cylinder, it may be noted, contains the equivalent of 16 dozen bottles. Under such great pressure germ life would have little chance of surviving, but the company formed to bring the system forward in Japan have decided to adopt the Berkefeld filter, which in some respects is held to be an improvement on the Pasteur apparatus. There seems little doubt of the success of the company, for consumers have this to tempt them, at any rate, apart altogether from the superior quality of aeration, that there will be no trouble with bottles or syphons and no anxiety about breakage. We believe that the price of super-aerated waters will compare favourably with the old system.

The demonstration on Wednesday was witnessed by members of the Japanese and foreign press and others, and the apparatus was fully explained by the courteous representative of the system, Mr. W. J. Hernan. Mr. McIvor is the President of the Company that has been formed and Mr. C. K. Marshall Martin is the Vice-President. Mr. Otto Meyer is the other member of the board. Mr. Eddison will act as Secretary and Mr. Howard as inspector.

NIPPON BICYCLE CLUB.

Mr. Geo. Hood, Hon. Secretary of the Nippon Bicycle Club, has issued the following notice:—I am glad to be able to inform the members of this Club that owing to the liberality of its Captain, Mr. C. J. Helm, his large property at Hachiojiyama, Honmoku, has been kindly placed at the disposal of this club for use as a Club House for the Summer Months. The property is situated on a high bluff at Honmoku Point overlooking the Bay, with a main building, a bathing house, tennis courts and large gardens.

It is intended, (weather permitting) to open the Club House on Sunday afternoon, the 12th July, when members and their friends are cordially invited to attend. Tea will be provided. A special bathing box is being fitted up for the Club's lady members.

THE FOUNDERING OF THE "CONCH."

The judicial inquiry into the foundering of the Shell Transport and Trading Company's steamer *Conch*, on the morning of June 3 off Amblangoda, was concluded at Colombo on June 16. The Judge read out the written opinions of the two assessors. They held that the master should have gone on the bridge shortly after 12 o'clock, when the 3rd officer went and reported to him that he had seen land. He should have found out a prudent course to follow. For not doing this the Captain was held blame-worthy, and his certificate was suspended for six months.

CORRESPONDENCE.

LORD KELVIN AND SUPERNATURALISM.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The cap-throwing and shouting elicited by certain utterances of one of the greatest scientists of the day on the attitude of science to religion are very significant. Were the daily utterances of European and American scientists favourable to belief in miracles, we should not witness such tremendous demonstration over the confession of individual belief which Lord Kelvin saw fit to make at University College, London, at the close of Professor G. Henslow's lecture on "Present Day Rationalism." That on that occasion Lord Kelvin spoke in the name of science or gave expression to a view that is generally held in the scientific world no one versed in current thought for a moment believes. Unfortunately for those who wish to make use of the confession for controversial purposes, that is, to prop up a belief that the majority of educated men in the West has long since rejected, Lord Kelvin's utterances on the occasion referred to are marked by a fatal weakness. Instead of drawing an argument in favour of supernaturalism from his own special subject, physics, he dipped into biology and practically said that, though in the physical sphere, that is, in his own special sphere, there is no special evidence of creative and designing processes, they are visible in the biological world. Now, among keen scientists, when a man leaves his own subject and begins to generalize on branches of knowledge with which he is only partially acquainted he ceases to be an authority. So to Lord Kelvin's argument Sir W. T. Thiselton-Dyer retorts that Lord Kelvin wants to keep a free hand for himself, while hampering the biologists with a theological dogma. The late Sir George Stokes did the same kind of thing some years ago. Instead of keeping to his mathematics, he attempted to cull arguments in favour of natural theology from the subject of light and the structure of the human eye, thereby bringing upon himself a very powerful attack from the pen of Professor Karl Pearson in an article called the "Prostitution of Science." In an article published on January 23rd, the *Saturday Review* dispels the mist in which the subject in dispute has been enveloped by the sunshine of logic, in the following terms:—"Lord Kelvin has immensely more scientific knowledge than the man of Paley's day, but he is neither more nor less qualified to decide by virtue of his scientific knowledge on the question of creative power, or design. . . . It is a remarkable exaggeration to say that Lord Kelvin's opinion sweeps away Darwinism. Other men have said that Darwinism: 'abolished teleology and eviscerated the argument from design.' It did no more, however, than show that animals and plants could not have been created exactly as they are now, for the purpose of doing exactly what they do at present; the cat and the mouse being the intended complements of each other. In Huxley's view 'There is a wider teleology which is not touched by the doctrine of evolution. This proposition is that the whole world, living and not living, is the result of the mutual interaction, according to definite laws, of the forces possessed by the molecules of which the primitive nebula of the universe was composed. That acute champion of teleology, Paley, saw no difficulty in admitting that the production of things may be the result of mechanical dispositions fixed beforehand by intelligent appointment and kept in action by a power at the centre.' Darwinism does not go therefore unless it is arbitrarily joined with a speculative doctrine of materialism. The real enigma lies in the word 'directive.' Is supernatural intervention excluded from the course of things after creation? Lord Kelvin's illogical dichotomy would lead us to suppose that there might be intervention in the 'biological' sciences but not in the physical—his own branch; and this it was that irritated Sir W. T. Thiselton-Dyer quite justifiably. Lord Kelvin says to biologists, 'You ought to admit that something takes place in your department which cannot be explained by physical and chemical

laws.' The phenomena of life are at least as mysterious as those of radium are at present; and when Lord Kelvin advises that they should be explained by "vital force," or otherwise than on the ordinary lines of scientific inquiry, he ought to be prepared to show that these are not applicable. He could only do this by proving his competency as a biologist, or by showing that opinion has reached such a point among biologists that an observer like him of competent intellect is able to say the next step must be so and so. Very evidently the biologists will not admit either alternative; and they may be granted the right to act on the assumption of the reign of strictest chemical and physical laws. These do not imply the exclusion of the creative act, since none of the sciences contains in itself a proof of materialism; they are simply dumb."

The conclusion which the writer of the article from which I have quoted reaches is the Lord Kelvin's statements have contributed nothing whatever towards the alteration of the attitude of science to religion, and that the big fuss that has been made is the result of trying to "square science falsely so-called with equally false religion." Modern science does not of itself lead men to believe in any directive power. It furnishes no explanation of ultimate things, either origins or ends. In science men are all agnostics. The belief in miracles, where it exists, rests on other grounds. Religion must stand on its own basis. The forlorn hope that science will ever come to its rescue had better be abandoned. And so this latest pronouncement of science on supernaturalism turns out to be valueless for controversial purposes, and the conviction which the discussion leaves on the mind is that even scientific Jupiters are occasionally to be caught nodding.

I am, yours, &c.,
July 5th, 1903.

"AGNOSTIC."

YOKOHAMA ENGINE AND IRON WORKS, LTD.

The following report has been issued to shareholders in the above-named company:—

Report and accounts to be presented to the Shareholders at the Sixteenth Yearly General Meeting to be held at the Company's Office, No. 161, Yamashita-cho, on Wednesday, the 15th day of July, 1903, at 4 o'clock in the afternoon.

The Directors beg to submit to the Shareholders the Balance Sheet and Profit and Loss Account for the Year which ended 31st May last.

The Net Profit for the Year (including the sum of yen 17,380.25 brought forward from 31st May, 1902) after payment of an Interim Dividend of yen 13,000 in January last and providing for Depreciation of Buildings, Plant, and Machinery, and payment of Directors' and Auditors' Fees, &c., amounts to yen 23,256.55.

Which the Directors propose should be appropriated as follows:—

In payment of a Final Dividend for the Year	Yen.
Year of yen 5 per Share	13,000.00
In payment of Bonus to Employees	1,009.00
The Balance to be carried forward to next account	9,247.55
	23,256.55

BOARD OF DIRECTORS:—Messrs. James Johnstone and James Dodds retire by rotation in accordance with the Articles of Association, but offer themselves for re-election.

AUDITORS:—Messrs. F. J. Hall and J. Cox Edwards retire and again offer their services for the ensuing year.

JAMES JOHNSTONE,
Chairman of the Board of Directors.
Yokohama, 7th July, 1903.

BALANCE SHEET FOR YEAR ENDED 31ST MAY, 1903.	
LIABILITIES.	Yen.
To Capital, 2,600 Shares of yen 50 each	130,000.00
To Sundry Creditors	8,341.43
To Balance Profit and Loss Account	23,256.55
	161,597.98

ASSETS.	
	Yen.
By Property Account (Estimated value in 1898 yen 62,000)	19,107.08
By Plant & Machinery Account	43,626.89
By Steam Launches	12,144.00
	74,877.97
By Stock on hand as per Inventory	60,007.89
By Sundry Debtors	8,225.62
By Chartered Bank of India, Australia and China	18,104.15
By Yokohama Specie Bank	233.73
By Cash on hand	148.62
	18,486.50
	161,597.98

PROFIT AND LOSS ACCOUNT FOR YEAR ENDED MAY 31ST, 1903.

DR.	
To Interim Dividend of Y. 5 per Share paid Jan. 31st, 1903.....	Yen. 13,000.00
To Property A/c. Depreciation of Buildings 5 per cent.....	992.92
To Plant and Machinery A/c. Depreciation 5 per cent.....	2,265.63
To Fire Insurance.....	1,462.96
To Wages and Expenses.....	106,152.08
To Rent.....	4,865.90
To Interest.....	58.75
To Directors' and Auditors' Fees.....	1,900.00
To Bad and Doubtful Debts.....	98.37
To Upkeep and Repairs.....	3,279.89
To Loss on Stern Wheel Steamer.....	8,269.00
To Balance.....	Y. 23,256.55

To be appropriated as follows:—

In payment of Final Dividend of yen 5 Yen. per Share.....	13,000.00
Bonus to Employees.....	1,009.00
Balance carried to New Account.....	9,247.55
	23,256.55

	165,602.05

1903. June 1. By Balance.....	9,247.55
-------------------------------	----------

JAMES JOHNSTONE,
Chairman of the Board of Directors.

We have examined the foregoing accounts and compared them with the books and vouchers of the Company, and certify them to be correct.

F. J. HALL
J. F. COX, EDWARDS } Auditors.

Yokohama, July 7th, 1903.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

ADMIRALTY SUBSIDIES.

London, July 3.

Speaking in the House of Commons, Mr. Arnold Forster, Parliamentary and Financial Secretary of the Admiralty, announced that the British Admiralty was not prepared to renew existing subsidies to merchant cruisers to be placed at the disposal of the Government in war time.

FREE TRADERS ORGANIZING.

Sir Michael Hicks-Beach has accepted the chairmanship of the Committee of Unionist Free-traders.

THE IRISH AUTOMOBILE RACE.

Jenatzy, a German competitor, won the Gordon-Bennett automobile race in Ireland.

FREE TRADE v. FAIR TRADE.

Later.

At a meeting of 54 Unionist Members of Parliament opposed to protection, a resolution was passed favouring an enquiry into the country's fiscal system, but declaring that if the result of the investigation leads to any departure from free-trade it would be disastrous to the country.

It is estimated that about 150 Unionist members have already declared for and 75 against Mr. Chamberlain's proposals, but about half the party have given no expression to their views.

London, July 4.

In the course of a discussion in the House of Lords upon the tariff question, Lord Rosebery demanded more information regarding the Government's reported enquiry into the country's fiscal system, the existence of which he doubted.

The Duke of Devonshire replied that all the members of the Cabinet agreed with Mr. Chamberlain that the time was ripe for

such an investigation. The Cabinet were at present conducting an enquiry, but whether the country would be asked to give its mandate could only be decided when the examination had concluded. Many like himself gravely doubted the expediency of taxing the food of the people.

TURKEY AND BULGARIA.

Later.

The Sublime Porte denies the Bulgarian allegations of the concentration of troops on the frontier, and says that the renewed activity of the revolutionaries necessitates the continuous movement of troops in the frontier districts.

Bulgaria, replying to this denial, charges the Porte with attempting to deceive the public by false reports regarding the intentions of Bulgaria. The latter has prohibited the export of horses and mules.

WARNING RUSSIA.

London, July 5.

The *Standard* says symptoms of a very serious crisis in the foreign relations of Russia are steadily accumulating. Russian statesmen ought to see that Great Britain, Japan and the United States are becoming tired of evasions and manoeuvres with reference to Manchuria, which have been so indecently prolonged. Russians are confronted by the alternatives of perilous defiance or undignified surrender.

SOMALILAND.

The 27th Punjab Infantry has sailed from Bombay for Somaliland. It is expected that the strongest military measures will be adopted for the suppression of the Mullah on the arrival of Major-General Egerton.

UNPRECEDENTED PREPARATIONS FOR PRESIDENT LOUBET.

Later.

President Loubet arrives in England on Monday. Extraordinary preparations are being made for his reception. The King has promised that it shall be such as was never given before in London to the head of a foreign state. Apart from the troops in the capital, two brigades will be encamped in Regent's Park for the purpose of lining the streets and for other duties.

SIR MICHAEL HICKS-BEACH AND THE LIBERALS.

Sir Michael Hicks-Beach has been admitted to the councils of the Liberal leaders on the fiscal question.

THE FISCAL QUESTION.

London, July 6.

After a prolonged discussion the Liberal leaders have decided to refrain from raising the fiscal question by vote of censure because this would embarrass their fellow free-traders among the Ministerialists.

THE POPE'S CONDITION SERIOUS.

The Pope is suffering from senile pulmonary hepatization. His condition is serious.

THE POPE SINKING.

London, July 7.

At the Pope's request the last sacrament has been administered.

THE PORTE AND BULGARIA.

The Porte has sent a circular telegram to the Powers repudiating the Bulgarian charges as to the concentration of Turkish troops at a strategic point on the frontier.

PACIFIC CABLES.

The Pacific cables have been opened. President MacKay, of the Cables Company, sent messages round the world in ten minutes.

PRESIDENT LOUBET IN ENGLAND.

President Loubet was accompanied by the Duke of Connaught from Dover, where

there was a splendid naval reception. The King, the Prince of Wales, and other royalties met him at Victoria Station. The King and the President gave each other a hearty and prolonged handshake. They drove together, with an escort, to York House, where President Loubet is to reside. Crowds cheered the President with genuine heartiness.

THE POPE.

The Pope's condition is unchanged.

BRITAIN AND THE FAR EAST.

Mr. Arnold-Forster, in the House of Commons, said that twelve British ships are at present in the Gulf of Pechili. The Admiralty was not aware of any special gathering of ships, or of any special object aimed at by the Powers in Chinese waters.

EXTREME UNCTION ADMINISTERED.

London, July 8.

Extreme unction has been administered to the Pope.

LOUBET'S RECEPTION.

At a banquet in Buckingham Palace the King, toasting President Loubet, said the reception extended to him by all classes of the population showed their really friendly sentiments towards France, which was the nearest country to England and consequently ought to be her best neighbour. M. Loubet replied, saying he was certain his visit would have the happiest effects, and would serve to tighten the relations between the two nations and thus guarantee the peace of the world.

AT THE GUILDHALL.

Later.

President Loubet was received at the Guildhall with the greatest ceremony. In responding to the toast of his health he emphasized the value of friendship between the two nations.

FRENCHMEN IN LONDON DELIGHTED.

All Frenchmen in London are delighted at the President's reception, which is regarded as an important landmark in international relations.

(RECEIVED AT THE LEGATION OF FRANCE.)

FATAL EXPLOSION.

Saigon, July 2.

There has been an explosion in the Hanna Mine in Wyoming, and 175 persons were killed.

PARLIAMENT CLOSED.

Saigon, July 6.

Parliament is closed.

POPE GRAVELY ILL.

The Pope is gravely ill. His lungs are attacked. Public prayers have been ordered.

THE PRESIDENT CROSSES THE CHANNEL.

Saigon, July 7.

President Loubet, accompanied by M. Delcassé, Minister for Foreign Affairs, after a halt at Boulogne, arrived at Dover, where the Duke of Connaught awaited him. The town was decorated with flags. M. Loubet declared that the cord between England and France is useful and profitable to the civilization of humanity.

THE POPE'S ILLNESS.

The state of the Pope is unchanged, and appears to be desperate.

ALBION'S WELCOME TO THE PRESIDENT.

Saigon, July 8.

The King of England, the Princes, Lord

Roberts, and the Ministers received President Loubet at the Victoria Railway Station. The reception was cordial. An enormous crowd cheered the cortège on its way to York House, where the President took up his residence. M. Loubet expressed his satisfaction and his emotion on account of the welcome which was given to him. There was a gala dinner at Buckingham Palace. The King and the President exchanged friendly toasts. To-day M. Loubet will be present at a banquet given by the Lord Mayor at the Guildhall. Yesterday and to-day an enthusiastic crowd gave him continual ovations.

PRESIDENT LOUBET.

Saigon, July 9.
President Loubet continues his tour without incident, but amid the same warm acclamations.

THE POPE: AN OPERATION.

An operation performed yesterday on the Pope gave him some momentary relief, but a fresh aggravation developed itself to-day.

(SPECIAL TO THE "JAPAN MAIL.")

THE STORM.

DAMAGE IN THE SOUTH.

Kobe, 8 p.m., July 9.

Extensive damage was caused here and in this neighbourhood by the storm of yesterday and early this morning. Few lives were lost, but a large part of the town was flooded. Traffic on the Sanyo Railway was stopped early this morning and great inconvenience was caused to suburban residents.

The Kansas Collotype Company's works were almost demolished by the collapse of the outer face of the embankment of the filter beds at Oku-hirano. The loss is estimated at yen 10,000.

There have been several landslips, one causing the loss of two lives.

(FROM THE "JIJI SHIMPO.")

RUSSIAN NAVAL REINFORCEMENTS.

London, July 1.

The steamers of the Volunteer Fleet and three new cruisers under the mercantile flag have passed the Dardanelles for Vladivostok. It is expected that the squadron after having landed cargo at the port will join the naval force at Port Arthur. The advanced troops in Russian Turkestan have been organized in battalions and ordered to set out for Manchuria. The force it is expected will be called the Trans-Amur (Southern Amur) Railway Battalions.

PRESIDENT LOUBET.

The French Chamber of Deputies has voted francs 600,000 for the expense of the British tour of President Loubet and for the entertainment of the King of Italy.

Splendid preparations have been arranged in London to welcome President Loubet, who is expected to arrive next Monday.

THE U.S. AND RUSSIA.

London, July 2.

With regard to the protest of the United States with reference to the Jewish massacre which took place at Kishineff, Russia, a diplomatic situation has arisen which needs a cautious attitude on the part of both the United States and Russia.

Russia's conduct in Manchuria has been viewed by America with strong disapproval.

BULGARIAN AFFAIRS.

Bulgaria has circulated among the Powers a note in which she blames the Porte for the military actions now taking place on the frontier of Turkey. Turkey has accordingly declared that as Bulgaria has been taking up a menacing attitude she has of necessity occupied Kossovina, Monastir, and Adrianople which are strategic points for military action.

IRISH MOTOR RACE.

The motor race which was participated in by representatives of various nations, took place to-day in Ireland.

THE "COLOGNE GAZETTE."

London, July 3.

The Cologne Gazette publishes a telegram from

St. Petersburg in which it states that Japan has continuously worked up the antagonism of the Manchurians toward Russia and blames Japan with supplying arms and ammunition to China.

THE RUSSIAN FORCE IN THE FAR-EAST.

The proposed military manoeuvres at Warsaw have been stopped. The idea of the manoeuvres had been to examine the transportation capacities of the Siberian railway.

(FROM THE "ASAHI SHIMBUN.")

Berlin, July 4.

Baron Speck von Sternberg, German Minister at Washington, has been promoted Ambassador.

THE KAISER'S TOUR.

The Kaiser Wilhelm is, as usual at this time of year, expected to tour in Norway via Nordeney, starting on Monday.

(FROM THE "JAPAN HERALD.")

THE OPIUM MONOPOLY CASE.

Kobe, July 7.

The dispute between Messrs. Samuel Samuel & Co. and Mr. R. Hughes was settled to-day on mutually satisfactory terms.

It was agreed the actual terms should not be published.

[The dispute, which has been before the Courts for some years, was in regard to a share in the opium monopoly business.—Ed.]

(FROM THE "DEUTSCHE JAPAN-POST.")

EAST ASIAN NEWS.

Berlin, July 9.

The English papers continue bringing exciting reports concerning East Asia. The Russian Embassy at Peking is said to augment its guards. In Berlin alarming official news have not arrived.

BULGARIA COMPLAINS.

Bulgaria has addressed a complaint against Turkey to Russia. Count Lambsdorff has rejected this note with scream (!) terms. There is not much chance of a war.

(FROM THE "N.C. DAILY NEWS.")

MR. CHAMBERLAIN'S ZOLLVEREIN.

London, June 30.

In a debate on the proposed Tariff in the House of Lords, Lord Lansdowne, (Foreign Secretary) said it was impossible for the Government not to consider the position threatening us serious. The possible withdrawal of favoured nation treatment was actually adumbrated in an official document which will shortly be published in a blue book.

WILD WITH ECZEMA

And Other Itching, Burning,
Scaly Eruptions with
Loss of Hair.

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Soap, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation, and inflammation, and soothe and heal, and lastly take Cuticura Resolvent Pills, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pimply humours, eczemas, rashes, irritations, and chafings, with loss of hair, when all else fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalded head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants and the anxiety of worn-out parents, as in milk crust, totter, and salt rheum,—all demand a remedy of almost superhuman virtues to successfully cope with them. Such are the CUTICURA remedies, the purest, sweetest, most speedy and economical curatives for the skin, scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes and chafings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many sensitive, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses.

Cuticura Remedies are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: W. D. Charterhouse St., London. French Depot: 5 Rue de la Paix, Paris. Forras, Dutoy and Cass. Dots., Sole Props., Boston, U. S. A.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JULY 18TH, 1903.

DEATH.

On the 16th instant, at No. 1, Bmd, Kobe, HARRY, eldest son of the late Mr. and Mrs. H. J. Gorman, of Yokohama, in his 23rd year.

SUMMARY OF NEWS.

BARON NAGAMATSU, Grand Master of the Kinkeino-ma at the Palace, died on July 13th.

DR. TSUBOI, a professor in the Kyoto Medical College, died on the morning of July 13th.

The dead body of a child was found on July 12th in the canal at Oginachi, Fukagawa, Tokyo.

The members of the *Seiyun-kai* belonging to the Hakodate branch decided on July 9th to wind up the branch.

The dead body of a child which is believed to have been murdered, was found on July 9th at Ueno Park, Tokyo.

The Artillery Regiment of the Tokyo Fortifications will hold manoeuvres at the end of this month at the foot of Fuji.

A CASE of dysentery was reported on July 12th in Tokyo. The patient was a boy named Watanabe, living at Igacho, Yotsuya.

A BOATMAN named Ikano (21), assaulted another with an oar on the evening of July 15th. The men were on a lighter off the landing-place of the Nippon Yusen Kaisha at the time they

quarrelled. The injured man was instantly removed to the Juzeu Hospital and the other to the police station.

A TELEGRAM under date of July 15th from Taipei, Formosa, states that silver coins have risen in value to *sen* 84 from *sen* 82.

THE Kwansei Railway has reduced its freight for tea to *sen* 4/10 per 100 *kin* per mile. The reduction will be in force till the end of December next.

A WOMAN named Ko Amano (18, living at Asakusa, Tokyo, committed suicide on July 12th by drinking poison. The cause is reported to be insanity.

A MAN named M. Matsuzawa (28), who stole *yen* 1,200 from the Nagawa Bank and absconded, was arrested on July 15th at a hotel in Asakusa, Tokyo.

S. OHORI, notary, and J. Tanaka, member of the Local Assembly, Sapporo, were arrested on July 8th on a charge of having forged several private letters.

THE construction of the steamer *Nikko Maru*, sister ship of the steamer *Kumano Maru*, has been completed. The new ship will be run on the N. Y. K. Australian line.

S. SATO, assistant of the Kotohira rural office, Kagawa prefecture, was arrested on July 15th on a charge of having embezzled *yen* 1,100 belonging to the office.

VICE-ADMIRAL HIDAKA, Commander-in-chief of the Standing Squadron, left Yokosuka on July 12th for the North in the flag-ship *Shikishima*, accompanied by the cruiser *Tokitsuna*.

ACCORDING to official investigations in Wakayama prefecture, says the *Asahi*, 13,079 houses were flooded by the recent inundation, and 4,038 persons are now receiving official relief.

TOKYO papers state that Mr. S. Awadzu has been delegated to attend the fourth international meeting of life insurance societies which will take place at New York on August 31st.

Z. OKABE, assistant Mayor of Nagoya, committed suicide on July 9th by drowning himself in a pond near the city. The body was found on the 12th. Temporary insanity is said to be the cause.

THE compilation of the history of the Japan-China war has been completed at the General Staff Office. According to the *Official Gazette*, tenders are invited for publishing the book.

ACCORDING to information brought to the *Asahi* by the steamer *Sumidagawa Maru*, which arrived at Shimonoseki on July 9th from Yuensan, famine distress still prevails at the port and in the surrounding districts. Many persons are starving.

THE general meeting of the Osaka Gas Company was held on July 9th when the report of the first half year's business and the draft contract arranged between the Municipal authorities and the company were submitted. These were at once approved.

A TELEGRAM from Sapporo to the *Fiji* states that Herr von Erckert, Major Etzel and two other officials of the German Legation arrived there on July 11th. They are to investigate the matter of an alleged assault by a German subject with a revolver.

THE Hankoku Railway Company decided on July 15th to issue debentures amounting to *yen*

500,000, carrying interest at 8 per cent. per annum. The *Asahi* adds that the company intended to raise a loan of *yen* 1,500,000 with interest at 7 per cent. but failed in the enterprise.

VICE-ADMIRAL GEISLER gave a dinner party at noon on July 9th on the flagship *Fuerst Bismarck*, at which Count Arco Valley, German Minister, and the legation staff; Rear-Admiral Saito, Vice-Minister of the Navy; and other Japanese officers, Governor Sufu, etc., were present.

THE Yokohama Specie Bank has decided to issue *tael* 5, 10, 50 and 100 notes payable on demand, to be used at Newchwang. The *Asahi* states that the *tael* 5 note has already been produced by the Printing Bureau and it will shortly be sent to the branch office at Newchwang. Similar notes issued by the bank are circulated in Tientsin.

THERE are a great number of forged rouble notes of all denominations in circulation in Shanghai, and many have been presented, principally by well-to-do Chinese, at the Russo-Chinese Bank for payment. Investigation by the Bank authorities goes to prove that these people are merely the victims, and that the Japanese counterfeiter has once again found a market for his spurious wares.

THE *Asahi* states that Baron Rosen, Russian Minister, will shortly leave for Nikko, where he will stay at the Kanaya Hotel. Mr. Melegari, Italian Minister, will probably proceed to his villa at Chuzenji, (Nikko) about July 20th. Mr. Harmand, French Minister, and Baron Corvisart, *attaché* of the French Legation, will also shortly leave for the same place.

A MAN who is suspected of having murdered a farmer named K. Ishikawa (42) Kawasaki, and three of his family, and burned his dwelling on the night of March 31st, was arrested on July 8th by the Isesaki-cho police, Yokohama. The name of the suspect is N. Ishiware. In the course of examination, he confessed that he had been a robber before and after the crime at Kawasaki.

It is stated that the hull of the French cruiser *Triomphante*, with its accessories, will be sold by auction at Saigon on the 24th inst., the upset price being 140,000 francs. The materials of which is constructed are estimated to comprise 2,050 cubic metres of timber, 1,340,000 kilos of iron, 29,000 kilos of castings, 46,000 kilos of copper, 800 kilos of brass, and 13,700 kilos of bronze.

SEVERAL agents of insurance companies at Yokohama have, states the *Yokohama Shimpō*, presented to the Japanese Government through their consuls an objection with regard to the deposit of *yen* 100,000. The ground of objection is said to be that of the various kinds of insurance concerns, some are certainly interested in the deposit for by it they can extend confidence in their business among Japanese, but there are others who have no connexion with Japanese and in whose case a deposit is not necessary.

THE steamer *Manchuria* took from Shanghai on July 5th for Dalny en route for Europe via the Trans-Siberian Railway, Mr. J. de Rijke, the eminent Dutch hydraulic engineer, who has been for so many years in the Japanese service, and who has twice investigated and reported so fully on the river approaches to Shanghai. Mr. de Rijke is retiring, but, says the *N. Y. Daily News*, he holds himself at the disposition, should he be wanted, of the Conservancy Board that is possibly some day to take the Huangpu into its charge.

THE POLITICAL SITUATION.

Saturday, July 11.

On Saturday morning it was known that Count Katsura had returned to Tokyo, but no one undertook to say positively whether the event signified that the political crisis was over or whether the Premier had been summoned by the Emperor.

The *Fiji Shimpō* now thinks that the best course for Marquis Ito to pursue would be to retire altogether from public life: in other words, to decline the honorable position offered to him by the Emperor and, at the same time, to sever his connexion with all political parties. Apparently that advice is based on the dictates of a sentiment which we can readily appreciate, but which will scarcely commend itself to foreign observers who see in Marquis Ito a statesman still capable of rendering signal service to his country. To retire altogether because an embarrassing choice has to be made would be too like succumbing to circumstances. That can not be predicted, we think, in Marquis Ito's case. By way of contrast we may note the *Asahi Shimbun's* suggestion that the true root of the difficulty is to be found in the system of continuing to retired statesmen the official treatment appropriate to their former office. It results from the operation of this system that certain distinguished men have the entrée of the Palace and are consulted by the Sovereign on all occasions of cardinal importance. There exists in fact an *imperium in imperio*. Prior to constitutional times it was natural and salutary that the makers of modern Japan should give advice about everything that concerned the empire, whether they happened to be in office or out of office. But one issue of parliamentary systems is that these men also have their own cliques, and consequently the counsels offered by the representative of one clique may happen to be entirely contrary to the views of another. When once the duties of administration have been entrusted to a body of statesmen, they should not be exposed to the danger of having their policy condemned by their elders, who form an advisory board in the Palace.

It will be evident to every foreign observer that a great many delicate adjustments have to be effected by Japan in her transit from the old to the new. It will also be evident that the political parties do not at present find time and tide making in their favour.

Sunday, July 12.

An impression steadily gains ground that Marquis Ito, in deference to the Sovereign's clearly expressed wishes, will abandon the leadership of the *Seiyū-kai* and accept an advisory position near the Throne. The post of President of the Privy Council, now occupied by Marquis Saionji, is spoken of, but as to that there is necessarily some uncertainty.

A meeting of the Council of the *Seiyū-kai* was held on the 11th instant to consider the situation. It was attended by 12 councillors, Baron Suyematsu being in the chair. Naturally, a question was immediately asked about Marquis Ito, but Mr. Hara Kei, answering on behalf of the Business Committee, said that the time had not come to make any definite declaration of the Marquis' intentions. The meeting broke up without adopting any resolution.

There is evidently great confusion. As to the future of the *Seiyū-kai* two opinions seem to prevail. One of them is that the Party should remain in existence under the leadership of Baron Suyematsu Kencho and Messrs. Matsuda Masahisa and Hara Kei.

The other, that the organization should be at once broken up and a new party formed between the present time and the meeting of the Diet next November. A member of the Party is quoted as saying that he and his associates have only themselves to blame, since they should have known better than to place themselves under the banner of a leader whose record made it impossible for him to sever his connexion with the Elder Statesmen. Onlookers are compelled to recall the fact that what chiefly made Marquis Ito an acceptable leader to the *Seiyū-kai* was precisely the prestige he employed as an Elder Statesman. It was supposed that association with him meant the breaking down of the last barrier on the road to party government.

It will readily be supposed that the *Seiyū-kai* organs condemn the Cabinet's procedure in vehement terms. They declare that Count Katsura has made a *coup d'état* of a most dangerous description, since he has employed the authority of the Throne to interfere with party organization. They further declare that owing to the evil suggestions of the Ministers in office, His Majesty is now made to assume a position plainly at variance with the celebrated oath made at the commencement of the *Meiji* era, the oath promising that all things should be decided in accordance with public opinion (*banki koron ni kessu*).

As to this problem of the Imperial Oath—now a very hackneyed problem—would not the logic of the above contention be greatly improved if some ingenious effort were made to define the signification borne by the words "public opinion" in the Japan of the year 1867, while feudalism still flourished and long before the idea of attaching importance to any views save those of the *Samurai* had begun to exist even in embryo?

The *Chinō* makes the point that by recommending the appointment of Marquis Ito to an advisory position near the Throne, the Cabinet has practically declared its own incompetence and unworthiness of public confidence. Side by side with that example of hypercriticism, our contemporary alleges that the course now adopted by the Sovereign was taken at the suggestion of the Elder Statesmen themselves.

Tuesday, July 14.

Things still remain unsettled. The talk now is that Marquis Ito, though he will certainly respect the Sovereign's wishes, is determined to provide some consolation for the party politicians whom he has hitherto led. He has therefore asked, as a condition to his abandonment of the *Seiyū-kai's* leadership, that certain arrangements should be made with a view to the immediate accomplishment of administrative reform, and of some modifications in the matter of the House of Peers. That is rather vague, it must be confessed, but inasmuch as administrative reform is the chief plank in the *Seiyū-kai's* fiscal platform, and inasmuch as the opposition of the House of Peers is the chief obstacle in the path of party government, a large part of the *Seiyū-kai's* *raison d'être* would be achieved could these projects be effected. An additional rumour is that simultaneously with the acceptance of this compromise a change would be effected in the holders of certain portfolios, namely those of Agriculture and Commerce, of Education and of Home Affairs. The Minister of Home Affairs is too sick to remain in office, so that his replacement would be nothing strange, but the removal of Baron Kikuchi and

Baron Hirata would be solely in deference to the hostility shown by the rank and file of the *Seiyū-kai*. In Baron Kikuchi's case this would be a veritable sop to Cerberus. The three-headed monster of Hades could not be called less discriminating than a political party which demands the sacrifice of a high official because he has been instrumental in exposing an abuse which they profess to abhor. Plainly the effect of such blind vindictiveness must be to deter everything like vigorous administrative procedure, and to teach men in office that their wisest course is to cover up everything malodorous. We do not imagine it possible that Marquis Ito should be a party to a condition of this kind, nor can we believe that if the Cabinet survives at all, it will survive in a fragmentary condition. Possibly some days must yet pass before the complication is finally disposed of, but in the meanwhile it may be said that administrative work has ceased to be obstructed. The *Fiji Shimpō* has a cartoon depicting three genii, Marquis Yamagata, Count Matsukata and Count Katsura, endeavouring to heave up Marquis Ito to their own place above the clouds, while the Marquis, still dangling midway between earth and sky, stretches out hands of reluctance and farewell to his quondam followers below, whose dimensions have already dwindled to pigmy size. In truth the loss of their leader would virtually crush the *Seiyū-kai* out of all semblance of efficient existence. They are said to be perturbed beyond measure, as well they may be.

Whatever be the position to which Marquis Ito is appointed it will carry with it a seat in the Cabinet. So, at least, rumour confidently asserts. There has already been one instance of that kind. Count Kuroda, when President of the Privy Council, was also a member of the Cabinet.

The Imperial News Agency attributes to Marquis Saionji a statement that one of the causes of the present crisis is the weakness of the Cabinet in foreign affairs. Concerning that the Emperor addressed himself to Marquis Ito when the latter was recently summoned to the Palace. The fact is—so Marquis Saionji is represented as saying—that the Katsura Cabinet has confined itself to warnings addressed to China through the Japanese Representative in Peking, and has never submitted any remonstrance direct in St. Petersburg.

Evidently the News Agency, via Marquis Saionji, would have the public believe that Marquis Ito condemns the Cabinet's foreign policy as deficient in resolution, and that he advocates direct representations to Russia. It is by such stories that history gets distorted.

Yesterday afternoon Marquis Ito was appointed by the Emperor to the post of President of the Privy Council. This terminates the Cabinet crisis.

Thursday, July 16.

It is stated by several newspapers that the appointment of Marquis Yamagata and Count Matsukata to be Privy Councillors simultaneously with Marquis Ito's appointment to the Presidency of the Council, was in consequence of representations made by Marquis Ito himself. Possibly that was the proximate cause, but it has already been intimated in these columns that Marquis Yamagata's simultaneous nomination to an advisory position near the Throne formed part of the programme judged most advisable in the circumstances.

In appointing Marquis Ito the Emperor made use of the following language:—

We, having regard to the circumstances of the present time, and being minded to avail Ourselves of your advice and assistance, now again call upon you and appoint you to the principal post in Our Privy Council, looking to benefit by your counsels in important affairs of State. The work consequent on the Restoration has been carried half way towards completion, but the end is still far distant. The labours performed by you during a long series of years inspire Our confidence, and it is Our desire to profit by your coöperation and discernment for the complete consummation of Our aims.

To Marquis Yamagata and Count Mutsukata His Majesty addressed a similar but briefer message:—

We, having regard to the circumstances of the present time and being minded to avail ourselves of your advice and assistance, now again call upon you, and appoint you to be members of Our Privy Council, looking to benefit by your counsels in important affairs of State. The labours performed by you during a long series of years inspire Our confidence, and it is Our desire to profit by your coöperation and discernment for the complete consummation of our aims.

Marquis Ito's reply was as follows:—

Your Majesty's servant, Hirobumi, ventures to address Your Majesty with profound reverence and obeisance,

Your Majesty's servant, in obedience to the Imperial command, had formerly the honour to be connected with the framing of the constitution, which maintained the immemorial polity, above, and admitted those below to a share in the administration on the basis of the people's welfare. Seeing, however, that the operation of the measure was immature and that its grand purpose was not yet attainable, Your servant planned to associate himself with a political party and to direct and guide it towards the consummation of the constitutional system. While this purpose was still in the period of inception, Your servant had the honour to receive Your Majesty's summons on the 6th inst., and to be informed of Your Majesty's gracious intention to appoint him to the Presidency of the Privy Council, Your Majesty's far-seeing appreciation of the situation at home and abroad having inspired that command, with which Your Majesty's servant was reverentially constrained to comply. Therefore having besought Your Majesty's gracious permission to give the matter full thought and consideration, Your Majesty's servant with all humility bows to the Imperial Order as in duty bound. To stand in the Imperial presence and to answer such inquiries as the Sovereign may propound with regard to important affairs of State, is a function in consonance with the practice of constitutional government. Your servant Hirobumi will not shrink from any labour in the discharge of that duty.

Marquis Ito subsequently met the Standing Committee of the *Seiyun-kai* in the Imperial Hotel and entertained them at dinner. The Marquis proposed as his successor Marquis Saionji, and the members of Committee readily acquiesced in an arrangement of which they had doubtless been cognizant previously. On the following morning (14th) an extraordinary meeting of the Party's Council was held, and after receiving from the Standing Committee a report of Marquis Ito's suggestion on the previous evening, the Council unanimously endorsed it, and prepared a resolution in that sense for ultimate submission to a general meeting of the Party. The resolution was couched in very brief terms. It merely announced that circumstances having arisen which prevented Marquis Ito from continuing his leadership of the Party, he had proposed Marquis Saionji as his successor, and the members of the Council, being in accord with the project, unanimously decided to have Marquis Saionji at their head. There was no dissentient voice. The same afternoon the Standing Committee proceeded to the Imperial Hotel to inform Marquis Ito. They would then have organized a deputation to submit the proposal to Marquis Saionji, but the latter, by desire of Marquis Ito, repaired to the Hotel and there met the members of Council, to whom he announced his willing-

ness to accept the post. It was then decided that a meeting of *Seiyun-kai* members of the Diet should be convened on the 15th instant in the Maple club where an entertainment would be given by way of farewell to the retiring leader and of welcome to the incoming one.

The *Nichi Nichi Shimbun* says that the next question to be settled is that of the Cabinet's personnel. Baron Utsumi, Minister of State for Home Affairs, will certainly insist on resigning, owing to ill health, and it is thought that his successor will be Baron Kodama, the latter retaining, however, his post of Governor-General of Formosa. The postponement of Baron Kodama's trip to Europe seems to give colour to this theory. Baron Hirata is also disposed to resign the portfolio of Agriculture and Commerce, in consideration of the vote of censure passed by the Lower House, and Baron Kikuchi is altogether willing to resume his old place in the world of education and learning. But our contemporary adds that there is a difficulty in connexion with the Finance Department. The Vice-Minister, Mr. Sakatani, declines to be a party to the financial policy of his chief, and without the Vice-Minister the Department would be perplexed. It will be remembered that this embarrassment was originally assigned as the origin of the recent crisis.

Friday, July 17.

Parliamentary members of the *Seiyun-kai*, to the number of about fifty, met in the offices of the Party at half-past two on the 15th instant. It had been expected that this meeting would be invited to endorse or reject the nomination of Marquis Saionji to the leadership of the Party in succession to Marquis Ito, but, as a matter of fact, the sense of the meeting on that topic was not sought. Mr. Matsuda Masahisa merely reported that the change had been effected and expressed on behalf of the Council and the Standing Committee a feeling of much satisfaction that there had been placed at the head of the Party a politician of such eminence, whose interest in the *Seiyun-kai's* well-being had been conspicuous from the first. The meeting, however, received the announcement with such evident marks of approval that there could be no doubt as to the general feeling.

Marquis Ito then addressed the meeting. He explained that in connexion with the working of the constitutional system there had arisen questions which, had their settlement been left to unguided public discussion, might have involved trouble. He had therefore embodied his views as to those points in a political manifesto and had organized a party in 1900 in order to give currency to his interpretations. The *Seiyun-kai* was thus an association of men holding similar views as to the operation of the constitution. It was essentially a party founded on principles and he need scarcely remind them of the vital necessity of maintaining those principles. (Here Marquis Ito seems to have been answering Count Itagaki and Mr. Ozaki Yukio, who recently contended that the *Seiyun-kai* had no basis of principles.—Ed. J.M.). He and the Party, had hitherto worked together for the realization of those principles, but circumstances too well known to demand any detailed statement, had now compelled a separation. Though, however, he now stood aside from his position of leader, there would be no change in his allegiance to these principles on his side, and he had confidence that there would be none on the side of the

Party. He wished to remind them that under a constitutional system there could be no division between Sovereign and subject, and that consequently the consummation of the policy entertained by the Party would best contribute to the maintenance and success of the Constitution. (The sequence of ideas is here somewhat obscure in the various reports). Thus as for himself, whether as leader of the Party or as adviser to the Throne, his efforts on behalf of the national welfare would be equally effectual. He then passed on to speak of the delegation of his leadership to Marquis Saionji, to whom he applied the term *itai doshin* (different body but the same mind). Marquis Saionji was his sincere friend and shared his views exactly as to constitutional government, and he therefore hoped that complete concord would exist between the Party and its new leader. The noble speaker concluded by expressing confidence that his hearers would appreciate the inevitable nature of the circumstances which had compelled him to sever his connexion with the Party, for which he wished continuous and growing prosperity.

Mr. Matsuda Masahisa having then obtained the unanimous consent of the meeting, read a letter of profound thanks to Marquis Ito in the name of the Party, declaring that his eminent services were fully appreciated; that the Party had earnestly looked for his continued guidance and direction but that unavoidable circumstances had defeated that hope; and that, although deprived of his leadership, the *Seiyun-kai* would continue to be the depository and exponent of the principles he approved.

Marquis Saionji, in addressing the meeting, said that the facts of the situation had been so clearly laid before them that no detailed statement was demanded from him. It was three years since he had entered the portals of the *Seiyun-kai* and now he was unexpectedly called on to occupy a position of the greatest responsibility, the gravity of which he fully recognised. After various polite expressions of gratitude and satisfaction, the Marquis then went on to say that the news of Marquis Ito's retirement had inspired him with the greatest anxiety on behalf of the Party. He had even feared for the life of the *Seiyun-kai*. But from the midst of dangerous intrigues the Party had been led successfully, and the heart of the nation gathered strength from observing that amid this storm and stress there stood a strong and immovable rock. Without loss of time or sign of consternation the crisis had been met and ably dealt with, so that he himself, though fully conscious of his own inability, did not hesitate to accept the great trust reposed in him. He had been one of Marquis Ito's colleagues in establishing the *Seiyun-kai*; he shared all the views of their illustrious leader who now retired, and he therefore trusted that the Party would pursue its way undeviatingly. He promised to exert all his efforts on behalf of the *Seiyun-kai*, working always on honest, straight-forward lines, since he believed that the day for crooked courses and devious devices had passed irrevocably, and that such devices, for which he himself was wholly unfitted, could bring only ridicule on those practising them. He begged them to regard the matter in that light, and to lend him their support and assistance in the discharge of his onerous duties.

Baron Suyematsu made a short address thanking Marquis Saionji for accepting the post, and the meeting broke up in the best possible temper.

Subsequently a social gathering was held at the Maple Club, where Baron Kaneko, in the name of the *Seiyu-kai*, thanked Marquis Ito for his services to the Party and welcomed Marquis Saionji as their new leader, to which address the two Marquises made suitable replies.

KOREA.

Friday, July 10.

One piece of news from Korea this morning is that Mr. Hayashi has protested against the new Russian cable from Antung to Yong Ampho. Whether that means a further protest or whether the intelligence is merely an echo of the protest originally lodged we do not know. It is at any rate evident that there is gradually accumulating in the Yalu Valley plenty of material for a troublesome complication. The Japanese have shown patience in dealing with the matter, whereas the chief characteristics of Russia's action have been promptitude and contempt for Korea's sovereignty.

The *Asahi Shinbun's* Seoul correspondent telegraphs that on the morning of the 9th instant 30 Russian soldiers and 86 Chinese civilians with 7 pack-horses crossed the Yalu and established themselves under canvas in the neighbourhood of Yong-chyong. The telegram gives no hint as to the purpose of this new incursion.

Saturday, July 11.

Apparently the Korean Government has taken strong action with regard to the Antung-Yong-Ampho telegraph line laid by the Russians. The Foreign Office in Seoul is represented as having expressed surprise to M. Pavlov that such an enterprise should have been undertaken without consulting the proper authorities, and as having requested him to restrain his nationals, while, at the same time, instructions have been issued to the local officials to have the telegraph removed. Such, at any rate, is the news that reached Tokyo on the evening of the 10th instant.

Intelligence has been received of a settlement of the long-disputed question about land for the Seoul-Fusan Railway terminus at the south gate of the former city. It has been agreed that the railway company shall pay 17,720 yen for 40,000 *tsubo* (33 acres) of land and shall also defray the expense of moving the buildings now situated on it, namely 3,808 yen. The price sounds very cheap.

A telegram from Seoul to the *Kokumin* says that since the establishment of a line of steamers from Chemulpo to Wiju, via Chinnampo and Anju, numbers of Japanese subjects have gone to Wiju. This bears out the forecast that if Wiju were opened to trade, the state of affairs in the Yalu Valley would soon change.

It is stated that the Taotai of Feng-hwang has proceeded to Antung and adopted such resolute measures with regard to the confiscated Chinese timber-rafts that they have all been restored to their owners.

Apparently the Korean Government is seriously entertaining the project of opening Wiju, for it is stated that instructions have been sent to the local officials there requiring them to survey and report upon the land available for foreign-settlement purposes.

Sunday, July 12.

According to latest news from Seoul it would seem that the line of telegraph from Antung to Wiju is only in process of construction, and has not yet been completed. Probably previous reports referred to the

cable, which constitutes the principal part of the work. At any rate we now learn that when some Russian experts, assisted by Chinese, attempted to erect poles from the bank of the Yalu to Wiju, they were restrained by Korean local officials, and the matter is now under consideration in Seoul.

Seoul has been notified that the Russians whose presence at Chasung was recently reported, have now withdrawn.

An extraordinary rumour is published by the *Kokumin Shinbun*. It is that when M. Pavlov proceeded from Korea to Port Arthur to attend the conference, there went at the same time to the latter place a secret Korean envoy charged with the duty of submitting an important proposal to General Kuropatkin and Admiral Alexieff. The proposal was that a Russian military force should be stationed in Seoul, and that Lady Om should be raised to the position of empress by Russian intervention. The envoy, it is further stated, failed even to obtain a hearing for his unpatriotic proposal, and it results that the pro-Russian party in Seoul has greatly lost heart. We wonder what dimensions may be safely assigned to the proverbial grain of truth in this story. That the intrigues on behalf of Lady Om have of late been more active than usual and that the disappointed lady's supporters are prepared to sacrifice a great deal for the sake of getting her appointed empress, seems certain, but beyond that it would scarcely be safe to carry credence.

Tuesday, July 14.

On the 12th instant the new line of steamers from Chemulpo to Wiju via Chinnampo and Anju, was opened with the *Kiiko-go*. It appears that Messrs. Hori and Company, a Japanese firm in Chemulpo, are chiefly instrumental in organizing this line. The *Asahi*, from which we take the intelligence, says that Mr. Oye Taku and several Japanese pioneers left by the *Kiiko* for Wiju. We presume then that a prophetic spirit inspired the telegraphist who informed us, a few days ago, that the opening of the new line had encouraged a tide of Japanese enterprise to the Yalu Valley.

Mr. Yuan, Taotai of Feng-hwang, is stated to have taken very strong measures on the occasion of his recent visit to Antung, where the confiscated timber rafts were moored. He not only caused the rafts to be restored to their owners, but he also dissolved a Russo-Chinese timber company and introduced order into the unruly proceedings of the banditti. How did Mr. Yuan accomplish all this, we wonder, and by what right did he dissolve a Russo-Chinese association? His own official dissolution is the next event we shall look to hear of if he has really been engaged in such a manner.

Thursday, July 16.

The Russian *Chargé d'Affaires* in Seoul has not made any reply, it is said, to the remonstrance of the Korean Government with reference to the Antung-Yongampho telegraph. The conjecture is that M. Pavlov's absence prevents the *Chargé* from giving an answer. Meanwhile the Korean local authorities do not venture, it is reported, to carry out their instructions as to pulling up the telegraph posts, and the Russians are hastily pushing the work, which now promises to be completed within two weeks.

There is talk of a Cabinet reconstruction in Seoul. The new Premier would be Chhin

Sang-hun, and among his colleagues would be Li Yung-yong, Min Yong-hwan and Li Hwang-yong.

The *Kokumin* reports that the Korean Government has finally decided to open Wiju, but according to the *Nichi Nichi's* account, although a majority of the Ministers of the Crown favour that step, there is a party which advocates awaiting the return of the Russian Representative from Liaotung.

It is stated, by latest telegrams, that the Russians engaged in building the telegraph from Antung to Yong Am-pho are proceeding with the work in defiance of all remonstrances from the Korean local officials.

From Peking comes news that the task of settling affairs in Yalu Valley has been entrusted to Major-General Wogack.

CHINA.

Monday, July 13.

The *Fiji Shimpō* has a telegram from Peking dated the 11th instant saying that Mr. Uchida, Japanese Representative in that city, was about to address a new remonstrance to China against adopting any weak policy about Manchuria and in favour of opening the district to foreign trade.

A telegram to the *Kokumin* from Peking alleges that General Kuropatkin is to leave Port Arthur on the 16th instant, and that the conference will continue until his departure.

It is stated that the number of Russian troops has been increased in Tashikiao and In-kow.

The agreement for the building of the Nanking-Shanghai Railway is said to have been signed on the 9th instant.

It is reported from Peking that the Japanese garrison of Peking paraded for manoeuvres, on the 10th inst. after a night under canvas, and that, while marching off the field, several men were prostrated by sunstroke. Military manoeuvres in July on the plains of Chili are a terrible test of condition and endurance. We have never heard of any European or American commanders deliberately subjecting their men to such an ordeal.

Tuesday, July 14.

The *Fiji's* Peking correspondent telegraphs a disquieting item of news. It is to the effect that in consequence of his observations in Japan Major-General Wogack proposed at the Port Arthur conference that Russia's troops in Manchuria should, within the space of a month, be placed on a footing commensurate with the force that Japan could bring against them. The Conference approved the proposal and so did the St. Petersburg Government, the result being that vigorous measures are now in progress to effect the necessary increment. Port Arthur's garrison is to be augmented by five thousand men.

If this news have any truth it constitutes a curious commentary on the question of evacuation. Three months ago the last Russian soldier should have been out of two of the provinces of Manchuria had Russia observed her treaty obligations. To-day, so far from marching her men home, she is adding to their numbers.

The Chinese Representative in St. Petersburg has informed his Government—according to the same correspondent—that although M. de Witte is not in favour of war, he can not for a moment consent to abandon Manchuria, and if that be the only

alternative of a fight with Japan, he recommends fighting.

It has already been reported that Mr. Uchida was to proceed to the Iwo Palace on the 11th instant, for the purpose of repeating Japan's remonstrance against any yielding on China's part in the matter of Manchuria. The result of his visit, we now learn from the *Jiji*, was that he received from Prince Ching an emphatic assurance in the sense that there had been no wavering on China's side and that there should not be any.

The *Asahi* publishes a telegram saying that the Viceroy of Kwantung proposes to have Chinese taught to two or three Russian soldiers from each company of the troops now in Manchuria, with the object of ultimately employing them in the capacity of non-commissioned officers. That would be kissing the rod with a vengeance.

It is all very well to stiffen Prince Ching's back and to postpone acceptance of Russia's proposals, but the hard fact remains that Russia is in Manchuria. Who is going to move her out? Really we do not see what matter a few more concessions make. Why should it be expected that if she exacts new conditions by way of preliminary to evacuation, she will implement her second promise more faithfully than she implemented her first? It is over-taxing human nature to ask that Russia should abandon her grip on Manchuria. The practical object to be now arrived at, we think, is to provide that the region shall be kept open to foreign trade. As to that proposition it is urged, we observe, by some commentators that the thing is unattainable since Russia could not be depended on to keep a pledge as to commercial facilities any more than a pledge as to military evacuation. But no one wants to obtain further pledges from Russia, nor is it of any moment now to engage in academic discussions about international good faith, a vanishing quantity whatever State be concerned. What may be reasonably suggested as within the range of practical achievement is that several places in Manchuria should be at once opened to the trade of the world. The rest might be left to the natural course of events.

The Port-Arthur journal is reported to have published an assertion that a convention has been arranged between Japan and Russia. Such is the news sent by the *Asahi's* Tientsin correspondent. It is a belated echo, we presume, of the wild story circulated in Tokyo a month ago by a yellow journal. In this context we may note that there are actually men in Yokohama sufficiently naive to have forwarded that singular item of news to certain English journals, which published it in all good faith.

Thursday, July 16.

Reports continue to arrive that the Russian troops in Manchuria and the Amur region are being steadily increased. This may be merely an echo of the statement published some time ago that the Russian Government had decided to test the military-transport capacities of the Trans-Asian Railway by sending two divisions across it. That news doubtless raised a smile on the public countenance. Yet, on the whole, the pretext, however flimsy, was better than silence.

It is stated that the Russian Authorities are negotiating for the purchase of a number of steamers at Newchwang.

The Port-Arthur conference has come to an end. M. Lessar is to return to Peking on the 17th, and General Kuropatkin left Liaotung on the 14th. Admiral Alexieff was

to accompany Mr. Pavlow to Korea on the 14th.

Friday, July 17.

It is now stated that General Wogack is to be Commander-in-Chief of Russia's forces in Eastern Manchuria. This rumour had been preceded by one to the effect that he was to command in the Yalu Valley, but probably the greater includes the less.

The Port-Arthur conference has certainly come to an end. It does not often happen that a meeting of such great and far-reaching importance inspires so few rumours. We have had two diametrically opposite stories: one that the conference decided on peace: the other that it resolved to maintain the present situation at all hazards. The present situation means the continued occupation of Manchuria and, presumably, persistence in ambitious designs in the Yalu Valley. The great factor on Russia's side is time. Every day that passes familiarizes the world with her position and gives the sanction of habit to her doings. We can not pretend to think that there are many other Powers which would have been guided by a more altruistic spirit in her place, but that reflection does not make her procedure more tolerable to those that suffer by it. At the same time it must be remembered that these great international dramas are acted now-a-days on a well-lit stage with the whole world for audience. Formerly the onlookers saw through a veil darkly, and very often did not see at all until they became cognizant of long-accomplished facts. But now the telegraph and the newspaper correspondent supply new eyes and ears for the public so that we all become close observers of the catastrophe as well as of all its preliminaries, and are proportionately shocked or alarmed, not recognising that what we see has been simply the way of the world through all the ages. It is only when confronted with the impenetrability of such secrets as those entered in the records of the Port-Arthur conference-chamber that we revert to old times and their crass ignorance. Could any one successfully penetrate the arcana of that meeting he would place the public under an immense obligation. It was a meeting of makers of history and its effects upon the future of the Far East can scarcely be over-estimated. Yet we are condemned to present nescience, and to gather some perception slowly from the indications of future events.

PUBLIC OPINION.

It is to be noted that one organ of opinion expresses very strong views about the issue of the political crisis. That organ is the *Jinmin*, which has hitherto been recognised as expressing the sentiments of the *Kwantung* section of the *Seiyun-kai*, that is to say, the section formerly led by Mr. Hoshi Toru. When Marquis Ito's appointment to the Presidency of the Privy Council became an accomplished fact, the *Jinmin* wrote in an almost desperately exasperated mood. It declared—to state its argument briefly—that the Clan Statesmen had once more occupied the citadel and defied the people to dislodge them, and it urged its readers not to submit to such a retrograde situation. We give but a faint idea of the language in which this declaration was couched. Then, when Marquis Saionji took Marquis Ito's place, the same journal supplemented its previous intemperance by crying out that the bandits now in office had laid violent hands on Marquis Ito, and by recourse to an arbitrary exercise of

Imperial authority, had dragged him away from his sphere of action. All intelligent and educated men—the *Jinmin* went on to say—must condemn such procedure, but as this is a day when publicists are found to contend for absolutely unlimited exercise of the Sovereign's sway, nothing can be gained by discussing that constitutional question at the moment. As for the *Seiyun-kai*, however, if any one imagines that a crushing blow has been dealt to it, he is completely mistaken. The Party will stand more firmly united than ever.

Experience shows that there is nothing like opposition for strengthening a man's vertebra. It was the *Jinmin* that lent its influence to foment disaffection in the ranks of the *Seiyun-kai* during the stormy days of the dispute between the Cabinet and the Diet, but the same *Jinmin* now puts its back to the wall and invites the Party to close up its ranks and stand firm.

The *Chiuo Shinbun*, not generally moderate in its tone, publishes a strong appreciation of Marquis Saionji, and expresses the conviction that these events will tend to consolidate the *Seiyun-kai*, which, however, must be prepared to encounter a renewal of insidious attempts against its stability on the part of the Government.

Other newspapers keep silence.

RENEWED OPPOSITION IN THE ARENA OF TOKYO TRACTION COMPANIES.

Saturday, July 11.

The amalgamation of the Tokyo Street Company and the Densha Company has now been virtually settled, and the amalgamated concern is to be called the Tokyo Tetsudo Kabushiki Kaisha (Tokyo Railway Joint Stock Company). So far as we can ascertain, the details of the arrangement were correctly stated in the rumours published a few days ago. Nothing appears to have been in question except the proportion in which the new shares should be allotted to the old shareholders of each Company. The present capital of the Street Railway Company is 3 million yen, which will have to be increased to 15 millions in order to build the 70 odd miles of line included in the concession. The capital of the Densha Company is 5 millions, which is expected to suffice for converting the horse-trams into electric lines. How, then, should the additional 12 millions which the former Company must soon raise, be allotted? The importance of this question becomes obvious when we observe that every new share, and even the right to a new share, is already saleable at a premium. Had not amalgamation taken place, each holder of one original share in the Street Railway Company would have been entitled to four new shares when the capital came to be increased. The arrangement effected by the Directors but still awaiting endorsement by the shareholders *en masse*, is that 7 millions of the new shares shall go to the Densha Company and 5 millions to the Street Railway Company. Thus each holder of one old share in the latter will be entitled to $1\frac{1}{4}$ new shares, instead of 4, and each shareholder of the Densha Company will receive $1\frac{1}{2}$ new shares for every old one. It seems that the settlement is highly favourable to the Densha Company, but on the other side of the account have to be set the facts that the latter company has already provided the whole of its capital, and that its shares are taken by the banks as security for loans. The two companies are to hold extraordinary

general meetings on the 28th instant for the purpose of deciding finally.

Monday, July 13.

Mr. Amenomiya is not yet beaten. As the principal shareholder in the Tokyo Street Railway Company he is naturally the principal objector to a project which reduces by more than fifty per cent. his title to the new shares that the Company would have issued for increasing its capital. A meeting took place on the 10th instant at the residence of Baron Shibusawa, when the amalgamation committee endorsed everything hitherto done. But subsequently on the same day Mr. Amenomiya invited a number of newspaper editors to the Imperial Hotel and explained to them his reasons for opposing amalgamation. The chief point made by him was that people were entirely mistaken in predicting public advantages as the result of amalgamation. He pointed out that the Directors of the Tram Company were insistently pressing the authorities to sanction an increase of fares, the tariff now advocated by them being 2 *sen* per section up to 8 *sen*, a confused and costly system. The Street Railway Directors, on the contrary, proposed a rate of 2 *sen* for one section and an uniform charge of 5 *sen* for all longer journeys. That difference was possible, he explained, because the Tram Company's lines will have cost 230,000 *yen* per mile, whereas the Street Railway's will be made for 100,000 *yen*. He declared, further, that from next year the Street Railway will begin to pay dividends of over 10 per cent., thus becoming a going concern whose shares would be just as good securities as those of the Tram Company are now.

Tuesday, July 14.

A curious complication has occurred with reference to the proposed amalgamation of the Tokyo Street Railway Company and the Tram Company. According to the provisions of the Commercial Code one or other of the amalgamating companies must dissolve for the purposes of amalgamation, and the articles of amalgamation, as drafted, indicate that the Street Railway Company shall be the one to dissolve. But in the Instructions attached to the Street Railway Company's charter there is a provision that in the event of dissolution for any cause other than bankruptcy, the Company must hand over, free of charge, to the State or the Municipality all the plant and equipment needed for carrying on its work. Hence this proposed dissolution would virtually mean forfeiture of charter. This difficulty is said to have greatly strengthened the hands of Mr. Amenomiya and his supporters who oppose amalgamation. But we do not imagine that the dilemma is really serious, unless it should prove, which is unlikely, that the Instructions attached to the charter of the Tram Company, a charter granted many years ago, contain the same clause as to surrender. At any rate it is not to be imagined that either the State or the Municipality would take advantage of such an incident to revoke a charter.

THE INSURANCE QUESTION.

Since writing on this subject we observe that the *Japan Gazette* attributes to us "the view that the new insurance Order is not only justified but moderate as compared with alleged requirements of other countries in a similar case." Apparently our contemporary has not carefully read

what we wrote. We scrupulously avoided expressing any opinion of our own. Our article commenced with the words:—"It would seem that the views taken by the Authorities of the Department of Agriculture and Commerce with regard to the deposit of security by foreign insurance companies doing business in Japan, are not fully understood by some commentators;" and ended with the words:—"Such, we believe, are the motives of the Authorities in legislating as they have done. They are understood to hold that while securing the interests of Japanese insured, which it is their duty to safeguard, the measure they have taken will also inure to the benefit of foreign insurers by promoting public confidence in their stability." Everywhere throughout the article we made it clear that our object was solely to set forth the official ideas, so far as we had ascertained them, and the sentence where moderation was spoken of ran in these terms:—"Thus it seemed to the officials of the Japanese Department that in setting the minimum at 100,000 *yen*, they would be taking a very moderate line." It is certainly desirable that in considering the merits of a piece of Japanese legislation the estimates and views of the legislators should be known, and for that purpose solely our original article was written. As to our own opinions, they find expression for the first time in our present issue. We are disposed to think, in fact we do not see how the conclusion can be avoided, that the framers of the Order did not fully foresee its results. They expected that the deposits demanded would not greatly exceed one half of the premia collected, but in practice the deposit would come to be equal to something like one half of the sum assured. Even on the hypothesis that one half of the premia would suffice, the official estimate seems to be greatly under the mark, for a company insuring to the extent of fourteen or fifteen million *yen*—a feat already accomplished, we believe—would be collecting some seven hundred thousand *yen* annually, and would have to deposit, not a hundred thousand *yen* only, but three or four times that sum, were the deposit equal to one half of the premia. But in truth the official ratio errs even more than that, for such a company would have to put up about one-ninth of the total sum insured, namely, 1½ millions. No doubt can be entertained that the whole question will be fully discussed in a friendly spirit, and that some satisfactory settlement will be found.

THE NAGOYA FIRE.

The fire on the 9th instant in Nagoya broke out in a big five-storeyed brothel called the Chinsui-ro. It is stated that the cause was the bursting of a machine used for generating the electricity with which the building was lighted. Attempts were made to extinguish the flames with wadded quilts but the fire got the upper hand and very quickly the whole building was involved. Five prostitutes and one *geisha*, two guests, a man-servant and a maid-servant were burned to death. The other prostitutes and *geisha*, numbering respectively 45 and 9, escaped. This Chinsui-ro was built 11 years ago at a cost of 60,000 *yen*. From it the flames spread to several other buildings, notably two of similar trade, namely, the Kotobuki and the Miyata. The total loss of property is estimated at 345,000 *yen*, of which about 22,000 *yen* was covered by insurance.

RAILWAYS.

The Railway Bureau is represented as having made investigations for the purpose of determining the possibility of carrying out the policy so strongly advocated by the *Seiyun-kai*, namely, the limiting of State outlays on account of railways to the profits derived from the lines. It would appear from this calculation that such a policy is feasible. During the next four years, namely up to 1907, the outlays would exceed the profits, but after that time the situation would be reversed, the profits showing a steady surplus. Hence the Bureau suggests that during the next four years the excess of expenditures over profits should be defrayed by issuing short-period bonds to be redeemed ultimately out of surplus profits, the interest on the bonds being paid out of the proceeds of their sale. The figures on which this project is based are:—

Year.	Outlays for Construction and Improvment. Yen.	Profits from Traffic. Yen.	Bonds to be floated. Yen.	Amount of Bonds to be redeemed. Yen.
1904 ...	13,000,000	8,970,000	4,133,333	—
1905 ...	13,000,000	9,500,000	3,801,710	1,935,043
1906 ...	12,500,000	9,840,000	3,135,130	11,070,173
1907 ...	10,681,921	10,150,000	1,113,262	12,183,435
Bonds redeemed.				
1908 ...	9,044,907	10,440,000	785,921	11,397,514
1909 ...	6,100,000	10,620,000	3,950,124	7,447,390
1910 ...	4,658,000	10,840,000	5,808,961	1,638,429
1911 ...	2,300,000	11,090,000	1,658,429	—
1912 ...	1,430,100	11,360,000	—	—

THE MINISTER OF STATE FOR COMMUNICATIONS.

The *Nichi Nichi Shimbun* says that Viscount Yoshikawa, Minister of State for Communications, persists in his often expressed determination to resign, and that he will probably be succeeded by Mr. Oura Kanetake, now Chief of Police.

From the same journal we learn that the portfolios of Agriculture and Commerce and of Education are also likely to be vacated, but that new holders will not be appointed. Baron Sone will discharge the duties of the Minister of Agriculture and Commerce, and Baron Kioura those of the Minister of Education. Mr. Takasaki Chikaaki is expected to become Chief of Police, but we can not reconcile that forecast with his nomination to the House of Peers.

NOTES ON CURRENT EVENTS.

As reports reach Tokyo it becomes evident that the country suffered much from the recent downpour. Almost every district sends accounts of sufferings, but evidently the worst effects were produced in the regions extending from Kyoto northward along the Tokaido. It seems that the storm had its origin in the seas adjoining Formosa. There the wind and rain commenced on the 5th instant, and thence the centre moved leisurely to the Riukiu Islands, reaching them at 2 p.m. on the 8th. That evening at 10 p.m. Kiushiu was invaded; at 9 on the following morning the Island of Shikoku became involved, and at 2 p.m. on the same day the storm, which was now moving with greatly accelerated velocity, reached Tokyo, thence passing seaward *via* Choshi in Shimosa. Thus its effects were not felt further north than Utsunomiya. There is now no appearance of any fresh depression, and the meteorological experts predict a spell of fine weather. If their forecast be correct the *niubai* season has ended with remarkable accuracy of date, but not without leaving heavy traces of its prevalence.

The *Official Gazette* contains an announcement of the immediate carrying out of the arrangements effected by convention on the 24th of last April for enlarging the Japanese settlement in Tientsin. The dimensions of the extension are 1,140 feet to the east, 1,050 feet to the south, 1,300 feet to the north and 2,000 feet to the west.

The *Anglo-Japanese Gazette* has been greatly misled by some informant with respect to the result of the negotiations concluded recently in Tokyo by Messrs. McIlwraith McEacharn and Company on one side and the Directors of the Tokyo Electric Railway Company on the other. It was not agreed that the share capital should be "equally divided between Britishers and Japanese"; it was not agreed that "the Board of Directors and Auditors should consist of an equal number of Britishers and Japanese"; it was not agreed that debentures should be floated in London by a syndicate; it was not agreed that ultimately "half of the subscribed capital should be ceded to the British capitalists at a reasonable rate of interest," and it is not true that Sir Malcolm McEacharn "experienced considerable difficulty on account of the suspicion which exists among a small conservative section of the Japanese regarding any association of their countrymen with foreigners for business purposes." In short the whole story as told by our London contemporary is singularly erroneous.

It is announced that the new arrangements as to telegraphic rates to Europe and to African ports along the Mediterranean will take effect from the 15th instant. The reductions made are:—

	Old rate per word.	New Rate.	Reduction Yen.
Telegrams <i>via</i> Shanghai	3.880	2.820	1.060
Telegrams <i>via</i> Vladivostok	3.080	2.420	0.660

Japanese telegraph offices in Korea, namely, those in Seoul, Yuensan and Fusan, are included in this arrangement.

The Graduation Ceremony of the Imperial University took place on the 11th instant. The Emperor was represented by Prince Kacho, who handed to thirteen specially distinguished graduates gifts from the Sovereign. There were in all 470 graduates, divided as follows:—

Law Graduates (namely English Law 32, French Law 17, German Law 31, & Political Law 59)	139
Medical Graduates	98
Engineering Graduates	115
Literary Graduates	113
National Philosophy Graduates	19
Agricultural Graduates	18

As usual the numbers do not tally, the total of the detailed figures being 502 whereas the alleged total is only 470. We presume that 470 is the true figure.

The *Soko*, which ran aground in Nemuro Bay last May, has been successfully floated and towed into Hakodate.

We learn from Tokyo newspapers that the action brought by the Russo-Chinese Bank against its comradore, Mr. Yuan, is for 175,971 yen. The basis of action is that Yuan went security for sums aggregating that amount and that he is bound to indemnify the Bank. The real defaulters were the Kwansai Spinning Company and a foreign firm in Kobe, their respective debts being 162,459 yen and 53,482 yen—as usual the figures do not tally. The cotton spinning firm went bankrupt, a fraudulent bankruptcy it is alleged, and failing to obtain the Bank's endorsement of its proceedings, induced Mr. Yuan to lend

his sympathy, the method of persuasion being more than questionable. But Mr. Yuan, on his side, has brought action against the Bank for a sum of 530,000 yen. He alleges that he put up that amount of security, in the form of realizable property, when he became the Bank's comradore in Shanghai, and that after his connexion with the institution ceased, the property was sold by the Bank, which has never accounted to him for the proceeds. In addition to these complications there is a prospect of a Japanese judge being arraigned for corrupt practices, so that altogether the case is likely to create some commotion.

Six new members of the House of Peers have been nominated by the Emperor. They are Mr. Hattori Ichizo, Mr. Takasaki Chikaakira, Mr. Shibata Kamon, Mr. Hara Yasutaro, Mr. Kawashima Jun, and Mr. Mayebara Jiro. Some of these names have been little before the public. It will of course be said that the Cabinet is strengthening its position in the Upper Chamber, which is not improbable.

YACHTING.

Saturday furnished real boating weather, and the difference between the conditions that had prevailed on three consecutive occasions previously and the fine southerly breeze that was experienced on the 11th was duly appreciated by yachtsmen.

The cruising class, consisting of only three boats, got away at 1.45 p.m., *Nina* and *Asagao* leading *Dainyo* over the line. By setting her spinnaker to starboard as they ran down the harbour, *Asagao* was able to show the way out between the lighthouses, *Nina* next and *Dainyo* last. It was a close fetch to the lightship and *Asagao*, going finely, kept her lead and a good weatherly position to that mark, though *Nina* was not far astern—ten seconds—in passing, *Dainyo* thirty seconds later and further to leeward. They tacked short round the lightship and while they remained in sight the big boats were close to each other, *Nina* apparently having the better position, with *Asagao* still in the lead. They got into *Uraga* while it was still light in the same order so that, *Asagao* wins the prize. Times:—

	h.m.s.	h.m.s.
<i>Dainyo</i>	6.06.30	6.06.30
<i>Nina</i>	6.00.00	5.54.00
<i>Asagao</i>	5.58.00	5.25.00

Eight 21-raters started, and twenty seconds only separated the first from the last after the gun went. *Vixen* got out of the harbour entrance first, *Sunbeam* next and *Winsome* close by. On the trip out to the lightship the two last mentioned made an interesting fight, and a little distance astern of them *Pele* and *Yugao* were similarly pitted against each other. *Vixen* tacked round the lightship first, *Sunbeam* second, *Winsome* third, and again in the windward work along the Honmoku shore there was close business between the second and third boats, which resulted in *Winsome* getting into a commanding berth, even seeming to hold the weather of *Vixen*. But in the choppy sea on and about the spit *Vixen* established a lead again and rounded the Widow Buoy first, *Sunbeam* having sailed past *Winsome* into second place. They ran back under spinnakers, and so far as the leaders were concerned their relative positions did not vary up to the close. As will be seen from the finishing times *Vixen* would have won outside her Club allowance. The first prize, therefore, with two record points goes to *Vixen*, the second with one point to *Sunbeam*. *Chocho* gave up. Times:—

	Finish.	Corrected Club.
	h.m.s.	h.m.s.
<i>Sunbeam</i>	4.26.40	4.26.40
<i>Winsome</i>	4.28.02	4.28.02
<i>Pele</i>	4.29.45	4.29.45
<i>Edna</i>	4.29.40	4.29.40
<i>Chocho</i>	gave up	—
<i>Yugao</i>	4.37.10	4.31.58
<i>Vixen</i>	4.22.32	4.17.34
<i>Daisy May</i>	4.42.45	4.32.07

We note that owing to the approaching departure for Shanghai of Mr. N. B. Morton, his share in the *Vixen*, 21 rater, has been taken over by Mr. A. E. McGlew.

Eight "Larks" went out to race for two prizes, the course being round the Lightship, a mark boat near the south breakwater and home through the harbour entrance via the inner Pier buoy. The little craft made a beautiful start of it. When they hauled on a wind to fetch the lightship, No. 10 (owned by A. M. Watt but sailed by J. Drummond) was ahead, then came Nos. 6 (H. A. Poole), 11 (F. H. Abley), 4 (W. B. Mason) and 2 (A. L. Manley). There was a good deal of passing and repassing on the way out, but 10 held her lead unchallenged and negotiated the lightship first. No. 6 had been fairly "collared," however, and occupied sixth place at this mark, 11, 2, 12 (R. Sander), and 4 all cutting round in front of her in the order given. No. 8 (M. Russell and G. Allcock) and 14 (J. Eytton) formed the tail of the race. As they came in on a fairly open reach the strong flood tide played tricks with most of them, but all made good going to the breakwater mark, the little fleet presenting a very pretty sight as they came along, apparently in line abreast. But they really were not by any means all abreast. No. 10 eased her sheet round the flag boat just 50 seconds ahead of No. 11, and the latter swung past half that space of time in front of No. 2; astern of which at a considerable interval came No. 6 and then No. 4. They ran along the breakwater and passed through the entrance in the same order, and the beating home did not change their positions. No. 10, however, winning by a bare 30 seconds from No. 11, the nearest of the others almost three minutes away. Times:—

	h.m.s.		h.m.s.
No. 10.....	4.09.20	No. 4.....	4.13.35
No. 11.....	4.09.50	No. 14.....	4.15.50
No. 2.....	5.12.30	No. 12.....	4.16.15
No. 6.....	4.13.30	No. 8.....	4.16.30

CRICKET.

A cricket match was played on Saturday afternoon between a team "Born in Japan" and "The Rest." The latter went in first and made a rather poor showing, Kingdon taking the wickets of two men and Mollison those of one before they could score. Dr. Moon made a fair stand till bowled by Kingdon for 11, and F. E. White contributed 21. Duff scored finely till run out making 29, but the rest were small figures and the side went out for 88. "Born in Japan" made a good display, E. W. Kilby, who went in first, piling up a score of 65 (which included six 4's) till caught by Dr. Moon off P. A. Cox. H. W. Kilby carried out his bat for 20. W. S. Moss, 17, and Mollison 11 provided the only other double figures. Stumps were drawn when the score stood at 127. Scoring:—

"THE REST."

THE POLITICAL SITUATION.

July 11.

THERE is a very interesting article in the *Fiji Shimpō* of the 10th instant. Stripped of all embroidery, the gist of what our contemporary writes is that, in effect, the problem now disturbing the public mind is simply a question of Marquis Iro's personality. Shall he remain in his dual position as leader of the *Seiyū-kai* and chief of the Elder Statesmen, or shall he step down from the former place and confine himself solely to the latter? Now that is a very momentous question, doubtless, and from the point of view of Marquis Iro's certainly eminent services to his country in the past and probably eminent services in the future, it is a question in whose solution the nation is deeply concerned. But, after all, is it a question such as should create a Cabinet crisis, or is it a question calling for anything more than advice from those most intimate with the distinguished statesman or those directly responsible for the conduct of State affairs? For Marquis Iro's sake many may be interested in the result of his experimental attempt to combine two roles so incongruous when contrasted with the relations hitherto existing between Japanese Ministries and Japanese political parties, but from the point of view of the country as a whole such a matter ought not to be elevated to the rank of a national question, and ought not to be carried to the tribunal of the Throne. Naturally no announcement has yet been made as to the exact nature of the EMPEROR's communication to the Marquis—to which communication he is understood to have been recently pressed by the Grand Chamberlain for a reply—but evidently the general opinion is that HIS MAJESTY contemplates conferring on the Marquis some new mark of Imperial favour which would be incompatible with his continued leadership of a political party. Such a distinction would be the title of Prince or an advisory position near the Throne with Marquis YAMAGATA for colleague. Apparently the EMPEROR desires to retain the undivided services of the Marquis and with that object would raise him to a position entirely above the arena of party politics. Granting all that, however, the *Fiji's* point is that the matter chiefly concerns Marquis Iro personally, and that it should not be allowed to interrupt the even course of administrative business or to disturb the serenity of the Imperial mind. We can not fully agree with the *Fiji*. Assuming its premises to be correct, the conclusions it arrives at appear to us incomplete. For certainly if the issue of this crisis shapes itself as the Sovereign's immediate advisers desire, a crushing blow will have been given to the theory of party government in Japan. An announcement, based on the highest authority in the land, will have been made that the closer a statesman is to the Throne the farther he must be from political parties. It should be plain to the most superficial student

of Japan's ancient and modern history that to keep the Sovereign entirely apart from every clique and cabal is a cardinal desideratum. In all the old feuds which deluged the country in blood and convulsed society, the prime aim of each disputing faction was to justify itself by securing the regis of the Throne. They have reason, therefore, who counsel the Emperor at this juncture to declare—for, in effect, that is what the declaration amounts to—that his most trusted advisers must stand aside from parties or coteries. But such considerations will not mitigate the stunning force of the blow to the parties themselves who will thus be driven further than ever into the wilderness. We refrain, however, from following a line of reflection which is still premature. But as to the adequacy of this problem to be treated as a State affair, surely that must depend upon circumstances beyond the accurate knowledge of outsiders. We can not know how far the interference of the Elder Statesmen may have compelled the Cabinet to choose between ignoring their advice, or accepting direct responsibility for a policy opposed to Ministerial views. Whatever may be said or written about the national disadvantages attending a Cabinet crisis at this juncture, that, we must assume, was perfectly evident to the members of the Cabinet themselves from the first. The scale must have been heavily weighted before they allowed it to incline towards a Ministerial deadlock. We note in this context that the *Kokumin Shimbun* publishes a closely reasoned article, the purport of which is that no man can serve two masters, and that Marquis Iro in his dual capacity can satisfy neither his old friends nor his new associates. But like all other commentators on the situation the *Kokumin* makes no attempt to explain how and why this peculiar problem of domestic politics has precipitated a Cabinet crisis at the present moment. It need scarcely be said that the organs of the *Seiyū-kai* confidently predict the nature of Marquis Iro's choice, namely, that he will abandon his position as an Elder Statesman and confine himself to that of a party leader. But it is not equally obvious why the organs of the Progressists should formulate a similar conviction with plain approval.

July 16.

IT is not yet possible to say how the changes just effected in the sphere of domestic politics will be regarded by the Japanese public. The *Kokumin Shimbun* alone has spoken on the subject, and we gather from its somewhat obscure utterances that while recognising the sacrifice made by Marquis SAIONJI, it does not regard him as by any means an ideal party leader, and further it considers that his friendship for Marquis Iro has induced him to accept a position to which his own disposition and inclinations must render him very averse. Among the present generation of hereditary noblemen the Japanese are wont to speak of

Prince KONOYE, Marquis SAIONJI and Marquis KURODA as the leaders in competence and attainments. Prince KONOYE was educated in Germany, Marquis SAIONJI in France and Marquis KURODA in England, and each is supposed to be a fairly representative type of the land of his collegiate career. Marquis SAIONJI is eminently a *grand seigneur*. He has all the quiet and somewhat cold dignity of the French aristocrat, and the impression his manner and conversation convey is that of a man wholly removed by nature and culture from the arena of political turmoil and intrigue. We ourselves are much surprised by his acceptance of such a post, but our first impulse is to think that he will be welcomed by the *Seiyū-kai* as a chief who, while not exacting any large measure of discipline and obedience, will confer a very considerable amount of dignity on the Party. In fact, nothing could seem more incongruous to a casual observer of Japanese politics than that the turbulent iconoclastic Liberals of a few years back, the men who received and did not resent the title of *Hakwai-to* (party of destruction), should now be ranged under the banner of a typical aristocrat like Marquis SAIONJI. But it will not be forgotten that when he returned from France Marquis SAIONJI showed a strong disposition to adopt the career of journalism; that he was with difficulty restrained by friends from taking a course which then seemed a marked solecism, and that he has always shown himself an emphatic opponent of the German *welt-politik* and an advocate of national federation. It is not inconceivable that as the leader of a party struggling for the complete attainment of constitutional ideals he may find himself in a congenial atmosphere and may develop qualities of generalship not hitherto attributed to him. However that may be, we can not but admire the extreme cleverness with which Marquis Iro has extricated himself from a most embarrassing situation. A few days ago something like the collapse of all his political edifice seemed to menace him. To-day he stands almost as completely master of the situation as ever. In his address to the Throne he contrived to let it be plainly seen that he obeyed the Imperial Command not altogether without reluctance, and now for the Party whose ruin appeared an inevitable consequence of his retirement he has provided a leader whose very name confers a new lustre of respectability on his followers. In fact, Marquis Iro retains the allegiance of the *Seiyū-kai* while divesting himself of the responsibilities of command, and, at the same time, there is removed from the field a palpable obstruction to the smooth discharge of ministerial functions, namely, the camera interference of the Elder Statesmen. These distinguished men are now re-assembled and placed in a position where their advice will be sought and given in the normal routine of official business; and since they

must henceforth speak collectively, we may presume that there will be no further traces of the feuds which their official cliques always took care to foment. The Privy Council has hitherto been a somewhat feeble body. It succeeded the Senate as an asylum for superannuated officials. But with Marquis ITO at its head, and Marquis YAMAGATA and Count MATSUKATA in its ranks, it must act a very different part. Meanwhile the problem of the *Seiyun-kai's* solidarity remains to be solved. That stormy petrel of Japanese politics, Mr. OI KENTARO, quondam leader of *soshi* and of late years hidden in oblivion, has again emerged upon the stage. He wants a new party. We infer from his return to life that the atmosphere is more or less lurid.

INSURANCE SECURITY.

July 13.

IT would seem that the views taken by the Authorities of the Department of Agriculture and Commerce with regard to the deposit of security by foreign insurance companies doing business in Japan, are not clearly understood by some commentators. Of course the question is of some importance, for the number of companies affected aggregates 71; namely, 65 in Yokohama, comprising 36 fire, 18 marine, 6 life and 5 fire and marine; 4 in Kobe, comprising 1 marine, 2 fire and 1 marine and fire, and 2 in Osaka, both fire. Each of these is required to put up a sum of at least 100,000 *yen* in the form of negotiable securities, so that the total involved is over seven million *yen*. The authorities calculate, we understand, that although this security is to increase in the ratio of the various companies' insurance responsibilities—that ratio being fixed by their own regulations—, very few companies will have to find more than 100,000 *yen* at present. A singular statement has been made journalistically to the effect that a certain life-insurance company will at once have to put up some six millions. But when we observe that the most successful of the foreign life companies doing business in Japan has not yet issued policies aggregating more than six millions, we are led to suspect that the formulor of such a statement confused the total of the policies with the amount of the security, especially since he further represents a company as accumulating a reserve of some nine thousand *yen* against a policy of one thousand. The fact is, we gather, that since the year 1900, when an Imperial Ordinance invested the authorities with competence to require that proper security must be put up by foreign insurance companies working in this country, the whole question has been under very careful official consideration, and the counsels of those responsible are said to have been inspired by a desire to impose upon foreign companies the smallest obligation consistent with the circumstances. Naturally the practice of other countries was examined,

with the result that a figure amounting to about one half of the minimum exacted in England and America seemed appropriate. In one state of America, Massachusetts, the minimum figure is \$200,000 (gold), or 400,000 *yen*, but in most of the other States it is only \$100,000, or 200,000 *yen*, while in England it is £20,000, or 200,000 *yen*. Thus it seemed to the officials of the Japanese Department that in setting the minimum at 100,000 *yen*, they would be taking a very moderate line, and that their procedure could not possibly be construed as in any sense hostile to foreign enterprise. Of course in proportion as the business of a company increases so also will its legal reserve, and consequently the amount of its security. But it is considered that since every increase of that nature must be accompanied, *pari passu*, with an increase of the company's income, no hardship will be involved. The official estimate, as we understand, is that the reserve will be approximately equal to, or a little more than, one half of the volume of the premia; and further that the fact of such monies being lodged in Japan under Governmental supervision will vastly increase Japanese confidence in foreign life insurance companies. At present a Japanese insuring his life in a foreign office must be inspired with a large measure of trustfulness, for he knows that in the event of any dispute, the execution of a judgment obtained against the company in a Japanese court might be difficult, the company having no distrainable assets within the court's jurisdiction. That is not the case with a Japanese company, for all its shareholders and their property are practically under the effective control of the courts of law. Obviously from this point of view the security lodged by a foreign company ought to be larger than that lodged by a domestic company. Such, we believe, are the motives of the Authorities in legislating as they have done. They are understood to hold that while securing the interests of Japanese insured, which it is their duty to safeguard, the measure they have taken will also inure to the benefit of foreign insurers by promoting public confidence in their stability.

July 16.

THE official views collected by us on inquiry and stated in our issue of the 13th instant show that in ordering foreign insurance companies doing business in Japan to put up certain security, the Japanese authorities believed themselves to be acting in the best interests of all concerned. But it may be doubted whether the question had received exhaustive consideration before the order was promulgated. Here we desire to mention two incidental points. The first is a statement made by a Yokohama journal on the 6th instant and traversed by us as "singular," namely:—"One Foreign Life Company has prepared a table showing the amount of reserve, calculated at 3½ per cent. interest, that would be required for one policy" (the italics are our contemporary's) "issued each consecutive year for

20 years for *yen* 1,000, age 35, annual premium *yen* 52.13 for 20 years. The reserve begins with *yen* 35 and increases to *yen* 9,248 in the 20th year." We read this as referring to one policy, but we are informed that it was intended to refer to twenty policies, issued, one each, in 20 consecutive years. In short, against liabilities accumulating by equal annual increments for 20 years until an aggregate of 20,000 *yen* was reached, the reserve would stand at 9,248 *yen* in the 20th year. That, of course, is beyond query. The second point is that a certain life insurance company would have to put up forthwith, not 100,000 *yen* as the Japanese Authorities seem to intend and suppose, but between six and seven million *yen*. We are unable to understand such an estimate. It is officially believed that no foreign life company in Japan carries policies aggregating more than six million *yen*. Let us suppose, however, that the most prosperous company has already issued policies totalling 15 millions and that it has been working for five years—though the first grant of charters to foreign life companies is by no means so old as that. Now, according to our information, the amount of reserves put up in the 5th year on the basis of 3½ per cent. interest and on the supposition that the growth of business has been uniform, is approximately one-ninth of the outstanding policies. Therefore for a fifteen-millions business the reserve would be 1⅓ millions, and in order that a company should be required to put up 6 millions, it must have issued policies totalling 54 millions. But whatever the explanation of that point may be—and we presume that some explanation is forthcoming—the fact remains that the security which a company such as we have supposed must immediately furnish under the recent order would be nearly two million *yen*, instead of a hundred thousand. Hence our expression of doubt whether the question had been exhaustively examined before the issue of the order. The principle observed by the best foreign companies with regard to their reserves is to set aside annually a sum such that, with accumulations of interest at 3 or 3½ per cent., it shall amount at the end of the insurance period to the sum insured. It is well within the limits of probability that twenty years from the time of commencing business in this country one of the great foreign companies will be carrying 50 million *yen* worth of policies, in which case its reserves would amount to nearly 25 millions, and the company would have to lodge that amount in the hands of the Japanese Government. Such can scarcely be the Government's intension, for a measure so drastic must immediately compel the foreign life companies to retire altogether from the Japanese field. On the other hand, some security ought certainly to be required. Japanese companies are not obliged to furnish more than twenty-five thousand *yen*, or one-fourth of their minimum paid-up capital. But they are within easy reach of the law and are at all times subject to offi-

cial inspection, which constitutes a guarantee of the soundness of their business and of the reality as well as the liquifiable nature of their reserves and assets. It is not apparent why foreign companies doing business in Japan should not be subject to similar inspection, nor do we believe that they would resent it. But to require that they shall lodge many millions of *yen* in the hands of the Government appears too onerous. Nothing so drastic is demanded, we believe, in England or America. An American office doing business in England can obtain recognition of a certificate written by American official inspectors, and such recognition serves exactly the same purpose as would be served by reserves and assets within actual reach of British law-courts. The new regulation, even supposing that it is modified so as not to require a larger security than a hundred thousand *yen*, may nevertheless prove fatal to some fire and marine companies which, being strictly limited as to the manner of investing their reserves, can not have recourse to the bonds of a Far-Eastern State. That result would be regretted by the Japanese Authorities, we are convinced, and it seems to us scarcely possible to doubt that they will modify the operation of the new order, not in the sense of dispensing altogether with security—that no reasonable person can expect,—but in the sense of limiting the amount actually lodged in Japan, and following the English and American plan of accepting foreign official certificates with regard to further reserves and assets. This appears to us to be precisely one of those matters which, in spite of the best possible intentions on both sides, may easily produce a very bad impression in Europe and America.

ANNUAL MEETING OF THE AMERICAN BOARD MISSION.

The Thirty-first Annual Meeting of the Japan Mission of the American Board was held at Kobe in the Chapel of the Girls' College, beginning in the afternoon of July 2nd, and closing in the afternoon of the 6th. There was an attendance of fifty-four adults, and sixteen children, besides several friends who were guests of the Mission during the week. Mr. Newell was Chairman, and Dr. Learned, Secretary, of the meeting.

The usual routine of business was attended to, relating to evangelistic, school and kindergarten work; devotional exercises of a high order characterized each day; several notable addresses were given; a letter of greeting was sent to Minister Griscom; and the social part of the programme was not neglected.

The first half-hour of each session was given to brief reports from the stations, two stations reporting at each session, followed by special prayer for their particular work and needs. In this way all the twelve stations passed in panorama before the Mission, with such enlivening touches and colour as could never appear in a printed report. The universal tone of hopefulness and triumph in all these reports was most encouraging, and indicated that the past year has been one of the best in the history of our work.

If the devotions of this first half-hour seemed rather self-centred, a corrective was offered in the last half-hour of each morning session when a purely devotional programme was presented with an outward and upward look. The general theme for the week was "Bear ye one another's bur-

dens," and some of the topics presented for sympathy and prayer were, "The Standing Committee of Co-operating Missions," "The Temperance Work," "The Special Evangelistic Work at the Osaka Exposition," "The Young Men's Christian Association," "The Young People's Society of Christian Endeavour," "The Hawaiian Evangelical Association."

On the opening day of the meeting the Rev. F. Franson, Director of the Scandinavian Alliance Mission, by invitation, was present and gave an address on the History of the Free Churches in Sweden.

This was followed, the same day, with an address by Dr. Greene on "The Missionary as an Interpreter of Japanese Life and Thought," in which he took to task those who would try to minimize the Japanese nation and the part it is playing and is yet to play in the East and in the world. The dictum of a certain savant that "Japan is a country where there are no origins" he considered a great mistake. Not only the civilization of the past, but the progress of the present, is full of lessons to us all. It is necessary to the missionary himself and to the good of his own work that he try to become a correct interpreter of Japanese life and thought. Though he may speak the language correctly, yet without close sympathy with the local and current thought, his own thought may be so far removed that there is practically no contact with the Japanese. The speaker called attention to several points of interesting development going on now in the national language and economics; in the new conceptions of family life and individual life that are coming in and taking possession. It is useless to say that psychological conditions require ages for changing racial traits, for the fact is that here in Japan they have changed in a brief time. The touring missionary is in the very best relation and position possible to tell the world these facts which he knows far better than the glib and superficial writers who array themselves against Japan. If the people of the United States knew what we know, they would give their best moral support to Japan at this time.

On Friday morning Miss Daniels presented a paper on "Religious Work for Young People,—its True Principles and their Application." A chart illustrating the age at which youth are converted showed that while a good percentage reach a definite religious decision at twelve, and again at eighteen, by far the largest per cent. are converted at the age of sixteen. Hence the greatest care should be taken to choose the best teachers for those between 12 and 16. "Storing the mind and forming habits are the things to aim at in these years." "The Gospel story should be imbedded in the mind in these years, and memorizing insisted upon." "Rather than attempt to rule, first gain their confidence. Cultivate a knowledge of what they like to do, and then do it with them. This is the open sesame."

Rev. T. Osada, of Osaka, followed in an able discussion of the subject, making a special plea for better and more up-to-date hymns and tunes for the young. Whereas the church was for a long time in the lead in this matter, it has now fallen behind the secular schools in songs adapted to boys and girls. He showed the need also for more and better Christian juvenile literature for the house and the Sunday School.

On Sunday, as usual at this time, the morning services at the Union Church were courteously put into the hands of the Mission, although Pastor Wicher kindly assisted in the opening exercises. Mr. Clark preached an excellent sermon from the text, "As thou hast sent me into the world, even so have I also sent them into the world."

The Annual Meeting of the Christian Endeavour Society has long been a feature of this annual gathering of the Mission; and though but fourteen children were participants in the Sunday afternoon exercises, the Mission and the friends from outside who gathered in the Chapel felt amply repaid by the bright songs and recitations and faces which they heard and saw there. The Treasurer's report showed nearly seventy *yen* collected and disbursed in benevolence during the year. At a later meeting in the day, which combined Vesper and Communion services, four

of the children were received into membership of the Mission Church.

During the business sessions naturally the financial problems occupied a large share of thought and time. While the reports from all the stations showed unusual advance and new doors of opportunity constantly opening; while the growth of the Doshisha, the Kobe Girls' College, Bible School, Kindergarten and Training School, was most encouraging, and a spirit of hopefulness pervaded every department of work, there was yet an undertone of anticipative disappointment in view of the probable fact (based upon the soul-trying experiences of the past few years) that the Board would not be able to provide the extra funds demanded for our expanding work.

In response to previous appeals two new families and one single lady were sent to join the Mission last year. While grateful for these fine additions, a still further reinforcement of 3 families and four single ladies was asked for at this time.

A request was also made to the Board for some eminent worker to be sent out from the United States who should give his whole time for a half-year or so to work in Japan alone. Without criticizing any previous visitor, it stands to reason that any man who puts in exhaustive work in India and other countries on the way, is at a distinct disadvantage before he reaches Japan.

The usual Fourth of July evening social and musical entertainment was postponed this year to Monday evening the 6th, when a goodly number of the Kobe residents, headed by U. S. Consul Lyon, showed their goodwill by mingling with the members of the Mission in a most delightfully informal and fraternal manner. About one hundred and fifty were present, and the evening closed with a musical programme and refreshments.

An attempt was made to have Arima chosen as the place for meeting next year. But in view of all the advantages which Kobe offers,—the convenient chapel of the College, together with the dormitories, the dining room and all the paraphernalia of this commodious and well-ordered school, which are generously thrown open by those in charge for the free use of the Mission; also the rare opportunity thus offered of coming in contact with the local residents once in the year, the attempt at a change was unsuccessful, and the vote was practically unanimous in favour of continuing the traditions of the past thirteen years. This vote may have been helped possibly by the delightfully cool weather of the week, and by the most astounding evidence of Kobe's progress along modern scientific lines,—the total absence of mosquitoes! a hitherto unheard-of thing at this time of year.

The next meeting is set for July 7, 1904, and Mr. Cary was chosen to act then as Chairman.

H.B.N.

LITERARY GOSSIP.

Mr. W. P. Courtney is hard at work, with two assistants, on his "Bibliography of Bibliographies," and, according to the *Athenaeum*, believes that he will be able to finish and publish it next year.

Mr. Laidlaw Purves has, in the *Athenaeum*, been trying to prove that "Robinson Crusoe" was not written by Defoe, but by Lord Oxford. There will soon come a time when writers will have to save posterity from these fruitless enquiries by depositing their MSS., duly attested, in some public repository.

The romance of publishing is not yet dead. Some weeks ago a well-known London publisher received the manuscript of a novel carefully packed in a red cloth case. The book was read, and turned out to be, in the opinion of the publisher's reader, a fine seventeenth century historical romance. Now the publisher is anxious to find the writer of the story and the owner of the red cloth case.

In connexion with the announcement of the coming publication of Lord Wolseley's "Me-

moirs" it will be interesting to note whether any mention is made of the authorship of a little work of fiction issued in the year 1877. The book in question, "Marley Castle," bore on its title-page the name of the great soldier (then, of course, Sir Garnet) as editor—not a common feature in the publication of a novel.

The centenary of the birth of Emerson was celebrated in various ways in America. If no English celebration, said an exchange, was organised, it is not because the name of Emerson is forgotten. His visits to this country were brief, but full of splendid interest; the hospitality of our literary men overwhelmed him, and he declared he had not till then been aware "there was so much kindness in the world." On his first visit (1833) he met John Stuart Mill and Coleridge in London, and journeyed all the way north to Craigenputtock to see Carlyle, whom he found "one of the most simple and frank of men."

The late Max O'Rell was exceedingly popular as a lecturer, and the way in which his mother (who died some years ago) viewed the suggestion that her son should take to the platform is worth repetition. She wrote to him from the native village, which she had never left for more than a day, to say that she did not think appearing before audiences to be a reputable business, and when he replied that he had decided to do it, and had signed a contract to that effect, the dear old lady wrote back that she was "still" his loving mother and that she would tell no one in the village about it!

What are the ideas of publishers regarding the next book which shall sell its hundred thousand? It occurred to the *People's Friend* to make some inquiries on the subject, and it publishes a series of replies. One publisher—Mr. J. Eveleigh Nash—makes this statement:—"It seems to me that the melodramatic story, with a strong love interest, always makes the widest appeal." Messrs. Hurst and Blackett think success now depends almost entirely on the merits of the novel itself. "Anything out of the common or above the ordinary run of novels as regards its literary merit is almost certain to find a public."

Mr. Crosland has followed up his indictment of a nation with an indictment of a sex in his new book "Lovely Woman," and having been rude to the Unspeakable Scot he goes on to be even more rude to woman, says the *Academy*. Indeed, the only notable feature of this hysterical, ill-spelled, and uninformed work is its blatant rudeness, and the man who shouts rude remarks in a crowd is certain of a hearing—though not of respect. Woman, he maintains, has neither good looks nor efficiency; she is a failure as maid, wife, and widow. She ought to be kept in a hutch at the bottom of the garden. "Of Miss Ellen Thorneycroft Fowler I will only say that I wish she had never been born."

That is a specimen of what Mr. Crosland thinks a gentleman should write, print, and publish. Of "the sinner" he writes, "Most women are more or less bad"—a statement which would apply to all men. "Many of them drink. Some of them are kleptomaniacs and shoplifters." Of course; they are as human as their husbands and fathers. "A man can carry a skinful of liquor like a gentleman. A woman never gets drunk like a lady." Well—there the women who are also ladies may find an unintended compliment. Naturally Mr. Crosland is infuriated by the success of women "in obtaining what they conceive to be their right." With Scotsmen and women "it is a case of Maud at the prow and Donald at the helm, and it means ruin of the bluest sort." We have been unable to find anything in the sentiment or the style of this work to justify it. It is simply rude.

Mr. Fisher Unwin's experience is that "novels of present-day life, especially Society novels, have the largest sale"; Mr. John Long holds that "a good Society novel with really clever dialogue always finds a market"; Messrs. Ward and Lock say "there always has been and always will be an enormous demand for well-told stories of

either love, adventure, humour, or of domestic interest, and the demand for all these stories exists at the same time." Messrs. Chapman and Hall believe that "there never was a time when the budding novelist had a better opportunity than he has at present." "To satisfy the taste of readers to-day a very high standard has to be attained as regards spontaneity, originality, imagination, style, power of expression, and human sympathy," is the opinion of Messrs. Chatto and Windus.

Tuesday was the 200th anniversary of the death of Samuel Pepys, the greatest of English gossipers said the *Westminster Gazette* of May 29th. Sir Walter Scott, who reviewed the "Diary" for the *Quarterly Review*, described it as an "untouched treasure of curious anecdote for the lover of antique scandal." But it is far more than that. Pepys had many houses in London. Of his abode in Seething-lane, Crutched Friars, he writes: "My wife and I are mightily pleased with our new house;" then he moved to Axe-yard, again to York Buildings (afterwards Buckingham-street), and finally to Clapham, where he died.

There is a pathetic touch in the last entry in Pepys's "Diary," though that was concluded long before his death. It ran:

And thus ends all that I doubt I shall ever be able to do with my own eyes in the keeping of my Journal. I being not able to do it any longer, having done now so long as to undo my eyes almost every time that I take a pen in my hand; and therefore, whatever comes of it I must forbear. . . . And so I betake myself to that course, which is almost as much as to see myself go into my grave: for which, and all the discomforts that will accompany my being blind, the good God prepare me!

Happily Pepys escaped blindness, but though he lived for more than thirty years after this last entry he made no addition to his "Diary." The original manuscript of the work is preserved in Magdalene College, Cambridge.

A valuable addition to the "Thin Paper Classics" series, now in course of publication, are two of the most delightful "diaries" ever written in the English language. One is "The Diary of John Evelyn, Esquire, F.R.S." (George Newnes, Limited). The little volume, in its elegant soft-leather binding, is, as all the books of this series, printed on thin India paper in clear bold type, and the publishers have fortunately abstained from modernising the text in any way. A charming title-page by Mr. Garth Jones and a fine portrait-etching by Mr. E. Sullivan add to the beauty of the volume, which will delight the heart of every lover of what is best and daintiest among modern books.

The other is "Pepys' Diary," which has been the delight of all lovers of books, philosophers, and readers of political and social history since good fortune put it into the hands of the Master of Magdalene College, Cambridge, early in the nineteenth century, and it was at his request edited and published by his brother, Lord Braybrooke, in 1825. The orthography in this case is naturally that of modern times, since Pepys wrote all his diaries in shorthand. But no spelling, however modern, can dispel the delightful old world flavour hanging about these pages, and the very charming form in which they are now given to the public should also help to make them, if possible, more popular than ever.

SHOJI HOTEL.

The following is a table of the temperature at Shoji during last week, taken at the Shoji Hotel:—

Date.	Max.	Min.	Lake.	Temp.	Weather.
Sunday	71°	59°	69°	Fine.	
Monday	63°	60°	69°	Rain.	
Tuesday	61°	58°	69°	Rain.	
Wednesday	67°	60°	69°	Rain and heavy blow.	
Thursday	71°	59°	66°	Fine.	
Friday	72°	60°	66°	Fine.	
Saturday	73°	62°	66°	Fine.	

LAW CASES.

THE ALLEGED SILK FRAUDS.

In the criminal section of the Yokohama District Court on July 11th, the trial of Messrs. Alfred Le Prevost, Carl Bremer and three Japanese, which was adjourned on June 8th, was resumed before Judge Danno and two Associates, with Public Procurators Nakamura and Midzutani.

Mr. Akiyama and other counsel were present as before for the accused.

The Court was opened at 10 a.m. and the examination of Mr. Le Prevost was resumed. He stated that the loss on transactions in the silk department of Messrs. Cornes & Co. was not yen 63,000; the actual loss should be yen 30,000 during the nine months from February to October, 1901. It arose because about 18,000 pieces of *habutai* which were purchased in September and October, 1901, and for which payment had not been made, were kept in stock. The amount of yen 63,000 which was alleged as loss must be a miscalculation. The 18,000 pieces of silk standing in stock at the end of September, 1901, was not lost but to be paid for afterward. The cost of that silk was over yen 30,000. The alleged loss of yen 63,000 was surely a miscalculation. The silk which was purchased from the districts of Kawamata, Kaga, and Echizen was entered in the books adding the packing expense, inspection charges and other various items, and then fixing the selling price. When the price in the book was looked at in times of dullness a considerable difference would be seen between the purchasing price and the then quotation of the market and such difference might be thought to be a loss. Even if the silk should have to be sold at a price lower than the cost in the books it was not necessarily loss and there would be some profit. As a matter of fact these goods had fallen in price in accordance with market fluctuations. The loss on the *usuji* silk amounted to yen 7,000. These goods were purchased in April, May and June, 1901, at the rate of yen 10 and were sold at yen 7.50 to yen 9.20. A portion of the *usuji* silk was exported, and there was no remarkable difference in the purchase price and the sale price. The *e-kinu* silk was 5 *momme* and the *usuji-kinu* silk 2 *momme* in weight (1 *momme*=3.3 grains troy). There was a large stock of *usuji* silk in July. Amongst it there were no goods remaining from a silk dealer named Ogawa. No loss was sustained on goods delivered by Ogawa and Okada on July 23rd, 1901, which cost about yen 75,000. On June 30th some *usuji* silk was in stock on which no further loss was sustained. On the transactions in connexion with the Kawamata and Kaga *habutai*, some slight loss was sustained. He could not exactly remember without looking over the telegram book whether the silk department received orders from customers in June exclusive of Messrs. Fraser, Farley & Co. Though Okura and Shimomura had said in the course of the proceedings of the preliminary trial that there was no order in June and July excepting Messrs. Fraser Farley & Co's, he remembered that a quantity of the silk had been exported to San Francisco and Canada. Under necessity, the silk department purchased some of the silk from Messrs. Fraser, Farley and Co. in June and July. The quantity of silk purchased from that firm he remembered to be 150 pieces. On the occasion of selling out the stock of goods on July 6th, Mr. Bremer, by consent of Mr. Weale, sold a quantity of silk to Messrs. Kahn and Kahn, Rangoon, who were customers of Messrs. Cornes & Co. He remembered that under pressing necessity, the silk department bought 1563 pieces of silk on June 30th, 1901, from Messrs. Fraser, Farley & Co. The price of that silk was not limited, but it was charged by Mr. Bremer in accordance with the market quotation. The transaction was made to appear as if the goods had been purchased from Shirai and Yoshikawa. The former was a silk broker, and the latter was connected with Mr. Bremer. He had no means of explaining why the names of Shirai and Yoshikawa were mixed up in the Goods Purchased Book or why alterations were made, because he saw them now for the first time. The book was kept by two or three men. In

July or August he received a letter from Mr. Weale instructing him not to ship any more merchandise but there was no request to present a stock list. The letter further stated that a telegram had been received on June 24th saying that more shipments were not needed in July and August. The statement in the preliminary examination to the effect that a letter had been received from Mr. Weale saying that he was not to purchase any more goods was a mistake. The letter from Mr. Weale instructed accused not to accept orders from customers in July and August. There was no instruction from Mr. Weale to sell goods then in stock. The amount of yen 68,000 which was transferred to Messrs. Cornes & Co. in July, 1901, was money collected in business as shown in the cash book. On July 29th the receipt of yen 69,000 was entered in the Cash Book when yen 55,892.31 was received from Messrs. Fraser, Farley & Co. On July 30th yen 68,000 was paid in to Messrs. Cornes & Co. The entry in the Cash Book of yen 15,000 as suspense account was meant to be a private account, the amount of which had been drawn from Messrs. Cornes & Co. and it was re-paid in June. The money was drawn for private expenses. The repayment was made to the silk department. After the amount of yen 15,000 was refunded on June 30th a certain balance remained in the silk department besides the yen 68,000. There was a space of a month between the time when the yen 68,000 and the yen 15,000 were paid in. The business was closed on June 30th and the settlement of accounts was made on a sheet which was delivered to Mr. Weale on July 9th, 1901. Certainly the yen 15,000 was not included in the amount of yen 68,000. He did not remember that Sawada, one of the employees, had been sent to the office of Mr. Bremer to receive over yen 55,000, but it would be shown in the books. For the amount, several cheques were drawn in various names and he believed that this was the result of some misunderstanding. After he (accused) entered the employment of the silk department, agents for purchasing the goods were arranged for at Kawamata, Fukui and two other districts. For goods from these agents, documentary drafts were mostly used. There was nothing unpaid to those agents for delivered goods and he remembered that payment was rather made in advance. On July 30th another amount of yen 11,994.49 was received from Mr. Bremer, which was a portion of an advance on transactions, and this was advanced to the agents at Kiryu and Kanazawa. The money so advanced was needed by the agents to open business with Messrs. Fraser, Farley & Co. Mr. Weale said that the silk department was to be closed and about the same time the witness asked him to transfer the business to him (Mr. Le Prevost). The intention was to re-transfer the business to Messrs. Fraser, Farley & Co.; consequently it was necessary to obtain the so-called advance money from that firm. In short it meant that the services of the agents had been sold to the latter firm for yen 11,994.49. No expenses were needed for establishing agents' offices because the offices were not specially built. The agents were using their own premises as offices and were acting on commission, and therefore the offices were not actual branch offices of the silk department. To some of the agents salaries were paid. As to the reason why yen 11,994.49 was obtained from Messrs. Fraser, Farley & Co. when the four agents were transferred to the firm, it would become intelligible if Mr. Bremer's books were examined. It was a mistake for Mr. Bremer to say in the 6th preliminary examination that the yen 11,924.49 was a balance on the business done. Messrs. Kahn and Kahn were customers of Messrs. Cornes & Co. before deponent entered their employment. For Kahn and Kahn 3 per cent commission was always charged by the silk department on the c.f. price arranged in the invoice. The business commission to Messrs. Mollison & Co. was not a rate on the c.f. price but only 1 per cent on the cost. On goods which Messrs. Cornes & Co. purchased in December, 1900, commission of 2 per cent. was incurred including the packing expenses and the inspection fee. The price of the goods was always according to the current quotation,

and fluctuations occurred every day so that the same goods were sold on February 31st, 1901, for yen 31.10 to the customer in Rangoon, later for yen 32.50 to Mr. Bremer and later still goods of the same quality were purchased for yen 28.50. The price of the goods purchased would be shown in the Stock Book which, however, some times did not express it clearly. With regard to the stock on June 30th, a list was made on August 30th. A detailed list of stock between June 30th and August 31st was not made, but the books would show it. A certain quantity of *mon-habutai* (figured *habutai*) was bought by him from Uyeno, who had mortgaged the goods to the Specie Bank, Ltd. A contract was made with Uyeno to purchase the figured silk. The accused knew that Uyeno made trouble over the transaction with Messrs. Fraser, Farley & Co. when accused and Mr. Yano, a lawyer, endeavoured to quell the dispute. He remembered that in March, 1901, he told Uyeno that he intended to start in business at No. 258. In December, 1901, in the name of Mr. Bremer, he held negotiations with the Specie Bank with which the goods of Uyeno were lodged in security. The merchandise was bought for his private account, also in the name of Mr. Bremer. At the same time an appropriate commission was paid to Mr. Bremer. In the end of July, 1901, the books of Okazawa and Sawada were examined in order to make a balance sheet and to investigate the business accounts. On and after June 30th, 1901, he investigated the accounts at his own house for various reasons of convenience, and especially because the lights of his private house were more clear than those of the silk department. The profit during the period from 1893 to 1899 was about 2 per cent. Besides a salary of yen 500 per month, about yen 3,000 was paid to accused by Messrs. Cornes & Co. in the end of 1900 as commission. The amount was about 5 per cent. of the profit on business done. There was no profit in 1899. The names of Sawada and Yoshikawa were used in business since 1901. The entries in the books with reference to the adopted names were commenced in November, 1900. In the goods Purchase Book and the Bank Cheque Book the names of Yoshikawa and Sawada were entered but not always in the ledger and other books.

The Court then rose at 12.30 p.m. for tiffin. At 2.15 p.m. the trial was reopened, when the proceedings were adjourned till this morning (13th) at 9 a.m., Counsel objecting that the Court interpreter was not competent to render the questions of the Judge and the answers of accused.

It was understood that a competent interpreter will be secured by Counsel before this morning. During the examination the Court interpreter and the accused spoke in low tones, so that their talk could not be understood even by the reporter who squatted just behind the interpreter. The accommodation provided for the press was of the scantiest description, and anything like an accurate or full report was out of the question. Counsel for the defence repeatedly requested that the interpreter should raise his voice, but with little effect. As an example of mistranslation we may give the following: The Judge: "What was your reason for obtaining yen 15,000 from the head office?"—Answer: I obtained the money through the Chinese cashier of Cornes & Co."

Mr. Sato Hakuai watched the trial on behalf of Messrs. Cornes & Co., and a Japanese shorthand writer was present under the instructions of Mr. de Becker. Mr. J. Twissell Wawn, of the British Consulate, had a seat on the bench up to noon.

THE ALLEGED SILK FRAUDS.

The trial of Messrs. A. Le Prevost and C. Bremer, and three Japanese, which was to have been resumed on the morning of July 13th in the Yokohama District Court was postponed *sine die* on the motion of counsel for the defence. The Court, however, did not explain the reason for the decision to postpone.

CLAIM AGAINST THE MINISTER FOR COMMUNICATIONS.

The case instituted in the Tokyo District Court by Mr. Joseki Makino against Viscount Yoshi-

kawa, Minister for Communications, claiming yen 220,000 on the ground that the authorities of the Department of Communication had illegally taken possession of a place at Shinagawa belonging to plaintiff, was settled on July 14th, out of Court, the Department paying yen 6,000. The *Asahi* states that the plaintiff died previous to the compromise.

YOKOHAMA ENGINE AND IRON WORKS.

The sixteenth yearly meeting of shareholders of the Yokohama Engine and Iron Works was held at the offices on Wednesday. Mr. Jas. Dodds occupied the chair and there were also present Messrs. B. Gillett, B. C. Howard, C. K. M. Martin, W. K. Tresize (Manager) J. W. Weaver (Foreman) and R. T. Bell (Secretary).

The notice calling the meeting having been read,

The CHAIRMAN said—I am sorry that through the indisposition of Mr. Johnstone, our Chairman, he is unable to be present at this meeting, and has asked me to take the chair in his stead. The report and accounts are now before you; they have already been circulated to all the shareholders and I will ask you to kindly take them as read. In presenting the report and balance sheet for the year ended 31st May last, the Directors hope that the share holders will regard them as shewing a fairly satisfactory result. From the accounts it will be observed that the gross earnings are in excess of the previous year, and that the various items of expenditure as a whole will bear favourable comparison with 1902, but unfortunately the item yen 8,269.00, loss on stern wheel steamer, having to be written off, reduces the amount to be carried forward to the next year to yen 9,247.55. The Company has well maintained its position notwithstanding the continued depreciation in shipping trade and business generally. During the past year the repairs of 290 steamers and sailing vessels have been dealt with, besides a large number of local orders and work for distant parts of this country, and notwithstanding the increased competition and the gradual upward tendency in workmen's wages and the prices of material, we have strictly adhered to our old tariff of charges, which we are confident will bear comparison with any other Far Eastern concern of a similar nature. The plant and machinery is and has been kept to a high standard of efficiency and new machinery added to meet the requirements of our ever changing varieties of work. Every care and attention has been paid to the important matter of stock-taking and the prices have been very carefully checked and verified. These are all the remarks it occurs to me to make on the accounts, and I now formally propose from the chair the adoption of the report and accounts.

Mr. MARTIN seconded the adoption of the reports and accounts.

The CHAIRMAN said of course the report and accounts were before the meeting, and the directors would be glad to reply to any questions that might asked before he finally put them to the vote.

No questions being asked, the report and accounts were adopted.

Messrs. J. Johnstone and J. Dodds, retiring directors, were on the motion of Mr. Martin, seconded by Mr. Tresize, unanimously re-elected.

The Auditors, Messrs. F. J. Hall and J. F. Cox Edwards were, on the motion of Mr. Martin, seconded by Mr. Weaver, re-elected auditors of the company.

This was all the business.

The CHAIRMAN announced that dividend warrants would be distributed on Thursday.

A vote of thanks to the Chairman, on the motion of Mr. B. C. Howard, brought the proceedings to a close.

An intruder was arrested on the night of July 12th in the compound of the Meiji Gakuin. On examination he confessed that his name was K. Takeishi (23) and that he had several times entered the dwelling of Rev. M. N. Wyckoff and of another gentleman in the vicinity since March this year and stolen jewelry and clothes.

ANNUAL MEETING OF THE A.D.C.

The annual general meeting of the Amateur Dramatic Club of Yokohama was held at No. 78, on Wednesday. Mr. J. P. Mollison, President of the Club, was Chairman, and there was a fair attendance of members.

The CHAIRMAN explained that the date of the meeting had been altered to July in order to enable the incoming committee to prepare for the beginning of the theatrical season. He then presented the report and accounts. Mr. Mollison explained that "The Chieftain" would probably have been played one time more but circumstances prevented. It had been proposed to give it again in July but that, it was felt, would be too hard on the performers. The proposal, however, to inaugurate the new season with it at the end of September would be considered, since it was believed that it would take again and draw houses which would bring in at least *yen* 400 or *yen* 500 to the credit of "The Chieftain" account.

Some discussion took place over the accounts, and at length on the suggestion of Mr. Beart the item under general account was amended to read "Property account *yen* 591.70; balance of 'Niobe' account, *yen* 100."

Mr. EDISON moved and Mr. Riddle seconded the passage of the amended accounts. Agreed to.

The Committee have the pleasure of submitting to the Members their report and statement of accounts for the season 1902-3.

The Club has given performances of three pieces during the season, the first being "Confusion," which was acted twice, followed by "Besty," also acted twice, and "The Chieftain," which was acted three times.

In connection with the production of musical pieces similar to "The Chieftain," the Committee consider it desirable to call the attention of the Members to the heavy cost involved and consequent liability incurred by the Committee in putting on such pieces, pointing to the necessity for an increased membership, or an appeal to the Community for a Guarantee Fund before attempting their production.

Although the general account shows a small Credit Balance, it will be noticed that there is a dependency owing to Mr. Mollison for scenery, and for the libretto, music, and acting rights of "A Runaway Girl."

Cordial thanks are due to the numerous ladies and gentlemen who so kindly assisted in the Club performances, and also to Mr. Hughes for auditing the accounts.

G. L. READ,
Hon Secretary.

Yokohama, July 13th, 1903.

"A Runaway Girl"	146.20
	367.83

Discussion afterwards took place as to the advisability of making an appeal to the public for a guarantee fund before entering upon such big undertakings as "The Chieftain."

Mr. BRADY stated that in Hongkong the Club never staged a big piece without a guarantee fund. In the case of "Robinson Crusoe," which cost \$6,000, before the rehearsal as much as \$5,000 had been guaranteed, Sir Thomas Jackson heading the list with \$500.

Mr. E. C. DAVIS thought the accounts should be circulated very freely and that the Club should let it be known that if the public wished to enjoy the privilege of seeing these pieces they should subscribe as members.

Mr. BEART thought with Mr. Davis that before any piece of the same magnitude was taken in hand again, some steps must be taken to guarantee the members of the Club against any possible loss, because pieces like "The Chieftain" could not possibly be put on without incurring debt. Steps must be taken either to increase the membership (now only about 31), or to call for a guarantee. He further warmly referred to the idea that appeared to have gone abroad, that the A.D.C. was a sort of "close borough," and said that in reality it was only too eager to include all the talent available.

Mr. DAVIS formally proposed that the incoming committee take steps to raise a guarantee fund before a piece of the above kind was again put on, to cover the cost of production, also to add as far as possible to the membership.

Mr. SOMERTON seconded and the proposal was agreed to.

On Mr. DAVIS' motion, seconded by Mr. N. G. Maitland, the retiring committee were unanimously re-elected, as follows: J. P. Mollison, Esq., President; E. Beart, Esq., Stage Manager; F. J. Hall, Esq., C. F. McWilliams, Esq., W. K. Vincent, Esq., Musical Director; G. G. Brady, Esq., Hon. Treasurer; G. L. Read, Esq., Hon. Secretary. This was all the business.

Sir Thomas Jackson, the well-known late Chief Manager of the Hongkong and Shanghai Banking Corporation, has joined the board of directors of the Imperial Bank of Persia.

SCHOOL FOR FOREIGN CHILDREN IN TOKYO.

All interested in the education of foreign children will be pleased to learn that there is now a definite prospect of a foreign school being again established in Tokyo. During the past year a school for a limited number of children has been conducted by two ladies at Myogadani, Koishikawa, the results of which have been such as to lead to larger plans for the ensuing year.

Several meetings have been held by a committee of ladies appointed to investigate the question of better school facilities for the foreign children in Tokyo and elsewhere in Japan. On July 1st another meeting was held by this Committee at which several others, gentlemen including Bishop Awdry, Prof. Swift, R. J. Kirby, Esq., Rev. H. H. Coates, &c.—were also present by request. At this meeting the plans of the Committee to start an intermediate department and a primary department, including a kinder garden, for children from 4 to 12 years of age, were formally approved. For the purpose of this department a teacher with a kindergarten training has been called from Canada.

It was also decided to organize an academic course, to prepare older children for entrance into college, making use of the ample talent already available on the field for the first year.

At the request of the Committee, H. E. Sir Claude MacDonald, H. E. Lloyd C. Griscom, the Rt. Rev. Bishop Awdry, the Rt. Rev. Bishop McKim, Prof. Swift, and R. J. Kirby, Esq., have consented to act as patrons of the school, assisted by an advisory committee composed of representatives of the respective missionary societies in Japan.

It is expected that the school will open in September, at the Young Men's Christian Association building, No. 3 Mitoshicho, Kanda, Tokyo, with an enrollment of 80 pupils in the primary and intermediate departments and possibly 10 to 20 in the academic course.

A prospectus of the school is now in preparation and will be furnished to any interested upon application to

The Methodist Publishing House, No. 3 Shichome, Ginza;

Mrs. H. H. Coates, No. 16 Tatsuokacho, Hongo;

R. S. Miller, Esq., United States Legation.

EUROPEAN NOTES.

A new magazine rifle has been invented by a mechanicien in the French Navy for which great merits are claimed. Although it is of very simple construction, it is expected to revolutionise the whole system of small arms throughout the French Army and Navy. It is said that the magazine is capable of carrying from 20 to 25 cartridges. As it is also a "repeating" rifle, it will, if adopted, still further complicate the question of the supply of ammunition in time of war.

At an auction sale recently held at the London Inn, Stamford, the clothes of Daniel Lambert, the famous eighteenth-century giant, were offered to the bidders, together with those of Tom Thumb, which were left at the hotel by the dwarf as a contrast. The articles have long been, after Burleigh House, the chief attraction of Stamford Town in the eyes of many Lincolnshire county people. Lambert, who weighed fifty-three stone, died at Stamford in June 1809. The sum of £75 was offered for the clothes, but the lot was withdrawn.

To those who denounce British "barbarity," the case is commended of the Zouave, Jean Didelin, who has just returned to France after an absence of thirty-two years. This man was taken prisoner by the Germans during the war with France, and in attempting to escape was so unfortunate as to strike a German sentry. For this infraction of the rules of war, says an exchange, the unhappy soldier has been kept in prison all these long years by the nation which was pleased to wax indignant over Britain's treatment of Boer prisoners of war.

Sir John Wolfe Barry, to the fore once again

in connexion with the opening of the new bridge at Kew, has built two other bridges across the Thames besides that just opened—the first being the railway bridge at Blackfriars, which was one of the earliest of his big achievements, and which he followed up later by that wonderful structure which takes its name from the Tower. The Barry Docks, near Cardiff, were also the creation of his brain, while it would be hard to enumerate all the big railway undertakings with which he has been connected at one time or another.

Mr. Grubbs, of the quarantine service in the Gulf of Mexico, has been studying whether mosquitoes carry the germs of yellow fever to a distance on vessels. Of 82 ships observed, only three had the fever-bearing mosquito on board. They came from Vera Cruz, Mexico, a haunt of the disease, and had been 17 days at sea, therefore ships might convey the infection from Mexico to American Gulf ports and the Antilles. It also appears that mosquitoes are able to come on board a ship when she is fifteen miles from the shore. This, however is probably a rare occurrence.

Spain is about, with the consent of all the monarchical parties, to make a great effort to bring her armaments into some sort of ratio with those of the leading Powers. Universal compulsory service is to replace the existence system of makeshifts, and the permanent peag footing of the army will be brought up to 300,000 men. A new fleet is to be built within four years. A foreign syndicate is providing the funds, in the form of a loan; and with a view to expedition foreign building yards will be freely used.

Richard W. Riedel, of Chicago, coxswain, of the battleship *Indiana*, and Edwin J. Hill, of Bellefonte, Penn., boatswain's mate of the same ship, are stated to have made the highest record for marksmanship with the 13in. rifle of any men in the world. Each of them hit a target 17ft. by 21ft. in size eight times running at a distance of 4,800ft., which is nearly a mile, while the *Indiana* was steaming at a speed of eight knots an hour. The holes in the target are clean cut, so that they could not have been accidental. The shots were fired at intervals of about three minutes.

The Medical Academy of Turin has just awarded its quinquennial prize of £800 to Prof. Sclavo, Professor of Hygiene at Sienna, for a method of treatment of malignant tumour in man, and of carbuncle in cattle. The treatment has stood the test of several years' practical working experience in Italy and Argentina. Altogether, about 300 cases of carbuncle have been treated, with a mortality result of five per cent., while the average mortality in such affections is from 25 to 35 per cent. Great things are hoped from the system in preventing the scourge which for years has desolated Italian stockyards.

Two interesting items of news connected with the application of wireless systems to ordinary field telegraphy come from Rome. The first is that the Italian Army headquarters staff has brought out a method by which Marconi's system can be applied to field telegraphs. The apparatus is easily portable, and has an efficient range of 60 miles. The other piece of news relates to the "tapping" question. While experimenting at Spezia, it was found that two foreign messages had been attracted into the receivers. They proved to be French naval messages passing between Calvi, in Corsica, and a French Mediterranean coast station.

The Paris papers record the death of the aged Monsignor Bauer, who was formerly father-confessor to the Empress Eugénie, and is known to have had a considerable influence over the unfortunate direction of her policy. He was a Jew by birth, and during the fourth decade of the last century he was a busy man upon the Paris Bourse. In 1855 he astounded his kinsfolk and fellow-financiers by turning Roman Catholic. He was no less successful as a Christian than he had been as Hebrew. He was ordained priest, taken up by Napoleon III., became the religious counsellor

of the Empress, and was made a Monsignor by Pope Pius IX. A few years ago the old priest added to the list of surprises which characterised his life by taking to himself a wife.

A considerable body of Belgian troops are this summer to make long route marches a part of their training, and experiments are to be made in the sustaining properties of sugar as diet, by the inclusion of 45 grammes per man per day in the rations. In this connection it is being half whimsically, half seriously, pointed out that the soldiers of the Napoleonic era took their sugar ration in the more acceptable form of alcohol in schnapps. Thus while the Prussian troops were quartered before Waterloo, the rations were: breakfast, bread, and schnapps; dinner, vegetable soup, ½lb. meat, 1lb. bread, and another schnapps; supper, soup, and a third schnapps. A pot of beer a day was also allowed. The men took to it better than to jam or candy.

The General Post Office, says a London paper, has issued the following notice:—

A small committee has been appointed to consider the best means of providing for the conveyance of the mails to and from the East and Australasia on the expiration of the existing contracts with the Peninsular and Oriental and Orient Steam Navigation Companies. It is constituted as follows:—Mr. Evelyn Cecil, M. P., Chairman; Mr. H. Buxton Forman, C. B., Assistant Secretary, Post Office; Sir John Anderson, K.C.M.G., Principal Clerk, Colonial Office; Mr. F. C. Holiday, Auditor of Home Accounts, India Office; Mr. S. J. Graff, C. B., Civil Assistant to the Director of Transport, Admiralty; Mr. W. E. Smith, Superintendent Construction Accounts, Admiralty; Sir L. W. P. Blomefield, Assistant Secretary for the Finance Department, Board of Trade, with Mr. A. G. Ferard, of the Secretary's Office, Post Office, as Secretary.

The Copenhagen correspondent of the London *Daily Telegraph* says that the hostile feeling towards Russia is increasing in Norway. The Press publishes violent articles against that country, coupled with strongly worded expostulations against the absolute Russification of Finland. The *Aftenbladet*, of Christiania, an important organ of the Conservative party, prints a sensational article, in the course of which it says that, according to the best sources of information, the Czar himself is entirely responsible for Russia's brutality to the Finnish nation. The paper asserts that the principal cause of the destruction of Finland's nationality lies in Russia's secret desire, entertained for some years past, to secure ice-free ports in Northern Norway, on the Atlantic Ocean. This is a question of great commercial and military interest to Russia, which would have there an excellent naval station, and an important point from which England could be attacked in time of war.

Captain Percy Scott, says the *Naval and Military Record*, among other distinguished officers, is to be made a Doctor of Common Law (honorary). Unfortunately there is no such degree as Doctor of Common Sense, otherwise it might with propriety be conferred on the captain of the *Excellent*. A perusal of *Brassey's Naval Annual* shows that the fleet is approximately up to the three-Power standard. We do not now intend to criticise the methods by which the conclusion is arrived at, but if we accept it without any salt it follows that any man who can double the gunnery efficiency of the fleet raises us to a six-Power standard without costing the country another penny. If Captain Scott succeeds in this enterprise—and there is little doubt that he will—he will not only show his strong commonsense, but he will place the British Navy in such a position of pre-eminence that we can command the peace of the world. Titles and degrees are so thick and plentiful just now that one more would make no material difference, so let us have a Doctor of Common Sense.

The whaling ship *Gjoa*, with Captain Amundsen's magnetic North Pole expedition on board, sailed on June 13th at midnight from Christiania. It has been announced that the Amundsen expedition will first go to King William-land, on the east coast of Greenland, and will

thence proceed for Behring strait. If Captain Amundsen is able to follow the course projected, it will take him almost across the pole. Captain Amundsen, who is a Norwegian, was the first officer of the *Belgica* in Gerlach's Antarctic expedition of 1897-99. After his return, Amundsen consulted with Professor Neumayer of Hamburg, the leading authority on terrestrial magnetism, who informed him that the expert determination of the earth's magnetic North Pole would be of the very greatest value to science. The fitting out of the expedition which has just left Christiania followed. The *Gjoa* is classed as one of the strongest and best vessels of the Arctic fleet. She can be handled by a crew of seven, is fitted with an auxiliary petroleum engine and is equipped for a four years' stay in the Arctic regions.

There seem, says a naval correspondent, to be good grounds for hope that the "smoke nuisance" in connection with the use of "oil-fuel" will in time be greatly abated, if not wholly eliminated. During some recent trials in the steam basin at Portsmouth, the 30-knot destroyer *Spiteful*, fitted with Reed boilers, which have been adapted for the burning of oil-fuel, succeeded in very greatly reducing the volume of smoke emitted from the funnels; in fact, at times no smoke at all could be seen, and unless one was near enough to hear the whirr of the engines, or the throb of the propellers, one would not have known that the vessel was steaming. The question as to how we are to obtain supplies of oil in time of war has not yet been tackled by any writer, so far as my reading goes. Yet it is one which should be solved before any large expenditure is incurred in providing the requisite fittings. As has been more than once pointed out in this column, we have no oil wells throughout the Empire, except in Borneo, and unless there are known to exist oil-bearing strata which will provide a plentiful supply at a reasonable cost, the trials which the Admiralty are conducting would seem to be somewhat premature.

CUSTOMS APPEALS.

Several decisions rendered by the Minister of Finance were published in the *Official Gazette* on July 11th.

The Minister of Finance gave decree on July 1st in the matter of an appeal filed by Messrs. A. Meier & Co. No. 24, Yokohama, against a Customs decision. The firm imported a quantity of cotton tape on which the Customs appraiser imposed *ad valorem* duty of 20 per cent. under No. 62-c of the Tariff. The importers appealed contending that the goods were not trimmings or such as were to be used on bonnets or on the clothing of infants, and that duty should be enforced at the *ad valorem* rate of 15 per cent. under No. 377 of the Tariff. The Minister sustained the appeal on the ground that the goods in dispute were only a kind of white ribbon and were not to be used for ornament.

The Minister gave decision on July 2nd in the matter of an appeal by Messrs. Oppenheimer Freres, No. 13, Yokohama, against a Customs decision. The firm imported five cases of woollen cloth on which the Customs authorities imposed duty at the rate of *sen* 093 per square yard under No. 337-A, of the Tariff, for the reason that the goods are a variety of worsted coating made of worsted yarns in warp and woof. The importers appealed insisting that the cloth was serge in nature and that the duty should be imposed under No. 335. The appeal was rejected on the ground that the goods belong to the class of worsted cloth with twisted worsted yarn in warp and woof.

On July 3rd, the Minister decided an appeal filed by Messrs. Bruhl Freres, No. 22, Yokohama, against the Customs. The firm imported a case of photographic apparatus and fastenings on which the Customs imposed duty at the *ad valorem* rate of 25 per cent. under No. 490 of the Tariff, on the ground that the goods were a kind of toy. The importers appealed contending that the articles were cameras for actual use, manufactured by the Oestmann Kodak Co. in the United States, and that the duty should be en-

forced at the *ad valorem* rate of 15 per cent. under No. 15 of the Tariff. The Minister sustained the appeal on the ground that the apparatus was made for real use.

The same day the Minister decided an appeal filed by Messrs. Holme, Ringer & Co., Nagasaki, against a decision given by the Nagasaki Customs. The firm reshipped on the steamer *Bocho Maru* for Korea two ropes to be used in whale fishing work, which had been brought by the steamer *China*, but were not landed. The Customs, however, imposed duty of yen 18.834 under No. 426 of the Tariff, on the ground that a permit for service in foreign seas had not been given to the steamer *Bocho Maru*, and that reshipment to that ship was import. The firm appealed contending that the ropes in dispute were to be used only by Russian whale fishers, but not in Japan, and that the duty should not be charged. The appeal was sustained on the ground that there is no law prohibiting the taking of foreign cargo on a ship to which no permit for service in foreign seas had been granted, and that on goods for reshipment duty could not be imposed. The duty which had been paid by the firm to the Customs was ordered to be refunded.

THE LATE MRS. RICHARD.

It was with very deep regret that the *North China Daily News* announced the death of Mrs. Mary Martin Richard, which took place in Shanghai on July 10, from cancer. Mrs. Richard came originally from Edinburgh, and had been one of the governesses in the Merchant Company's College Schools. She married Dr. Timothy Richard in 1878, and in all kinds of work no wife ever entered more fully into the plans of her husband, or helped him more efficiently than she did. They lived first at Taiyuanfu and the recollection of the good they did there still survives. She had a school of thirty famine orphans in the city, and superintended several other schools in the country. She visited the wives of the officials, telling them of the wonders of Christianity and of Western civilisation, and translated Christian biographies, of which she published ten small volumes in 1900. When in Peking, she taught English to sons of high mandarins, as well as to the son of the Japanese Minister, and two Japanese Legation Secretaries. In Tientsin she trained Bible women, some of whom afterwards became eminent leaders in the Christian Church. In Shanghai she taught English in the families of high mandarins, and took a leading part in getting the Christian women of China to present the Empress Dowager with a copy of the New Testament in 1894, herself writing the letter which accompanied the book. She was a lady of very high attainments and culture, and had a very extensive knowledge of the theory and practice of music. She was one of the Editors for some years of *Woman's Work in the Far East*, and edited some of the early numbers of the magazine, *The East of Asia*. Her amiable qualities had made her a very large circle of friends, foreign and Chinese, and it may be mentioned as a singular mark of their regard, that many influential and wealthy Chinese came at her residence to express their condolence. Her premature death at the age of 59, after a suffering borne with exemplary patience, a very bitter blow to her husband and her daughters, with whom the most genuine sympathy is felt.

NEWS OF THE WEEK.

A case of cholera was reported on July 11 at Tokushima.

Six cases of dysentery were reported on July 9th at Kotohira, Sanuki province.

The warship *Chokai* left Sasebo on the morning of July 12th for Vladivostok via Chefoo.

A correspondent writes to the *N.-C. Ly News*: "A final dividend was recently declared in Hongkong on the estate of a man who

adjudicated bankrupt on the 25th of November, 1848."

A case of cholera was reported on July 15th at Shimonoseki.

The Empress, who had been indisposed for some days past, has recovered her usual health.

A locomotive of the Sanyo Railway was derailed on July 14th while running near Fukukawa. No person was injured.

The chimney, about 90 feet in height, of the Glass Mill, Honjo, Tokyo, was blown down on July 9th by the gale. No person was injured.

In connexion with the text book affair, K. Kurabayashi, Chief of the Kita-katsushika District Office, Saitama, was arrested on the night of July 11th.

The Tokyo papers say that Sir C. MacDonald, British Minister in Tokyo, will probably proceed on July 16th to Nikko, where he will stay for about two months.

Mr. R. Kurosu, lawyer, was examined on July 11th in the Tokyo District Court, after which he was removed to the detention ward. The charge against him has not yet been reported.

S. Shimomura, a clerk of the tax office at the village of Tsukawa, Okayama prefecture, committed suicide on July 12th. The cause is not reported.

Marquis Ito proceeded on July 15th to the Palace of the Crown Prince to have audience. He was expected to leave Tokyo on the 16th for his villa at Oiso.

A woman named Kise Koyama, who had been under medical treatment for plague at the Manji Hospital, Yokohama, was reported recovered and discharged on July 15th.

The dead body of a man apparently about 25 years old was found on July 15th on the Koku Railway at a point near Oigikuko station. It seems to be a case of suicide.

A farmer named Ando (23) living at the village of Onsen, near Oiso, murdered his wife and child with a revolver and a large knife on July 11th. The murderer afterwards escaped.

An ex-priest, an Alsatian named Leon Martz, who has been in the native prison in Tientsin for four months charged with dacoity, says the *China Times*, has been released and deported to Japan.

The dead body of a man, apparently about 60 years of age, was found on July 10th in an unoccupied house at Shinjuku, Tokyo. Death is believed to have taken place from natural causes.

The preliminary examination of S. Matsuda and S. Watanabe, officials of the Department of Agriculture and Commerce, concluded on July 15th in the Tokyo District Court and they were committed for trial.

The N.Y.K.'s steamer *Niigata Maru*, which has been constructed at the Nagasaki Ship Building Yard, was chartered on July 7th by the Department of War. The ship will carry guns to Formosa from the Osaka Arsenal.

The Minister for Communications has, according to the *Official Gazette* of July 14th, notified that foreign press telegrams to Great Britain, France and Italy via Shanghai have been reduced to *sen* 95.2 from *yen* 1.158 per word. The rate is to come in force on July 15th.

The fireworks postponed from the evening of the Fourth of July on account of inclement weather, were displayed on Friday evening, the first occasion on which really fine weather promised. The exhibition was a great success though rain began to fall before the close.

In connexion with the text book affair, in the Tokyo District Court, on July 13th, an educational official was sentenced to a fine of *yen* 20 and ordered to pay costs *sen* 60. Another

official was sentenced to one and a half months' imprisonment with hard labour, and a fine of *yen* 7. The bribe, *yen* 500, which he had received, was ordered to be confiscated.

A man named S. Takagi (69) living at Asakusa, Tokyo, was on the morning of July 12th run over by a bicycle on which a youth called T. Tsukamoto (20) was riding through Nihonbashidori. Having sustained severe injuries on the head the old man died the same night.

In the evening of July 10th the members of the Nippon Economical Society held a meeting at the Bankers' Club, Tokyo, when Mr. Harada, vice-President of the Mitsui Bishi Mining Department, made a speech on gold mining conditions in Southern Africa to which he recently paid a visit.

The French residents celebrated the 14th of July, on Tuesday by closing their places of business and by making ceremonious calls at the Consulate, where M. Tronquois, Vice-Consul, and M. La Roche did the honours of the day. The *Chateau Renault* and other warships in port dressed ship and fired salutes at noon.

The local Manager of the Hongkong and Shanghai Banking Corporation has received the following telegram from his Head Office in Hongkong, viz: "Subject to audit Bank Dividend for half year will probably be 30s.; added to Reserve \$500,000; Carried forward to next half year \$1,425,000; written off Property Account \$200,000."

A case of plague appeared on July 11th at the village of Awoshima, Shida district, Shizuoka prefecture. The patient, who died the same day, was a man named K. Ota (22) living at Honcho, Yokohama, who arrived at the village on July 7th to pay a visit to his parents. Since then he had been complaining of fever.

The trolley line to Larchmont and Rye, N.Y., has posted this order: "The last three seats and rear platforms are reserved for smokers. Do not reserve it for your lady friend. Let her be seated with the rest of the crowd. It may have a tendency to decrease the number of complaints received at the office lately."

Mr. Yarrow, head of the great British ship-building firm, recently stated his opinion before the Institute of Naval Architects, that submarines have very little, if any, value, either as weapons of defence or offence, and that the large amount of money which the United States, England and France are now putting into this type is being practically wasted. The torpedo boat can do everything the submarine can, and do it much better and more cheaply, was his contention.

A case of suspected plague appeared on July 12th at the village of Awashima, Shida district, Shizuoka Prefecture. The victim is a boy named Shuichi (12). Another of the same family, died on the previous day from the disease while paying a visit to his parents, coming up from Yokohama. The prefectural authorities on the 13th burned the dwelling and all the furniture.

Among those to whom scholarships were awarded on June 12 by Yale University was Henry H. Gurnsey, former Republican alderman of New York, who is a member of the middle class in the divinity department. He got a Fogg scholarship. Another scholarship went to William J. Hail of Wakayama, Japan. Frederick E. Pierce, '04, of South Britain, Conn., secured the Waterman scholarship.

Mr. T. Asakura, lawyer, Tokyo, who was connected with the text book affair, was sentenced on July 15th in the Tokyo District Court to one month's imprisonment with hard labour. The charge against him was stated by the *iji* to be that he embezzled *yen* 300 which the Kokuko-sha, text book publishers, had entrusted to him to hand to Mr. Awoki, Secretary of Kyoto.

After a conference with President Roosevelt on June 17, Secretary Moody announced the follow-

ing U.S. Naval appointments, all of the appointees being from New York Captain Charles W. Rae, to be chief of the Bureau of Steam Engineering, upon the retirement of Rear-Admiral George W. Melville, in August next. Lieutenant-Colonel George F. Elliott, to be commandant of the Marine Corps, when Major-General Charles Heywood retires next fall. Pay Director Henry T. B. Harris, to be paymaster-general, upon the retirement of Rear-Admiral A. S. Kenny in June.

The shareholders of the 100th Bank at a general meeting on July 12th decided that yen 8,500 should be allowed to employees as rewards, yen 10,000 be added to the reserve fund, yen 75,000 be paid to shareholders as a half yearly dividend at the rate of 15 per cent. (30 per cent. per annum) and yen 32,249.78 be carried to the next account. At the same time, the shareholders decided to add yen 100,000 to the present capital.

The Minister for Communications notifies that postage rates on letters, post-cards, printed matter, and mercantile samples for any place in China and Korea have been changed. The rates are now the same as the domestic tariff. The new postal rates will be enforced from July 18th. A special clause is added to the notification that special postage will be charged on delivery of postal matter addressed to a place in China where no post office is situated, or may be charged on delivery of the postal matters, except letters and post-cards, addressed to a place in China where a post office is established but where no convenience exists for transportation by railway or steamship.

The heavy rain since July 13th seems to have been most violent in western localities. A landslide occurred on the 14th on a hill at the village of Yamada, Hiroshima Prefecture, with the result that over ten houses were destroyed and several persons were injured. At Nagasaki, all the canals and rivers have been inundated since the night of the 13th. Over a hundred houses were flooded and over 90 junks were wrecked or capsized. The bank of the Sakai river was broken down on the 14th and a part of Kure was flooded, including about a thousand houses. Two persons were drowned and about twenty others are missing. The Wakayama city councillors have decided to defray yen 181,282.81 for the purpose of repairing the damage.

Decision was rendered in the Patent Bureau on July 2nd, states the *Official Gazette*, as to an appeal by the China and Japan Trading Co. The letter applied to the Bureau for registration of a trade mark which included an eagle in the design, but it was rejected on the ground that the mark resembles the registered trade mark, No. 5,703, of another person. The firm appealed against such rejection, contending that the eagle on one trade mark was perched on a rock folding its wings, but that of the other was depicted as about to start from earth and spreading its wings, and that there could not be any confusion in business between the two marks. The appeal was rejected under the provisions of the 4th Clause, Art. II. of the Trade-Marks Law.

We acknowledge receipt of a copy of the "Barrows Lectures" 1902-1903, collected in book form, and issued by the Methodist Publishing House, Tokyo. The Barrows Lectureship, it may be recalled, was founded in 1894 by Mrs. Caroline Haskell in connexion with the University of Chicago, and it is associated with the name of Rev. Dr. J. H. Barrows. The present course consists of six lectures delivered in India, Ceylon and Japan by Rev. Dr. C. Cuthbert Hall, dealing with "The Nature of Religion" in the first, and so through the others to the sixth which gives "Reasons for Regarding Christianity as the Absolute Religion." Dr. Hall's language is easy and graceful, and the lectures are quite popular in character; and as, moreover, the printing has been most creditably performed, this book ought to have many purchasers. It is sold at sen 40, postage sen 6.

TRADE OF JAPAN.

Summary of the foreign trade of Japan for June, and comparison with corresponding month of the previous year:

A MOGUL PRINCESS.

Reviewing "The History of Humayun," by Gul-badan Begam (Princess Rose-body), the *Spectator* says: These Memoirs are by Babar's daughter, and those who know the fascination of the father's autobiography will understand the interest with which we opened the reminiscences of the daughter. If Babar can let us into the very heart of his life and career, as he does in his famous book, which most readers who appreciate good literature know through Erskine and Leyden's translation, what may not be expected from the Memoirs of his talented daughter, who not only witnessed the amazing ups and downs of Mogul power in India, but can tell us, what no man could or would, the secrets of the harem, and show us a woman's view of the times? The prospect was alluring, and we may say at once that the "Princess Rosebody" (there is surely no need for the bald literariness of translating Gul-badan as "Rose-body") does not altogether disappoint us, though, being a woman of the East, writing for men and women of India, she does not enlighten us on a thousand things which a Western would like to know, but, which every Oriental understands by instinct. Why these Memoirs have escaped notice so long it is difficult to say. It seems strange that only one copy should be known to exist, in spite of a most careful search for duplicates; and it is odd that this unique manuscript should have lain more than thirty years in the Hamilton Collection at the British Museum before any one thought of printing or translating it. The delay, however, has been fortunate for the Begam, since she has at last fallen into the hands of an editor, not only competent and learned, but also gifted with the insight and sympathy of her own sex. Mrs. Beveridge has performed a critical task with remarkable skill. To edit a text from a single MS. is always difficult; and when the text abounds not only in technical terms for women's articles of dress, but in what Rosen and others call modern colloquial forms, supposed to be unknown in Indian literary Persian, but which our Princess uses with the utmost freedom, it is not always easy to translate them, as the dictionary is often at fault. Mrs. Beveridge would be the last to claim that she is always right, and her occasional marks of interrogation show how doubtful she feels some of her renderings to be; but, on the whole, the translation is singularly close and accurate, and we feel we may trust the accomplished editor alike in her Persian and her history. The slightly sentimental tone of the comments is not inappropriate in a woman editing another woman's memoirs; and personally we do not dislike the frequent Scottisms, such as "this will be" so-and-so, which have, however, no equivalents in the original Persian.

The value of the work is greatly enhanced by a full historical introduction of nearly eighty pages, and by an elaborate biographical appendix, in which all the women mentioned in the text are as far as possible identified and as much of their history given as can be extracted from the Persian chronicles. The volume is also enriched with photographic reproductions not only of a page of the MS., which may quite possibly be in Gul-badan's own hand, and also an autograph note of her great-grand-nephew, the Emperor Shah-Jahan, but with eight pictures from the choicest volume in the library with which Khuda Baksh Khan Bahadur has munificently endowed Patna; it was illustrated in the time of Shah-Jahan himself and by his order, at a cost of Rs. 8,000, and the portraits of Timur, Humayun, Shir Shah, and Akbar are very striking, whilst the pictures of scenes in Mogul history are delightful. Here we see the famous incident of Babar devoting his life for his sick son, who lies on a bed on a high

estrade attended by a venerable leech, while dusky attendants in elaborate costumes try to administer medicine or food with a spoon. In another picture we have scenes following the birth of Akbar; his mother on her couch, fanned by her damsels, and the nurse holding the baby; a portly eunuch giving the news to a bench of astrologers, that the horoscope may be drawn; and the joyful father receiving the tidings seated on his throne surrounded by his nobles. Another picture shows a nautch given in honour of Akbar's birth. They are all admirable examples of the finest period of Mogul miniature painting, and we only wish they could be reproduced in colours. The elaboration of the work rewards the most minute examination.

Mrs. Beveridge has done her part to admiration. It remains to see what the Princess has to say for herself. Much is at second hand, and though even this has its value, since it comes from eye-witnesses, or at least from the inner circle of the Court, it lacks the vividness of personal recollections. Unluckily, Princess Gul-badan was only seven years old when her famous father died in 1530, and Babar was absent upon his expeditions for some years before that, so that her memories of this fascinating personage are necessarily few and fragmentary. She was with him, however, for the last year of his life. After his conquest of Hindustan he sent for his family from Kabul, and the little Rosebody came too. Babar's wife, Maham, pressed on post-haste to Agra by night, and was met by her husband four miles out; he was too impatient to wait for a horse, and hurried to her on foot. Gul-badan followed next morning after a characteristic Oriental scene:—

"My royal father's Khalifa, with his wife Sultanam, came as far as Naugram to meet us. My mamas had made me alight at the Little Garden, and having spread a small carpet, seated me on it. They instructed me to rise when Khalifa came in, and to embrace him. When he came in, I embraced him. Then his wife Sultanam came in too. I, not knowing, wished to get up, but Khalifa raised objections, and said, 'She is your old serving-woman. There is no need to rise for her. Your father exalted this old servant by giving such an order.' From Khalifa I accepted 6,000 shahrkhis (money) and five horses, and Sultanam gave me 3,000 and three horses. Then she said, 'A hasty meal is ready. If you will eat you will honour your servants.' I consented. There was a raised platform in a pleasant spot, and a pavilion of red cloth with lining of Gajrai brocade, and six canopies of cloth and brocade, each of a different colour, and a square enclosure of cloth with painted poles. I sat in Khalifa's quarters. The meal drew out to almost fifty [sic] roast sheep, and bread and sherbet and much fruit. Having at length eaten my breakfast, I got into my litter and went and paid my duty to my royal father. I fell at his feet; he asked me many questions, and took me for a time in his arms, and then this insignificant person felt such happiness that greater could not be imagined."

Gul-badan gives a touching account of Babar's last moments, and of that curious ceremony of self-sacrifice by which he gave his life for his son Humayun, and all she writes of her father confirms one's previous impression of his extraordinary charm. No wonder that on his death she writes: "Black fell the day for children and kinsfolk and all. They bewailed and lamented; voices were uplifted in weeping; there was utter dejection. Each passed that ill-fated day in a hidden corner."

Most of the Memoirs, which appear to have been written about 1587, at the request of her nephew, the Emperor Akbar, refer to the troubled times of Humayun, and give a vivid picture of the hesitations of that amiable but feckless Prince, largely from personal experience. The story of the picnic on pp. 188-91, when the ladies went to see "how the river was coming up," and kept Humayun waiting while they were putting on their fal-lals, till he got exceedingly cross and made them all write him abject apologies, is a real picture in words. On another occasion one of his wives, Bega, complain of some neglect, and Humayun was vexed, as usual,—he did not like criticism:—

"I am an opium eater," he said; "if there should be delay in my comings and goings, do not be angry with me. Rather, write me a letter, and say, 'Whether it please you to come or whether it please you not to come, we are content and are thankful to you.'" Gul-badan Begam wrote to this effect at once, and he settled it with her. Bega Begam insisted a little, saying "The excuse is worse than the fault." . . . She wrote a letter and gave it to him, and he made it up with her also."

The chief interest of the Memoirs is that they let us into the inner home life of the Mogul Emperors as no book except Babar's own Memoirs ever has done; even Babar, like a true Eastern, is reticent about his women. Princess Gul-badan shows us the harem side of the life of the time, and, as Mrs. Beveridge observes, she "lets us see a group of living and feeling men and women," not merely historical

persons with dates. Incidentally we learn much of women's ways in India in the sixteenth century. It is clear that the Turkish ladies were then far less secluded than now, and it is also evident that they had a high standard of virtue. There is a fine story of Haram Begam's treatment of the scandalous overtures of Kamran (p. 193), which recalls the well-known tale of Babar's grandmother, Isan-daulat, and the general impression our Princess gives is one of strong family affection. Gul-badan writes lovingly of her father's wives, of "my lady" and "dearest lady," and one can see that these women were as sweet as they were chaste.

THE JAPANESE SQUADRON AT MELBOURNE.

The arrival of the Japanese squadron in Melbourne has created a brisk social week; indeed, quite the most festive we have had for some time, says a late number of the *Australasian*. By invitation of the Lord Mayor and Lady Gillott a largely attended reception was held at the Town-hall on Monday, May 18th, to meet His Excellency Rear-Admiral Kamimura and the officers of the squadron.

Over a thousand guests were entertained. The Town-hall looked quite lovely. The decorations were emblematic of the flora of Japan. Maples and bamboos appeared as if growing amid each other on the platform, the arrangement rising to a great height as it reached the organ, where lofty palms completed it. In the centre of the massing were chrysanthemums of every hue, set out with dwarf maples, brilliant with autumn tints. When the Admiral entered the room with his officers the flowers blazed with lights, and the word "Welcome" was lit up in their midst.

The colouring of the "sun of splendour" seen on the Japanese national flag was prominent in the drapery that enfamed ingeniously placed mirrors; also in the series of draperies that were festooned beneath the balcony. From six points of the balcony to the centre of the roof were strung ropes of evergreens, profusely lit with electric light, the globes being in the tones of the Japanese sun colouring. Many of the guests wore the chrysanthemum, or carried bouquets of it, their so doing completing a charming scheme in decoration.

The Lord Mayor and the Japanese Consul (Sir Malcolm McEachern) received the Admiral. He entered the hall with Sir Samuel Gillott, a long procession of his officers following, many keeping time to the march from "Tannhauser," played by Herr Benno Scherck's large orchestra. One and all then shook hands with the Lady Mayoress, who was on the dais. Their form of greeting was very quaint. They first bowed low, and then took her hand and raised it very high, the sudden quick lift upwards looking very curious. This procedure was followed all the evening, for introductions were plentiful.

Another procession (for that now seems the way for prominent people to arrive at civic functions) was that of His Excellency the State Governor and Lady Clarke. The aldermen, in pairs, led the way, Sir George and Lady Clarke following with the Lord Mayor.

Lady Clarke's elegant dress was of silver grey satin, the bodice having a drapery of rare white lace, and sleeves with long full frills of silver-grey chiffon. At the waist was a belt of silver embroidery. Lady Gillott, Lady Clarke, and Lady Madden carried bouquets of azaleas and roses, mingled with Japanese maples. The bouquets of the two latter ladies were presentations from the Mayoress, who wore rich ivory satin, with soft embellishments of black and white tulle, mingled one with the other. She also had on a single stone diamond necklace, and many stars and brooches of the same on the front of her bodice.

All naval and military officers, consuls, and other official personages were in full-dress uniform, the Austria-Hungary consular dress (white cloth trousers with broad gold stripe, and scarlet coat, braided with gold) of Mr. Carl Pinschot being a striking one among the consular uniforms.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

LOUBET'S VISIT.

London, July 9.

There is a general consensus of opinion that President Loubet's visit is proving an unqualified success both socially and politically.

The German Press affects indifference. M. Loubet has placed a wreath on Queen Victoria's tomb, and has witnessed a review

at Aldershot. This afternoon M. Delcassé, the French Minister for Foreign Affairs, had a prolonged conversation with Lord Lansdowne, British Secretary of State for Foreign Affairs.

BULGARIA'S MILITARY PREPARATIONS.

Owing to the urgent representations of Austria and Russia, Prince Ferdinand has given the strongest assurances that Bulgaria will not proceed further with her military preparations.

NATAL AND CHINESE.

July 10.

The Natal Legislative Council has rejected a motion condemning the importation of Chinese.

LOUBET IN LONDON.

President Loubet dined with Lord Lansdowne, and afterwards attended a state ball at Buckingham Palace, the first since the King's accession. There were 2,000 guests.

THE POPE.

The Pope really appears to be rallying. He conferred for a long time yesterday with Cardinal Rampolla, dealing with important affairs in a perfectly lucid manner.

LOUBET'S DEPARTURE.

President Loubet has left England.

AMERICAN SQUADRON AT PORTSMOUTH.

The American squadron which lately visited Kiel is now making a long stay at Portsmouth, where officers and men are greatly feted.

AMERICAN OFFICERS FÊTED.

London, July 11.

Officers of the American squadron now at Portsmouth attended the State Ball in Buckingham Palace. The King entertained them at dinner last night in Buckingham Palace, the Prince of Wales and most of the Cabinet Ministers being present. They were entertained at luncheon yesterday by the Pilgrim Club, and Lord Charles Beresford, who presided, predicted that if President Roosevelt came to England he would have a reception such as had never before been given to the Chief of a State.

TURKEY AND BULGARIA.

Later.

The Bulgarian bands in Macedonia, re-organizing under officers sent from Sofia, are large and are concentrating in the hills. The Turks are also concentrating. Hostilities appear to be imminent.

KING EDWARD AND PRESIDENT ROOSEVELT.

At the banquet given to the American officers, King Edward toasted President Roosevelt, for whom he expressed the highest admiration. He emphasized this by writing on a telegraph form while at table a felicitous message to the President. The King also made an emphatic declaration in favour of closer relations between Great Britain and America.

Mr. Choate, U.S. Ambassador to Great Britain, responded, ardently reciprocating.

EUROPEAN PRESS ON LOUBET'S VISIT.

July 12.

The German and Austrian press are beginning to appreciate the significance of President Loubet's visit. The Russian press regard the visits of King Edward and President Loubet as not mere acts of courtesy, though there can be no question of a formal alliance.

TURKEY AND BULGARIA.

It is declared in Sofia that Turko-Bulgarian relations are greatly relieved owing to the formal assurances of Russia that she will never permit Turkey to attack Bulgaria.

THE POPE.

London, July 13.

The doctors say that the Pope has overcome a critical period of his illness and that he may last for days, even for weeks.

TURKEY AND BULGARIA.

In a semi-official announcement the Government of Sofia gladly notes the declaration of the Powers that Turkey's plans are not aggressive, also that the Powers may intervene to secure the withdrawal of the Turkish re-inforcements from the frontier. The Government is especially gratified by Turkey's promises of better treatment of the Bulgarians in Macedonia. The Government has consequently revoked its counter measures, especially the calling out of the reserves.

SOMALILAND.

London, July 14.

The *Daily Telegraph's* correspondent at Aden says that the Somaliland force is moving towards the coast, leaving small garrisons at Damot and Bohotle. It is believed that there will be no advance till February.

FRANCE AND ENGLAND.

In conversation with some friends, M. Delcassé, the French Minister for Foreign Affairs, said that he had proof of the British Government's loyal uprightness, and that he had received a profound and consolatory impression that the journey (of M. Loubet and himself) to London had served the cause of peace and of mankind.

THE U.S. SQUADRON IN ENGLAND.

Later.

The Prince of Wales has inspected the United States squadron at Portsmouth. The Channel Fleet also assembled and exchanged salutes. The reception of the Americans in Great Britain has aroused the most cordial manifestations in the United States.

THE ANGLO-FRENCH FRIENDSHIP.

London, July 15.

The national fete celebrations in France occasioned numerous cordial demonstrations in favour of Great Britain. Also at a banquet in Sydney, Governor Sir H. Rawson toasted the Anglo-French rapprochement, and the toast was received with enthusiasm.

THE FISCAL ISSUE IN GREAT BRITAIN.

[DELAYED IN TRANSMISSION.]

London, July 15.

At a meeting of Unionist Free-traders, held under the presidency of Sir Michael Hicks-Beach, M.P., it was unanimously decided to take steps to obtain a full debate in the House of Commons upon Mr. Chamberlain's proposals before the end of the session.

Correspondence of Great Britain with Germany and Belgium, arising out of Canada's preference tariff with the mother country, shows that if the other colonies, notably South Africa, give preference to Great Britain, then Germany proposes to impose a higher tariff on all British imports.

DUBLIN AND THE KING.

The Corporation of Dublin, after four hours' stormy proceedings, decided by a vote of 40 to 37 not to present an Address to the King.

THE CZAR AND SCOTS GREYS.

London, July 16.

The Emperor of Russia has given £500 to the South African Memorial which is to be erected at Edinburgh to the Scots Greys, of which regiment he is Colonel.

THE MOAT FARM MURDER.

Dougal, the Moat Farm murderer, has been executed. He confessed his guilt on the scaffold.

THE POPE.

The Pope is slowly sinking.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE PRESIDENT.

Saigon, July 10.

M. Loubet has arrived at Calais. He was present on the preceding day at a review at Aldershot, dined with Lord Lansdowne and was afterwards present at a ball in the Palace. The President was everywhere cheered by the crowd. The adieux at the station were very amicable.

THE POPE.

The state of the Pope is unchanged.

PRESIDENT LOUBET.

Saigon, July 11.

President Loubet has returned to Paris, where he was cheered. King Edward has telegraphed to him that he ardently desires the rapprochement between the two countries to be durable.

ANOTHER OPERATION ON THE POPE.

The Pope has undergone another operation.

LOUBET'S VISIT TO ENGLAND.

Saigon, July 12.

At a Council of Ministers held at the Elysées, Mr. Delcassé confirmed the warmth of the welcome given to President Loubet in England.

KING OF ITALY AND THE POPE.

The journey of the King of Italy to France has been postponed in consequence of the Pope's illness. The date of the journey will depend on the Pope's condition, the gravity of which increases.

THE POPE SLIGHTLY IMPROVED.

Saigon, July 13.

The Pope's condition is stationary; perhaps somewhat improved.

THE CZAR TO VISIT ENGLAND.

Saigon, July 15.

It is affirmed that the Emperor of Russia will soon visit King Edward. This visit, following so soon upon that of M. Loubet, is regarded as significant.

GREAT HEAT IN NEW YORK.

There have been 200 deaths from the excessive heat in New York since Thursday last.

PRESIDENT LOUBET.

President Loubet has held a review at Longchamps, where he was greatly cheered.

THE POPE.

The Pope, whose state is becoming worse, has partially lost consciousness.

THE NATIONAL FETE.

Saigon, July 16.

The National Fete was brilliantly celebrated in Paris in the provinces and abroad, without particular incidents.

THE KING OF ITALY'S VISIT.

The journey of His Majesty the King of Italy to Paris has been adjourned to the end of October or the beginning of November.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)
**BARON KODAMA APPOINTED
 HOME MINISTER.**

Tokyo, July 15.
 Baron Kodama has been appointed Minister of State for Home Affairs, *vice* Baron Utsumi, whose resignation is accepted on the ground of ill-health. Baron Kodama retains the position of Governor-General of Formosa.

CEREAL PROSPECTS.

Newchwang, July 15.
 The Japanese Consul at Newchwang telegraphs that the export of cereals from that port has been temporarily suspended, the suspension to take place from the 22nd instant. The order in that sense, issued by the Russian head of the civil administration, is in response to a request from the people, who are alarmed at the rapid rise in the price of cereals.

Chinnampo, July 15.

The Japanese Consul at Chinnampo telegraphs that, the weather being favourable, a good rice crop is expected, and that the prospect for other cereals is excellent.

A telegram from a branch consulate of Japan in Pyongyang reports a good harvest outlook if no change occurs.

Japanese Consulate at Chemulpo,
 July 14.

Owing to scarcity of rains part of the rice seedlings have not been planted out. Rain is needed on account of the rice and the bean crops. Barley is below the average. The price of rice has risen through apprehensions of drought.

Japanese Branch-Consulate at Songjin,
 July 14.

The weather being favourable the growth of the crops is good. Barley alone is only a fifty-per-cent. crop.

Japanese Consulate at Yuensan,
 July 14.

The barley crop is bad, but owing to favourable weather lately rice and other cereals promise well.

Branch-Consulate at Kungsan, July 14.

Good crop prospects. If rain falls during the next 10 days there will be nothing to complain of. Barley, however, is only a half crop.

Japanese Consulate at Mokpo, July 15.

The barley crop is only 30 or 40 per cent. of the average. The planting out of the rice is not yet completely finished. Rain is generally needed.

(FROM THE "JIJI SHIMPO.")

THE POPE.

London, July 8.
 A pleural operation was yesterday performed on the Pope who bore up well under the treatment. It increased the weakness, however. His condition is now hopeful.

PRESIDENT LOUBET.

President Loubet was to-day present at a military review at Aldershot. This evening he is to be entertained at Buckingham Palace.

THE MANCHURIAN AFFAIR.

A rumour floating with regard to the matter(?) of the various legations of the Powers at Peking is alleged to be a Russian intrigue to divert the attention of the European Powers from Manchuria.

[It is impossible to understand the meaning of this telegram clearly. It may be that a rumour of rioters having intended to attack the legation at Peking has been received in London.—*Ed. Jiji.*]

PRESIDENT LOUBET.

London, July 9.
 The visit of President Loubet to Great Britain is concluded. The King escorted him to the railway station, where cordial farewells were exchanged. The warships at Dover and the forts on the coast fired salutes on the departure of the National guest.

President Loubet despatched a most friendly telegram to the King and the people before embarking on board his ship.

The French press express strong satisfaction.

THE POPE.

The condition of the Pope has been growing better. OPERATION ON THE POPE.

A second operation was performed last night on the Pope. It was satisfactorily accomplished.

THE U.S. SQUADRON.

The U.S. Squadron is on a visit to Portsmouth, where the officers were entertained at noon yesterday. Lord Charles Beresford presided.

THE JEW MASSACRES.

Unless Russia deals satisfactorily with the Kishineff Massacre affair, as to which Americans presented a petition in behalf of the Jews, the United States, President Roosevelt has decided, will oppose Russia as to the Manchurian affair.

M. DELCASSE.

London, July 13.
 M. Delcassé, French Minister for Foreign Affairs, has declared that the reception of President Loubet in London tends to the satisfactory maintenance of friendship between the two countries.

THE U.S. AND RUSSIA.

According to statements by Mr. Carbalkins(?) at Newchwang, the antagonism of the United States has awakened the indignation of Russia.

GREAT BRITAIN AND THE U.S.

The King of Great Britain and President Roosevelt have exchanged most friendly telegrams with reference to the visit of the U. S. squadron to Portsmouth. The welcome to the squadron continues.

W. E. HENLEY.

Mr. William Ernest Henley is dead.

(FROM THE "ASAHI SHIMBUN.")

GREAT BRITAIN AND FRANCE.

London, July 11.
 The farewell telegram which President Loubet despatched at Dover to the King declared that France is a friend of Great Britain, and that the principal purpose of his visit was to familiarize that fact to both peoples; an intention which was accomplished.

THE POPE.

Berlin, July 15.
 The Pope has become insensible. The end is at hand.

A BASELESS STATEMENT.

The statement of the *Standard* with reference to the information that M. Lessar, Russian Minister, has requested Russian residents in Korea to withdraw is baseless.

(FROM THE "DEUTSCHE JAPAN-POST.")

THE RUMOURS OF WAR.

Berlin, July 13.
 In spite of the rumours of war circulated by the English press, the Russian paper *Novoye Vremya* has information from Japan, saying that in respect to the good relations entertained by Japan with all Powers the building of new men-of-war will not take place, also the increase of the land tax will be left undone.

THE POPE WORSE.

The state of the Pope's health has grown worse.

THE POPE.

Berlin, July 16.
 The Pope's condition is as before. Germany will not intermeddle in the election of a new Pope.

HAITI.

In Haiti martial law has been proclaimed.

THE CZAR.

The Russian Emperor is going to Copenhagen and later will go to Darmstadt.

THE SILVER QUESTION.

The Mexican-American Committee is negotiating in London, Amsterdam and Berlin about the silver question and the Mexican standard.

(FROM THE "N. C. DAILY NEWS.")

PRESIDENT LOUBET'S VISIT TO LONDON.

London, July 6.
 All the papers publish the most cordial articles in reference to the visit of President Loubet, and express the unanimous opinion that the visit will consummate what King Edward's journey to Paris commenced, completing a *rapprochement* which must henceforth be regarded as one of the accomplished governing facts in the European situation.

FRANCE AND ENGLAND.

London, July 7.
 At the banquet at Buckingham Palace, the King, toasting President Loubet, said that the reception by all classes of the population showed their really

friendly sentiments towards France, which is the nearest country to England, and ought consequently to be our best neighbour.

President Loubet replied that he was certain that the King's visit to Paris would have the happiest effects, and serve to tighten the relations of the two nations, which was a guarantee for the peace of the world.

The newspapers dwell on the spontaneity and warmth of yesterday's demonstrations as a proof of the real interest in France and the French which has never died out in Great Britain.

THE UNIONIST PRESS ON THE NEW ENTENTE.

London, July 7.
 The *Daily Telegraph* says that it is no secret that M. Delcassé has come to London with the hope of settling the few outstanding difficulties between the two countries.

The *Standard* says that M. Delcassé and Lords Salisbury and Lansdowne have brought France and England as close together politically, as is possible without a formal alliance.

THE FUGITIVE FINANCIER'S RETURN.

London via Bombay, July 8.
 Mr. Whitaker Wright has formally waived his right of further examination in the extradition proceedings against him at New York. He sails for England on the 29th instant to stand his trial.

The ex-financier declares that he hastens home to prove his innocence.

THE PASSING OF THE POPE.

H. H. the Pope underwent a slight operation, consisting of a puncture of the pleura, yesterday, with the object of removing the oppression of his breathing. The operation will probably prolong His Holiness's life for some hours.

LOUBET ENTERTAINING THE KING.

President Loubet has entertained the King at dinner at the French Embassy. There were no formal toasts proposed.

A gala performance at the Opera afterwards was a scene of unrivalled splendour.

NO MORE CHEAP SUGAR IN ENGLAND.

London, July 9.
 At a conference at Brussels of sugar manufacturers, Russia, Austria, Hungary, Germany, France, Belgium, and Holland have resolved to restrict the export to Great Britain, with the object of maintaining the price in Europe, and raising English prices by one to two francs.

GREECE FERMENTING.

There have been serious disturbance in Greece, notably at Pyrgos, owing to the non-ratification of the proposed Currant monopoly.

The Premier, Mr. Theototis, has resigned, and Mr. Ralli is forming a Cabinet.

[Pyrgos is on the west coast of Morea, opposite Zante. Currants are the principal export from Greece, the value sent every year to the United Kingdom alone being over £1,000,000 sterling.]

THE FATHERLAND FIRST.

London, July 10.
 The Berlin Rowing Club has won the Silver Goblets at Henley, the first time the race has been won by foreigners.

LOUBET'S FAREWELL.

President Loubet's farewell telegram to the King from Dover, which speaks of France as the friend of England, expresses the keynote of the whole visit, which brought to light the genuinely friendly feeling of the two people.

POSTAL MONEY ORDERS.

Viscount Yoshikawa, Minister of Communications, notified in the *Official Gazette* of July 14th, that foreign money orders are to be convertible into Japanese money by the following table:—

	Yen.	Exchange rates.	
		per yen 1.

FOR BABY'S SKIN SCALP AND HAIR.

Something for Mothers to Think About

EVERY CHILD born into the world with an inherited or early developed tendency to distressing, disfiguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, gentle anointings with CUTICURA OINTMENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, to be followed in the severer cases by mild doses of CUTICURA RESOLVENT PILLS (see below), to cool and cleanse the blood, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-out, worried mothers. A single set is often sufficient to cure when the best physicians fail.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itching, and chafing, in the form of baths for annoying irritations and inflammations, or for free or offensive perspiration, in the form of washes for alcoholic weaknesses, and for many sensitive, anæsthetic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are prepared to meet the wants of delicate women, and sensitive children, and are pure, sweet, and tasteless. They are beyond question the most successful blood purifiers and humour cures yet compounded.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. TOWNS & Co., Sydney. British Depot: 37-38, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. FORTIN, DUBOIS AND CHEN. Co., Sole Props., Boston, U. S. A. "All about the Skin," free.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JULY 25TH, 1903.

SUMMARY OF NEWS.

HIS HOLINESS the POPE died on Monday afternoon.

KING EDWARD's visit to Ireland is turning out a great success.

A GALE prevailed on July 18th on Sado Island causing severe damage.

SIR MARCUS SAMUEL, the Lord Mayor of London, has been gazetted a Baronet.

It is officially announced that Prince and Princess Rupprecht arrived at Vancouver on July 17th.

THE *Shikishima* and seven other warships carried out manoeuvres on July 20th near Awamori.

GOLD bullion valued at yen 181,730 arrived at Nagasaki on July 20th from Shanghai for Kobe.

HEAVY rains prevailed on July 9th at Awamori causing inundations. Damage was caused to fields.

THE U. S. transport *Logan* arrived at Nagasaki on July 21st carrying 1,450 soldiers from Manila en route for home.

It is officially reported that the training ships *Hashidate*, *Isukushima* and *Matsushima* arrived on July 20th at Manila.

THE casting of the bronze statue of the late

Prince Arisugawa has been completed at the Tokyo Arsenal. It will be removed on July 25th to the General Staff Office.

THE Canadian mail brings news of the death on 29th of June, from paralysis, of Lieut. Dan Godfrey, the famous bandmaster.

SUMMER vacation, says the *Yorodan*, is not granted this year to the officials of the Department of the Imperial Household.

THE dead body of a woman poorly dressed was found on July 19th floating in the canal near Ishikawa-machi, 3-chome, Yokohama.

OWING to inundations caused by the recent rains, traffic on the railway between Noshiro and Futatsui was suspended on July 19th.

THE construction of the elevated railway for electric tram-cars at Osaka has been completed. Traffic will be opened in the end of this month.

PRINCES MICHI and ATSU, and Princesses Fumi and Yasu will leave the capital about the end of this month for the detached palace at Hakone to spend the summer.

THE Japan Railway Co. is reported to have applied to the Communications Department for permission to transport passengers' bicycles free of charge on its line.

THE Crown Prince and Princess will leave Tokyo on July 28th for Shiobara, where they will stay till the middle of next month. Thence they will proceed to Nikko.

A COOK named H. Kazama (50) employed by Baron Nishi, Azabu, Tokyo, committed suicide on July 18th by drinking muriatic acid. Insanity is reported to be the cause.

MR. N. HANABUSA, Director of the Statistical Bureau, who has been ordered to the International Statistical Conference to be held at Berlin, will leave Tokyo on July 25th.

THE villa of Mr. Murayama, at Chigasaki, was entered by an armed man on the night of July 19th. Having threatened the family, he stole over yen 10 and made off.

A TELEGRAM from Mr. Uyeno, Consul at Amoy, states that cholera is spreading at that port. Thirteen Chinamen and four Japanese have recently died from the disease.

THE Nippon Beer Brewery Company decided at a general meeting held on July 15th to pay a dividend of 20 per cent. with a special bonus of 3 per cent. per annum.

ACCORDING to official investigations, the population of Tokyo numbered 1,705,028 in 1902. During the first half year of 1903, the births were 21,610 and the deaths 15,250.

EARLY in the morning of July 17th, two men armed with swords entered the dwelling of a woman named Moto Ishikawa, Kanda, Tokyo, and stole a sum of money and several articles.

MAJOR M. SATO, commander of the 33rd regiment of infantry, Nagoya, was dismissed from the service on July 16th. The *Mainichi* alleges that the officer has been connected with scandalous matters.

S. KUMAMOTO (47) headman of the village of Awoki, Saitama prefecture, was arrested on July 16th on a charge of having forged official documents and embezzled money belonging to the village office.

THE sailing vessel *Tomiyoshi Maru* carrying

2,029 tons coke from Osaka to Tokyo, ran ashore on July 14th off the Yura fort on Awaji island, sustaining serious damage to her hull. The cargo was transhipped to several lighters and sent back to Osaka.

MR. TANII, a graduate of the Sapporo Agriculture College, who has been engaged by the Governor of Shantung province, China, as adviser in sericulture at Tsinan, will leave Tokyo in the end of August for his post.

THE preliminary trial of T. Ikeo, clerk of the Department of Finance, who is accused of having stolen 42 bonds of yen 5,000 each face value and raised money on them, was begun on July 20th in the Tokyo District Court before Judge Ushio.

THE *Asahi* states that the authorities concerned have prohibited, during the summer vacation, the prolonged movement from Tokyo of officers connected with the War and Navy Departments and the Head-Quarters Staff. A week is the maximum allowed.

THE Yokohama Electric Light Co. held a general meeting of shareholders on July 18th and decided to issue debentures amounting to yen 150,000 in order to increase its plant and to pay back loans of high interest.

TOKYO papers state that the Emperor recently summoned the high officials of the Imperial Household and having asked questions about the palace expenses for the coming year desired them to economise in all outlays except in the case of festivals for ancestors and of the calls of charity.

G. ANDO, an official of the Department of Agriculture and Commerce, who had been in detention in connexion with the bribery affair in the department, died on July 20th of consumption from which he had been suffering before his arrest.

ON the morning of July 19th, thirty-two police officers of the Kure station, Hiroshima prefecture, went on strike. After being pacified by the superintendent, they returned to duty, however. The cause, states the *Fiji*, was dissatisfaction with some of the inspectors.

THE steamer *Kanko Maru* (gross tonnage 348), went ashore on July 18th at the entrance of Kushiro, Hokkaido. Having jettisoned cargo, the ship was floated and arrived at Hakodate on the 21st. It is insured by the Nippon Marine Insurance Company for yen 17,000.

JUN WASHIO (23) living at Shitaya, Tokyo, who left his home leaving a letter saying that he was going to death out of weariness with the world, and who was thought to have made his way to the Kegan waterfall, was taken in charge by the Nikko police on July 19th. He was at once removed to Tokyo in custody.

AN old curio dealer named H. Mori (48), living at Bakurocho, Tokyo, murdered his wife named Mine (43) with a short sword on the night of July 18th at the tea-house Kawaiya, Yonezawacho. The man then committed suicide. Tokyo papers report the cause to be insanity.

Two Japanese have been arrested at Tientsin by the Japanese consular authorities on a charge of having uttered forged notes of the Hongkong and Shanghai Banking Corporation. The suspects are said to have received notes amounting to over yen 5,000 from a man named Iwakami at Kobe this year. They then went to China and circulated the notes among Japanese residents and Chinese merchants.

THE POLITICAL SITUATION.

Saturday, July 18.

Recent events in the political world have naturally suggested to the Progressists the expediency of a complete re-organization of parties. It is undeniable that the *Seiyu-kai* has received a severe blow. Not, perhaps, an absolutely fatal blow. The Party will retain some measure of vitality and some semblance of solidarity, but it will be found to have lost prestige and energy, and to survive in shadow rather than in substance. There must be many of its members to whom, in its new guise, the Party will appear a crippled invalid, deprived of the very source of its nourishment. These men will be ready to enrol themselves under any banner with a good fighting motto, and it is quite within the range of possibility that they would respond to an invitation from Count Okuma if he issued one. That is what he seems disposed to do. We read in vernacular papers that he and the other prominent men of the Progressists have decided to essay the organization of a new association on wide lines: to adopt, in short, the policy of the open door. They are willing, and indeed they think it will be necessary, to dissolve their own party as it now stands, and to adopt a new name. This last measure would be essential. There never was a worse choice than that of the Party's present appellation, *Kenseihon-to* (Real Constitutionals). The word has no independent meaning. It owes its significance to an event which Count Okuma and his followers should have endeavoured to consign to oblivion instead of crystalizing it in a name. Public intelligence rebelled against the term from the first and fell back upon the good old name "Progressists." Rumour now has it that a committee of twelve has been appointed to consider and elaborate the scheme of re-organization, and that considerable activity will soon be witnessed in the world of party politics.

Nineteen ex-members of the *Seiyu-kai* met in the quarters of the Shako Club on the 16th instant and decided to organize a new party under the leadership of Count Itagaki. The Count was present and delivered a speech which contained nothing new when compared with his previous utterances to the Club as reported in these columns. In effect he denounced the *Seiyu-kai* as being little better than a mob of politicians, not united by any strong bonds of principle, and he enunciated as such bonds for the new-projected party his favourite doctrine of "liberty, equality and fraternity." Whether these talismanic words can be employed as effective ties, remains to be seen. At all events there will be a new association, as yet nameless and embryonic but possibly the nucleus of something tolerably strong. Count Itagaki, however, can not promise his followers anything, and we suspect that solid prospects constitute more valid inducements than the finest theories in these days of self-seeking. It is a rather melancholy spectacle to see the father of Japanese liberalism re-enter the field in his old age at the head of a forlorn hope. We admire his courage and energy, especially as it is certain that his motives are wholly disinterested.

The *Fiji Shimpō* raises a familiar question, namely, whether the Japanese Government does not observe excessive secrecy in the realm of foreign affairs. There are no blue books here as in England, nor any yellow books as in France, and still less

are the public kept in careful touch with everything in progress as is the case in the United States, where the people are consequently conspicuous for intelligent perception of foreign affairs. One result of the secrecy observed in Tokyo is that newspapers publish all kinds of wild rumours which have an injurious effect on the amity of nations. So serious has this abuse become that, according to the *Fiji*, rumour attributes to the Government a project in the sense of organizing some censorship of journalistic utterances on foreign affairs. Our contemporary likens such a measure to the timidity of the clown in the proverb, who, having once burned his cheeks with a hot mouthful, blew ever afterwards on his salad to cool it. There is also another objection which the *Fiji* does not note, namely, that from the moment when a Government institutes any kind of press censorship, it is thenceforth regarded by the public as responsible for every journalistic utterance. That responsibility is more inconvenient than the state of affairs which the censorship is intended to rectify.

Baron Kikuchi, Minister of State for Education, Viscount Yoshikawa, Minister of State for Communications, and Baron Hirata, Minister of State for Agriculture and Commerce, have been allowed to retire at their own request, and their portfolios are distributed as follows:—

Baron Kodama, to be Minister of Education, in conjunction with the posts of Governor-General of Formosa and Minister of Home Affairs.

Baron Kioura, to be Minister of Agriculture and Commerce, in conjunction with his post of Minister of Justice.

Baron Sone, to be Minister of Communications, in conjunction with his post of Minister of Finance.

Baron Kodama has abandoned his intention of proceeding to Europe.

Monday, July 20.

It will have been observed by our readers that the new distribution of portfolios differs somewhat from public anticipation as previously reported. According to the original forecast, Baron Kodama was to assume charge of the Communications Department, Baron Kioura of the Education Department and Baron Sone of the Department of Agriculture and Commerce, for all which appointments there would have been reason in the past records of these statesmen. But, according to the best informed Japanese journals, a change was deemed advisable at the eleventh hour, the reason being that as the Government has to undertake sweeping measures of retrenchment in connexion with next year's budget, it is deemed advisable to have the above three Departments under the direction of Ministers whose hands will be wholly unhampered by previous relations. Whether the Cabinet has resolved to dispense with the policy of recourse to public loans and to obtain all the necessary funds by means of administrative retrenchments and financial reforms, as advocated by the *Seiyu-kai*, we do not yet know. What we gather from the writings of our Tokyo contemporaries is rather that a falling off in the revenue derived from the *sake* tax and the necessity of reducing the land tax to its old rate, have brought the Government face to face with a deficit of some 15 or 20 million *yen*, which has to be met by retrenchments. The impression seems to be that the limit of the *sake* tax has been reached and passed. Since 1896 the rate has been raised from 4 *yen* per *koku* to 7 *yen*, then to 12 *yen* and then to 15 *yen*. Even at the latter rate no perceptible dimi-

nution of taxable production took place, owing, it is thought, to the stringent measures adopted for checking domestic brewing. But the people are now beginning to find the price of their favourite beverage too high, and a reduction of production to the extent of 800,000 *koku* is anticipated during the current fiscal year. That means a loss of 12 million *yen* of revenue in the Budget now in operation, and it means also that some other source of revenue must be found for next Budget. It is said that all the Ministers have promised to put their shoulders resolutely to the wheel of retrenchment, and that a marked diminution of administrative outlays as well as an important readjustment of appropriations will be features of the next Budget.

Before the recent Cabinet crisis much talk became again audible about that old complaint, the so-called *kakkyo no hei*, or prevalence of feudal ideas in the Departments of State, each fighting for its own hand and working to obtain a maximum appropriation without due regard to the state of the national finances. It is now thought, and the *Fiji Shimpō* endorses the belief, that the new distribution of portfolios will greatly facilitate reform of that abuse. Thus the Minister of Finance will obtain control of the Department of Communications, which has always been a thorn in the side of the Treasury, and Baron Kodama will direct the affairs of the Department of Education, which he can sweep after the new-broom fashion, Baron Kioura having an equally untrammelled hand at the Noshomusho. The *Fiji* thinks that if such be the purpose of the new distribution, the Government deserves applause. There is even talk of abolishing the Departments of Education, of Communications and of Agriculture and Commerce. The *Asahi Shimbun* virtually endorses the *Fiji Shimpō*, but contends that Baron Kodama ought not to retain the Governor-Generalship of Formosa, since, the new territory being under the supervision of the Home Department, it is obviously incongruous that the Minister of Home Affairs should be at the same time Governor-General of the Island. An Imperial Prince, the *Asahi* thinks, might advantageously be nominated to succeed Baron Kodama in Formosa. It is noticeable that the large share of responsibility now devolving on Baron Kodama's shoulders in connexion with the affairs of the Central Government is not condemned by any critic. The Japanese public evidently entertain a very high idea of the Baron's capacity.

It is to be noted that the *Kokumin Shimbun* raises its voice against the notion of extreme retrenchment. Too little of anything is as bad as too much, it declares. Economy merely for the sake of economy is not to be recommended in State affairs. If income is found less than expenditure, it may be a better plan to work for the increase of income than for the reduction of expenditure.

It is announced that Baron Ito has been appointed Vice-President of the Imperial System Investigation Bureau instead of Count Hijikata who retires. When this Bureau was first established under Marquis Ito's Presidency, Baron Ito held the office of Vice-President. His return to official life will be welcomed by a wide circle of friends.

Tuesday, July 21.

In their search for a platform wide enough to afford standing room for a multitude of politicians the leaders of the Progressists,

that is to say, the men that advocate reconstruction and the open door, have evidently been constrained to deal in vague generalities. They have adopted two principal planks: the first is that the basis of constitutional government must be made firm; the second, that the Party will labour for the development of the Japanese race abroad. Apparently this latter declaration represents imperialism in an occult form, but it may also mean nothing more than the utilizing of opportunities already obtained by treaty or convention and the encouragement of Japanese emigration. It will be interpreted, however, and is probably intended to be interpreted, as the text of a "strong foreign policy."

Upon the above lines Messrs. Inukai and Komuchi have been instructed to compile a manifesto, which will of course be an erudite and eloquent document. But the impression produced upon outsiders by such a platform as the above is one of utter hopelessness. It is now 17 years since the first political party was organized in Japan, and among the numerous associations born during that interval, not one has ever succeeded in formulating really definite principles. There is of course, a great deal of similar vagueness in the corresponding sphere of Europe and America, but it was not and is not always so. In the Occident the lines of cleavage sprang originally from great issues and have been deepened from time to time by vital incidents. Here in Japan we detect persons only. One significant explanation is that the nation's publicists, being unanimously liberal and progressive, there is no practical margin for differences of opinion. Perhaps, indeed, that is a sufficient explanation. At any rate the foreign public can not continue to take keen interest in dissolutions, and reconstructions which reveal no intelligible codes of political doctrine and are ultimately found to be based on personnel solely. There is talk now of an amalgamation between the Progressists and Prince Konoye's followers, which would perhaps mean the enrolment of the whole under Prince Konoye's leadership. Such a result would awaken the languishing interest of foreign observers, for Prince Konoye is essentially an exponent of imperialism on the German model, and Marquis Saionji is supposed to represent the French school of individualism. But it is only the methods of the two statesmen that differ: each is equally zealous for the expansion of Japan.

The *Seiyu-kai*, it is claimed, have not been seriously shaken by recent events. They have elected a committee for purposes of financial investigation, and they hope to elaborate an important programme in the course of the next three months. Last autumn they were understood to have arrived at the conclusion that some 18 million yen annually might be saved by administrative economies and financial re-adjustments. But we are now told by a politician, speaking through the columns of the *Fiji Shimpō*, that this extensive programme did not obtain the endorsement of the Party as a whole; that it emanated chiefly from the brain of one man, Mr. Hara Kei; that its feasibility appeared doubtful when Marquis Ito came to consult with the Cabinet, and that a more precise examination is now to be made. The *Seiyu-kai*, then, seem to be busied with financial issues only. We hear nothing of their interference in foreign politics.

The same authority declares, however, that the internal condition of the *Seiyu-kai* is most unsatisfactory. Out of the parliamentary members, some 40 or 50 are in reality friendly to the Government, and, in the event of any collision with the latter, are

prepared to create dissensions in the ranks or even to withdraw altogether. On the other hand the adoption of a policy friendly to the Cabinet would drive out all the stalwarts. Thus the Party is virtually useless as a political engine. Whatever unanimity might have been attained under Marquis Ito's leadership, will be appreciably impaired now that he has withdrawn. There is nothing for it, therefore, but to throw all the parties into the crucible and re-fuse them for casting into new moulds. But as yet no one competent to undertake such a feat presents himself.

Meanwhile Count Itagaki seems to be really in earnest in his resumed role of party organizer. He is preparing a manifesto the text of which will be his favourite doctrine of liberty, equality and fraternity, and the argument will tend to the rejection of imperialistic ideas and the assertion of individualism. Strange to say the Count has associated himself with the notorious ex-leader of *soshi*, Mr. Oi Kentaro, and, stranger still, his activity does not seem at all pleasing to the *jinmin*. It is not yet certain, however, whether Count Itagaki will enter the field as an actual captain of political troops. Some authorities allege that he will act only as chief of staff, that is to say, as adviser. At all events he will have a very respectable following, so far as mere numbers are concerned, for whatever be said to the contrary, recent events were a great shock to the *Seiyu-kai* and the secessions from its ranks have been considerable.

Wednesday, July 22.

The *Nichi Nichi Shinbun* publishes the text of Count Katsura's address to the Throne on the 1st instant, praying for permission to resign, and publishes also a speech, or the gist of a speech, delivered by the Premier to Marquises Ito and Yamagata on the 26th of June in the presence of Admiral Yamamoto. The address partakes of the nature of a mere formality. It pleads that the Count finds the financial and the political situation too much for his incapacity and inexperience, especially since he is suffering from illness, and it prays for permission to resign. The speech has a ring of more genuine reality. Count Katsura is represented as saying that the position attained by Japan and the conditions of the time impose upon her the duty of pursuing a positive policy. She must increase her armaments, on the one hand, and must labour, on the other, for industrial and commercial development. On those lines the last budget presented to the Diet was compiled. But the Diet rejected it, and ultimately a compromise was effected—a compromise for which Marquis Ito and Marquis Yamagata had to be thanked. By the terms of this compromise funds for naval expansion were provided, but those required for material development were refused. The Cabinet thus saw its programme cut in two, and saw that the portion lopped off had a vital bearing on the empire's progress. Under these circumstances he felt himself unequal to cope with the situation, and he desired to be relieved of office in order to take a trip to Europe, there to collect materials by way of compensating for his inexperience and equipping him for future usefulness, and there also to cure a malady which otherwise must become serious.

These revelations of the *Nichi Nichi* suggest the inference that the Budget and the compromise were solely responsible for the recent Ministerial crisis, and the *Kokumin Shinbun* has a few words which encourage

a similar belief. It is a partial version, we think.

There is talk of forming an association on the basis of a strong foreign policy. Members of the Progressists, the Imperialists, the seceders from the *Seiyu-kai*, the Independents, the National Unionists and others, have been holding meetings in Tokyo, and endeavouring to elaborate a programme or construct lines of action likely to have successful results. Thus far nothing definite has been accomplished, and perhaps this movement should be regarded mainly as a result of the partial disintegration which all political bodies suffered from the recent crisis. Once before since the Diet became a practical fact, an agitation was set on foot for the formation of a general union in the cause of a stalwart policy abroad. But the occasion was then wholly different, and we are by no means sure that a very similar measure of unsuccess would attend an effort of that kind now.

Greater progress seems to have been made by another project to which we have already alluded, namely, the organization of what is called the *Shako Club* (Social Club). This would consist of Progressist malcontents, *Seiyu-kai* seceders and National Unionists, and would be under the presidency of Prince Konoye, with Viscount Watanabe for vice-president. The Viscount is said to have already accepted the post, but Prince Konoye's decision is deferred on account of illness. The *Shako Club*, also, would have its foundations in a strong foreign policy, and there is no valid reason why it should stand independently of the association described above, except, perhaps, that whereas the one would have a political character, the other—Prince Konoye's coterie—would not.

Thursday, July 23.

There are many interpretations of Marquis Ito's attitude in foreign politics, and since the question is of very great importance to Japan, its discussion always finds an attentive audience. The *Nichi Nichi Shinbun* has an interesting article on the subject; an article which must be taken as coming from an exceptionally well-informed source. While the Marquis led the *Seiyu-kai*, says our contemporary, rumour, attributing to him a weak foreign policy, concluded that his influence upon the Cabinet was more or less paralyzing; and when he became President of the Privy Council, abandoning his party connexion, rumour changed its tone to one of gratulation that his interference would no longer be felt by the Ministry. But surely the latter is an unsound conclusion? Whatever influence the Marquis enjoyed in official circles during his leadership of the *Seiyu-kai*, he must be supposed to enjoy much greater influence in his position of President of the Privy Council. But the fact is that the empire's foreign policy has been uniform and unchanging. It was Marquis Ito that concluded the Tientsin convention of 1885, which virtually put an end to China's suzerainty in Korea. It was Marquis Ito that directed affairs in the war of 1894-5 when the independence of Korea was finally established. It was Marquis Ito that obtained from China a promise as to the non-alienation of Fukien province, thus contributing to the preservation of the Chinese empire. And it was Marquis Ito that made conventions with Russia securing to Korea immunity from aggression. It may be said that the members of the present Cabinet acted as Marquis Ito's subordinates on all these occasions, and there is no intel-

ligible reason why they should now be supposed to entertain a policy different from his. If those that advocate a stalwart front have in prospect the annexation of Chinese territory, they ignore the Anglo-Japanese Alliance, which pledges its signatories to respect and preserve the integrity of China. The alliance further provides that the allies shall combine for the protection and assertion of their mutual interests. But the compact is based on the state of affairs actually existing at the time of its signature. Any radical change in that state would require the allies to reconsider their position. If, for example, China herself failed to assert her integrity and became a consenting party to her own disruption, the hands of the allies would necessarily be freed to take such action as their interests might dictate in the altered situation. It is noticeable that folks who advocate war are called strong politicians, and that those who advocate peace are called weak. But outside the ranks of savages there are no advocates of war now-a-days while peace is possible. It is further noticeable that the so-called "strong politicians" never descend to the consideration of ways and means. They would not have had the Liaotung Peninsula restored, but they never attempted to explain how it might be preserved. They would not have had Kiao-chow seized by Germany, but they did not indicate any route to its prevention. They would not have had Hawaii included in the United States, but they failed to suggest any way of averting it. And whenever they were in a position to carry out their theories they have made no attempt to do so. They are simply politicians, and their talk is *vox et præterea nihil*. The present Cabinet does not belong to their class.

MANCHURIA.

From Peking comes news dated the 21st instant to the effect that on the preceding day Mr. Conger called on Prince Ching and again urged the importance of opening certain places in Manchuria. The Prince is represented as having replied that none of the places named could be called an emporium of trade and that, consequently, the Chinese Government did not appreciate the utility of opening them. If this be true it confirms the impression that China's condition is hopeless. She has no disposition to assist in rescuing herself from Russian aggression, and really it would seem that the Powers may reasonably abandon the task of trying to rescue her. As between China and Russia there can, of course, be no choice, for though China has much that is venerable and respectable to commend her to the world's sympathy, her absolute incapacity to realize the advantages of the Occident's material civilization, or at any rate, her failure to avail herself of them, render her almost contemptible, whereas Russia is a progressive and civilizing power. In this context it is worth while to quote a telegram sent to *The Times* by its Peking correspondent on June 9th:—

Some of the newspapers received from Europe to-day speak of the final and definite refusal of China to yield to Russian demands regarding Manchuria, and state that, in face of such refusals, Russia considers it prudent to retreat. Those capable of entertaining such an astonishing misconception of China's power would have had an object-lesson could they have witnessed an incident which occurred this afternoon in the centre of Peking, when, for the second time in three years, the buildings of the Board of Revenue were destroyed by fire.

The resources of Peking were exhausted in vain and the confusion was infinite. The flames were combated by hundreds of men carrying banners, who blocked all movement, and there was a hideous clangour of gongs and tom-toms, as in the South Sea Islands.

For extinguishing the fire the authorities depended upon water carried in old kerosene tins and in bean and oil baskets, using appliances dating from the time of William Rufus. Assistance was also given by some hand-power engines dating from Waterloo, which squirted unavailing jets of dirty water.

The flames were prevented from spreading towards the French hospital by the exertions of the foreign Legation guards.

No assistance that China could give at present on account of her own salvation is worth a moment's thought, and if she is determined on such a suicidal course as even to reject the advice of Powers anxious to save her, it would really seem that there is nothing for it except to make suitable arrangements for her funeral. If there were any security, or any way of obtaining security, that Russia would keep the door open in Manchuria, she would meet with little opposition from outsiders in the prosecution of her ambitious designs.

With reference to the above the *Asahi Shimbun's* Peking correspondent says that in diplomatic circles in Peking very little faith is placed in the assurances alleged to have been recently given by St. Petersburg in Washington to the effect that the Port Arthur conference had recommended the opening of Manchuria as desired by America and Japan, and that administrative arrangements to that end were in progress. Concerning this the *Asahi* writes editorially. It affirms that Russia has befooled America again and again, and this last announcement must be taken as belonging to the category of dust-throwing. At any rate the announcement is worthless, for Russia's conduct in Manchuria proves that she regards a treaty merely as so much waste paper, and if such is her view of a solemn international compact, it is easy to estimate how much store she sets by a mere diplomatic statement. Nevertheless what Count Cassini has said in Washington has this value that it may be cited as a definite withdrawal of Russia's objections to the opening of Manchuria. Russia does not intend it, perhaps, to be so counted, but if her Representative made the statement, America, England and Japan may fairly utilize it as a proof that Russia no longer stands in the way, and since Russian opposition constitutes China's only admitted cause of reluctance, she may be fairly called on to sign the treaty at once. The *Asahi* does not go so far as to say that China should be compelled to sign, but it must be evident to every reader of history that where the Manchu Dynasty is concerned compulsion has come to be the only effective weapon. Rumour recently attributed to Mr. Hayashi in Seoul a declaration which was so admirable that we would fain hear it confirmed. He was alleged to have informed the Seoul Government that since Russia's objections had nothing to do with the opening of Wiju, which lay entirely within the province of Korean Sovereignty, and since Korea assigned no cause for hesitation except Russia's objection, he should regard Wiju as opened. Of course there would be insuperable difficulties in giving practical effect to such an assumption, but its mere statement, if in Peking, would probably startle the Manchus into some exercise of common sense. We do not care how much Russia expands her empire. On the contrary, we wish her all success.

But her expansion must not be at the expense of other nations, and it is most emphatically at the expense of other nations if its effect be to exclude their commerce from every region brought under the shadow of her flag.

It is alleged by the *Tiji's* correspondent that Prince Ching, interrogated by Mr. Conger, has emphatically denied the story about a Russian loan of two million taels to the Turkestan authorities in consideration of certain special privileges in that region. Of course, if the privileges had any relation to trade they might be claimed by other Powers also under the most-favoured-nation clause. Turkestan is a very vague term. It covers a huge area in Central Asia much of which is already Russian, and only Kulja can be properly called a Chinese province. There is room for many things to happen there that would have little concern for European and American Powers other than Russia.

The *Kokumin Shimbun* undertakes to expound the real sentiment of the Japanese nation with regard to Manchuria. That sentiment is not reflected either in the utterances of a little band of students who contend that the sword should be drawn because the moment is favourable for drawing it, or in the policy of another small band who would purchase peace at any price. What the nation wants is to see Manchuria preserved to China and thrown open to the commerce of the world, but it desires to exhaust every pacific resource for the attainment of these objects, being determined, at the same time, to fight for them should peaceful measures fail. No effort will be spared to avoid war but if war prove inevitable, the responsibility must rest on Russia.

Friday, July 24.

The *Asahi's* Peking correspondent says that Mr. Conger is pressing the Chinese Government to give a definite answer about the opening of Mukden and Ta-tung. Prince Ching is alleged to have replied that pending the military evacuation of Manchuria by Russia, no new ports could be opened in that region. Mr. Conger, naturally exasperated by such a reply, declared that China was merely making game of America by means of the Russian bogey, and that he must insist upon the opening of the places in question. This telegram, is dated the 21st. We doubt whether Mr. Conger would have taken such action in the face of the assurances given by Russia in Washington. It is possible, however, that his proceedings antedated those assurances.

THE NEPAULESE STUDENTS.

Some months ago the arrival of two Nepaulese students in Tokyo to receive education was stated in these columns. We do not recall the exact date, but their coming was at least a year ago. It appears that a fellow-countryman who accompanied the lads to Japan for the purpose of overseeing their studies, proved unworthy of the trust reposed in him, and dissipated the funds sent from Nepal. Professor Takakusu, Dr. Max Muller's well known pupil, assisted in correcting this abuse, and led to the dismissal of the dishonest overseer. The matter has been recalled to public notice by the arrival of Mr. Kawaguchi from his adventurous journey to Tibet. It is said that he has undertaken to furnish an exact statement of the facts to the King of Nepal. The two students are now attending the Imperial University.

KOREA.

Friday, July 17.

Tokyo newspapers report that the Korean local authorities at Wiju, acting under instructions from the Government in Seoul, have removed the telegraph-posts erected by the Russians for the purpose of the Antung-Yongampo line. This is the version of the *Fiji Shimpō* and the *Asahi*. But the correspondents of the *Nichi Nichi* and the *Kokumin* allege that the Russians themselves, in deference to Korea's remonstrances, have abandoned the enterprise.

It is stated that the British Representative in Seoul has urged on the Korean Sovereign the importance of at once opening Wiju to foreign trade. Thus far there is uniformity of statement on the part of the various correspondents. But they differ as to the results of the representation, some alleging that Russian opposition is likely to be potent, and that the issue can not be foreseen, while others think that the Korean Government has now resolved to yield to the united urgency of Japan and England.

The *Fiji Shimpō* publishes the text of the Note addressed by Mr. Hayashi, Japanese Representative in Seoul, to the Korean Government with reference to the wounding of two Japanese subjects on the 26th of June by Chinese bandits in the neighbourhood of Kanke on the upper reaches of the Yalu. It is a very strong note, but the text merely elaborates the accounts already published of its gist, namely, that whereas the Korean Government is bound by treaty to protect the lives and property of Japanese subjects travelling in Korean territory in prosecution of their legal business, not only is that duty neglected, but armed bands of foreigners are suffered to make irruptions into Korean territory and commit lawless acts. Such a state of affairs must be regarded as an absence of all efficient control on the part of the rulers of the territory, and unless measures are speedily taken to administer the district so as to prevent these incidents, Japan, on the ground of self-protection, will have herself to undertake the duty of protecting her subjects.

According to this same correspondent the Minister of Foreign Affairs is in favour of opening Wiju but Li Kon-thaik, leader of the Russophil party, takes the opposite view. Pressed repeatedly by the Japanese Representative, the Korean Foreign Office at last answered that if a meeting of the Foreign Representatives unanimously decided in favour of opening Wiju, the Korean Government would consent. To this Mr. Hayashi answered that the question not being of a nature to call for submission to the Foreign Representatives, Japan would have to consider Wiju already opened in the absence of any legitimate objection on Korea's side. Our readers have already learned about this action on the part of Mr. Hayashi, but the information lacked the confirmation which it has now received.

The labour of Korea's naval mountain has apparently brought forth not even a mouse. It seems that the solitary war-ship which was to have flown the ensign of the peninsular empire, the converted merchantman that nearly involved her original owners in heavy loss owing to the Korean Government's inability to pay for her, is to be re-converted into her pristine shape. Orders have been issued for the removal of her armament and for her employment as a humble carrier of goods and passengers. This is one of the most sensible acts recently placed to Korea's

credit. She has no money to procure even an insignificant navy, so she had better abstain from the attempt.

Saturday, July 18.

A Tientsin telegram to the *Asahi* alleges that the seizure of timber-rafts by Russians in the Yalu Valley continues; that there are about 150 Russian troops with one gun at Antung, and that the freebooter leader Lin is at Yong Am-pho with some forty men.

It is stated to have been officially reported from Wiju that the Russian telegraph poles on the south side of the Yalu have been removed, but that the cable across the river remains *in situ*. The inference said to have been drawn from this issue is that Russia essays much which she is not prepared to carry to a conclusion in the face of resolute opposition, and there has been a consequent weakening of the Russo-phil party under Li Kon-thaik. On the 16th instant the Korean Foreign Office is reported to have announced to M. Pavlow that as the laying of a line of telegraphs on Korea's territory was a distinct violation of her Sovereignty and of the treaty, the local officials at Wiju had been ordered to remove the posts, with which order they had complied. It will be observed that there is a disposition to magnify this incident. Certainly the case was one well calculated to illustrate the value of resolution, for it might have been confidently predicted that, except as part of a scheme of deliberate aggression, Russia would never persist in building telegraphs in Korean territory in defiance of Korean dissent.

The *Asahi's* correspondent says that things are proceeding favourably for the opening of Wiju and that it may be expected to become an accomplished fact before long.

The Korean Government has paid the first instalment—200,000 *yen*—of the price of the *Yangmu*, but we do not find any further intelligence as to her reversion to a merchant steamer type.

Sunday, July 19.

Seoul correspondents of the *Asahi* and the *Fiji* agree in reporting that the Russians engaged in the construction of the Antung-Yong-Ampho telegraph lodged a protest with the Korean local officials at Wiju with reference to the removal of poles by the latter. The reply was that the step had been taken in accordance with orders from the central government, and that objections should be formulated in Seoul.

Concerning this telegraph question it is reported that the Russian Representative in Seoul has at length replied to the remonstrance made by the Korean Government. He is alleged to have stated that the work of laying the line was not undertaken by his orders or under the direction of Russian officials, and that it was doubtless suggested by the convenience of the timber-felling Company. He asserted, however, that the Company had offices in three places, and that to build railways, construct and repair roads, lay telegraphs and establish mining bureaux were within its natural rights. British and American mining concessionaires were not prevented from enjoying such privileges, and Russians, who paid a royalty of 25 per cent. to the Korean Government, ought to be at least equally favoured. If the Company erected a line of telegraph on the upper part of the Yalu and placed it under the control of Korean officials, Korea herself would be the gainer. On the whole it did not seem that there was anything illegal in the conduct of the timber company, and the Minister saw no reason to

restrain its acts. In conclusion M. Pavlow suggested that as the Korean Government had already despatched officials to the scene to make investigations, they should be instructed to consult with the local officials in this matter also, and finally the despatch is said to have contained an intimation that a concession for building a telegraph from Seoul to Wiju for the purpose of effecting at the latter point a junction with the Antung line would be welcomed by Russia.

The sum of the matter is that the Russian Representative, supposing the gist of his despatch to be rightly reported—which we have no reason to doubt—claims for any foreign concessionaire the right to equip himself with all modern facilities for conducting his business, such facilities to include the construction of railways, the laying of telegraphs and the establishment of offices at any points within the district affected by the concession. That is a very remarkable claim, and in the particular case under review the situation presents a specially striking feature, namely that one of the proposed lines of telegraph would establish direct connexion between Korea and the Chinese territory occupied by Russia. It seems scarcely necessary to give serious attention to M. Pavlow's argument, from the point of view of international justice; and we can not forget that Russia is specially disqualified to advance such pretensions, for it is she, and she eminently and solely, that has given to the world a striking object lesson in the sinister meaning of railway concessions and their dangerous contingencies.

M. Pavlow was received in audience by the Emperor of Korea on the 17th instant. Japanese journals report a conviction that he seized the occasion to lodge a protest against the opening of Wiju. If so, it has to be admitted that Russia's action in Korea contrasts curiously with the line of procedure attributed to her in Manchuria by a semi-official statement in Washington which Reuter telegraphs this morning. In Manchuria she is said to be busily arranging the internal administration of the country so as to admit of the opening of new ports as desired by America and Japan, but in Korea, where no arrangements are necessary, she is simply blocking the path of commercial progress. For the rest, so far as we know, she has declared that the opening of new marts in Manchuria must not carry with it the right of establishing foreign settlements. What, then, is it to signify, or how could the concession be utilized? It is impossible even for Russia's friends to find plausible extenuations of her conduct in the Far East.

In the face of statements as to the interruption of the work of laying telegraphs in northern Korea, the pulling up of poles and so forth, the *Asahi's* Seoul correspondent alleges that telegraphic communication between Antung and Yong Am-pho, was opened on the 15th instant.

According to the *Kokumin Shimbun's* Seoul correspondent, it is believed by Korean officials that the Port-Arthur Conference decided on the advisability of preserving the *status quo* in Korea for three years, and entered into calculations as to the expense of maintaining 300,000 troops there for six months. The Koreans are said to hold that this will result in a peaceful settlement with Japan.

Friday, July 24.

A telegram to the *Fiji Shimpō* from Peking says that the Korean Government, deeming it advisable to enlist China's sympathies in the matter of opening Wiju, instructed its

Peking Representative, Mr. Pak Che-sun, to approach Prince Ching. One is not surprised to learn that the step proved fatuous. If China is too timid to stretch out a hand in her own defence by opening new marts in Manchuria, it is not likely that she would venture to exasperate her *bête noire* by advising Korea to open Wiju. Prince Ching made no reply of a useful character. He merely said that the Chinese Minister in Seoul should be instructed. Very likely he was considerably exasperated at the notion of Korea carrying her troubles to Peking where the Government is already "snowed under" with perplexities.

As to the Antung telegraph, Korea seems to be standing firm. A late telegram says that the Seoul Government has renewed its instruction to the Wiju officials to remove the poles as often as they are erected. That means a collision, sooner or later, unless Mr. Pavlow orders a retreat, and Mr. Pavlow seems to have burned his boats. It need scarcely be observed that recent intelligence as to the actual opening of the telegraph from Antung to Yong Am-pho was altogether premature. The cable across the Yalu appears to have been laid, but land communication on the south of the river was never established.

Southern Korea has been visited by very heavy rains. The farmers were thirsting for something of the sort, but when the deluge came it did not bring good to all alike, for we read in Tokyo telegrams that the Seoul-Pusan and Seoul-Chemulpo lines of railway have both suffered more or less.

CHINA.

Saturday, July 18.

A telegram to the *Kokumin Shinbun* from Peking quotes a traveller who returned on the 15th instant from a journey through Manchuria. He is made to say that the Russian troops in Mukden and Kirin are steadily moving southwards and are being massed in the region from Liaoyang to Fenghwang. Large preparation is also being made of transport vehicles. The *Kokumin's* correspondent vouches for the non-sensational character of this traveller's account, and further attributes to him the view that Russia's present military action is not in the nature of a mere demonstration but means a genuine determination to appeal to force if necessary in defence of her tenure of Manchuria.

The same correspondent alleges that although nothing is yet definitely known about the result of the Port Arthur conference, the Russians in Peking are of the opinion that war has been decided on. It will be necessary, the correspondent thinks, to watch for practical indications of the conference's decision. Meanwhile it is believed that M. Lessar, who returned to Peking on the 14th instant, is in secret communication with the Chinese Government.

The Tientsin correspondent of the *Fiji Shimpō* reports that trade is in a most unsatisfactory condition, and that the prospect of a war between Russia and Japan has greatly increased the depression. No one ventures to predict the time of revival.

Major-General Wogack has gone in the direction of the Yalu Valley.

Monday, July 20.

A telegram to the *Asahi* from its Peking correspondent indicates that the decision—whatever it may have been—arrived at by the Port Arthur Conference has not yet had

any visible results in the Chinese capital. M. Lessar is taking things very quietly and there has not been even one meeting between him and Prince Ching since the 14th instant, when M. Lessar returned. The correspondent thinks, however, that taking into consideration the reports received from various quarters, the resolve formulated by the Conference was to hold Manchuria even at the risk of war with Japan and England.

The same correspondent wires that a belief prevails among the Chinese in Peking to the effect that war between Russia and Japan must soon break out over the Manchurian question. It is not to the Chinese in Peking, however, that we should be disposed to go for information on such a topic.

It is further alleged that Viceroy Yuan has just assembled at Paoting a meeting of senior military officers and of officials under his own orders, and has consulted with them in connexion with the belief that the result of the Port Arthur Conference was a determination to maintain the *status quo* in Manchuria.

According to the *Nichi Nichi's* Peking correspondent, M. Lessar has had an interview with ex-Viceroy Chang Chih-tung but is postponing all active measures until the receipt of instructions from St. Petersburg, such instructions being necessitated by the Port Arthur Conference.

General Kuropatkin, accompanied by a large staff, is said to have left Port Arthur on the 14th instant and to have proceeded to Mukden where a brilliant reception was given to him by the Chinese Commander-in-chief, Tso. From Mukden General Kuropatkin was to return to Liaoyang for the purpose of holding a military review. It is conjectured that another important conference will take place at Liaoyang.

It is stated that although Japanese subjects are allowed to purchase land at Dalny, their total purchases must be limited to one-tenth of the area offered for sale.

Tuesday, July 21.

In consequence of the rolling stock of the Trans-Asian line being required for the transport of troops to Manchuria, it is stated in Peking that the Russian authorities no longer allow Chinese subjects to travel by the line. This intelligence is given by the *Fiji Shimpō*.

The same journal has an obscure telegram from Peking to the effect that an official crusade has been undertaken against the reform party, and that their leader was arrested and executed on the 19th instant.

Friday, July 24.

On the occasion of his recent visit to the military school in Paoting Viceroy Yuan is reported to have delivered a very stirring address to the students. He made no attempt to conceal the misfortunes that had overtaken China on account of her unreadiness, and he urged the vital importance of educating a military spirit. It had been the custom, he said, to teach the students merely the tactical side of the military art, but what was incomparably more important was that they should learn its strategy and imbibe its spirit. Referring to Japan, he said that she owed her place among the nations and her success to her people's appreciation of these facts, and he strongly eulogized the earnestness and industry shown by the Japanese officers engaged as instructors at the Paoting College. The Viceroy further claimed that Japan sympathised with China in her troubles, and that to that sympathy might be attributed in part the zeal displayed by the Japanese instructors.

REV. R. C. FILLINGHAM IN NEW YORK.

The Rev. R. C. Fillingham came into collision with Bishop Potter shortly before leaving New York, for England. Mr. Fillingham, it appears, visited the Sunday morning service at St. Mary the Virgin, in that city and thereafter sent a letter to Bishop Potter in which he declared the sacrifice of the mass, the burning of incense and the elevation of the host to be contrary to the doctrine of the Anglican church, and called the whole ceremony profane and idolatrous. Bishop Potter, in addition to writing to Mr. Fillingham, addressed the Rev. Dr. G. M. Christian, rector of the Church of St. Mary the Virgin, advising him to apply for a detail of police to throw the vicar of Hexton and his party into the street, should they interrupt the service in the Church.

The Bishop's letter to the Rev. R. C. Fillingham, which was dated from Coopers-town, Otsego County, N.Y., was as follows:

Reverend Sir:—You call yourself a clergyman of the Church of England, but I doubt it, for a clergyman is usually a gentleman, and aware that he may not print a private letter until its receipt has been acknowledged by the person to whom it is addressed.

That you are a lunatic is much more likely, for only a lunatic could suppose that the Church of New York is governed by the laws of the Church of England, or that you could compel me, or any incumbent in the diocese of New York, to enforce or to obey the laws of the Church of England.

The rector of the Church of St. Mary the Virgin possesses my respect and confidence, and though his modes of worship may be as little to my taste as to yours, he is not following them without my privacy and knowledge.

I have advised him, therefore, to apply for a detail of police and have instructed him, in case you and your followers venture in any way to interrupt or interfere with his services, to direct the police to throw you and your associates into the street. Happily, we have a law in the State of New York which deals summarily and effectually with disturbers of public worship.

Upon receipt of Bishop Potter's letter Mr. Fillingham penned another one in reply and gave it at once to the press, as he had done the first one:

Reverend Sir:—I am in receipt of your extremely violent and insulting letter of yesterday's date. I suppose so extraordinary a production was never before penned by a professedly Christian minister.

You are, or affect to be, unaware that open letters are frequently written to public men. You are also unaware, apparently, that the church of which you are an officer has declared that she has no intention of differing in anything from the doctrine, discipline, and worship of the Church of England. I suppose you are also unaware of the fact that the ritual of St. Mary the Virgin does differ absolutely from that discipline and worship.

I will not follow you in your own choice of expressions and describe them as "lunacy," but it is certainly a singular exhibition of ignorance.

I note that you condone and are privy to the illegalities and idolatry practiced by the rector of St. Mary the Virgin. I also note your threat of physical violence—that you, a minister of the gospel, advise another minister to "throw" us into the street; but I can assure you that no threat will affect those who are prepared not only to act, but to suffer in the cause of Protestantism.

Mr. Fillingham has returned to England but says he will go to the States in February and conduct a Lenten mission in the interest of Protestantism.

A JUDICIAL DECISION.

An interesting judicial decision has just been given in Tokyo. It relates to the payment of income tax. The Nippon Yusen Kaisha contended that the assessment of its income for the purposes of this impost for the two half years ended in September, 1902, was excessive, and being unable to get the justice of its protest acknowledged by the Tokyo Tax Inspection Office, the Directors

of the Company carried the case into the Administrative Court. What the Directors claimed was that a shipping company's taxable income should not include the sum set apart on account of reduction in the value of ships, the sum set apart for insurance of fleet, the sum set apart for major repairs of vessels and the sum set apart for wear and tear of buildings. These monies the Directors would have treated entirely apart from the net profits constituting taxable income, whereas the Tokyo Office included them all in that income. The ruling of the Court was this:—"The procedure of the defendant (the Tokyo Tax Inspection Office) in regarding as profit includible in taxable income the funds set apart on account of depreciation of fleet and depreciation of buildings, is hereby reversed, and the defendant will take proper measures with respect to the money thus collected. But the application of the plaintiff (Nippon Yusen Kaisha) to have excluded from its taxable income the funds set apart on account of insurance and major repairs of vessels, is rejected." Thus each side came off with divided honours.

The Toyo Kisen Kaisha also was a plaintiff before the same Court on a similar ground. The Directors objected to be taxed on account of their depreciation fund, their major-repairs fund and their rewards fund. The Court granted the application in the matter of the first-named fund, but declared the two others to be taxable.

This is a question with reference to which opinions will vary. For our own part, we fail to follow the Court's reasoning. The taxable income derived by an individual from any business in which he engages is generally understood to be the income available for purposes of personal or family expenditure. But funds set apart from earnings for purposes of insurance and for major repairs of vessels seem to belong strictly to the category of running expenses. The arguments forming the basis of the Administrative Court's decision are not published, or possibly the matter would be more intelligible.

THE ASHIWO MINE.

The Government has issued a number of instructions to Mr. Furukawa, proprietor of the Ashiwo mine, requiring him to take a variety of measures for the purpose of averting the injury caused by the working of the mine. These instructions are based on the recommendations of a committee of investigation officially appointed last year. The details have no interest, and may be summed up in the statement that the mine-owner is required to construct ponds, build embankments, cut drains and adopt various other measures of a like nature. It is to be hoped that this course will prove effective. The authorities have more than once endeavoured to remedy the evil.

The *Nichi Nichi Shinbun* calculates that the expenditures actually required for carrying out the measures ordered by the Authorities in connexion with the Ashiwo mine will be 400,000 yen, and that if the loss involved by suspension of the works be included, the total outlay will amount to 700,000 yen. Even such steps will not remove the cause of complaint, says the *Yomiuri Shinbun*, which recommends that an extra tax be imposed on the mine and that the proceeds be devoted to reducing the taxes paid by the sufferers.

THE "KOKKA."

The "Kokka" is now a really attractive object to foreign lovers of Japanese art. Technically it has always been an excellent publication—well selected subjects, beautifully executed illustrations, fine paper, tasteful get-up and an intelligent text. But in former times the pictures alone appealed to the foreigner, the descriptions that accompanied them and even the names of the painters, sculptors or other artists, being hidden in ideographs. Now, however, an English text has been added. It is an eminently satisfactory text, just a trifle emotional, but abounding in information which is clearly and succinctly set forth. A less imposing publication than the *Shimbi Daikan*, which, contrary to all expectation, continues to issue steadily from the press of its enterprising projectors in Kyoto and has now reached its ninth volume, the "Kokka" has the advantage of appearing monthly and of being much less expensive, the annual subscription being only 22½ yen, or, say, 45 shillings. Probably there is no cheaper magazine of art in the world, since for less than four shillings one obtains a work of noble proportions with six full-page pictures, some in colour, and with engravings in the text. The May and June numbers are now before us. In the former we have faithful reproductions of fine pictures from the brushes of Raiju, Eshin, Sesshu, Taigaido, Ikeno and Keibun, a photogravure of a wooden image said to have been carved by Kukai, together with three essays, the first on the Ideal Representation of Kshitigarbha, the second on the Myōshinji Bell, and the third on the Origin of Landscape Gardening in Japan. Of the six plates in the June number, three show pictures by celebrated Chinese painters, two reproduce drawings by Oguri Soritu and Matsumura Goshun respectively, and there is finally a representation of the wonderful silver crown of Amoghapasa Avalokitesvara. This crown, which dates from the 8th century, is of silver. It is 2 ft. 2 in. in height, a grand specimen of chiselling a *jour*, with profuse addition of emeralds, agates, green crystals, pearls and other gems. During nearly 12 centuries the crown, resting on the head of an image over 13 feet high, remained almost hidden from view in the darkness of the shrine enclosing it. We learn from it to what a high point the glyptic art in metals had already been carried in the 8th century. The *Kokka*, we may add, is published at No. 10 Yazayemon-cho, Kyobashi-ku, Tokyo.

THE STOLEN BONDS.

A very silly robbery of public bonds was made last October by an official of the Finance Department. He made away with 42 bonds, each of 5,000 yen face value. All the bonds were useless for purposes of exchange, some of them having been rejected on account of typographical errors, and the rest having been already redeemed. Oike, the thief, nevertheless managed to raise money on the security of the paper. Confronted by the approaching maturity of his obligation, he contemplated suicide, but finally decided to make confession. The bonds not having passed out of the possession of the money-lender who took them as security, no inconvenience will be caused to the public by the incident.

On inquiry at the Department of Finance we learn that no reliance can be placed in

the statements made by Japanese journals and reproduced in these columns on the 22nd instant to the effect that uncertainty exists as to the whereabouts and the numbers of several of the missing bonds, and that a large volume of these securities is affected. The fact is that the whole of the 42 bonds which were abstracted have been found, and that there need not be any uneasiness among the public. We are informed, indeed, that the talk of 2 million yen worth of bonds being affected and of confusion among bond holders is unadulterated nonsense.

NOTES ON CURRENT EVENTS.

It is stated that the new lines to be opened before the close of the present year are as follows:—

Line	Length.	Date.
North O-U Line (Akita to Wada section).....	8m. 18c.	15th Aug.
In-Yo Line (Mikuriya to Yatsushashi section).....	11m. 4c.	do
Kagoshima Line (Yoshimatsu to Yokogawa section).....	8m. 5c.	10th Sep.
South O-U Line (Shinjo to Nii-machi section).....	9m. 48c.	Nov.
In-Yo Line (Yatsushashi to Matsuzaki section).....	13m. 10c.	Dec.
Kure Line (Kure to Umida).....	12m. 33c.	do
Chuo Line (Kofu to Nirazaki section).....	7m. 79c.	do

Total.....70m. 37c.

Tokyo newspapers add that although this record of work is not altogether unsatisfactory, the traffic returns of the lines do not offer much ground for congratulation. Last year the gross earnings of the State Railways were 17,586,502 yen, being 1,260,000 yen larger than the earnings in 1901. It would appear from this increase that the first addition made to railway-passenger fares in 1899 did not seriously affect traffic, though one can only conjecture how much larger the earnings would have been had the old schedule of charges been retained. Last year, again, there was a second enhancement of fares, and the expectation is that it will produce a bad effect. In April, May, and June, indeed, the earnings of the lines showed an increase of from 300,000 yen to 400,000 yen compared with the record for 1902, but that is attributed to the Osaka Exhibition, and the prediction now is that a steady decline will be witnessed during the second half of the year. Some comfort is derived, however, from the returns of goods' traffic, which are said to be steadily increasing.

It appears probable that the public will soon see a settlement of the long outstanding claims preferred by Japanese subjects whose buildings were burned in connexion with sanitation measures in Hawaii. The Committee appointed to consider the matter recently carried its investigations to an end, and the business of paying the claims commenced on the 20th of June. The work will be spread over a period of three months from that date, and any claimant failing to receive his due in that time, is to take whatever steps may seem necessary, acting with the advice of his consul.

Mr. Stead's essay on the science of conquest has opened the eyes of the *Yomiuri Shinbun* to a consciousness of the fact repeatedly pointed out in these columns, namely, that among the progressive achievements of civilized nations must be placed the science of conquest by railways and banks. Our Tokyo contemporary recalls the circumstance that a Chinese philosopher—Sun Tze—, who flourished 2,000 years ago, laid down the principle that the esoterics of military

science is to conquer without fighting, and that the next best thing is to conquer by fighting. The *Yomiuri* thinks that, for various reasons, chief among them being defective diplomacy, Japan can not follow the highest and most refined programme, and must therefore have recourse to the alternative of fighting. But it seems to us that Japan is perfectly competent to adopt the former plan. Indeed she is adopting it in Korea, as Mr. Stead points out, again echoing our words. Russia is the most striking exponent of the device, but Japan is having a "look in," and her doings in Korea have doubtless attracted a great deal of attention in St. Petersburg. The Russian statesmen appear to have moulded their Yalu-Valley doings on these lines. It will be Japan's egregious fault if she allows herself to be effaced in that most important part of the peninsular empire.

Marquis Ito has been appointed to the post originally held by him as Chief of the Office for Investigating the Imperial System. Since the Marquis resigned this office at the time of assuming the leadership of the *Seiyukai*, there has been no Chief of that Office, the duties of the post being discharged by the Vice-Chief, Viscount Hijikata. This re-appointment is made by the *Official Gazette*, and it is also journalistically reported that the Marquis has been nominated Tutor to the Prince Imperial and Financial Adviser to the Imperial Household.

It is stated that on the 15th instant a new comet was discovered by the Observatory at Azabu. The comet is one degree larger than that which visited us last year. Its present place is some twenty degrees further north than the latter, between the constellation of Sigma and Lyra. The tail is forked and very long, and the comet is moving with great velocity. It will soon be visible to the naked eye in the evening.

The members of the Kojun Club, numbering about 92, met on the 17th instant in the Imperial Hotel to entertain Mr. Kawaguchi Ekai, whose visit to Lassa has excited so much interest in Japan. The Kojun Club is a very old institution. It was founded by the late Mr. Fukuzawa in connexion with the Keio Gijuku, the leading idea being to obtain a place for the interchange of ideas between men of note. On the roll of membership are now found many names of publicists illustrious in every walk of life. There was a display of the various articles brought back by Mr. Kawaguchi from the regions through which he had travelled, and truly when we read the long list we are perplexed to understand how a man flying for his life from Lassa, as Mr. Kawaguchi was obliged to do, can have succeeded in transporting so much gear. The traveller delivered a lecture, said to have been most interesting, in which not only were his own adventures described in detail, but also much ethnological and religious information was given.

The number of persons now in jail in Chiba Prefecture on charges of bribery and corruption is 14. They range from a secretary of prefecture and a member of prefectural assembly to very minor officials. Some are implicated in the text-book trouble and others in misdoings connected with public works. According to the *Chiuo Shimbun* these troubles have been precipitated by political dissensions. A public procurator *lie* with the Progressists took for associate a newspaper editor, and the latter

acting as informant, the former as judicial official, several charges were formulated and arrests effected. But the *Chiuo* does not attempt to pretend that evil deeds were not done by the incriminated persons, and unless that can be established, we do not see that it much matters what may have been the political complexion of the prosecutors and detectives.

The Emperor has presented a sum of a thousand *yen* to the Welcome Society in recognition of its long and useful efforts to promote facilities of travel in Japan.

There have been several arrests in Chiba prefecture of local officials and members of the communal assembly. Tokyo newspapers talk as though some scandal of large dimensions had been unearthed.

The number of text books that have to be prepared in Japan for the use of the various schools is very large. It amounts, according to a recent calculation of the authorities, to 29,850,000.

We read in Tokyo journals that the draft of the revised Code of Civil Procedure is now ready for submission to the Diet next session. It consists of 10 sections comprising 1004 articles, the increase in the number of articles as compared with the present Code being 199. From the fragmentary statements of our vernacular contemporaries it is difficult to form any clear idea of the changes introduced or the improvements effected, but as this draft has been very fully examined by practising barristers and men of business, there appears to be considerable confidence in its quality. We can not learn whether it corrects the serious defects of the present system in the matter of postponements and delays.

The Tokyo Chamber of Commerce, under the presidency of Baron Shibusawa, is interesting itself actively in the policy of protection recommended by the united Chambers of Commerce at their recent meeting in Osaka. With Baron Shibusawa is prominently associated Mr. Okura Kihachiro. Speaking broadly, the line they take is that articles which can be produced at home should have the benefit of tariff discrimination against competing articles from abroad, and further should enjoy the privilege of being preferentially used as far as possible for State enterprises. They further contend that special facilities should be given to Japanese exports, such facilities to take the form of cheap rates over railways and banking assistance. A more minute statement of the programme is promised.

It would seem that the suicidal mania created by the death of Fujimura Misao at the Kego cataract has not subsided. In addition to the six youths who subsequently precipitated themselves over the precipice into the whirlpool, another is now suspected of the same madness. He was an intimate friend of Fujimura, and he has disappeared leaving a letter which says that, weary of the world, he has gone to his death. His age was 23.

The English autumn manœuvres are to take place in the first half of September. Hitherto Japan has not sent any officers to observe British manœuvres, except the Military Attaché of her Legation in London, and the British Government has not given notice to the Japanese War Office on any occasion of such manœuvres. But things are different

now. Due notice has been given, and Japan has told off three officers to attend, namely, Colonel Oka and Lieut.-Colonels Koike and Furumi. They will leave Yokohama by the *Kaga Maru* on the 28th instant.

Mr. Amenomiya's opposition to the amalgamation of the Tokyo Street Railway and the Electric Tram Railway seems to be gathering force. The great contention of the opponents of amalgamation is that such a measure would not be of public benefit, inasmuch as whereas the Tokyo Street Railway Directors propose to have a uniform charge of 3 *sen*, the Tram Directors contemplate a scale of charges ranging from 1.5 *sen* to 8 *sen*. Of course as between these two systems there can be no manner of doubt that the former would be much more beneficial to the travelling public. But will any one be found simple enough to imagine that the directors of such an enterprise are influenced by altruistic considerations of public welfare? We can not pretend to such credulity. One thing is certain, however, namely that Japanese monopolists are public enemies. Since the Shinagawa Electric Light Company was amalgamated with the Tokyo Electric Light Company, the original clients of the former find their charges increased by just 250 per cent., and are exposed to the pleasure of having the lamps lapse into darkness about 3 times a week on the average. Everything savouring of the organization of a monopoly ought to be vehemently resisted by the citizens.

Here is a little sketch which, under the above heading, appears in the *Berliner Börsen-Courier* :—

8 a.m., Jump out of bed; 8.4, Bathe and shave; 8.15, Swallow breakfast and scan morning paper from end to end and say "Yes" and "No" four or five times to the wife; 8.21, Rush to the station; 8.25, Wait one minute for train and swear at lack of punctuality on the line; 8.50, Rush into office, growl at three clerks who are three minutes late; 9 a.m. to 12.30 p.m., Arrange important piece of business, telephone eight times, write forty letters, and see ten people; 12.34, Rush to restaurant; 12.36, Naturally obliged to wait fifty seconds for waiter, hastily swallow some cold meat, a piece of pudding, and a cup of hot coffee, thereby wasting 1 minute 30 seconds; 12.42, Back at office; 12.50 to 6 p.m., More business, telephone twelve times, see eighteen people, answer four telegrams, and write fifteen letters; 6.15, Rush to station and catch train as it begins to move; 6.45, Rush into dressing-room, change in three minutes; 7 p.m., Irritable, since dinner is two minutes late. One hour at table; terribly dull; very nervous; 8 p.m., Theatre; after second act leave wife in her stall and go to club; 9.40, Whist at club; 10.15, Whist slow, try bridge; 12 midnight, Home; meet wife on the steps, say good-night, jump into bed, snore.

Japan has compensations infinitely preferable to this, we think.

Telegrams announce that the *Kasagi* ran on a rock near Tsuno-shima near Bakan on the 22nd instant. The ship was on her way to Ominato in Awomori, where a number of ships are now assembling. Nothing is stated as to the ship's condition or the probability of getting her off. The *Kasagi* is a steel cruiser of 4,978 tons.

SHIP ASHORE.

The American ship *Atlas*, Captain McKay, from New York on April 1st for Yokohama went ashore, during thick weather, near the middle fort on Futsu on Wednesday evening. Assistance has already been sent to her and it is expected that she will be floated without much delay.

The *Atlas* made the passage from New York in 111 days, which is considered one of the quickest passages on record.

RUSSIAN TROOPS.

THE news is confirmed that Russian troops are being transported to Manchuria in great numbers; such numbers that the railway officials decline to receive Chinese passengers. As the troops arrive they are sent southward, and it is reported that four train-loads have already reached Ta-sihkiow, a town midway between Mukden and Liaoyang. Again, too, we hear of the construction of barracks for 20,000 troops at Port Arthur. This military movement may be represented as the outcome of the Russian Government's recently announced desire to test the carrying capacities of the Trans-Asian road. It is not the business of any journalist to take a sinister view of such incidents. But we must at least assume that the Russian Government is acting with full cognisance of the influence these proceedings can not fail to exercise upon public opinion. More than three months have now elapsed since the date when the military evacuation of the two southern provinces of Manchuria should have been completed, had Russia fulfilled her treaty obligations. But instead of evacuation the world sees thousands of fresh troops pouring into these very districts. Not only, therefore, is the treaty ignored but it is defiantly ignored. Very likely when Russia pledged herself to withdraw from Manchuria at definitely fixed dates, she undertook more than human nature could be expected to perform. That, however, is the psychological side of the problem. The hard facts are that she seems quite indifferent to public opinion, and that she is taking a step in the face of which any protestations of desire to observe conventional obligations must lose all value. The world's interest in such doings centres not so much on the fate of Manchuria, which has very unequal moment for the various Powers, as on the danger that the patience of some of the onlookers may be strained to breaking point by the application of tests so drastic. Nothing succeeds like success. Thus far Russia has been successful, and the subjects of an empire built up by a series of similar aggressions are bound to remember when the impulse of criticism seizes them, that their own dwelling is of glass. But there had always hitherto been associated with Russia's preliminary processes a measure of conciliatory tact which softened the hardness of her final achievements, whereas now she seems to have thrown tact to the four winds of heaven, and to be flourishing her gauntlet in the very faces of the Powers most likely to be exasperated by the token. Her line of action in northern Korea, conceived and carried into execution at the moment when the Manchurian problem was becoming acutely painful, may have been intended as a counter-irritant, but will certainly be classed by history as part of a series of doings whose cumulative effect must overtax the forbearance of the most long-suffering spec-

tators. Even professions of good intention are soothing, though in reality they may be as worthless as the pavement of hell, but in the face of actual events the issue must soon be carried beyond the region of professions and beyond the region of all kinds of amicable conference. Russia does not desire that catastrophe, we are persuaded, and she ought therefore to remember that she has to do with nations not made up wholly of Jons.

RUSSIA IN TURKESTAN.

IT is shrewdly remarked by leading Tokyo journals that the sum of two million taels which Reuter reports to have been lent, or to be on the point of being lent, by the Russo-Chinese Bank is connected with a scheme propounded some time ago by the Governor of Sinkiang. According to the system hitherto prevailing, Turkestan has been garrisoned by troops sent from China proper, and the expenses thus incurred have been defrayed by taxing the provinces. This tax has always been very unpopular, the average Chinaman not being easily persuaded of the necessity of garrisoning a distant region like Turkestan. Therefore the Governor of Sinkiang conceived the idea of organizing a local militia, which, being called out for a brief period only in each year, the men having leisure in the interval to devote themselves to farming pursuits, would involve comparatively small outlay. For the equipment of such a force, however, an initial outlay of some two millions of taels would be required, and the Peking Government, though approving of the Governor's suggestion, had no disposition to put up the money. It was therefore decided that steps should be taken to raise a loan in Shanghai, but the strong probability is, according to the view of our Tokyo contemporaries, that the *provenance* of the taels had already been arranged with the Russo-Chinese Bank, and that the interval which has been suffered to elapse between the formulation and the consummation of the scheme is an affair of mere decency. It need scarcely be said that this is regarded as another example, and a very striking example, of the modern science of conquest by means of railways and banks. English banks and English capitalists have lent money to China time and again. But such transactions have been purely in the way of business: they have been free from political taint of any kind. The loan on account of Turkestan, however, is differentiated by the condition attached to it: the condition that in consideration of remitting the interest Russia shall enjoy certain special privileges in Turkestan. That places the transaction at once in the category of diplomatic coups, and lends some colour to the idea of journals like the *Jiji* and the *Asahi*, which now reckon Turkestan as having been brought within the sphere of Russian influence. Russia is certainly affording a

fine spectacular display for the gallery of onlooking nations. Her activity is stupendous, and to find any parallel for the empire-building achievements of her restless agents, it is necessary to turn back many pages of history. As for feats like this last, however, jealousy alone can make them unsightly. The game of national aggrandisement having now been brought within reach of the instruments hitherto regarded as mere factors of commercial or industrial expansion, we have no business to grumble because Russia invests money in the reversion of the Turkestan estate, just as a merchant puts his capital into a project of distant maturity. It is only the vastness of the forward movement that calls for astonished comment. Russia may be said to be advancing along a front that extends from the Gulf of Tartary to the Mountains of Heaven. There has been nothing on a similar scale since history began to be written.

ERRORS.

WE observe in the *Japan Gazette* of the 16th instant some statements so curiously erroneous that they call for a word of contradiction. In the first place, the *Gazette* represents us as pronouncing the Japanese Courts of law to be superior to the British Consular Courts which they replace. "Japanese judges and the whole personnel of courts, public prosecutors, registrars, lawyers and the minor officials with whom the public must do business of various kinds, are not to be compared with the British Consular Court officials, higher and lower, whom they displaced. The *Mail* has to say that they compare well, but that does not matter; the truth is the truth nevertheless." Such are the *Japan Gazette's* words. So far as they relate to anything ever stated by this journal, they are absolutely false. We have never either directly or indirectly compared British Consular Courts with Japanese legal tribunals to the disadvantage of the former. On the contrary, in the old days when the question of treaty revision was on the tapis, we frequently insisted that Great Britain was one of the very few Powers which had discharged her responsibility by establishing in Japan tribunals fully equipped and thoroughly competent to exercise the jurisdiction of which Japan had been deprived. To allege that we ever wrote anything which could possibly be construed as claiming for Japanese law courts superiority to British Consular Courts is a reckless falsehood.

In the second place the *Japan Gazette* affirms that "when Japan asked foreign powers to voluntarily abolish the fairly satisfactory consular courts, it was distinctly and emphatically stated that the conditions that an efficient interpreting staff should be provided"; and that "without this promise foreigners certainly would never have consented to come under Japanese jurisdiction." No such condition was ever made; no such

promise ever given. Here also the *Gazette's* allegations are altogether false.

In the third place the *Japan Gazette* says:—"The Japanese Government promised, and the *Mail* as its quasi-foreign mouth-piece vehemently asseverated, with much rhetorical flagellation of our poor selves, that the Government then had actually in training an ample staff of interpreters to meet this requirement which they admitted to be fairly called for; and they said that when the time came they would be ready with fully qualified interpreters in sufficient number, so that foreigners would be in that matter certainly no worse off than before." The *Japan Mail* never said anything of the kind. Prior to this assertion made by the *Japan Gazette* we had never heard of such a thing as "an ample staff of interpreters" put under training by the Japanese Government to meet the requirements of the law courts. We have more than once ridiculed the extravagant notion that the Government of Japan should be required to do what is not expected of any other Government in the world, namely, to provide and attach to its courts of law a staff of men qualified to act as interpreters of every language spoken in Europe, and that too for the sake of a small community of foreign settlers numbering less than one in fifteen thousand of the native population. To say that we ever attributed to the Government of Japan any such purpose or any such preparations, is an unqualified falsehood.

It is necessary to use very plain language in dealing with allegations so reckless as those of the *Japan Gazette*. Concerning the question of interpreters for the Japanese law courts, it is one of much perplexity. To interpret satisfactorily for the purposes of a criminal or civil investigation demands linguistic competence of a very high order. There are not many Japanese fitted for such a task, and the number of foreigners is still smaller. Possibly if the Courts were in a position to offer a sufficiently tempting fee, they could obtain qualified men when occasion arose, and it would not, we think, be extravagant to ask that they should have that competence. But nothing can be gained by approaching the problem in an unreasonable spirit, and by attempting to establish the groundless pretence that a treaty obligation was imposed on Japan in this matter.

It must be confessed that the very worst of luck pursues the cause of the anti-revisionists. While the question was a living issue their champions disfigured it by intemperance and exaggeration of the most unsightly character, and now the much battered mummy is drawn from its ignominious tomb to be once again made the stalking-horse of wasteful and unpicturesque falsehoods.

JOURNALISTIC METHODS.

IN its issue of the 7th instant the *Kobe Chronicle* published an article—which has probably been read with considerable

amusement—renewing its attack upon *The Times* and criticising in very strong terms the methods of the great journal. Since the question of newspaper methods is thus brought upon the *tapis*, it may not be amiss to relate a few facts.

On the 22nd or 23rd of last June the *Kobe Chronicle* reproduced from the columns of the *Saturday Review* a letter remarkable for extreme silliness; a letter whose writer virtually laid down the proposition, and illustrated it by his own practice, that no encyclopedia is worth possessing ten years after the date of its issue from the press. To this very foolish letter, which it apparently endorsed, the *Kobe Chronicle* appended the following note—we quote from the columns of a Yokohama contemporary:—

When the *Chronicle* was asked for terms for an advertisement of the *Times* reprint of the *Encyclopædia Britannica*, we informed the agent in Japan that no such advertisement could appear in our columns unless it was clearly stated therein that the volumes then being sold were the ninth edition and must be supplemented by eleven new volumes in order to bring the information contained therein up to date. Needless to say we heard no more of the matter. But if an English literary man describes the advertisements in the *Times*, for consumption by the English-speaking public, as "fraud," it would be interesting to know how he would characterise advertisements in Japan pushing the ninth edition without making it clear that a further eleven volumes had to be purchased to bring the work up to date.

This is not an ambiguous note. It formulates in very plain terms a charge of fraud against *The Times'* agent in Japan, and it constructively includes in the charge all journals—our own among the number—which published a certain advertisement offering copies of the ninth edition of the *Encyclopædia Britannica* to Japanese and foreigners in Japan. The alleged fraud consisted in seeking to deceive the public as to the nature of the book advertised: seeking to persuade them that instead of being the ninth edition, it was, in fact, the tenth; or, in other words, that it included the 11 supplementary volumes recently compiled, whereas it did not by any means include them.

If there be persons so deficient in the elementary instincts of sound business as to suspect any agent of such a shallow trick, they must be very rare, and still rarer must be those capable of attributing such suicidal antics to the representative of a journal which, for over a century, has been the leading newspaper of the world. Of course it was wholly impossible that any one could labour under the faintest misapprehension as to the nature of the work offered for sale. For the advertisement stated it to be "The *Times'* reprint of the ninth edition;" said that the reprinting had been done three years previously, and that the original had been on sale long prior to that time; explained that 44,000 copies had been disposed of since the reprinting, and that the reprint was the authoritative Edinburgh edition, "not the mutilated pirated American edition," and added that though a few copies had already been sold in Japan their price had been much higher than that at which the work was now offered. If, with these

explicit statements and explanations staring him in the face, any reader of the advertisement could be for one instant betrayed into the fancy that in buying what *The Times* had been selling for three years as a reprint of an older book, he would acquire at the same time a copy of a supplement compiled within the past three years and not yet actually on the market, he must be either an imbecile or a lunatic.

So much for the first advertisement, which began to appear in foreign and vernacular journals in Japan from December 12th, 1902.

Now simultaneously with the publication of this advertisement, there were circulated by *The Times* agent twenty thousand copies of a circular, from which we quote the following, italicizing certain portions:—

But *The Times* did not undertake merely the reprinting of this unrivalled work. A new and in some respects a more important undertaking was soon begun. In order to keep pace with the extraordinary advances in science which have been made during the last decade and a half of the nineteenth century, supplementary volumes were planned, the object of which was to record all that has resulted from the multiplied experiments of scientific men in Europe and America, during a period which has witnessed perhaps greater scientific, industrial and mechanical progress than any other. These new volumes with the 25 volumes of the Ninth Edition, will constitute the Tenth Edition of the *Encyclopædia Britannica*. The first of the new volumes are already in the hands of subscribers in England, but owing to the difficulty we have found in supplying the wants of our new and old subscribers at home, we can not promise delivery of the new volumes in Japan before the first of May next.

The Times' new offer is this:—

- (1.) To despatch to all responsible persons the 25 volumes of the *Encyclopædia Britannica* (Ninth Edition) on receipt of a preliminary payment of 5 *yen*. Subscribers who prefer may pay for the work in full, realizing a discount from instalment prices of about 10 per cent.
- (2.) To extend the period of payment to nineteen months from the date of delivery.
- (3.) To accept as monthly payments 10 *yen*, payable regularly on a given day each month.
- (4.) To permit subscribers to purchase not only the 25 volumes of the Ninth Edition at the London price (which is half the publishers' price,) but to enjoy the right to purchase the supplementary volumes, as they shall be issued, also at the London price, which is 40 per cent. less than the net catalogue price at which the same volumes will hereafter be supplied.

This circular having been translated into Japanese, twenty thousand copies of it were distributed through the post simultaneously with the publication of the first newspaper advertisement, and of the English version about a thousand were sent to foreign residents, including the editor of the *Kobe Chronicle* and the members of that journal's staff.

Therefore, in the middle of December, 1902, the editor of the *Kobe Chronicle* knew that *The Times'* agent was scattering broadcast in Japan a circular which explicitly and emphatically informed the Japanese and foreign public of the facts that a supplement to the *Encyclopædia* was in preparation in England, that it would be offered at a later time than the 25 volumes of the ninth edition now offered, and that it would bring the work up to date. Of all this the editor of the *Kobe Chronicle* had certain knowledge in the middle of December, 1902.

In the middle of January, 1903, another circular was issued. It contained a translated reprint of a leader written by *The Times* with reference to a banquet given in London

on November 21st, 1902, to celebrate the completion of the Supplement. From this second circular, 22,000 copies of which were distributed, we take a clause:—

To those who already possess the *Ninth Edition*, we offer the eleven new Supplementary volumes at 40 per cent. less than the catalogue price hereafter to prevail in Japan. These new volumes are now in course of distribution in England and will arrive in Japan about 60 days from now.

More than a fortnight after the date of this second circular and more than six weeks after his receipt of the first, the editor of the *Kobe Chronicle* was handed a letter from *The Times* agent inquiring about his journal's charges for advertising. He knew then perfectly well that from the time of first publishing newspaper notices—notice incapable of misleading any one save a fool or a lunatic—*The Times*' agent had been sending out thousands of circulars in Japanese and English which contained full explanations about the Supplement and about the terms on which it would subsequently be offered to purchasers of the ninth edition. Nevertheless he directed his manager to say that no advertisement could be published in his journal unless it "clearly stated that the volumes then being sold were the ninth edition and must be supplemented by eleven new volumes in order to bring the information contained therein up to date."

The letter containing this proviso was dated February 5th, 1903, and probably reached *The Times* Agent on the 6th or the 7th. Now on February 4th, that is to say the day before the manager set down his editor's words as quoted above, there was sent by *The Times*' agent to four foreign and nine vernacular journals in Japan an advertisement from which again we extract a paragraph:—

THE SUPPLEMENT.

The edition of the *Encyclopædia Britannica* now offered is the latest Edinburgh 9th Edition, printed from the original plates and containing all the original illustrations, maps, plans and diagrams. It constitutes, in itself, an admirable, and always valuable, library of reference. It is the best and without doubt the most comprehensive reference work in the world. The last volume was issued by the publishers, Messrs. A. & C. Black, in 1889. In order to bring up to date those subjects to which scientific discovery and experiment during the closing years of the 19th century had added new knowledge, "*The Times*" three years ago began to prepare supplementary volumes. These new volumes in no sense supplant or supersede the 9th Edition. The volumes of the 9th Edition, for another generation at least, must remain unrivalled and unassailable. But the new volumes will supplement the old by adding to the history of the past the truths of the present. The two sets of volumes—the 25 volumes of the 9th Edition and the 11 volumes of the Supplement—will constitute the Tenth Edition. As the Supplement is not yet complete, delivery cannot be promised in Japan until May next. All purchasers of the 9th Edition will be entitled to purchase the Supplement at 40 per cent. less than the future net catalogue price.

It is the dates that enhance the curiosity of this strange story. Before the end of the first week in February the editor of the *Kobe Chronicle* knew that in four foreign and nine Japanese journals an advertisement was appearing which told all about the Supplement and about its relation to the ninth edition. He further knew that this advertisement had been prepared and sent to several of the 13 journals before his own provisional letter had been even penned. He therefore knew, as a matter of absolute

certainty, that the proviso made by him could not possibly have prevented the insertion of an advertisement in the *Kobe Chronicle*, since an advertisement containing all the information for which he stipulated had already been despatched to several Japanese and foreign journals. Yet, on the 22nd or 23rd of June, that is to say four and a half months after learning that 13 other journals had published precisely the form of advertisement required by him, he deliberately penned a paragraph charging that *The Times*' agent had been deterred from advertising in the *Kobe Chronicle* because, to gain admittance to that journal's columns, he must have amended his advertisement in such a manner as to defeat his fraudulent purpose of deceiving the public. There can be no mistake about the nature of the accusation. After quoting the condition which he had imposed, the editor adds, "needless to say we heard no more of the matter," thereby plainly implying that rather than abandon a fraudulently deceptive form of advertisement, *The Times* agent refrained from advertising in the *Kobe Chronicle*.

No comment could enhance the significance of these plain facts. They constitute a shameful record of journalistic methods, rendered comical by the circumstance that the editor who thus disgraces himself has assumed the role of a censor of *The Times*.

THE TELEGRAPH QUESTION IN KOREA.

M. PAVLOW seems to be taking a strong line about the much talked-of Antung-Yong-Ampho telegraph. Tokyo journals report that he has addressed to the Korean Government a note claiming that when timber-felling privileges in the Yalu Valley were granted to a company consisting of Russian and Korean subjects, the concession carried with it the right of building railways, erecting telegraphs and constructing or repairing roads, all such operations being intimately connected with the prosecution of the main enterprise. He therefore alleges that in causing the telegraph poles on Korean territory to be pulled up the Seoul authorities have been guilty of an illegal act for which he claims damages, and if the Korean Government refuses to pay, the amount will be deducted from the royalty which the Company is pledged to pay the Government. Korea's answer to this protest has not yet been given.

The story sounds very incredible but as the *Fiji Shimpō* and the *Asahi Shimbun* publish it in virtually identical terms, and as they have both proved themselves accurate purveyors of Korean news, we can not refuse to attach some credence to it. Mr. PAVLOW's claim certainly seems most extravagant. Were its validity admitted, curious results would follow. For instance, a mining concession granted to a British syndicate in Szechuan, let us say, would entitle the syndicate to construct a line, or lines, of railway through the Yangtse Valley to any important centres where a

market offered for the Szechuan minerals, or to the mouth of the river, and would also entitle it to similar discretionary power in the matter of telegraphs. That is obviously ridiculous. No Government, when it allows its own subjects to cut trees in a forest, endows them, at the same time, with the right to build railways and lay telegraphs. Such a monstrous contention was never before heard of. And if a Government's grant to its own subjects does not admit of any such arbitrary extensions, how can it be held to do so in the case of foreigners? The matter does not admit of argument. A mere statement of the facts is sufficiently convincing. What inspires uneasiness, however, is that the Russian Representative should take such a line. So far as the building of railways or the erecting of telegraphs in the Yalu Valley is concerned, Russian enterprise is entitled to just as much consideration as the enterprise of any other nation. But no one knows better than M. PAVLOW how absolutely untenable is his claim that permission to do one thing involves permission to do several other things also: that, for example, permission to grow potatoes or peaches in Yunnan means permission to build a railway to Canton. In taking such a position M. PAVLOW appears to be deliberately pursuing the policy of exasperation which has unfortunately been adopted by Russian officials in their recent dealings with questions in northern Korea. He is well aware these strange doings must be interpreted by the light of Russia's general attitude towards the question of railways in foreign territory, and that did her subjects come into possession of lines in the Yalu Valley, the whole region traversed by these roads would be irrevocably converted into a Russian sphere of influence. He is also well aware that the Japanese nation can not suffer anything of that kind. We repeat what we have often said that no imperial interests acquired by Russia in Manchuria can weigh for an instant against the interests of self-protection that Japan possesses naturally in Korea. In connexion with Manchuria Japan may share her anxiety with other Powers; in connexion with Korea the danger touches her alone. It is alleged that M. PAVLOW has cited the Japanese line of telegraph from Fusan to Seoul as a precedent for the line his countrymen are building from Antung to Yong Am-pho, and it is further alleged that the Korean Government has consequently been induced to notify Japan of the necessity of removing the Seoul-Fusan wires. These latter were erected at the time of the war with China and their removal when peace was fully restored may have been contemplated. But it is obvious that if M. PAVLOW bases an argument on their existence he assumes an inconsistent position, for the claim that a timber-felling concession carries with it the right to construct railways and erect telegraphs is entirely distinct from, and is indeed in plain conflict with, the claim that Russia should be allowed to do what

has been specially permitted to another State. M. PAVLOW doubtless knows his own purposes. They may be pacific. They may be limited to the legitimate promotion of his country's commercial and industrial development. But they are assuredly most unfortunate, and if persisted in their issue can not be doubtful. We begin to think, most reluctantly but still inevitably, that all this sinister activity on the part of Russian agents in the Far East and all this calm disregard of treaty obligations, synchronise ominously with the completion of the military railway from Europe to Liaotung. It would seem as though Russia had waited only until she was ready. Yet how is such light-hearted disturbance of the peace reconcilable with the Tsar's noble and assuredly genuine sentiments in establishing the Hague Tribunal? His Majesty certainly desires to establish amity among nations but some of his Representatives abroad have failed, apparently, to appreciate the Imperial purpose.

THE JAPANESE IN MELBOURNE.

The Japanese officers and men of the training squadron seem to have had a really fine time in Melbourne, where they arrived on May 16th. In five consecutive issues of *The Age* we find many columns devoted to descriptions of the doings connected with their arrival, their stay and their departure. Although the labour party in Australia resent the idea of a Japanese element in the country's population, there certainly were no evidences of an exclusive spirit in the welcome given to Admiral Kamimura and his men. *The Age* speaks of this empire's flag as "the familiar and welcome Red Chrysanthemum (or sun in splendour)," which is certainly a novel description, but its heartiness redeems its error. Visits and return visits occupied the first three days of the ships' presence in harbour, and on the evening of the 18th the Lord Mayor and Lady Gillott entertained all the officers of the squadron at a reception attended by 1,200 people. Thereafter the programme consisted of a dinner at Malvern by Lady Hutton; an At Home at the Kew residence of Lady McEacharn; a reception at Government House; a dinner at Parliament House by the Premier; an athletic display at the Melbourne Athletic Club's rooms, where officers and men of the squadron as well as members of the Club took part; an At Home on board the *Hashidate*; and a dinner at the Naval and Military Club. Very appreciative notices appear in Melbourne papers about the ships and their armaments, the excellent order of everything on board, the appearance of the men and their splendid conduct on shore, not a single case of drunkenness or misbehaviour having been reported. Sir Malcolm McEacharn, who is now Japanese Consul in Melbourne, seems to have treated the visitors with extraordinary hospitality. On the night of the Squadron's arrival he entertained the Admiral, the captains and the officers at the Princess's Theatre, where they saw, "A Midsummer Night's Dream" and where the Admiral, rising in his box to acknowledge the hearty welcome given to the party by the audience, received "a splendid ovation." On the following day Sir Malcolm entertained all the officers at dinner, and on the following Wednesday Lady McEacharn gave an At Home which is thus described by *The Age* :—

Goathlands, Studley Park, was the scene of an enjoyable entertainment yesterday afternoon, when, at

the invitation of Sir Malcolm and Lady McEacharn, a large company assembled to meet Rear-Admiral Kamimura and the officers of the Japanese squadron. The house grounds are especially well adapted for entertaining on a large scale, and though a very large company was present no overcrowding marred the pleasure of the guests. Sir Malcolm and Lady McEacharn received near the main entrance, then guests the passing on through a series of rooms into the handsome hall which constitutes one of the features of the house. From there they went on to the drawing-room, the grounds or the refreshment rooms. Ample entertainment was provided throughout the afternoon. Under the direction of Madame Charbonnet Kellermann a concert was given in the drawing-room. The contributions to this were uniformly excellent, the singers including Madame Albertine Gay and Mons. Napoleon Boffard. Much pleasure was evidenced at the violin performance of Miss Maggie Fenelon and Mr. Maurice Kellermann. Mr. Maurice Kellermann was also heard to advantage in a violin and piano duet with Madame Kellermann. In the grounds mutual admiration went on between the band of the Japanese squadron and Piper Morrison with his pipes and bevy of young dancers in Highland costume. Its excellent band is a feature of which the visiting squadron is very properly proud. Admirably conducted, the band can hold its own with the large majority of military and naval bands elsewhere, which is high praise considering how recent is the adoption of European notions of music by the Japanese. When, to the strains of the pipes, the four dancers, two boys and two girls, executed various Highland dances the visitors applauded with absolute fervor. The young Japanese were specially delighted with the clever dancing of the bekkilt lads and lasses, while even the most superior of their officers exhibited very keen interest in the accessories of Piper Morrison's historic garb. The admiral himself regarded him with approving attention, it being made very evident that the picturesque in dress still appeals largely to our visitors. An item which attracted much attention was the tiny Japanese poodle brought by the admiral. Small enough to slip with ease into the average masculine pocket it was still intelligent enough to suffer much admiration cheerfully.

Though the social element predominated, the company was essentially a representative one—one of its features being the presence of a large number of men who rarely affect garden parties. Hanging over the entrance to the house was the Japanese flag, a fact which doubtless combined with magnificent Japanese tapestries inside, and Japanese plants outside, to make the visitors more at home than they would have been in any other private house about Melbourne.

There was of course a military review and there were also many minor events which need not be described, but our readers, Japanese and foreign alike, will be interested by the following account of the entertainment at the Athletic Club :—

The Athenæum Hall was packed last evening on the occasion of an athletic entertainment given by the Melbourne Amateur Athletic Club to the Admiral, the officers and the 180 midshipmen of the Japanese squadron. The Chief Justice, Sir John Madden, took the chair.

Half the excellent programme provided consisted of wrestling, fencing and exhibitions of swordsmanship by the Japanese. A 24-foot ring, around which the Japanese and English flags were entwined, was roped off below the stage, and here the fencing took place. On entering the arena, bare-footed and bare-legged, the competitors, went on their knees while they adjusted masks to protect the face and neck. Their waists were encircled with short cane corsets. One of the competitors was armed with a double-handed bamboo foil about 4 feet long; the other wielded a foil in each hand, one being much shorter than the other. As they were about to engage both uttered weird and wonderful exclamations, and they kept it up throughout the bout. Their dexterity in thrusting and dodging was marvellous.

An amusing combat followed between a sturdy Japanese midshipman armed with a two-handed bamboo sword and Mr. Fred. Youl wielding a single-stick. Both knelt and kow-towed, but once the signal to engage was given the Jap. sailed in like a human tornado. He uttered whoops and showered blows against which no ordinary singlestick could live ten seconds. Mr. Youl lost his helmet and broke his stick, but returned to the attack with such effect that the smiling Japanese referee gave the verdict "Both conquer" at the finish.

The visitors wrestling exhibitions were quite unique. Wearing short-armed loose fitting coats they came upon the stage, and took harmless arm holds. In this position they walked about, each waiting for an opportunity to trip and throw his opponent. Down they went time and again on the middle of their backs, hitting the boards with a terrific thump. But they apparently enjoyed themselves.

The most exciting event of the evening was an impromptu wrestling encounter between Buttan Singh, the skilful Indian, and Midshipman Hamano, champion of the Japanese squadron. As a concession to his opponent, the Indian wore a short coat. They took holds, but as Buttan Singh deftly kept his legs out of the way his opponent threw himself down and brought his opponent with him. For ten minutes they lay on the boards, neither being able to gain an advantage. The Jap. was the more skilful of the two, and, using his feet like hands and adopting positions that were amazing in their unconventionality, kept his opponent struggling desperately to avert a fall. The midshipman, a magnificently built athlete, finding that his opponent was not wearing enough clothing to enable him to secure a hold and swing him over, had nothing more to do than to laugh at the futile attempts of the Indian to gain the upper hand. The bout was undecided.

A sword display by a Japanese officer, boxing contests between Marshall and Cole and Corbet and Higgins, and an athletic display by "B" Battery Field Artillery helped to fill a splendid programme. At the close of the performance the visitors rose en masse and sang the Japanese national anthem, which was followed by "God Save the King."

THE BOOKSHELF.

Murray's Handbook for Japan.

The seventh edition of this work is now in the hands of the public. As we examine its pages the thought suggesting itself to us is a wondering query how wretchedly the section of the world interested in Japan must have fared before this now famous guide-book was in their hands. As to the debt owed by Japan to the compilers, it is inestimable and we therefore make no attempt to estimate it. The seventh edition, we learn from the preface, "has been revised throughout with minute care, more especially the Yezo routes and those in the northern portion of Japan proper, where the constant development of the railway system has called for a certain amount of re-arrangement. The same consideration has applied in a lesser degree to the central routes. A description has been added of the small islands to the south of Japan—Hachijo and the Bonins—which are now accessible by steamer; and the maps have been, some carefully revised, others entirely redrawn." This edition is dated May, 1903; the sixth bore date October, 1900. It is evident that the authors must be working perpetually and unremittingly to keep the work up to date. The book deserves the success that has attended it, for its compilers have been Sir Ernest Satow, the late Consul-General Hawes, Professor Chamberlain and Mr. W. B. Mason.

The Christian Daimyos:—A century of Religious and Political History in Japan. 1549-1650.

THIS work, already known to the readers of the *Japan Mail*, recently appeared in book form. As its preface announces, this new book is an abridgment of the religious and political history of Japan from the year 1549, date of the introduction of Christianity into this country, to its extinction which took place towards 1650. It shows the role which the numerous Christian Daimyos played from the religious and political point of view; it gives a true and unvarnished account of the conduct of the missionaries and foreign merchants then in Japan, and finally it rectifies a great number of errors, which nearly all Japanese historians and many foreign publicists have fallen into.

Though only an abridgment, the "Christian Daimyos" gives a clear and sufficient idea of all the memorable events which illustrated that epoch. At the end of the book, the author gives a list of the families of the Christian Daimyos, indicating what they were formerly and what has become of them to-day.

DEATH OF THE POPE.

His Holiness Pope Leo the Thirteenth, the 263rd occupant of the See of St. Peter, died on Monday. Since the celebration of the twenty-fifth anniversary of his Coronation, which took place on March 3rd last, various rumours have prevailed as to the condition of the Pope's health, the unfavourable reports, at length, by reason chiefly of their persistency, establishing a place in the public mind. But Roman Catholic people throughout the world were struck by the extraordinary cheerfulness and apparent strength displayed by the Pontiff for a man of his age, during the exceedingly trying ceremonies attending the celebration referred to; and more than once since—notably at his reception of King Edward of England, and later of the German Emperor—as if to disprove the rumours of his weakness, His Holiness seems to have shown that his enfeebled frame still retained sparks of its former fire and vigour. Yet it had been evident to the whole civilized world that this spiritual ruler over many millions was drawing near to the close of a long life—long, saintly, and full of work,—and that the end could not be far distant. It has come, and by no means unexpectedly, though none the less it will stir the world through all its borders. "History later will decide what rank Leo XIII. shall take among the great Popes," remarked a writer in connection with this year's celebration; "the Papacy has known glories as immaculate, lights as brilliant, powers as fruitful, influences as strongly pervading. It has never had a Pope of gifts so universal."

We do not know any appreciation of Leo the Thirteenth that is more interesting or one that more skillfully brings the man, the ruler, and the saint before the mental vision of the reader than the character study contained in Mr. F. Marion Crawford's *Ave Roma Immortalis*. He deals at the outset with the thirty and odd years that marked the long peace between 1815 and 1848, and says: Halfway through that time, about 1830, Joseph Mazzini founded the society of Young Italy in connection with the other secret societies of Europe and acquired that enormous influence which even now is associated with his name. Mazzini and Garibaldi meant to make a republic of Italy. The House of Savoy did not at that time dream of a united Italian kingdom. The most they dared hope was the acquisition of territory on the north by the expulsion of the Austrians. England and circumstance helped the Savoy family in their sudden and astonishing rise of fortune, for at that time Austria was the great military nation of Europe, while France was the naval power second to England, and through the Bourbons, Italy was largely under the influence of Austria. England saw that the creation of an independent friendly power in the Mediterranean would both tend to diminish Austria's strength by land and would check France in her continued efforts to make the shores of the Mediterranean hers. She therefore encouraged Italy in revolution and it is generally believed that she secretly furnished enormous sums of money through Sir James Hudson, Minister in Turin, to further the schemes of Mazzini. The revolution thus supported by England, and guided by such men as Mazzini and Garibaldi, made progress. * * *

Gregory the Sixteenth died in 1846 and Pius the Ninth was elected in his stead,—a man still young, full of the highest ideals and of most honest purpose; enthusiastic, a man who had begun life in military service and was destined to end it in captivity, and upon whom it was easy to impose in every way since he was politically too credulous for any age, and too diffident if not too timid for the age in which he lived. The only stable thing in him was his goodness; everything else was in perpetual vacillation. His private virtues made him a model to the Christian world while his political weakness made him the sport of his enemies. * * * He hesitated to the last, through a pontificate of thirty-two years; he out-reigned the "years of Peter," and he lost the temporal power. The great movement came to a head in 1848. Every one knows the history

of that year, when one Emperor, several Kings, and numerous princes and ministers scattered in all directions like men running away from a fire that is just going to reach a quantity of explosives. Pius the Ninth fled like the rest when his favourite Minister, Count Rossi, had been stabbed to death on the step of the Cancellaria. Some of the sovereigns got safely back to their thrones. The Pope was helped back by France and kept on his throne first by the Republic and then, with one short intermission, by Louis Napoleon. In 1870 the French needed all their strength for their own battles, and gave up fighting those of the Vatican. * * * During the long period reforms and improvements of every kind were introduced in Rome. The government of Pius the Ninth was paternal, and if he was not a wise father he was at all events the kindest of men. The same cannot be said of Cardinal Antonelli, his prime minister, who was the best hated man of his day not only in Europe and Italy but by a large proportion of Churchmen. * * *

The long Pontificate of Pius the Ninth came to a close almost simultaneously with the reign and the life of Victor Emmanuel, first King of United Italy, after the Pope and the King had faced each other during nearly a third of the century. On his death-bed the King earnestly desired the Pope's parting blessing but although the Pope gave it, the message arrived too late, for the old King was dead. Little more than a month later Pius the Ninth departed this life, and his successor, whose death many millions this day are mourning, received the almost unanimous vote of the Sacred Conclave at the first ballot.

Joachim Vincent Pecci, since 1878 Pope, under the name of Leo the Thirteenth, was born at Carpineto in the Volscian Hills in 1810, where his father, who had served in the Napoleonic wars, was a landed proprietor of considerable importance and the father of several children. Born and bred in that keen air he was a Southern Italian, but of the mountains, and there remained almost to the last something about him of the hill people. He had the long, lean, straight, broad-shouldered frame of the true mountaineer, the marvellously bright eye, the eagle features, the well-knit growth of strength, traceable even in extreme old age, and in character there was the well-balanced combination of a steady caution with an unerring, unhesitating decision which appears in those great moments when history will not wait for little men's long phrases, when the pendulum world is swinging its full stroke, and when it is either glory or death to lay strong hands upon its weight. But when it stops for a time and hangs motionless, the little men gather about it and touch it boldly and make theories about its next unrest. In the matter of physique there was indeed a resemblance between Leo the Thirteenth, President Lincoln, and Mr. Gladstone—long, sinewy men all three, of a bony constitution and indomitable vitality, with large skulls, high cheek-bones and energetic jaws—all three men of great physical strength, of profound capacity for study, of melancholic disposition and of unusual eloquence. It might almost be said that these three men represent three distinct stages of one type—the real or material, the intellectual, and the spiritual. From earliest youth each of the three was by force of circumstances turned to the direction which he was ultimately to follow. Lincoln was thrown upon facts for his education; Gladstone received the existing form of education in its highest development, while the Pope was brought up under the domination of spiritual thoughts at a time when they had but lately survived the French Revolution. Born during the height of the conflict between belief and unbelief, Leo the Thirteenth, by a significant fatality was raised to the Pontificate when the Kultur Kampf was raging and the attention of the world was rivetted on the deadly struggle between the Roman Catholic Church and Prince Bismarck—a struggle in which the great Chancellor found his equal if not his master.

The stiff mannerism of the patriarchal system, which survived until recently from the early Roman times, writes Mr. Crawford, gave the Pope that formal tone and authoritative manner

which are so characteristic of his conversation in private. His deliberate but unhesitating speech makes one think of Goethe's "without haste, without rest." Yet his formality is not of the slow and circumlocutory sort; on the contrary it is energetically precise, and helps rather than mars the sound casting of each idea. The Pope's voice is as distinctly individual as his manner of speaking. It is not deep nor very full, but considering his great age it is wonderfully clear and ringing, and it has a certain incisiveness of sound which gives it great carrying power. Pius the Ninth had as beautiful a voice both in compass and richness of quality as any baritone singer in the Sistine choir. No one who ever heard him intone the "Te Deum" in St. Peter's in the old days, can forget the grand tones. He was gifted in many ways,—with great physical beauty, with a rare charm of manner, and with a most witty humour, and in character he was one of the most gentle and kind-hearted men of his day as he was also one of the least initiative, so to say, while endowed with the high moral courage of boundless patience and political humility. Leo the Thirteenth need speak but half a dozen words with one glance of his flashing eyes and one gesture of his noticeably long arm and transparently thin hand, and the moral distance between his predecessor and himself is at once apparent. There is strength still in every movement, there is deliberate decision in every tone, there is lofty independence in every look. Behind these there may be kindness, charity and all the milder gifts of virtue; but what is apparent is a sort of energetic, manly trenchancy which forces admiration rather than awakens sympathy. When speaking at length on any occasion he is eloquent, but with the eloquence of the dictator and sometimes of the logician rather than that of the persuader. His enunciation is exceedingly distinct in Latin and Italian and also in French, a language in which he expresses himself with ease and clearness. In Latin and Italian he chooses his words with great care and skill, and makes use of fine distinctions, in the Ciceronian manner, and he certainly commands a larger vocabulary than most men. * *

All men who direct, control or influence the many have a right to be judged by the world according to their main deeds to the total exclusion of their private lives. There are some whose public actions are better than their private ones, out of all proportion, and there are others who try to redeem the patent sins of their political necessities by the honest practice of their private virtues. In some rare high types, head, heart and hand are balanced to one expression of power and every deed is a mathematical function of all three.

Leo the Thirteenth probably approaches as nearly to such superiority as any great man living. As a statesman his abilities are admitted to be of the highest order, as a scholar he is indisputably one of the first Latinists of our time and one of the most accomplished writers in Latin and Italian verse and prose; as a man he possesses the simplicity of character which almost always accompanies greatness, together with a healthy sobriety of temper, habit and individual taste, rarely found in those beings whom we might call "motors" among men. It is commonly said that the Pope has not changed his manner of life since he was a simple Bishop. He is indeed a man who could not easily change either his habits or his opinions; for he is of that enduring, melancholic, slow-speaking, hard-thinking temperament which makes hard workers and in which everything tends directly to hard work as a prime object, even with persons in whose existence necessary labour need play no part and far more so with those whose smallest daily tasks hew history out of humanity in the rough state.

We take the following from *Men and Women of the Time* :—

Leo the Thirteenth, was the son of Count Ludovico Pecci, by his wife Anna Prosperi. He was born at Carpineto, in the diocese of Anagni, in the State of the Church, March 2, 1810, and was baptized by the names of Vincenzo and Gioacchino. His mother always called him by his first name, which was also used by himself up to the termination of his studies, when he began to use his second name,

Gioacchino. In 1818 his father sent him, along with his elder brother Giuseppe, to the Jesuit College of Viterbo. There he was taught grammar and humanities under Father Leonardo Giribaldi, a man of great learning, until the year 1824, when, on his mother's death, he was sent to Rome to the care of an uncle, and took up his residence in an apartment of the palace of the Marchese Muti. In November 1824 he entered the schools of the Collegio Romano, then restored to the Jesuits, and had for his teachers Fathers Ferdinando Minini and Giuseppe Bonvicini, both distinguished for eloquence and virtue of no common order. Three years later he began to study mathematics. He had for instructors Father Giovanbattista Pianciani, nephew of Leo XII., and Father Andrea Carafa, a mathematician of renown. Young Pecci signalled himself by his assiduity and talent, and in 1828 got the first prize in Physico-Chemistry, and the first accessit in mathematics. Then he passed to the course of philosophy, and in the four years of that curriculum he attended the lectures of Father Giovanni, Perrone, Francesco Manera, Michele Zechinelli, Cornelius Van Everbroeck, and Francesco Xaverio Patrizi, brother of the late Cardinal Patrizi. While studying philosophy Pecci was entrusted, despite his youth, to give repetitions in philosophy to the pupils of the German College. In his third year of philosophy he sustained a public disputation, and obtained the first prize (1830). The following year, being then but twenty-one years old, he obtained the *laurea* in philosophy. Even in Viterbo young Pecci was noticed for his ability and for his perfect propriety of conduct. In Rome he seemed entirely devoted to study, and took no part in entertainments, conversazioni, amusements, or plays. At the age of twelve or thirteen he wrote Latin, prose or verse, with facility; and it may be mentioned that since he became Pope a volume of his verses, chiefly Latin, has been printed at Udine. Having entered the College of Noble Ecclesiastics, the Abate Pecci frequented the schools, of the Roman University to learn canon and civil law. Pecci and the Duke Sisto Riario Sforza (afterwards Cardinal Archbishop of Naples) were the two brilliant youths who eclipsed all the rest of their companions in study. Cardinal Antonio Sala took much interest in Pecci, and assisted him with advice and instruction. Becoming a Doctor in Laws, he was made, by Pope Gregory XVI., a domestic prelate and Referendary of the Segnatura, March 16, 1837. Cardinal Carlo Odescalchi, famous for his humility in renouncing the purple to enter the Society of Jesus, gave Pecci holy orders in the chapel of St. Stanislas Kostka, in S. Andrea al Quirinale, and on Dec. 23, 1837, conferred the priesthood upon him in the chapel of the Vicariate. Gregory XVI. bestowed upon him the title of Prothonotary Apostolic, and appointed him Apostolic Delegate at Benevento, Perugia, and Spoleto in succession. In these important posts he ruled with firmness and prudence, and while at Benevento he, by his energy, put a stop to the brigandage which had before infested that district. In 1843 he was again promoted by Pope Gregory XVI., being sent as Nuncio to Belgium, and on Jan. 17 in that year he was created Archbishop of Damietta, *in partibus infidelium* to qualify him for his office of Nuncio. He remained in Brussels for three years, and was then nominated Bishop of Perugia on Jan. 19, 1846, about four months previous to the death of Gregory XVI. He was created and proclaimed a Cardinal by Pius IX. in the Consistory of Dec. 19, 1853. He was a member of several of the Congregations of Cardinals—among them those of the Council of Rites, and of Bishops and Regulars. In September, 1877, he was selected by Pope Pius IX. to fill the important office of Cardinal Camerlengo of the Roman Church, which post had become vacant by the death of Cardinal de Angelis. In that capacity, after the death of the late Pope (Feb. 7, 1878), he acted as head of the Church in temporal matters, made the arrangements for the last solemn obsequies of the Pontiff, received the Catholic ambassadors, and superintended the preparations for the Conclave. Sixty-two Cardinals attended the Conclave, which was closed in the Vatican on Monday, Feb. 18, 1878, and the Cardinal Camerlengo was made Pope by the acclamation of all. The news was officially proclaimed to the outside world at a quarter past one o'clock from the gallery of St. Peter's, when it was announced that His Holiness had assumed the name of Leo XIII. On March 3 he was crowned in the Sistine Chapel, all the ancient ceremonies being observed, save the benediction *Urbi et Orbi*, from the loggia of St. Peter's. At the end of 1887 the Pope celebrated his jubilee, commemorative of his having been fifty years in the priesthood, on which occasion he received congratulations from all parts of the world. The Queen of England sent the Duke of Norfolk as her Special Envoy with valuable gifts and an address of congratulation. In June, 1891, the Pope issued an important Encyclical Letter on Labour, which presented the Papacy in a new and liberal light. Later, His Holiness bade the French clergy recognise the Republic, the result being that many hitherto disaffected Monarchists accepted

the present order of things in France. On Feb. 19, 1893, His Holiness celebrated his episcopal Jubilee, and held a State celebration at St. Peter's before immense crowds of pilgrims. The English pilgrims on this occasion were headed by the Duke of Norfolk. In October, 1894, the Pope summoned a conference of the Patriarchs of the Greek and other Eastern Churches at the Vatican, but the gathering was without results. In March, 1895, considerable excitement was aroused in Austria owing to an announcement in the leading organ of the Christian Socialists' Party that the Pope had sent his blessing to the party, whose leader, the well-known Polish priest and Christian Socialist agitator, Father Stojalowski, was then awaiting his trial on a charge of inciting civil discontent, and to the journal itself. At about the same time an intimation was given to the world that, being approached by many English churchmen, both lay and clerical, who desired reunion with the Church if only certain restrictions, including the enforced celibacy of the clergy, could be withdrawn, the Pope was disposed to grant some mitigation as to celibacy, but, the English bishops being divided, nothing further came of the pronouncement. Following up this appeal to His Holiness, Viscount Halifax, as representing the English churchmen before mentioned, visited Rome and conferred with Cardinal Vaughan, the Pope's English Vicar, as to the conditions of reunion. The Pope did not endorse Cardinal Vaughan's conclusions favouring the promotion of individual conversions, but stated his desire to address an appeal to the English people. His famous utterance was published on April 20, 1895, inscribed "Ad Anglos," and the pathetic plea for the unity of Christendom was followed, in June 1896, by an Encyclical addressed to the Bishops of the Church, in which the conditions of unity—in brief, unqualified recognition of Rome—were laid down. As was observed at the time by all thinking people, not one word from the beginning to the end of this statement could be found to justify the assumption of Lord Halifax and kindred spirits that Rome would or could treat the question of reunion as a matter of negotiation or compromise. Although rebuffed, members of the English Church Union sought for the recognition by Rome of Anglican Orders, and the assistance of Mr. Gladstone was enlisted in that behalf. But neither Mr. Gladstone's touching personal appeal to His Holiness nor the earnest, if misguided, efforts of the High Church Party availed. On Sept. 21, 1896, the now-famous "Papal Bull on Anglican Orders" was promulgated, and, to the keen disappointment of Mr. Gladstone and to the dismay of the English Extremists, the Pope unequivocally refused to recognise English ecclesiastical Orders, setting forth in his pronouncement an elaborate argument to justify Rome's reiterated negative. When receiving the Cardinals and his Court on the celebration of his 87th birthday in March, 1897, the Pope emphasised the drastic nature of his Bull, which, he said, had been issued "in order to enlighten those who were honestly mistaken and to cut short sophistical evasions." His Holiness has not since made a further appeal to the English Church, convinced, probably, by the severe and discouraging criticism of both Prelate and laity that his Pontificate will never see the dawn of the reunion of the West. The only two recent intrusions of the Pope into English political life have been the bestowal, in March, 1896, of his blessing on Mr. John Dillon as the new leader of the Irish Party, and his expressions of sympathy with the objects of the Irish Race Convention, which met in Dublin during September, 1896. But the Pope's active interest in European affairs has of late been as keen as ever, and in 1896 he made various representations to the Governments of Hungary, Bulgaria, and Serbia, concerning which it is impossible to comment here. An Encyclical was published in May, 1897, exhorting the faithful, on the occasion of Pentecost, to pray for the unity of all Christians; and in the following month the Pope solemnly canonised two old priests, Anthony Zaccaria (1502-39) and Peter Fourier (1565), a ceremony which had not been seen in St. Peter's for thirty years. His Holiness at this time made an important statement as to the Church's attitude towards the French Republic, asserting that the supreme criterion of the common good imposed upon Catholics the acceptance of the existing form of government. On Aug. 14, 1897, the Pope received in audience Sir Wilfrid Laurier on his visit to Europe. This interview resulted in the appearance, on Dec. 24, 1897, of an Encyclical on the Manitoba School Question, in which, while asserting the concessions obtained by Catholics as inadequate, the Pope advised the faithful on their part not to refuse a partial compromise. On the previous day, Leo, speaking at his customary Christmas reception to the Cardinals, declared the hostility between the Vatican and the Italian Government to be "repugnant to the national traditions and genius," and said that such a state of affairs could never be supported by the votes of the Italian Catholics. In the spring of 1898 the Pope endeavoured to act as mediator between Spain and America, with the view of bringing about the

conclusion of the Hispano-American War, but with no success. In June, 1897, His Holiness revived memories of his early days as a poet in a Latin poem, "In Praise of Frugality." An English translation of this poem, which was on the model of the Epistles of Horace, was made by Mr. Andrew Lang for the *New York World*. The effort was an interesting appeal for asceticism in modern life, and much astonishment was evinced at such a production from a statesman so advanced in years.

ANNUAL MEETING OF THE AMERICAN BOARD MISSION.

The Thirty-first Annual Meeting of the Japan Mission of the American Board was held at Kobe in the Chapel of the Girls' College, beginning in the afternoon of July 2nd, and closing in the afternoon of the 6th. There was an attendance of fifty-four adults, and sixteen children, besides several friends who were guests of the Mission during the week. Mr. Newell was Chairman, and Dr. Learned, Secretary, of the meeting.

The usual routine of business was attended to, relating to evangelistic, school and kindergarten work; devotional exercises of a high order characterized each day; several notable addresses were given; a letter of greeting was sent to Minister Griscorn; and the social part of the programme was not neglected.

The first half-hour of each session was given to brief reports from the stations, two stations reporting at each session, followed by special prayer for their particular work and needs. In this way all the twelve stations passed in panorama before the Mission, with such enlivening touches and colour as could never appear in a printed report. The universal tone of hopefulness and triumph in all these reports was most encouraging, and indicated that the past year has been one of the best in the history of our work.

If the devotions of this first half-hour seemed rather self-centred, a corrective was offered in the last half-hour of each morning session when a purely devotional programme was presented with an outward and upward look. The general theme for the week was "Bear ye one another's burdens," and some of the topics presented for sympathy and prayer were, "The Standing Committee of Co-operating Missions," "The Temperance Work," "The Special Evangelistic Work at the Osaka Exposition," "The Young Men's Christian Association," "The Young People's Society of Christian Endeavour," "The Hawaiian Evangelical Association."

On the opening day of the meeting the Rev. F. Franson, Director of the Scandinavian Alliance Mission, by invitation, was present and gave an address on the History of the Free Churches in Sweden.

This was followed, the same day, with an address by Dr. Greene on "The Missionary as an Interpreter of Japanese Life and Thought," in which he took to task those who would try to minimize the Japanese nation and the part it is playing and is yet to play in the East and in the world. The dictum of a certain savant that "Japan is a country where there are no originals" he considered a great mistake. "Not only the civilization of the past, but the progress of the present, is full of lessons to us all. It is necessary to the missionary himself and to the good of his own work that he try to become a correct interpreter of Japanese life and thought. Though he may speak the language correctly, yet without close sympathy with the local and current thought, his own thought may be so far removed that there is practically no contact with the Japanese. The speaker called attention to several points of interesting development going on now in the national language and economics; in the new conceptions of family life and individual life that are coming in and taking possession. It is useless to say that psychological conditions require ages for changing racial traits, for the fact is that here in Japan they have changed in a brief time. The touring missionary is in the very best relation and position possible to tell the world these facts which he knows far better than the glib and superficial writers who array themselves against

Japan. If the people of the United States knew what we know, they would give their best moral support to Japan at this time."

On Friday morning Miss Daniels presented a paper on "Religious Work for Young People,—its True Principles and their Application." A chart illustrating the age at which youth are converted showed that while a good percentage reach a definite religious decision at twelve, and again at eighteen, by far the largest per cent. are converted at the age of sixteen. Hence the greatest care should be taken to choose the best teachers for those between 12 and 16. "Storing the mind and forming habits are the things to aim at in these years." "The Gospel story should be imbedded in the mind in these years, and memorizing insisted upon." "Rather than attempt to rule, first gain their confidence. Cultivate a knowledge of what they like to do, and then do it with them. This is the open sesame."

Rev. T. Osada, of Osaka, followed in an able discussion of the subject, making a special plea for better and more up-to-date hymns and tunes for the young. Whereas the church was for a long time in the lead in this matter, it has now fallen behind the secular schools in songs adapted to boys and girls. He showed the need also for more and better Christian juvenile literature for the house and the Sunday School.

On Sunday, as usual at this time, the morning services at the Union Church were courteously put into the hands of the Mission, although Pastor Wicher kindly assisted in the opening exercises. Mr. Clark preached an excellent sermon from the text, "As thou hast sent me into the world, even so have I also sent them into the world."

The Annual Meeting of the Christian Endeavour Society has long been a feature of this annual gathering of the Mission; and though but fourteen children were participants in the Sunday afternoon exercises, the Mission and the friends from outside who gathered in the Chapel felt amply repaid by the bright songs and recitations and faces which they heard and saw there. The Treasurer's report showed nearly seventy yen collected and disbursed in benevolence during the year. At a later meeting in the day, which combined Vesper and Communion services, four of the children were received into membership of the Mission Church.

During the business sessions naturally the financial problems occupied a large share of thought and time. While the reports from all the stations showed unusual advance and new doors of opportunity constantly opening; while the growth of the Doshisha, the Kobe Girls' College, Bible School, Kindergarten and Training School, was most encouraging, and a spirit of hopefulness pervaded every department of work, there was yet an undertone of anticipative disappointment in view of the probable fact (based upon the soul-trying experiences of the past few years) that the Board would not be able to provide the extra funds demanded for our expanding work.

In response to previous appeals two new families and one single lady were sent to join the Mission last year. While grateful for these fine additions, a still further reinforcement of 3 families and four single ladies was asked for at this time.

A request was also made to the Board for some eminent worker to be sent out from the United States who should give his whole time for a half-year or so to work in Japan alone. Without criticizing any previous visitor, it stands to reason that any man who puts in exhaustive work in India and other countries on the way, is at a distinct disadvantage before he reaches Japan.

The usual Fourth of July evening social and musical entertainment was postponed this year to Monday evening the 6th, when a goodly number of the Kobe residents, headed by U. S. Consul Lyon, showed their goodwill by mingling with the members of the Mission in a most delightfully informal and fraternal manner. About one hundred and fifty were present, and the evening closed with a musical programme and refreshments.

An attempt was made to have Arima chosen as the place for meeting next year. But in view of all the advantages which Kobe offers,

—the convenient chapel of the College, together with the dormitories, the dining room and all the paraphernalia of this commodious and well-ordered school, which are generously thrown open by those in charge for the free use of the Mission; also the rare opportunity thus offered of coming in contact with the local residents once in the year, the attempt at a change was unsuccessful, and the vote was practically unanimous in favour of continuing the traditions of the past thirteen years. This vote may have been helped possibly by the delightfully cool weather of the week, and by the most astounding evidence of Kobe's progress along modern scientific lines,—the total absence of mosquitoes! a hitherto unheard-of thing at this time of year.

The next meeting is set for July 7, 1904, and Mr. Cary was chosen to act then as Chairman.

H.B.N.

THE YOKOHAMA GENERAL HOSPITAL.

REPORT AND ACCOUNTS TO 30TH JUNE, 1903, FOR PRESENTATION AT THE GENERAL MEETING OF SUBSCRIBERS TO BE HELD AT THE CHAMBER OF COMMERCE ROOMS, No. 14, YAMASHITA-CHO, YOKOHAMA, AT 5 P.M., ON FRIDAY, 24TH JULY, 1903.

REPORT OF THE COMMITTEE.

The last General Meeting was held on the 15th April, 1902, but owing to the non-attendance of anyone except the Committee, the then members were obliged to remain in office.

Funds were required, and a subscription list was circulated which was handsomely responded to, and a sum of yen 5,175 was raised.

The Accounts which are attached to this report, are from 1st April, 1902, to 30th June, 1903, a period of 15 months.

CHARITY PATIENTS.—The payments under this head are considerably larger than in previous accounts, as the salaries of the Japanese nurses (mentioned elsewhere) are included.

INFECTIOUS WARD.—The disbursements for this account are exceptionally heavy owing to the purchase of a new boiler for sterilizing clothes. During the period under review, only one patient has been admitted.

The buildings require some repairs which are now being carried out, otherwise they are in first-class order.

GENERAL HOSPITAL.—As will be seen from another part of this report, the Hospital may revert to the community (with the exception of the dwelling-house and hydropathic establishment) and is in fairly good repair. A portion of the fence requires renewing and the whole of the buildings would be the better of a coat of paint.

The building used as a Laboratory has been turned into an isolation ward, at a cost of about yen 150, which sum does not appear in the accounts now presented.

In July of last year it appeared to the Committee that the nursing staff of the Hospital was insufficient and though not incumbent on them under the terms of the existing lease with Doctor McCre to do, they thought it well to engage the services of two Japanese nurses, for the general benefit of the Hospital, and more particularly for the benefit of the third class and charity patients. At the same time, some of the Yokohama Ladies, under the Presidency of Mrs. Bellows, raised a fund for the payment of an European nurse, but owing to some misunderstanding with Dr. McCre no action was taken by them at the time.

Later on Dr. McCre informed the Committee that he was anxious to leave Japan for France and was in treaty with a Dr. Davies for the transfer of the unexpired portion of the lease of the Hospital. The Committee having examined Doctor Davies' testimonials which were first-class in every respect, agreed to sanction the transfer and so he took over the lease under certain conditions, and entered into possession on the 1st April, of this year. The ladies in the meantime had secured the services of Mrs. Davies as matron, and she entered into her duties on the same date.

After Dr. McCre had left, it was found that the Hospital was bare of the commonest necessities, and your Committee were obliged to come forward and spend about yen 1,400, in order that patients might be made fairly comfortable.

Mrs. Marshall Martin kindly volunteered to help the Committee, and the assistance she rendered is beyond praise. In conjunction with Mrs. Davies she made out lists of requirements, obtained estimates etc., and for over a month was working at the Hospital almost every day.

Your Committee owe to her a debt of gratitude, as without her aid it would have been most difficult to have got the wards in anything like order in so short

a time. Their thanks are also due to Mrs. Bonar for her kind assistance.

To Mrs. Bellows and other ladies who have interested themselves in the work, the Committee are most grateful.

The Hospital is now in fairly good working order, but there are still several things to be done and purchased, before the equipment is what it should be. Your Committee estimate that at least yen 1,000 must be spent at once in alterations and necessities.

For a short time after Dr. Davies had taken control, things worked smoothly, but later on, it was found that he was not the man to be in charge of a hospital, and after numerous interviews and some correspondence, your Committee notified him by letter that the lease would be cancelled, and Doctor Davies left Japan for England on the 16th June.

Mrs. Davies remains as matron, and has earned the goodwill of everyone with whom she has come in contact. Her professional abilities are vouched for by the local Doctors and your Committee congratulate the ladies on their selection.

Before Dr. Davies left Yokohama your Committee interviewed Doctors Munro and Reidhaar and placed the situation before them. They immediately volunteered to attend the 3rd class and charity patients free of charge, till the Committee could make permanent arrangements and your Committee feel deeply grateful for their generous action.

The dwelling-house and hydropathic establishment were the property of Dr. McCre, who sold them to Dr. Davies, who made them over to his wife. He also made over the unexpired term of the Hospital lease, but without notifying the Committee, so that it is in their power to either sanction or refuse the transfer.

If the latter course is determined on, the Hospital will revert to the community, and an arrangement will have to be come to with Mrs. Davies as to the remuneration for her services in future, and the taking over of the dwelling-house and hydropathic establishment.

Your Committee have taken the opinion of a large number of subscribers, who think it should be retained by the community and run on its merits under the superintendence of Mrs. Davies.

They think that the present rules should be somewhat modified and that it should be worked more or less on the lines of a Nursing Home. First and 2nd class patients should be charged a fixed sum per day for their room and board, to include ordinary nursing, but they would be required to pay for medicine and medical attendance.

The charge for 3rd class patients to include medical attendance, but medicines to be charged for. Charity patients to be provided with everything free of charge.

The 1st and 2nd class patients would have to provide and pay for their own Doctor, but for the 3rd class and charity patients, an arrangement would have to be made by the Committee, for the permanent assistance of one or two physicians.

In order to make the nursing staff efficient, it is proposed to get out from England a trained nurse, to help the matron, and to work in conjunction with the Japanese nurses.

It is almost impossible to estimate what amount will be required to carry on the Hospital as proposed, as no statistics are available, but if everyone who can, will subscribe, it is thought no difficulty will be experienced in providing funds. The disbursements for the coming year must necessarily be large, but later on, when everything is in good working order, it is hoped that the Hospital may be looked upon with favour and become to a certain extent self-supporting.

A suggestion has been made to the Committee that the land now occupied by the hydropathic establishment should be rented to the Chinese for the purpose of building a hospital, to be run entirely by themselves and with a separate entrance.

No definite proposition has been put forward, but your Committee do not look upon the scheme with favour, except as a method of adding to the income of the general fund, which they hope may not be required, as they trust the subscription may fully cover all expenses.

At the General Meeting, a proposition will be brought forward, asking the community to support the Hospital on the lines of a Nursing Home for a period of at least three years.

The present Committee consisting of Messrs. J. Colomb, F. S. James, H. Keswick, and L. Mottet (absent), tender their resignation, but are willing to stand for re-election.

It is advisable that the incoming Committee, should be enlarged by at least three members, and the meeting will be asked to vote for any candidates put forward.

F. S. JAMES.
J. COLOMB.
HENRY KESWICK.

Yokohama, 9th July, 1903.

THE JAPANESE IN CHINA AND KOREA.

(SPECIALLY TRANSLATED FOR THE "JAPAN MAIL.")

The *Novoe Vremya* of May 20 (June 2) gives prominence to an article from one of its Far Eastern correspondents who signs himself A. Stromoff. He writes as follows:—

From China and northern Korea come strange tidings. It is said that the Japanese Minister in Peking has signed a convention with the Chinese Government for the construction of a Japanese railway from Amoy through Fuchow to Kyooking. [The names are written sometimes in the Russian style.—Translator.] This railway is to have branch lines, one to Nanking and the other to Hankow. From northern Korea comes the news that Mr. Nakabane, the President of the Japanese steamship line, the Osaka Shosen Kaisha, and one of the Directors, Mr. Maebara, are making preparations for the establishment of a special steamship line on the river Tai-dong-gang and have already left for Phyang-an in order to make themselves acquainted with local conditions.

If it is taken into consideration that the river in question separates two very rich provinces, Hoang-hai, a great agricultural centre, and Phyang-an, which is rich in coal, gold and other minerals, the meaning of this new steamship line will be understood. But if we also take into consideration the fact that near Phyang-an the Tai-dong-gang bends to the north and approaches the Yalu and the Manchurian frontier, then it will not be necessary for the reader to possess any particular stock of wisdom to understand why the Japanese intend to establish that line. At the present moment there is firmly established in Phyang-an a colony of Japanese usurers who ruin the local population and then seize their immovable property. After this line of steamships has been established, depots must be built and agencies formed: around these a Japanese population will collect, and that population, with its immemorial taste for cultivated land, will soon wrest from the people, (when the latter fail to pay back the Japanese loans of money), the best lands and houses. Then quarrels will take place; the Japanese police will appear on the scene; and lo! a Japanese colony will have been created on the Manchurian frontier . . . to keep an eye on Russia and to interfere with her as much as possible. . . . These new Japanese inclinations in China and Northern Korea, not quite clear some time back, are now as clear as daylight. It may be remembered that serious organs of the Press all over the world began a year ago to suspect that China was making preparations for some big *coup*. Some Japanese papers mocked at this alleged danger and waxed funny over it. Is it impossible that such papers did not know what was really going on? Of course it is. They did know what was really going on but they thought it just as well to keep foreigners from knowing. What might be considered very dangerous by the "Western barbarian" might be regarded as extremely pleasant and useful by those Yellow Brothers, the Chinese and the Japanese. These papers would therefore have us shut our eyes and close our ears and pretend to know nothing of the formidable army that is being organized, the cannon that are being imported and the roads of communication that are being constructed while they explain that all these things are plausible but false rumours.

Here is for example a small but eloquent article from the patriotic *Japan Times* of April 5 (new style). The article is based on a telegram announcing the increase of the American squadron in the Far East:

It is headed "Quite Unnecessary" and the following is a word-for-word translation of it [I translate it, however, from the Russian so that there may be some discrepancies.—Translator].

"Reuter informs us to-day that the Government of the United States is increasing its squadron in the Far East in view of the alarming rumours about the situation in China. Of all the Western Cabinets, the Cabinet at Washington next to that at St. Petersburg, has the best sources of information about Chinese

affairs. But in the present instance we fear that Mr. Hay has not been correctly informed by his official correspondents. We are strongly inclined to believe that there is no occasion whatever for this step which is now reported to us."

Short and lucid this, isn't it?

Sleep, then, my masters, till a new storm in China makes you convinced that you have been too, too kind to the Yellow Race and that you have been too, too amiable with regard to what it calls its "legitimate" pretensions. . . .

THE RUSSIAN PRESS.

(SPECIALLY TRANSLATED FOR THE "JAPAN MAIL.")

America's recent action with regard to Kishineff and Manchuria has produced a painful impression in Russia and most of the leading journals in that country refer more in sorrow than in anger to the sudden mania that has seized upon Uncle Sam for meddling in other people's business. The *Novoe Vremya* of May 22 (June 4) has a leading article on this subject entitled "Russia and America."

"The United States of North America are from time to time," it says, "the arena of an anti-Russian propaganda which finds favourable material to work on in a politically immature population who, having broken with their old tradition of isolation, are going forward with enthusiasm in their new policy of imperialism."

"Siberian prisons," the Open Door in Manchuria, internal disorders in Russia, all these furnish pretexts to some Americans for the holding of anti-Russian meetings which are of course viewed with great satisfaction by the enemies of Russia. And now owing to his strong Anglophil tendencies, the American Secretary of State for Foreign Affairs, Mr. Hay, has given official importance to the absurd declarations of a heterogeneous collection of American businessmen and missionaries established in the Far East.

"The activity of our diplomatic representatives in the United States ought to be very different to their activity in European courts where the political life is more centralized. . . . Their object ought to be to explain not only to the American Secretary of State but to the American people at large the aims and aspirations of Russia: and, in order to do so, influence must be brought to bear on the American Press which is, in spite of all its faults, not only a mirror of public opinion but even the guide, philosopher and friend of a very large section of the American population."

The writer then goes on to prove by means of figures that American business men and financiers have great faith in the stability and the future of Russia.

He complains bitterly, however, that Russia's friendship for America on the occasion of the foundation of the Republic and also on the occasion of the Civil War is ignored by American compilers of historical text-books for the use of schools (for example Wilbur Gordy's "History of the United States for Schools, New York, 1898). In contrast to this he cites a passage from an address presented to Alexander II. in 1866 on the occasion of the liberation of the serfs. This address was presented by Mr. Gustavus Fox, the head of the American Embassy in St. Petersburg, and in it that American diplomatist spoke in very warm terms of the traditional friendship which bound Russia and the United States together.

The writer of the article (Mr. S. N. Siromatenoff) then remarks, *en passant*, that when, during the course of the Spanish-American war, Russia was accused of trying to form an anti-American coalition to aid Spain, he (the correspondent in question) exploded the rumour in what he calls "the two most influential papers in America" namely the *New York Sun* and the *Washington Post*, with what he regarded as very gratifying results.

He then again falls foul of the "American Asiatic Association" for being too pro-English and for being violently opposed to legitimate Russian activity in Manchuria; after which he goes on to speak of an article which the American correspondent of the *Novoe Vremya* contributes to "that very influential weekly paper" *Harper's Weekly* of May 9 on the subject of "Russia in

Manchuria," and to another article in *Collier's Weekly* (May 9) on "Russia's Policy in Manchuria" in which the warlike intentions of Japan and England are shown up. "But unfortunately," he adds, "articles in defence of Russia rarely appear as a rule in the American newspapers."

This contention is, of course, very true. American information about Russia is obtained as a rule through tainted sources, that is through enemies of Russia or through persons who, in spite of their desire to form an unbiased opinion about the country, are so hampered by rampant red-tape and iron-shod officialdom that they are prejudiced—unconsciously prejudiced perhaps, but still prejudiced—against the ruling classes, in other words against the men who represent Russia in the eyes of the world.

Some interesting particulars regarding Tolstoi appear in the Russian *Missionaries' Review*, the direction of which is in the hands of clergymen of the Greek Church.

One day a poor *moujik* came to his house to ask for money to enable him to make a pilgrimage to a certain famous monastery in which the relics of a saint were kept. Tolstoi tried to persuade the man not to go, saying that it was superstition which urged him to do so, but the man insisted, declaring that at the instance of his dying wife he had made a vow to perform the pilgrimage in person. Thereupon the Count gave the peasant double the sum he demanded.

In spite of his excommunication, Tolstoi is very polite toward the clergy; and the Popes of the villages around *Yasaya Polyana* (Bright Meadow), as his estate is called, unanimously praise him for this courtesy and even amiability. Tolstoi never fails when he meets a Pope to take off his hat first, to shake hands with the clergyman, and to ask after the latter's wife and children.

SOME HOURS OF IDLENESS.

PART I.

A heavy mist hung low over the harbour of Yokohama when the engine-room telegraph of the *Samuki Maru* (one of the N.Y.K.'s London liners) rang out, a few days ago, "Stand-by." It was such a mist as we usually associate with the coasts of England, being denser, more all-pervading and chilly than those which descend on the waters of these latitudes; but, as is the wont of all sea-mists, this particular one was quite ready to play all the pranks which an English mist can get up to when it seeks to bewilder and confuse the poor Master Mariner who wishes to make a passage through it—enlarging this object, diminishing that, foreshortening the other, entirely hiding a big ship almost alongside, while faintly outlining another many a cable's length clear of our course. Though it was but a very little past four o'clock in the morning life was stirring on several ships around, and one by one they slid past, dim, gaunt shadows in the grey-shot gloom, gliding, with their engines impatiently panting, through the harbour entrance, and thence down the Bay to the open sea. We let them pass and then the head of our big liner slowly swung round and we made for the entrance too, raising at times a blast of syrenic horror when a venturesome sampan or other cockle-shell needed frightening from the vessel's course. Once past the men-of-war anchorage we too bade farewell to the sleeping town and stole out to an equally silent sea. The sea-fog wreathed every familiar headland visible from the deck in fantastic draperies of white, or grey, or dun, while low on the horizon hung a solid mass of inky-black clouds which boded ill for the coming day. I was but an Idler on board the ship, bent solely on holiday, and so watched the glowering dawn with feelings of disgust. The outlook for the day was not alluring, but a bath and then a satisfactory breakfast discussed amid animated conversation disposed the mind to take whatever the gods had to give as philosophically as the most hardened Stoic.

Drip, drip, drip—the rain had reached us at last, but on the promenade deck of the "Snuky Marrow"—as the London dockers please to call her—one cared not a fig for the rain, though it was now descending in sheets that blotted out the coastline with spume and spin-drift. Indeed,

my thoughts were soon far away, in the delightful company of one of the daintiest maidens ever reared in that home of fair women—Old England. Back they flew in her society to the years when Cromwell was thinking of assuming the title of Lord Protector; to those days when great ladies swept a grave curtsey when gentlemen "made a leg;" when ladies called their lovers servants, and many gentlemen beside Milton were proud of their Latinity. Now who was the charming companion of my comparative solitude? Why, no one less than Mistress Dorothy Osborne, of Chicksands. Years and years ago the Honourable Thomas Peregrine Courtenay in writing Temple's "Memoirs" proclaimed himself one of Dorothy Osborne's devoted Servants—using her old-world phrase—and Lord Macaulay, on reading her love-letters to Sir William Temple some time in 1838, declared himself Courtenay's rival: and so must all who chance upon her dainty work in the present year of grace. The charm of her letters is indescribable: they breathe a perfume so rare and precious, yet so delightfully honest and true, that the sense of sacrilege in reading them, two hundred years later, is gradually lost as one plunges deeper and deeper amid their pages. Courtenay sums up briefly the manner of these beautiful Letters. He says:—

"Many of them are not to be distinguished in their topics from the hundreds which have been written or invented; they contain abundant evidence of a faithful and passionate attachment; much allusion to the persecution of friends; the difficulties of the correspondence, the impatience with which the letters were expected, and the blush with which they were received. There are thanks for long letters, reproaches for short; rings, pictures, and hair requested or bestowed; company despised, and the world abjured; tears amidst parties of pleasure, and delight in the solitary ramble; rivals rejected, and cruel brothers defied. There is the usual variety of matter, and rapidity of transition, some fashionable gossip, and much serious reflection; now and then a very little scandal; often the warm commendation of a friend. She writes much of books, but generally of romances, sometimes of poetry: scarcely at all of works of a graver cast. Criticism, rather remarkable, upon style, and upon the prevalent affectation of language and a few political allusions. . . .

But this is putting the matter very baldly. Dorothy Osborne first met William Temple when she was 21 and he was 20, at a little inn on the Isle of Wight. She was in the company of her brother, a Royalist like herself, who, to pass the time, scribbled on the windows his opinion of Cromwell and the ruling powers. For this instance of malignancy the whole party were arrested and brought before the Governor. The sister, trusting to the tenderness which, even in those troubled times, scarcely any gentleman of any party ever failed to show where a woman was concerned, took the crime on herself and was immediately set at liberty with her fellow-travellers. Such were the circumstances that drew the young people first together and when the Letters open their love-affair was in full swing. But the course of their true love did not run smooth. Temple had all Dorothy's family arrayed against him—her brothers particularly; besides she had far more eligible suitors for her hand—as the letters show—chief among them being Henry Cromwell, the Lord Protector's brilliant son. And so we find Dorothy writing:

What a satisfaction you had found out to make me for injuries you say you have done me! And yet I cannot tell either (though 'tis not the remedy I should choose) whether that were not a certain one for all my misfortunes; for, sure, I should have nothing then to persuade me to stay longer where they grow, and I should quickly take a resolution of leaving them and the world at once. I agree with you, too, that I do not see any great likelihood of the change of our fortunes, and that we have much more to wish than to hope for; but 'tis so common a calamity that I dare not murmur at it; better people have endured it, and I can give no reason why (almost) all are denied the satisfaction of disposing themselves to their own desires, but that it is a happiness too great for this world, and might endanger one's forgetting the next; whereas if we are crossed in that which only can make the world pleasing to us, we are quickly tired with the length of our journey and disquiet of our inns, and long to be at home.

And later in the same letter she writes:—

Next week my persecution begins again; he comes down, and my cousin Moll is already cured of his imaginary drowsy, and means to meet him here. I shall be baited most sweetly, but sure they will not easily make me consent to make my life unhappy to satisfy their importunity. I was born to be very happy or very miserable, I know not which, but I am certain that as long as I am anything I shall be.

Your most faithful FRIEND AND SERVANT.

You will never read half this letter 'tis so scribbled; but 'tis no matter 'tis not much worth it.

Oh, Dorothy, Dorothy, the hankering after a Postscript must have been as strong in you as in your sisters of the present day. As the weeks rolled on, Dorothy, like all true lovers, sought to render service to her Servant so as to make their acquaintance yet the sweeter; she even invites his chiding, if that were necessary.

Sure, I shall not find fault with your writing in haste, for anything but the shortness of your letter; and 'twould be very unjust in me to tie you to a ceremony that I do not observe myself. No, for God sake let there be no such thing between us; a real kindness is so far beyond all compliment, that it never appears more than when there is least of 'tother mingled with it. If, then, you would have me believe yours to be perfect, confirm it to me by a kind freedom. Tell me if there be anything that I can serve you in, employ me as you would do that sister that you say you love so well. Chide me when I do anything that is not well, but then make haste to tell me that you have forgiven me, and that you are what I shall ever be, a

FAITHFUL FRIEND.

What a pretty touch is here: how womanly, how sweet. Anon we gather that Temple, as is the nature of all lovers in every age, desires to know how Dorothy spends her days, and we get in reply a dainty picture of an English country gentlewoman's life during the Commonwealth:

You ask me how I pass my time here. I can give you a perfect account not only of what I do for the present, but what I am likely to do this seven year, if I stay here so long. I rise in the morning reasonably early, and before I am ready I go round the house till I am weary of that, and then into the garden till it grows too hot for me. About ten o'clock I think of making me ready, and when that's done I go into my father's chamber, from thence to dinner, where my cousin Moll and I sit in great state, in a room and at a table that would hold a great many more. After dinner we sit and talk till Mr. B. comes in question, and then I am gone. The heat of the day is spent in reading, or working, and about six or seven o'clock I walk out into a common that lies hard by the house, where a great many young wenches keep sheep and cows, and sit in the shade singing of ballads. I go to them and compare their voices and beauties to some ancient shepherdesses that I have read of, and find a vast difference there; but, trust me, I think these are as innocent as those could be. I talk to them, and find they want nothing to make them the happiest people in the world, but the knowledge that they are so. Most commonly, when we are in the midst of our discourse, one looks about her, and spies her cows going into the corn, and then away they all run as if they had wings at their heels. I, that am not so nimble stay behind; and when I see them driving home their cattle, I think 'tis time for me to retire too. When I have supped, I go into the garden, and so to the side of a small river that runs by it, where I sit down and wish you with me (you had best say this is not kind neither). In earnest, 'tis a pleasant place, and would be much more so to me if I had your company. I sit there sometimes till I am lost with thinking; and were it not for some cruel thoughts of the crossness of our fortunes that will not let me sleep there, I should forget that there were such a thing to be done as going to bed.

How lucky Sir William Temple was to have such a woman fall in love with him one other extract from Miss Dorothy's letters will, I think, show. He has evidently been asking for some all-convincing proof of her attachment—again, as is the fashion of lovers from Father Adam downward—and she replies:—

I have known you when of all the things in the world you would not have been taken for a Discontent; you were, as I thought, perfectly pleased with your condition, what has made it so much worse since? I know nothing you have lost, and am sure you have gained a friend—a friend that is capable of the highest degree of friendship you can propound, that has already given an entire heart for that which she received, and 'tis no more in her will than in her power ever to recall it or divide it.

From now on Sir William is satisfied and the

letters grow more familiar as the lovers increase in their knowledge of one another: they lend books, discuss them, exchange pictures, locks of hair; Sir William procures for Dorothy out of Italy rare old seals, for which she has taken a fancy, and in fact they indulge in all the usual things which the time of courtship generally brings in its train for clean-living, high-thinking men and women.

One other extract ere we close the book, dear reader, and go down to the saloon to dinner. Sir William and Lady Temple had one little daughter, "My Di" the father calls her, who was snatched away in early childhood by that dread scourge, small-pox, to the unutterable grief of her parents. Among the Temple papers was found one short letter from the wee maid to her father and this has been printed at the end of the collection, for which kind thoughtfulness we thank Mr. Israel Gollancz, the present editor. Says little Diana Temple:—

SIR.—I deferred writing to you till I could tell you that I had received all my fine things which I have just now done, but I ought never to have done giving you thanks for them, they have made me so very happy in my new closet, and every body that comes does admire them above all things, but yet not so much as I think they deserve. And now if Papa was here I should think myself a perfect pope though I hope I should not be burnt, as there was one at Nell Gwynne's door the fifth of November, who was sat in a great chair, with a red nose half a yard long, with some hundreds of boys throwing squibs at it. Monsieur Goré and I agree mightily well, and he makes me believe I shall come to something at last—that is, if he stays, which I don't doubt but he will, be cause all the faire ladies will petition for him. We are got rid of the workmen now, and the house is ready to entertain you. Come when you please, and you will meet with nobody more glad to see you than, sir

Your most obedient and dutiful daughter

D. TEMPLE.

November the 19th.

For Sir William Temple.

Well might Temple provide in his will that on the family vault should be inscribed

DIANÆ TEMPLE, delectissimæ filie.

PART II.

Dorothy Osborne's letters carried me serenely across Suruga Gulf and Owari Bay and effectually kept my thoughts off the gale that was now howling around us—the gale that was to do so much damage when it struck the Japanese coast. Morning dawned, grey and cheerless, with rain still coming down but the wind abating in force very rapidly once we had left Tomagoshima behind. During the morning hours the Chief Engineer kindly sent up a bundle of English papers and in lazily turning them over I came across traces of the acrid controversy which the latest Carlyle letters have provoked in English literary circles. Poor Thomas, poor Jane! What torrents of words, words, words, have poured over your heads since Froude published his amazingly frank biography of the Sage of Chelsea. Now has come the husband's turn to be whitewashed, and thoroughly well do the craftsmen apply their tools. Yet, after all, what an idle beating upon the wind it is, and how thoroughly the bottom sinks from beneath the whole controversy by the latest posthumous book of James Anthony Froude—but which likewise will arouse the literary hornets into acrimonious activity. What is the conclusion of the whole matter? Why, to put it shortly, that poor Mrs. Carlyle longed to be a happy mother of children, but the blessing being denied her, she "took it out of" her husband in bitter words and painful "scenes": while Carlyle, it now is plainly said in black and white, was one of those singularly few men that "ought never to have been married"—I am quoting Miss Jewsbury as quoted by Froude. Let us hope that the last word has now been said and that the dreary discussion will be considered closed, and allowed to sink into deserved oblivion. For what a weary world it is, after all, which such discussions reveal; what infinite numbers of square pegs seem irretrievably jammed into round holes, and what a ceaseless worry and fret their constant chafing engenders. Could we but rise above the noisy squabbling more frequently we should be the

readier to acknowledge that life for all its disappointments has some exquisite compensations.

Taking on the pilot at Wada Point was a subject of much interest to two small passengers on board the *Sanuki*—a three-year-old maiden, whose big blue-grey eyes and golden tresses were the subject of ever-lively comment among the crew, and her small brother, a mannikin of pronounced nautical tastes, though only just past the two year mark. They had been but 30 hours at sea, but already had found out for themselves many things about the ship which their elders knew absolutely nothing about. The pilot aboard, we headed at once for the Inland Sea which we found a veritable veiled lady, a secluded beauty. Not a glimpse could we gather of the charms of that famous scenery, for the rain came down steadily from low-hanging clouds which effectually shut off objects 500 feet away. There was nothing for it but to take to the deck-chairs and pass the hours of daylight in the company of the Bookmen. Just before leaving Yokohama, Messrs. Kelly and Walsh kindly placed me in possession of Kakasu Okakura's "Ideals of the East," and I found it during this dripping day a fascinating book. He traces from the dawn of Japanese civilization the effect upon the national character of the various streams of Indian, Chinese and Korean influence, in ethics, religion, art, manufactures, law, and national polity, and from the whole deduces a moral which deserves the attention of all thinking persons. Many of his observations completely upset the theories which the West complacently sets up as the sole and fundamental principles of life; and many of his judgments upon century-old Occidental syllogisms shake one's self-complacency to the core. The book has already been reviewed in the columns of the *Japan Mail*, but I cannot help quoting part of Mr. Okakura's final chapter.

"Even Japan," he says, "cannot, in the tangled skein of the Meiji period, find that single thread which will give her the clue to her own future. Her past has been clear and continuous as a mala, a rosary, of crystals. From the early days of the Asuka period, when the national destiny was first bestowed, as the receiver and concentrator, by her Yamato genius, of Indian ideals and Chinese ethics; through the succeeding preliminary phases of Nara and Heian, to the revelation of her vast powers in the unmeasured devotion of her Fujiwara period, in her heroic reaction of Kamakura, culminating in the stern enthusiasm and lofty abstinence of that Ashikaga knightlyhood who sought with so austere a passion after death—through all these phases the evolution of the nation is clear and unconfused, like that of a single personality. Even through Toyotomi and Tokugawa, it is clear that after the fashion of the East we are ending a rhythm of activity with the lull of the democratising of the great ideals. The populace and the lower classes, notwithstanding their seeming quiescence and commonplaceness, are making their own the consecration of the Samurai, the sadness of the poet, the divine self-sacrifice of the saint—are becoming liberated, in fact, into their national inheritance.

But to-day the great mass of Western thought perplexes us. The mirror of Yamato is clouded, we say. With the Revolution, Japan, it is true, returns upon her past, seeking there for the new vitality she needs. Like all genuine restorations, it is a reaction with a difference. For that self-dedication of art to nature which the Ashikaga inaugurated has become now a consecration to the race, to man himself. We know instinctively that in our history lies the secret of our future, and we grope with a blind intensity to find the clue. But if the thought be true, if there be indeed any spring of renewal hidden in our past, we must admit that it needs at this moment some mighty reinforcement, for the scorching drought of modern vulgarity is parching the throat of life and art.

We await the flashing sword of the lightning which shall cleave the darkness. For the terrible hush must be broken and the raindrops of a new vigour must refresh the earth before new flowers can spring up to cover it with the bloom. But it must be from Asia herself, along the ancient roadways of the race, that the great voice shall be heard.

Victory from within, or a mighty death without.

Mr. Okakura's book should be placed in the hands of the *Athenaeum's* critic who was so pleased the other day with Mr. Del Mar's descriptions of Japan and Japanese ways. This gentleman is quite sure that Japan will entirely throw off her Oriental traditions and adopt and assimilate the civilization of the West in all its ramifications. An idle dream, my masters, as books like Mr.

Okakura's clearly show. Just as much of the West as Japan finds will suit her purposes will she adopt—and not an iota more or less. True offspring of the East, it may be her destiny to lead the East, and if she does it will be along lines conformable to her ancient cultus and beliefs.

* * *

Morning found us at Kure, that important naval base strictly secluded in a beautiful land-locked haven of the Inland Sea which Japan screens with such jealous care from the eye of the alien. The mists were lying low down on the flanks of the encircling hills and where we anchored rain was still falling. The discoloured state of the water around told of the gale which had just swept over the district, and later in the day we learnt that over two hundred houses of the hamlet of Kawasaki, which lies just outside the confines of the Admiralty town, had been flooded. As old Father Plutarch would have said in similar case it behoves me not to write of Kure, for the place is a fortified zone, and regarding such things the Japanese are peculiarly sensitive just now.

Taking advantage of a fine blink next morning, we left the ship early and engaging space on a coasting steamer of the "Three Bars Diagonal" line made an hour's trip across to Ujina—an interesting journey. Three different fares are charged—first, second, and steerage, but all passengers mingled freely together without let or hindrance. The payers of first-class fare, however, had the privilege of depositing their sticks and luncheon basket in a cubby hole abaft the engine-room, over which a Brussels carpet of gorgeous hues was spread—an ideal place for developing nausea I should imagine. At Ujina train was taken to Hiroshima, where the branch road connects with the trunk line of the Sanyo Railway—by far the best managed railway in Japan. A prettier journey than that from Hiroshima to Miyajima would be difficult to find. Almost before the ancient city is left glimpses of the sea are caught on the one hand, while on the other are tiny bits of riverscape and bamboo groves inexpressibly alluring in their setting. At Miyajima we left the train and were ferried across the placid sea to Itsukushima—one of the famous *San-kei* of Japan—to visit the world renowned temple. Words fail to convey a tithe of the charm which this place possesses for lovers of the placidly beautiful. The white sandy beaches, the cool, clean streets of the little village, the old world courtesy extended by everyone to the stranger, the exquisite beauty of the little valleys which trend down to the sea—all must be seen and experienced to be understood; while who can do justice to the wonderful torii and temple if seen when the tide is at the full! On landing on the island we were met by a courteous *gens d'arme* who, speaking in English, said:

Foreign gentlemen: What is your country?

Oh, we are Englishmen.

Thank you: Where is your country?

A pause ensued, and then one of the party hazarded: Yokohama.

The reply was eminently satisfactory, and we were about to pass on, when again—

Foreign gentlemen, please, read.

The questioner extended a card on which was written in English, French and German a notice that as Miyajima was within the limits of a fortified zone photographing of any of its beauties was forbidden. We read the card and at once inadvertently fell into Yokohama dialect, exclaiming:—*Domo, arigato, Watakushi waakarimasu; daijobu jurushi.* Whereupon the courteous *gens d'arme* heaved a big sigh, saluted, and disappeared from the sight of the manglers of his mother's tongue. Thereafter we were not disturbed, but roamed where we listed, spent all our coppers on buying *satsuma imo* to feed the pertly pretty tame deer—who somehow preferred to take the dainties from the hand of the only lady in our party;—the sacred horse and the holy monkey; and finally came to anchor in the maple groves of the Iwaso Hotel. Verily this was a haven of heavenly peace, a delectable haunt of ancient quietude, and one was genuinely sorry when the time came to leave it and return to a workaday world of steam ferries and railway trains. One of the charms of Miya-

jima is the exquisite courtesy of the tradespeople and dwellers there. It was a real pleasure buying a few trifles in the shops ere we left the one-time sacred spot. But what a pity the guardians of the temple allowed the painters of scenes from the China-Japan war to hang their hideous daubs in the long gallery among the ancient masters. It is a sacrilege from a foreigner's point of view, though the reverent Japanese visitors on this beautiful July day seemed to derive more satisfaction in contemplating, and paused the longer before, these awful pictures than they did before the masterpieces of the men who flourished in days of old. But who shall account for the vagaries of taste? Even Hideyoshi's noble council room, standing so stately and reserved on its eminence above the temple, has been decorated with thousands of rice-ladles—many the *ex votos* of soldiers leaving for the China-Japan war, but hundreds the offerings of casual tourists, whose names they bear. Indeed, quite an industry has sprung up in the island on account of this fad and one can buy immense rice-ladles, 6 ft. long and wide in proportion upon which are carved representations of the temple, the island panorama, the deer, or the monkey. Unwieldily curious in very sooth—but very alluring to *la Belle Americaine*, if the island shopkeepers are to be believed.

Six o'clock saw us back in Hiroshima and after a hasty scamper through its narrow streets, and a passing glance at the ancient castle, we hurried on in jinrikisha to Ujina to catch the last boat back to Kure. One could not help noticing that in all the towns, big or little, visited on this trip there was an entire absence of the dirt, misery, squalor, and dilapidation which make the backstreets of Yokohama so distressing to the passers-by. The faces of the poorer people too, seemed happier, their bodies better nourished than are those of similar folk in our neighbourhood. Of course this may be mere fancy born of the pleasant recollections of the day.

Half past eight saw the lights of the *Sanuki Maru* ahead and needless to say that once on board we soon turned in.

P.S.—Our expenses worked out at *yen* 3.22 each, and we had been sight-seeing almost continuously for thirteen hours. A.B.B.

BASEBALL.

The baseball game on Saturday between the Y. C. & A. C. and the U.S. Naval Hospital was a decided walk-over for the former team, the score ending in 13 runs to 3, with an inning to spare in favour of the Club. The Y. C. & A. C. team showed great improvement in their batting and team work, though several men were playing for the first time in positions entirely new to them. Parker played a splendid game in centre field, catching every fly batted to him. McChesney also did well at second, a new position for him, and was responsible for several nice plays. One of the features of the game was a fine home run by Mollison, a good hit over second. For the Hospital's team Thompson caught very well, while Cassidy at second was in good form, as was also Garton on first. Mr. Hamburger acted as scorer, while Mr. W. S. Stone was as efficient as ever as umpire. After the game tea was served in the Pavilion by several of the American ladies.

THE PLAGUE.

Two cases of suspected plague appeared in this city on July 20th. One is that of a woman named Kin (20) whose husband is a workman employed by the Yokohama Water Works and living at Nishi-tobe. She had been suffering from fever since the 17th and died on the night of the 20th. The other is that of a young boy employed at a dairy kept by M. Iketo, Minami-Ota. The lad was at once removed to the hospital. The two places where the disease had appeared as well as neighbouring houses were segregated.

A telegram under date of July 22nd from Taipei, Formosa, states that silver has risen from *sen* 84 to *sen* 87.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

"There is perhaps no country in the world where the sword, that 'knightly weapon of all ages,' has, in its time, received so much honour and renown as it has in Japan. Regarded, as it was, as being of divine origin, dear to the general as the symbol of his authority, cherished by the *samurai* as almost a part of his own self, and considered by the common people as their protector against violence, what wonder that we should find it spoken of in glowing terms by Japanese writers as 'the precious possession of lord and vassal from times older than the divine period,' or as 'the living soul of the *samurai*?' " So wrote the late Mr. Thomas R. H. McClatchie in a paper contributed to the Asiatic Society of Japan in November, 1873; and so writes the *Nichi Nichi Shinbun* in a recent article on the same subject; a brief account of which we now proceed to give:—The history of the sword in Japan may be said to date from the Taihō era (A.D. 701-704), or shortly after. The number of noted swordsmiths in the Kamakura and Ashikaga ages whose names have come down to us is very large. It is recorded that in Bizen alone there were 1,500 swordsmiths; in Mino, 320; in Sagami, 130, to say nothing of other parts of the country. Compared with earlier times the quality of the weapons produced in the Ashikaga age (A.D. 1335-1574) was decidedly inferior.⁽¹⁾ But in the time of the Taikō the swordsmith's art was again revived, especially in Kyōto, Ōsaka, Bizen, Hiizen and Echizen. The terms *shinō* and *koto*, new swords and old swords, originated at this time.⁽²⁾ The practice of devising all kinds of fancy ornaments for swords dates also from this period. In not a few cases the famous painters and famous swordsmiths each took a part in the production of first-class blades. Sesshū and Kanō both lent their skill to the adornment of swords. Although from the days of Hideyoshi onwards firearms were much used in battle, more reliance was placed on the swords than on the musket, or the cannon. In the Meiji era the sword is thought by some to have been largely superseded by other weapons, but it is said that even to-day many Japanese cavalry officers prefer the old Japanese sword to any other weapon.⁽³⁾ Owing to the abolition of the practice of wearing swords enforced against the *samurai* many years ago and the adoption of foreign military drill and methods, the art of the Japanese swordsmith has been of late years greatly neglected, to the nation's loss. It is desirable that steps should be taken by the Government to make use of the craft of the few remaining Japanese swordsmiths for the revival of the art. We should like to see regulations passed, says the *Nichi Nichi*, in favour of the exclusive use of Japanese-made weapons both in the Army and the Navy and the adoption of other measures for the encouragement of sword-forging. It would indeed be a pity if from mere inadvertence the secret of an art in which we may be said to have excelled other nations should be entirely lost. As in the Tempō and Kōwa eras (1830-1848) we still had noted forgers in our midst, if steps are taken at once the revival of the art ought not to prove impracticable.

(1) As Mr. McClatchie pointed out, the four swordsmiths best known in Japan were Munechika Masasamune, Yoshimitsu and Muramasa. Munechika was born in 938, A.D. Masasamune and Yoshimitsu acquired their renown towards the end of the 13th century. Muramasa appeared a century later, and was succeeded by his son and grandson, who both bore the same name.—(WRITER OF THE SUMMARY.)

(2) The difference between the old weapon, which was long, straight and double-edged and the slightly curved, shorter, modern single-edged weapon is marked by the application of the term *ken* to the former and that of *katana* to the latter.—(WRITER OF SUMMARY.)

(3) The experience of the Japanese cavalry during the China-Japan war is stated to have been all in favour of the old Japanese sword as in every way superior to the sabres used by ordinary cavalry. And it is stated that in time of war the Japanese cavalry are in the habit of attaching Japanese blades to foreign-shaped regulation hilts.—(WRITER OF SUMMARY.)

The attitude of Marquis Itō to political parties on the one hand and to the elder statesmen on the other is at present forming a topic of earnest discussion in Japanese journals. In an article entitled *Seitō to Itō Kō* (Political Parties and Marquis Itō) the *Nipponjin* writes in the following strain:—Going back to early times it will be remembered that Marquis Itō did not side either with Count Itagaki or Count Ōkuma when they agitated in favour of an early establishment of constitutional government. He was for delay. When the two above-named leaders started political parties Marquis Itō was found in the ranks of those statesmen who regarded the two Counts as rebels that ought to be strenuously opposed. He and Count Inoue set about forming a Government party and started a newspaper known as the *Goyō Shinbun*. Itō's visit to Germany only tended to increase his aversion to political parties and the steps that he took on his return to Japan were all in the direction of strengthening bureaucracy. The Imperial University was converted into a training-place for officials. In order to enable the Government to command wealth, the expedient of granting rank to opulent citizens was hit on. Titles were bestowed on men who had subscribed money towards the country's defence. A system of examinations for officials was inaugurated which had as one of its objects the exclusion of men who favoured popular government and advocated the predominance of political parties as independent bodies. On the opening of the Diet in the 23rd year of Meiji we find Itō heading the pro-Government party in the House of Peers. The representatives of the people in the Lower House both in the first and second sessions resolutely opposed the Government. When during the second session a dissolution was ordered and a general election followed, Itō took sides with the statesmen who regarded it as the duty of all provincial Governors to lend their support to pro-Government candidates. In that election the Government did its best to prevent the return of political party members to the House of Representatives. Their interference with the election was so heinous that the Government was attacked in the Diet and public opinion in Europe and America, where no such interference is practised, was against Marquis Itō, who was regarded as an advocate of the continuance of clan-Government. The downfall of the Cabinet was hastened by its unconstitutional action during the elections, and when Itō was called upon to construct another Cabinet he felt convinced that it was necessary to have a pro-Government party in the Diet in order to insure the smooth working of the legislative machine. He made overtures to the existing parties, but neither of them agreed to his terms, and in 1894 there was constant friction between the Cabinet and the Diet. This was put an end to for a short time by the China-Japan war, but no sooner was that over than hostilities were renewed and, acting on the advice of the late Count Mutsu, Marquis Itō eventually came to an understanding with the Jiyūtō, whereby, in consideration of power granted to Count Itagaki and other members of the party, the latter should give its support to Government measures in the Diet. This was the first attempt made by the Government to give public recognition to the power of a political party, and the Cabinet then formed may be described as semi-popular and semi-bureaucratic. But this step of Marquis Itō's offended most of the elder statesmen, who began to feel that the Marquis was no longer trustworthy from their point of view. He had broken away from bureaucracy pure and simple, and there was no saying how far he would go. But by means of the coalition some very necessary measures were carried; what is known as the *post-bellum* programme, including naval increment and the extension of railways, &c., being among them. The partnership with the Jiyūtō was not of long duration, and when in 1898 the Marquis found himself obliged to construct a new Cabinet, his relations with the elder statesmen were of such a distant type that he found it very hard to get any of them to act with him. His combination with Count Ōkuma and his party for a short time proved to be a lame

affair, and, despairing of success, he recommended the Emperor to give the reins of power to a Coalition Cabinet under Counts Ōkuma and Itagaki, and he himself went off on a trip to China. This Coalition Cabinet fell like a pack of cards and power returned to the elder statesmen, represented by Marquis Yamagata, who formed a new Cabinet without waiting for Marquis Itō to come back. This, one would have supposed, would have been the signal for Marquis Itō to finally break with the *Genrō* and join hands with Counts Ōkuma and Itagaki in endeavouring to overthrow them. But it would seem that the Marquis was still entangled in the meshes of the Palace party of statesmen, and so the next thing we find him doing is acting as a medium between Marquis Yamagata and the Jiyūtō, presided over by the late Mr. Hoshi Tōru, and effecting a compromise whereby the Yamagata Government was to be supported in the Diet by the Jiyūtō. Immediately after this Marquis Itō gave fresh cause of umbrage to the elder statesmen by founding the Seiyūkai. He was henceforth regarded by the conservative statesmen as a man who had embarked in a most dangerous enterprise, as aiding the enemies of the State. He gave it out that his chief object in forming a political association was to create a party of an improved type. Education and reform of abuses were the tasks he had undertaken to perform. But on other occasions he was heard to say, *Waga seitō ni iru wa seitō wo shizumuru tame nari* (My object in joining a political party is its pacification). The tranquillizing and the educating have not been found to work well together, because tranquillity is not one of the main objects of the existence of a political party. Of late the Marquis seems to have given up hopes of being able to educate the party, but in response to the earnest solicitations of Count Katsura he has been trying to keep the party quiet. Marquis Itō has for many years past been the victim of a political environment which has been created by the times in which his lot is cast. Many people suppose that he is wanting in resolution, but this is not the case. The fact is he is not cut out for acting as a leader to a political party. His connection with the Palace knot of statesmen is too close to allow of his being wholly trusted by the independent politicians whom he seeks to lead. In his own interests as well as in the interests of political parties he would do well to sever his connection with the Seiyūkai and pass the remainder of his days in an endeavour to raise the elder statesmen to a higher level, to persuade them that constitutional government means a great deal more than they have any conception of at the present time. * * * * Since the above was written Marquis Itō has taken the course here recommended.

* * * In the *Kyōiku Kohō* appears a report of certain ethnological investigations made in China by Professor Torii Ryūzō, who was sent by the Japanese Government to the South-Western part of China to collect material bearing on the origin of the lowest race of savages found in Formosa, usually called 生番 *Seiban* (raw savages). Considering that the tattooed savages of Formosa are certainly descended from the Kweichau, Miaotz (苗子), aborigines, Professor Torii proceeded to Kweichang-fu in Sangching (Kweichau), where he made various investigations, which in the report are classified as follows:—(1) Bodily structure and physical peculiarities. (2) Language; he collected words sufficient to make a small book. (3) Customs and manners. (4) Written historical accounts of the ancient savages of this part of China. (5) He took some 400 photographs of objects connected with the subject under investigation. His travels extended over the whole of Kweichau, through a part of Hunan and though the eastern part of Yunnan. It is considered that Professor Torii's inquiry, when its results are published, will throw much light on knotty ethnological questions connected with the aborigines of Annam, Siam and Burmah.

* * * The following books are announced by booksellers or have already made their appearance.

In a former Summary we drew attention to the series of works under publication by the Jingu-shichō known as 古事類苑 *Kojiruien*. Many volumes of this work have already been issued, and now subscriptions are solicited for a part bearing on Japan's foreign relations called *Kojiruien Gwaikō-bu*, covering 1900 pages, for which the subscription price is 4 yen 70 sen. It goes back to the earliest times and the record is brought down to the close of the Tokugawa era. Applications should be sent to Yoshikawa Hanshichi, Minami-demma-chō, Kyōbashi, Tōkyō.

The *Taiyō Tsūshi* (A Complete History of the East) is the title of a 12 volume work being written for the Hakubunkan by Mr. Kubo Tenzui, of the Imperial University. One volume only has appeared, which sells at 50 sen per copy.

The *Indo Zatsujō*, by Dr. Matsumoto Bunzaburō, consists of 2 volumes on India. Vol. I. treats of the politics, literature, religion and philosophy of the country, and Vol. II. of its customs, habits and art. The work is issued by the Rokumeikan, Honchō, Nihonbashi, Tōkyō and sells at 90 sen per volume.

The 雅言集覽 *Gagen Shūran* is the name of a very well known standard work on classical language which has hitherto appeared is no less than 57 volumes. It has now been reduced to three bulky volumes and is offered for sale by the Zushokaisha, 18 Minami-machi, Ushigome, Tōkyō at 6 yen for the whole work. It is a companion lexicon to the *Wakun Shiori* and the *Rigen Shūran*, fully noticed in a former Summary. To any one who wishes to thoroughly study Japanese the three above-named works are indispensable. They are complements of each other. The *Wakun Shiori* explains *Yamato-kotoba*, and the *Rigen Shūran* colloquial speech.

The *Nihon Tōsei Chizu* (A map showing the strength of Political Parties, price 60 sen), by Mr. Hashida Kametarō, Chief Secretary of the House of Representatives, has been published by the Dōbunkan, Omote Jimbō-chō, Kanda, Tōkyō. Mr. Hayashida is quite an authority on the laws and rules connected with general elections. The map is supplied with tables showing the relative numerical strength of the parties.

Green Shi, Rinrigaku is the title of a translation of the late Professor Thomas Green's Ethics, recently published by the Kinkōdō, and for sale there at 2 yen a copy.

The following tables are taken from the July number of the *Taiyō*, and were compiled by Mr. S. Itō.

* * *

In a recent number of the *Taiyō* appears a long article by Dr. Tabe Tongo on the present system of Japanese education. Public opinion, says Dr. Tabe, points to three defects in our system of education. (1) The connection between the lower schools and the higher schools has not been properly established. (2) The general standard of teaching in all Government schools is in many ways unsuited to the times in which we live. (3) The Imperial Universities maintain too high a standard; and the courses which students have to follow in the various schools are unnecessarily tedious and prolonged. To the first of these three subjects the Government has for some time past been giving attention, and though the changes made or proposed do not seem to go far enough, it is better to wait and see what is to be effected before discussing the question further. (a) Taking the various schools in order, let us consider in what respects they need reform. (a) *Primary Schools*.—The training of teachers for these schools as carried on in recent years is most unsuitable. The teachers turned out by the High Normal Schools are extremely rule-of-thumb sort of men, who are teaching machines rather than teaching men. They are lacking in adaptiveness and in common sense and they are apt to hold experienced teachers in contempt because the latter are unacquainted with recently imported German methods. Teachers of this type attach more importance to what they themselves say than to anything found in text-books. Hence the disregard of text-books which is complained of in many quarters. (b) *Middle Schools* in our conception ought to be characterised by practicality and common sense and to teach the subjects that are most needed in the after-life of the student. (c) *The High Schools* are now rightly regarded as preparatory schools for the Imperial Universities and as nothing more, the attempt to make them fill a double function having failed, as in the nature of things it was bound to do. (d) *The Imperial Universities* are to be regarded as finishing institutions for specialists. There are those who advocate a shortening of the period spent in education by cutting out the High School preparatory course from the programme. They would have the Elementary School course 6 years in length, the Middle School 5 years, and the University course 3 years, thus making it possible for youths to finish their education at the age of 20. This would imply a lowering of the standard of the Universities or a thorough recasting of the Middle Schools. The present Middle School student is quite unfit to enter either of the Universities. It is in the knowledge of English that he is most deficient. There are some who advocate the employment of foreigners in all Middle Schools, in order to remedy this defect. But the foreigners that are to be had for 100 yen or 150 yen a month are not worth having. To employ such men would be to lower the reputation of such schools.

(Kono hei wo sukuran to shite, Chūgakkō ni gwaikoku kyōshi wo yatoeyo, nado iu ga, guron nari. Dai ichi ni hyaku yen ya, hyaku go-jū yen no gekkyū de yatoru beki sei-yō-jin wa nani mo dekinai. mushiro kakaru mono too motte suru wa chūgaku wo kegasu mono nari). In Germany the lowest salary paid to a Middle School teacher is 1,350 yen a year. Such a teacher in Japan would have to be paid 4,000 yen a year; for do not our University graduates on going over to China immediately

after graduation receive 2,000 yen a year and our ex-University professors get 6,000 yen a year in China? Even supposing that the Middle Schools could provide for such an outlay as the scheme would involve, it is doubtful whether constituted as these schools are now the results would be satisfactory. Regard it how we may, the shortening of the course of study would mean less thoroughness. The degree would be of less value than it is now; would, in fact, be a mere empty name. We are in favour of keeping the educational course as regards the time spent in the various schools as it is now, that is, of making it to extend over 17 years. (e) The *Tokubetsu Sokushi Gakkō* (Special Short-Method Schools) no doubt fill a useful rôle in the case of poor students or of men who are no longer young and yet wish to study, but they should be made to depend on charity and not be supported with State money. (f) *Private Schools* should receive every encouragement in this country, but they have not hitherto been run on right lines. They have savoured too much of mere money-making concerns. Private Schools are very prosperous in America. The reason of this is that they are well endowed. The education they impart being valued by the nation, capital for their efficient maintenance is freely subscribed. Profit is not the chief end in view of those who run them. It is in this particular that our Japanese private schools are most defective. They are most of them ill-provided with capital and dependent on school fees alone. (g) The standard of *Technical Schools* should be raised so as to make a University course superfluous in the case of the majority of students. (h) In the amount of State money devoted to education compared to annual revenue we occupy the lowest place among the subjoined eight Powers.

Percentage of annual revenue devoted to Education.

The *Jitsugyō no Nihon* (Business Japan) a well-written fortnightly Magazine has been in existence six years, but has undergone much improvement in recent years. From month to month it supplies a very large amount of most useful information on business subjects and discusses various interesting questions connected with modern industrial and commercial development in all parts of the world. It covers about 100 pages and sells at 11 sen per copy. During the past few months it has been printing maps showing the state of various industries throughout the world. The coal and tobacco yield, the railway mileage and the like, are each treated in turn; the object being to show Japanese readers just where this country stands vis-à-vis competing nations. A great deal of information bearing on Japan's various industries will be found in the pages of this magazine. Finance and politics are discussed in their bearing on business. The tone of the *jitsugyō no Nihon* is practical and utilitarian, and the sentiments expressed in its pages are mostly of a liberal if not pro-foreign type. In an excellent article published last month entitled *Jitsugyō to Seikō*, (Business and Success) the dignity of business as a profession is upheld, and it is clearly, demonstrated that traditional Japanese notions on the inferiority of all pursuits which have the supply of man's bodily wants as their chief object are founded on partial knowledge, stupid prejudices or false philosophy. Though contempt for the man of business is not so generally entertained by Japanese educated men to-day as it was 20 years ago, there is still far too much indifference to business and hence there is much need for such vindications of its claims to honour and esteem as are constantly published by the *Jitsugyō no Nihon*. In the article to which we have referred above the notion that a business life is of itself demoralizing, that it is incompatible with the pursuit of lofty ideals, and the like, are earnestly combated and the rank held by business men in the West is referred to as a proof that a low standard of morals and success in business are by no means necessary counterparts of each other.

Under the title of *Kokumin Tofu-byō* (The National Craze for residing in Towns) the *Chūō-Kōron* deplores the flocking of all the best members of society to large cities. This has been going on for a long time in Japan, the result being that while there are many signs of progress at the great centres of commerce and industry, country districts are very much what they were a quarter of a century ago. The *Chūō-Kōron* refers to the practice followed in England in respect of the educated gentry. Many of these settle in country districts and constitute centres of enlightenment to their fellow-residents. In Japan from the nobility downwards residence in the country is unpopular and it seems to be thought that contentment with a country life argues lack of intelligence. The cities are all over-populated and there is much distress among the lower classes in consequence. The young men who are sent up to the Universities from the provinces have no inclination to return to their native towns and villages. This is one reason of the slow progress that the Japanese nation as a whole is making in the adoption of Western civilisation.

Under the heading of "The Conciliation of Labour and Capital," the *Chūō-Kōron* alludes to the wild theories which are being propagated in this country in the name of socialism. The notion that community of goods is capable of being effected in any country or that if effected it would last for six months is quite absurd, says this magazine. The present agitation encourages the idle and the unthrifty. As for all the talk about the equal division of property, even supposing it could be accomplished, it would not enable the mass of the people to live comfortably by any means. The following figures are worthy of the attention of everybody interested in this subject. According to a recent report of the Bank of Japan the value of property in Japan may be approximately stated as follows:—

	Yen.
Land	7,000,000,000
Mines	400,000,000
Horses, Cattle, &c.	80,000,000
Buildings	1,900,000,000
Household property of various kinds	400,000,000
Railways, Telegraphs, &c.	350,000,000
Men-of-War	250,000,000
Gold and Silver	200,000,000
Various Industries	300,000,000
Miscellaneous Goods	800,000,000
Total.....	11,680,000,000

Now supposing this property were equally distributed among the 44 million inhabitants of Japan, each person would have about 265 yen 50 sen. Even on the assumption that this property would realize an interest of 25 per cent. *per annum*, the income to be derived from it would not exceed 66 yen 37 sen, or about 5½ yen a month. Since there are enormous difficulties connected with any redistribution of property after the fashion proposed by socialists, and since prating about such things only encourages discontent, we recommend, says the *Chūō-Kōron*, earnest-minded men to turn their attention to certain practicable methods of benefiting the poor and of adjusting the relations of capital to labour. We are too fond of carrying on lengthy theoretical discussions which have no bearing whatever on the practical issues of everyday life.

* * *

We have heard so much of linguistic reform without witnessing any substantial change during the past 20 years that we have grown quite weary of reading lengthy discussions of what is desirable or practicable. As for the Education Department, the public seems to have given up the hope that it will ever inaugurate any radical improvement in the mode of writing Japanese. For years a Committee of inquiry has been supposed to be sitting for the purpose of collecting information on this mysterious (?) subject. Dr. Katō Hiroyuki, a member of the Committee, seems to fear that nothing will be done in his lifetime. But that ardent and persistent advocate of reform in all quarters, the *Jiji Shimpō*, in a recent issue under the title, "Proper Nouns and Chinese Ideographs," pointed out how useless and

confusing is the practice of resorting to Chinese characters at all in the case of proper nouns. Instead of being an aid to pronunciation they are a positive hindrance. The characters 神戸, are read, according to locality, Kōbe, Gōdo, Kambe, and Kamibe; the ideographs 富田, are read Tomita, Tomida, Tonda, Tomuta, and Toda. There are three ways of writing Sendai, 仙台, 川内, 千代, according to locality. There is no uniformity in the characters used even where the pronunciation is precisely the same. Yukinaga may be written 行長 or 幸長. The pronunciation of names is so difficult and arbitrary that even Japanese scholars have to make inquiries before venturing to decide on the way a name is to be read. (4) The *Jiji* proposes that the practice of using Chinese characters for names be dropped altogether and that either *Katakana* or *Romaji* be used in their stead. If the ideographs must be retained as an ornament, in every case *kana* should be printed with the name. Nomenclature in Japan is a most elaborate branch of knowledge, in which few Japanese even are thoroughly proficient. It is quite common for learned professors to expose themselves to ridicule by the wrong reading of a name that is familiar to most of the students. (5) There are ideographs ending with vowels when expressed in *kana*, the pronunciation of which differs according to position in the word. Take the character 郎. This is usually written ラウ, ろ and in Saburō and other names it is so pronounced, but we have never heard a Japanese say Gorōsaburō or Gorōhachi or Jirōzaemon, they say Gorosaburō, Gorohachi and Jirozaemon, for the sake of euphony, ignoring the Dictionary *kana* reading of 郎, changing at will the ラウ into ロ.

(4) For the convenience of the foreign teachers connected with the High Schools, it is customary to write the names of the students in *Romaji* as well as in Chinese. Those Japanese teachers who read *Romaji*, whenever a doubt arises as to the proper reading, refer to the *Romaji*. The funny thing is that the teachers who read no *Romaji* often go to the Japanese teachers of foreign languages for instruction as to the pronunciation to be given to proper names. This occurs year after year—no slight compliment to the convenience of *Romaji* for proper names.—(WRITER OF SUMMARY).

(5) We have constantly come across local names whose pronunciation no ordinary Japanese could hit off at a guess. The ideographs are sometimes in excess of the sounds required, and sometimes insufficient, whereas at other times a local turn has been given to them. 七北田村 is pronounced Nanakita-mura, and not Nanakittam-mura; but 愛子 is not pronounced Aishi, but Ayashi. The name of a station on the Tōkyō-Awamori line is 小牛田, which is pronounced Kogota, and not Kogyūta, as one might suppose. The whole subject is a maze.—(WRITER OF SUMMARY).

LAW CASE.

CLAIM FOR CANCELLATION OF SEIZURE.

The hearing of the case instituted by Mrs. Yuki Nakamura against the Etablissement Orosdi-Bach, No. 78, Yokohama, claiming cancellation of seizure with regard to certain property was to begin in the Tokyo District Court on July 17th.

ALLEGED FRAUDULENT SALE OF A FOREST.

In the Court of Cassation, on July 22nd, T. Matsuno, Kochi Prefecture, filed an action against Mr. K. Yamane, Director of the Kochi Forestry Bureau, claiming yen 100,000. The petition states that plaintiff purchased in 1880 a certain extent of the Tokinouchi forest from Government. A man whose name is unknown had however, sold it fraudulently to a third party. The defendant approved of this act, and plaintiff, the owner of the forest, has sustained loss of over yen 100,000. The petition was dismissed in the lower Courts—the District Court and Appeal

NEWS OF THE WEEK.

Four cases of cholera were reported on July 22nd at Niigata.

The German cruiser *Thetis* arrived at Masampo, Korea, on July 21st.

The Japanese training ships *Suma* and *Akashi* arrived at Fusan, Korea, on July 20th.

A case of cholera was reported on July 17th at Tsuruga and another on the following day at Hiroshima.

Tokyo papers state that the Japanese Government sent on July 22nd to the Vatican a telegram of condolence at the death of Pope Leo XIII.

Baron Yamamoto, Minister for the Navy, arrived on July 22nd at Kobe. Tokyo papers state that he seemed to be on secret and urgent business.

A case of dysentery appeared at Noge, Yokohama, on July 21st. The patient is an old woman. She was at once removed to the Manji Hospital.

A regular service between Wiju and Anju, Korea, was commenced on July 12th by the steamer *Kaiho Maru* belonging to the Japanese firm, Hori Shokwai.

The steamer *Tomiyoshi Maru*, which went ashore on July 14th off Sera, was broken up on the night of the 20th by the waves. Cargo and crew had been saved as already reported.

A case of cholera was reported on July 21st in Tokyo. The patient is a woman named Kayo Yokota (43) living at Komagome and was at once removed to the disinfecting hospital.

The usual assembly of local governors will be held in Tokyo about the beginning of August. The Minister for Home Affairs ordered them on July 21st to arrive at Tokyo before August 4th.

The trial trip of the gun-boat *Uji* which was completed at Kure Dockyard about the beginning of this month has been successful. The ship will shortly be commissioned and proceed to North China waters.

The preliminary examination of Mr. H. Okabe, Director of the Osaka Life Insurance, concluded on July 17th in the Osaka District Court. He was committed for trial. The charge against him is fraud and embezzlement.

It is officially reported that the Exhibition at Osaka was again entered by thieves during the night of July 16th and gold ingots valued at about yen 7,000 were stolen. The exhibits were in the Formosa Building and were the property of three Japanese merchants at Keelung.

Mr. N. Miwa, M.P. for Miye Prefecture, and five of his supporters, who have been charged with infringement of the Election Law were on July 22nd released in the Nagoya Appeal Court on the ground that the evidence against them was insufficient.

The steamer *Shoko Maru* (Konan Steamship Company) being completed at the Osaka Iron Works, was launched on July 22nd. She will be ready for service before the middle of September on the Yangtze. Her gross tonnage is 900, speed 10 knots, length 195 feet, width 38 feet.

In the Tokyo District Court, on July 22nd, an educational official connected with the text book affair was sentenced to one month's imprisonment with hard labour and a fine of yen 4. The bribe, yen 200 which he had received, was ordered to be confiscated.

Two educational officials connected with the text-book affair were, on July 20th in the Tokyo District Court, sentenced to 4½ and 2½ months imprisonment with hard labour and a fine of yen 15 and yen 7 each respectively. The bribes they had received were ordered to be confiscated.

The competition between the Sanuki Railway Company and the union of steamship companies

is growing more serious. The former on July 20th reduced the return fare between Osaka and Takamatsu to *sen* 80 from *yen* 1 to which rate it had recently been reduced, and put on two extra steamers.

The captain of the steamer *Athenian*, which arrived at Yokohama on July 15th, informed the Harbour police, just before sailing for Hongkong, that a Japanese passenger from Canada was discovered to be missing on the 12th. Being unable to make further investigations after the *Athenian's* departure, the police sent instructions to the Kobe police to proceed on board there.

According to the *Yoroku*, the report that the Government intends to sell loan bonds amounting to *yen* 50,000,000 on the foreign market is quite true. The same paper says that the Government received on July 21st a lengthy telegram from London about the transaction. The *Fiji*, however, it will be remembered, contradicted the report.

A coolie named S. Abe (28) working on board the Norwegian steamer *Skuld*, was arrested on July 19th by a tidewater on a charge of having stolen some 15 *kin* of sugar from the ship. He was the following day removed to the Court through the harbour police. While being arrested the man inflicted injury on the Customs officer.

A coolie named S. Ichikawa (38) living at Kotobuki-cho, Yokohama, at 5 p.m. on July 21st murdered another coolie named T. Ishida (29) living at Ishikawa, at the former's dwelling, inflicting injuries on his head and neck with a knife. The offender was at once arrested. It appears that the murderer had been working on board the steamer *Coptic*. On landing at the pier, he was much intoxicated and Ishida took him home, only to fall a victim to his madness.

Two men who had been passing as farmers were arrested on July 16th by the Mishima police on suspicion of forging *yen* 5 notes by means of printing machinery which they had hidden in the forest, in Taho district, Idzu province. They were removed on the 20th to the Shizuoka District Court where their preliminary trial was at once commenced. The *Fiji* states that some persons believed to be connected with the affair are being observed by the police in Tokyo.

The barque *C. H. Watjen*, bound from New York to Yokohama, is reported by a contemporary to have been found by the Australian steamer *Moresby* lying at anchor off the coast of New Guinea, between Cape Suckling and Yule Island. She had about 120 fathoms of chain out, and was in a totally helpless condition. With the exception of the mizzen lower mast she had absolutely nothing standing, even her rudder being gone. She had only her own crew aboard at the time, but the disabled vessel had been the means of rescuing part of the crew of the barque *Edith*, which was wrecked off the New Caledonian coast. The barque was dismasted in the cyclone which played such havoc at Townsville, and she had drifted helplessly for 900 miles before being picked up by the *Moresby*. The *C. H. Watjen* had a cargo consisting of kerosene oil. She had made a protracted voyage, having sailed from New York as far back as October 29th last. She was in a bad way when picked up by the *Moresby*, and the timely arrival of the latter doubtless saved the vessel from total loss.

AMERICAN MATTERS.

The semi-official *North German Gazette* on July 2nd announced that Baron Speck von Sternberg had been definitely appointed Ambassador of Germany at Washington.

Definite steps towards the erection of a \$3,000,000 art museum in Chicago have been taken. The trustees of the National Art Museum have selected the Illinois Trust & Savings Bank as a repository for the funds of the organization, and the task of collecting the funds will be commenced soon.

The Cunard Steamship Company's withdrawal from the North Atlantic Conference, went into effect on July 2nd, the fourteen days' notice of its intention having expired. At the offices of the Company in New York it was said that no orders had been received to make any change in rates, either freight or passenger.

The first foreigners to join the "passive resistance" movement against the Education Act in England are two American tax-payers, living at Wimbledon, Rev. W. Farquhar, formerly a pastor of Portland, Oregon, and Mr. E. P. Gaston, who at one time lived in Chicago. They have both refused to pay the education rate, and consequently their household goods will be seized and sold at auction, to satisfy claims for a few shillings.

To secure increased efficiency in the unlisted personnel of the U. S. Navy, President Roosevelt issued an executive order increasing the pay of chief petty officers of the U. S. Navy to \$70 per month, and establishing the new rating of chief water tender at \$50 per month. Only those chief officers who shall receive permanent appointments after qualifying by examination after July 1, will be affected by the order.

Mr. Sakae Shioya, who has received the degree of Master of Philosophy at the University of Chicago, is the first student from Japan to make in that university English literature his specialty. Mr. Shioya's thesis was on "The Influence of Fletcher's 'Faithful Shepherdess,'" the first pastoral drama written in Shakespeare's time. After graduation from the Imperial University of Tokyo, Mr. Shioya edited "An English Reader for Japanese Students," which was published with the approval of the Japanese Department of Education.

A number of contributions towards the \$10,000,000 demanded last autumn by President Butler of Columbia University for the immediate needs of the institution have been promised conditionally on the acquisition of the entire sum. Considerably more than \$2,000,000, the amount necessary for purchasing the South Field property, the two square blocks between Amsterdam Avenue and Broadway, and running from 114th to 116th streets, has already been ensured on this provisional basis.

Between Chicago and Milwaukee there are spots where diamonds are said to be hidden, deposited there by glaciers. Mr. Alja Robinson Crook, Professor of Geology at Northwestern University, is the sponsor for these northshore diamonds. He has issued a pamphlet entitled "The Mineralogy of the Chicago Area," and in it he tells of the new treasure fields. "Some 17 specimens, weighing together about 70 carats, have been found," he says. "The largest weighed 21 $\frac{1}{4}$ carats."

Professor Garrett Drovers, President of the University of South Dakota, it is believed, will resign as a result of recent investigation by the regents. He is said to be so disgusted at what he calls petty persecution that he will no longer consent to be connected with the institution. The charges are declared to have been largely the result of local hostility. The citizens of Vermillion, it is said, were so ashamed at the petty character of the charges that they induced their local papers to omit all mention of them.

In an address at Springfield, Ohio, recently, a coloured bishop, the Rev. H. M. Turner, of Atlanta, said: "My people do not seek social equality. We have no desire to mingle with the whites in a social way. I have said and I repeat that I do not want to visit any man's home who does not want me, and I have no desire to call on white folks. We are now asking the white man to do like the Negro—stay on his own side of the house. We want to hold our race distinction, and if it is not held it will not be our fault. The lifting up of the Negro must be in the hands of the Negro, and for this reason I still contend that the Negroes should go to Africa, where they can have their freedom and not be lynched simply because they stand up for their rights."

CORRESPONDENCE.

WHY NOT ARBITRATE?

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Of all three means of settling international disputes—diplomacy, arbitration and war—the last is the most barbarous, and is certainly against the divine doctrine of Christianity," so said Mr. Uchida, Japanese Consul-General to New York, at the recent meeting of the Mohonk Arbitration Conference. All will agree with him that, of the three, only one is barbarous, and that one intensely so; and many will agree, as does the present writer with a deep-seated conviction strengthening with the years, that "all war is contrary to the spirit and teaching of Jesus Christ." But as the relations between this country and its northern neighbour become painfully tense, the question presses for answer:—If diplomacy fail, what else is left for Japan but "the cruel arbitrament of the sword?"

It may be taken for granted that Japan only asks good faith in the observance of treaties, and desires, in all honourable ways, to avert war. On the other hand, as we should give a nation, as a picture, the best light, we should try to believe not only that Russia would deplore war, but that she considers her course in the Far East one that the moral sense of the nations must approve. It is right to assume that the sincere convictions of the Czar and his counsellors still find expression in the noble Rescript: "To seek the means of warding off the calamities which threaten the whole world is the supreme duty resting to-day upon all states. This Conference will strengthen the efforts of all those states which sincerely seek to make the great conception of Universal Peace triumph over the elements of trouble and discord. It will, at the same time, cement them together by a joint conservation of the principles of equity and right, on which rest the security of states and the welfare of peoples." It ought not to be difficult to approach with peaceful proposals a nation which professes to be swayed by these exalted sentiments. "It is Jacob's voice, but the hands are the hands of Esau." This is, as with one voice, Japan's answer. Yet if opportunity can be found to test sincerity, that opportunity should be in sincerity sought. "In well-ordered society, the disputes of individuals are settled, not by recourse to a duel, but to the law. Would it not be a blessing to humanity if the just cause of a nation should be vindicated by a court of arbitration rather than by an appeal to arms? Then to rulers, as well as to private litigants, could be applied the words: 'Thrice is he armed that hath his quarrel just.'"

While, however, this will be admitted theoretically, yet for the present complication we have not seen such a course suggested, and he, perhaps, would be considered very ill informed who should seriously propose arbitration of the questions now at issue. But we are emboldened to believe that these delicate as they are, are not beyond settlement from the following, which caught our eye while wishing that such a method might be within the range of practical politics. "Baron von Rheinbaben, Prussian Finance Minister, has declared it desirable that the whole Manchurian tangle, as he calls it, should be arbitrated between the disputants." It is naively added, "Justice would suggest, if the Baron please, that Manchuria herself and China should first be allowed their rights in the case." But if justice toward all concerned is all that is desired, there is no reason why the whole "tangle" should not be untangled as the Baron suggests.

If either nation should say, "there is nothing to arbitrate," it could be answered, "if there is anything that may call for settlement by force, there is something that calls for settlement by reason." Grotius' words are still true: "the party who refuses to accept arbitration may justly be suspected of bad faith." "Controversies between nations," said that eminent jurist, David Dudley Field, "can be settled by arbitration before a war, because they are always settled by negotiation after a war, and are, therefore, just as capable of discussion and settlement before, as they are after, provinces have been ravaged, treasures exhausted, and lives destroyed." It is true that, even in arbitration, there is not absolute certainty of a just decision, but much more is there no certainty that in war the right will conquer. A people might say that, sure of the righteousness of their cause, they will trust in the God of battles. But what if there be no God of battles, and Max Nordau, the Jew, wrote truly when he wrote, "It is blasphemy to ask of the God of love to look with favour upon murder and destruction?" Arbitration may not be ideal, but it "is an alternative and, in judging of its fitness and wisdom we must do so by comparison, with the other side of the alternative."

If the tangle had been delayed for a few years the way would then be much easier for peaceful settlement. Apart from a Stated International congress, looming up on the near horizon, the International Court of Arbitration, in its million

and a half home, will have more fully proved that "when the future writes the history of the present, the establishment of this court will be seen to be the greatest event of our time." Delcassé, France's Foreign Minister, did not overstate when he said that the arbitration movement was "nothing less than a revolution." Is it not then possible to prevent the time, and deal with the problems of to-day as they would be dealt with in the better day so near at hand?

It may be a revelation to others, as it was to ourselves, how the International Court has already removed one of the greatest obstacles in the way of an appeal to reason. "It was to be feared," writes Baron d'Estournelles de Constant, "that the two states in conflict would hesitate to have recourse spontaneously to arbitration. The stronger will not care to renounce the advantage of its superiority; the weaker will, perhaps, not be able to appeal to arbitration, for fear of thus betraying its inferiority. In order to induce the two states to have recourse to the Tribunal, and even to render it morally impossible for them to shun its jurisdiction, the Conference decided to reverse the rôles: instead of waiting for the Powers concerned to appeal to arbitration, it has laid them under the necessity of repulsing it. By Art. 27, the Neutral Powers impose it upon themselves as a duty to remind those among them which are on the eve of coming to blows that the permanent Court is open to them." We could wish that the added words might prove true, that Governments "will no longer dare to refuse arbitration any more than they would have dared to have recourse to it spontaneously"; but we may hope that if diplomacy fail and a crisis is faced, the barbarous last resort will be averted by this "second line of defence."

Our references to influential Frenchmen remind us of the interesting reading which the newspapers have given us of late; the friendship between England's King and France's President. In the 674 years between 1141 and 1815 England and France were at war 266 years, or for every two years of peace one year of fighting. Little wonder that animosity has been in the blood. "Perfidie Albion," said France. "The French are our natural enemies," said England. "I feel it my duty to hate the French," said Nelson. How ashamed we should be that the night of suspicion and hate has been so long and dark, and how thankful that the day of brotherhood has dawned at last! All right-thinking persons will, surely, agree with President Loubet that "the nearest of neighbours should be the best of friends." We hail the rapprochement both for its sake and as promise of the time when all the nations shall be animated by the same spirit, when the narrow and false shall be displaced by the wide and true patriotism, when all men's good shall be each man's rule, when the prayer shall be answered of the venerable head of the Roman Catholic Church, who before these lines are printed may have passed to "where beyond these voices there is peace."

"Tu pacis almae semina provehe;
Irae, tumultus, bellaque tristia
Tandem residant."

Yours, etc.

IRENE.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

ANGLO-JAPANESE COMMERCIAL TREATY.

London, July 17.
A commercial treaty between Great Britain and Japan has been notified.

THE CRIMES ACT.

The Crimes Act has been revoked in various districts of Clare, Limerick, Tipperary, Roscommon, and Sligo. The measure is greatly welcomed in view of the approaching royal visit.

THE TAXATION OF FOOD.

A requestion signed by 650 city men, including 19 members of the House of Commons, has been sent to the Lord Mayor requesting the use of the Guildhall for a meeting to condemn the taxation of food.

SOMALILAND.

Two companies of the Army Service Corps, with 900 mules and many wagons and stores sail from Durban on July 18th for Berbera en route for Somaliland. This is believed to indicate elaborate preparations before active operations are resumed.

THE BRITISH FISCAL QUESTION.

London, July 18.

The Lord Mayor of London has declined the requisition (referred to in Reuter's telegram on Saturday for the loan of the Guildhall to the Unionist opponents of Mr. Chamberlain's fiscal proposals.)

SOUTH AFRICAN GARRISON.

Mr. St. John Brodrick, Secretary of State for War, states that the Defence Committee of the British Cabinet has decided to keep 25,000 men in South Africa available for service in India in the event of any emergency.

THE PORT ARTHUR CONFERENCE.

It has been semi-officially announced at Washington that the Port Arthur Conference was an important step in Russia's plans to arrange the internal administration of Manchuria in such a manner as to allow of the opening of ports desired by the United States and Japan without undue sacrifice of Russian interests.

SOMALILAND.

It is expected that General Egerton with fresh reinforcements will strike a fair blow at the Mullah, but a vast expedition is not contemplated.

THE IRISH LAND BILL.

London, July 19.

The Irish Land Bill has passed the Committee stage and been read a third time in the House of Commons. Mr. Healy congratulated Mr. Wyndham on the great skill and courage he had shown in the conduct of the bill.

THE POPE.

The Pope's condition remains unchanged. His Holiness may live for several days.

CHINA AND THE RUSSO-CHINESE BANK.

It is announced in St. Petersburg that China has concluded a loan of two million taels from the Russo-Chinese Bank, which, instead of receiving interest, received privileges in Chinese Turkestan.

TELEGRAPH CODES.

London, July 20.

The International Telegraph Conference has completely revised the rules relating to Codes which will become effective from the 1st day of July 1904. Any combination of five letters will be accepted as one word.

FRANCE AND ENGLAND.

An Anglo-French Union for the development of commercial relations between Great Britain and France has been practically completed. A number of French delegates have arrived in London with deputies of the arbitration group for the purpose of conferring with English representatives of the Union.

THE TRUSTS IN AMERICA.

Later.

President Roosevelt has decided to summon a special session of Congress for the purpose of introducing legislation dealing with the present unsatisfactory financial conditions, particularly in connection with the Trusts, several of which are notoriously tottering and others are bankrupt.

DEATH OF THE POPE.

London, July 20, 5.50 p.m.

His Holiness the Pope is dead.

A CORRECTION.

London, July 21.

With reference to the Commercial Treaty announced on the 16th of July, Reuter's message should be corrected to read "com-

mercial treaty between Great Britain and Persia"—not Japan.

BRITISH FINANCE.

Speaking at the Mansion House, Mr. C. T. Ritchie repudiated the charge that he had insufficiently safeguarded the Sinking Fund. He declared that in four years' time it would be found to have reached a sum of nine millions, which was unprecedented. British Consols were still the best and greatest security in the world.

THE PASSING OF LEO XIII.

London, July 22.

The Pope's death was preceded by a short struggle; then he fell into a profound lethargy, passing away calmly, while Cardinals and dignitaries, kneeling around weeping, recited the prayers for the dying. Then the Grand Penitentiary recited the prayer for the dead, after which the Cardinals and dignitaries defiled past the corpse, kissing the hands. The body, which is clad in white with the face veiled, rests on a bed.

Cardinal Oreglia, as Camerlengo, has assumed official direction of the Vatican, Cardinal Rampolla immediately ceasing to act as Secretary of State.

INDIA AND THE AFRICAN TROOPS.

The proposal that India should pay a share of the troops at the Cape has aroused much opposition in the Lords and Commons. Nothing will be decided until a reply is received from India.

THE LATE POPE.

Later.

The Pope has been embalmed and the body will be removed to-morrow to St. Peter's, there to lie in state.

The Italian Government is arranging with the Admiralty for the maintenance of order.

THE KING IN IRELAND.

The King and Queen have landed at Kingstown.

The King, replying to an address, said that the death of the Pope saddened his heart as well as the hearts of a multitude of his subjects. He knew the Pope's interest in the welfare of the people of the British Empire. The King concluded with these words:—"My visit coincides with the bright hope that a new era of prosperity is opening for Ireland. My fervent prayer is that the country may steadily grow in contentment and happiness."

Their Majesties drove to Dublin and had a splendid reception everywhere.

RUSSIAN TORPEDO BOATS.

London, July 23.

Eleven Russian torpedo boats leave Kronstadt on the 26th July to reinforce the Russian Squadron in the Far East.

RUSSIAN TROOPS.

The *Standard's* Odessa correspondent says that it is reported from Moscow that 128,000 troops of the Central and Northern garrisons are being mobilized for immediate despatch to the Far East in case of need.

ANGLO-FRENCH RELATIONS.

One hundred French deputies and commercial delegates (mentioned in the cable of the 20th inst.) have arrived in London. They were accorded a civic welcome at Dover.

POLITICAL CHANGE.

The Duke of Marlborough has been appointed Under Secretary for the Colonies in succession to Lord Onslow.

BRITISH POLITICS.

Later.

The Times says that it is anticipated in

official circles that there will be a dissolution of parliament early in next session, and that the general elections will take place next March.

THE KING IN IRELAND.

The King's reception in Ireland was universally hearty. There was no jarring note.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE POPE WEAKER.

Saigon, July 17.

The weakness of the Pope increases and death seems near.

PORT ARTHUR.

Russia has ordered the construction of barracks for 20,000 troops at Port Arthur.

DEATH OF ADMIRAL BESUARD.

Saigon, July 19.

Admiral Besuard is dead.

THE MANCHURIAN QUESTION.

It is stated in Washington that Russia has declared that she will consent to the opening of new ports in Manchuria. The question of Manchuria thus finds itself satisfactorily settled.

DEATH OF THE POPE.

Saigon, July 21.

The Pope died yesterday at 4 p.m.

ANGLO-FRENCH RELATIONS.

Saigon, July 22.

Ninety deputies and French Senators have set out for London to attend the Anglo-French arbitration conference.

ADMIRAL BOYLE.

The *Figaro* announces that Admiral Boyle will replace Admiral Marechal in the Far East.

THE LATE POPE.

The death of the Pope was calm. The body of His Holiness was embalmed to-day. The Camerlengo Oreglia has taken possession of the Vatican.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)

CHOLERA IN AMOY.

The Japanese Consul in Amoy telegraphs that cholera has broken out there, and that in the Foreign Settlement alone 15 Chinese and 4 Japanese have died.

(RECEIVED IN TOKYO.)

WIJU.

England and Japan are anxious to have WiJU opened but Russia is opposed. The other Powers concerned have not, it is said, yet expressed any opinion on the subject, and the Korean Government also keeps silence.

(FROM THE "DEUTSCHE JAPAN POST.")

THE POPE.

Berlin, July 18.

The Pope's condition is most critical.

THE EX-CROWN-PRINCESS OF SAXONY.

The King of Saxony conferred on the Princess Luise Toscana, Ex-Crown-Princess of Saxony, the title of Countess Montignoso.

TURKEY AND BULGARIA.

The Turkish-Bulgarian conflict is arranged.

WIRELESS TELEGRAPHY.

July 19.

Wireless telegraphy trials made at Washington showed the German system of Staby-Arco to be the best.

THE KISHINEV AFFAIR.

The Russian-American Kishinev affair has been composed by diplomatic negotiations.

The Russia paper *Novoye Vremya* says Russia keeps in Europe and Asia watch and ward over the peace; it warns Japan against English influence.

VENEZUELA.

Venezuela has paid the remaining part of the German reclamation.

THE POPE'S DEATH.

Berlin, July 21.

The Pope has expired. The bronze door of the Vatican has been closed.

NEW CABINET IN SPAIN.

In Spain a new Cabinet has been formed, whose President is Villaverde.

THE DEATH OF THE POPE.

Berlin, July 23.

The German Emperor has sent to the College of Cardinals a very cordial telegram as to the Pope's death. He condoles with the Sacred College and says he will for ever keep in remembrance the illustrious patriarch and his own true friend. The Prussian Minister Baron Rotenhan extended condolences for the German Empire and the Kingdom of Prussia.

The Conclave for the new Pope's election will assemble on the 31st of July. Cardinal Rampolla, one of the best known *papabili*, is showing a reserved attitude.

The funeral parade of Leo XIII has begun. France and President Loubet will send representatives to the obsequies.

RUSO-JAPANESE RELATIONS.

Contrary to Reuter's telegrams the Japanese-Russian relations in Korea and Manchuria are considered at Berlin to be not dangerous.

(FROM THE "JIJI SHIMPO.")

DEATH OF THE POPE.

London, July 21.

The Pope died at 4 o'clock this morning. The obsequies will last nine days. The election of his successor will take place at the end of July. The Italian Government will ensure the preservation of order during the Cardinals' Conclave.

All papers in European countries have published appreciative articles with regard to His Holiness.

President Roosevelt has telegraphed his condolences to Cardinal Rampolla.

VENEZUELA.

Serious fighting has occurred at Ciudad Bolivar. The revolutionists still occupy the government offices at that place. (The government soldiers are now besieging the revolutionary force at Ciudad Bolivar.)

THE ROYAL VISIT.

Owing to the death of the Pope, calmness prevailed at Dublin when the King and Queen paid their visit there. The people, however, warmly welcomed them, pleased that the relations between England and Ireland have been further improved.

EXPORTS.

RAW SILK.

A few small daily purchases both for Europe and America, but the market is not strong and supply begins now to exceed the demand. Native exporters try to uphold the market by direct shipments, which are entered in the lists at nominally full rates, but foreign buyers hold off, the news from consuming markets being dull and depressing.

Skin-Tortured Babies AND TIRED MOTHERS Find Comfort in Cuticura

INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA OINTMENT, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusty, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, and the BEST toilet and BEST baby soap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses.

CUTICURA Remedies are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. German Depot: 400, Soke Str., Berlin, U. S. A.

DEATH.

DAVID JACKSON, Manager of the Hongkong and Shanghai Banking Corporation, Yokohama, at his residence at No. 160 Bluff, on Monday, 27th July, in the forty-eighth year of his age.

SUMMARY OF NEWS.

A CASE of cholera was reported on July 28th at Shiba, Tokyo.

Six cases of typhus and three of dysentery were reported on July 28th at Okayama.

GOVERNOR SUGU has proceeded to Hakone, where he will spend the vacation.

MR. SANSHU KUSAYAGI, a well known poet, died at Osaka on the night of July 23rd.

MR. TSAI CHIN, Chinese Minister at Tokyo, and his wife left Nagasaki on July 27th for home.

ACCORDING to the latest official investigations, the number of primary schools in Tokyo is 310. Among these eighty-eight are run at the city's expense and the remaining two hundred and

twenty-two are private. The children attending these institutions number 172,831.

THREE SONS of Prince Kita-Shirakawa left on July 26th for Osaka to pay a visit to the Exhibition.

FOUR actors at the Hagoromo theatre, Yokohama, were arrested on July 24th on a charge of gambling.

THE Korean refugee Pak Yong-ho arrived on July 24th at Ise, Ise province, where he will stay for some time.

S. ITO, chief of the village of Jinrokuji, near Nagoya, was arrested on July 24th on a charge of embezzlement.

Y. NAGASAKA, 15 years old, was drowned at about 3.20 p.m. on July 26th, while swimming near Yamashita, Honmoku.

ACCORDING to a telegram from the Japanese Consul at Manila, the Philippine Government issued the new *pesos* on July 20th.

GAS exploded on July 25th in Chojabara Coal mine, Kasuga district, Fukuoka prefecture. Three workmen were severely injured.

A WHALE fishing vessel capsized and sank on the morning of July 20th off Hamano near Nagoya. The crew were rescued.

A FERRY-BOAT capsized on July 22nd in the Tone river near the village of Hanawa, Chiba prefecture. Two passengers were drowned.

AN omnibus was over-turned on the morning of July 28th at Honshila near Shimabashi and two passengers were more or less injured.

OWING to the gale, a lighter carrying 23,000 *koku* of coal (1 *koku*—about 5 bushels) capsized on July 27th off Shinagawa. The *sendo* was saved.

A BAG containing postal matters and parcel post-packages, was stolen on the night of July 24th in the Mine district, Yamaguchi prefecture.

MARQUIS SAIONJI, new president of the *Seiyukai*, entertained many prominent members of the party at the Hoshigaoka restaurant on July 26th.

A TELEGRAM from Urawa states that the shareholders of the Koshima Bank held a general meeting on July 28th and decided to wind up the concern.

THE warship *Kasagi* which stranded on July 23rd off Tsunoshima, near Shimomoseki, and floated on the 25th, will probably be repaired at Sasebo Dockyard.

ALL the jinrikisha coolies at Hamamatsu struck work on July 25th. The cause was reported to have arisen out of an intention of the authorities to revise the fares.

THE training ship *Taisi Maru*, of the Commercial Marine College, which is under construction at the Kawasaki ship building yard, Kobe, will be launched in October.

ACCORDING to a telegram from Matsuyama, the Toyo Steamship's Company steamer *Toyo Maru*, which sank on July 23rd off Echi district, Iyo province, was floated on the 27th.

THE Osaka Shosen Kaisha intends to issue debentures to raise funds needed for the extension of its services to Manila and the southern islands. The amount of the debentures is not yet fixed.

THE construction of the Government railway between Kure and Kaida, which was commenced on May 1st, 1901, at a proposed expense of *yen*

2,150,000, has recently been almost completed, excepting work on two iron bridges. It is expected that traffic will be opened in the beginning of December this year.

THE extraordinary general meeting of the Nagoya Commercial Bank was held on July 27th when the shareholders decided to sell the concern to the Kitahama Bank. The conditions are not yet reported.

MR. KAWAGUCHI, the Buddhist priest, who has explored Thibet, delivered on July 26th, at the Chuwo Commercial School, Tokyo, a speech on the customs, commercial conditions, etc., of that country.

THE construction of an electric tramway between Shimabashi and Shinagawa has been completed. The trial run on July 25th proved successful. It will be opened to the public on August 1st.

EARLY on the morning of July 27th the dwelling of a wealthy merchant named T. Hashimoto, at Hinodochi, Yokohama, was entered by two armed robbers who stole over *yen* 100 and several valuable articles.

K. HISHITANI, president of the Hishitani Bank, and sharebroker, who is suspected to be in connection with T. Ikeo, official of the Department of the Finance, and is alleged to have assisted the latter to raise money by the 42 stolen bonds, was arrested on July 27th at Kobe.

THE N. Y. K.'s steamer *Hakata Maru* is reported to have collided with a junk containing a crew of eight, at 5 a.m. on July 28th off Noshima point, Awa province. The latter was cut to pieces and sank, but the crew were saved by a boat from the *Hakata Maru*.

A. SAJO (27) and another were arrested on July 24th at Maisaka by the Shizuoka police on suspicion of having murdered, on October 26th, 1898, in Koishikawa, a *sake* dealer named K. Miyazaki his wife, two children, and four servants. Their house was robbed and then set fire to.

THE members of the Yokohama Municipal assembly held a conference on July 28th when Mr. Watanabe, under instructions from the Mayor, appointed a committee of ten to investigate enterprises with regard to the improvement of the harbour, etc.

A THUNDER-STORM prevailed on the night of July 23rd at Nagoya and the surrounding districts. At Chiba district, two persons were killed by the lightning. A telegraph pole fell near Otaka railway station and communication was suspended. At the same time a workman at the station was injured. At Niwa district a house was burned down by the lightning.

TOKYO papers publish a report from Manila that a Japanese boat containing two fishermen named A. Shirai and S. Kimura, was reported missing on June 19th off Cavite. It was found on June 21st, empty, off a neighbouring village. On examining the boat blood stains were discovered, and the Japanese Consul is of opinion that the men had been killed by pirates.

A HUNDRED and eighteen artillery-men had a rather trying experience at Ariake mountain, near Itsukuhara, on July 24th. A terrible rain storm raged over the district that day and interrupted the movement of the guns with which they were manœuvring and the men passed the night without provisions. The following day, provisions and coolies were sent to the scene from the village office of Itsukuhara. Three soldiers were invalided.

POLITICAL NOTES.

Tuesday, July 28.

Nothing having tangible shape has yet been born of the movements lately reported in the ranks of political parties. It does not appear, according to some onlookers, that the hopeful predictions of re-consolidation uttered when Marquis Saionji consented to become the *Seiyu-kai*'s leader have been fulfilled. On the contrary, the further secession of three parliamentary members is announced. These members represent Tokushima, and as their secession had been preceded by that of one other, the *Seiyu-kai* branch in that district has been dissolved. Further it is alleged that the suspension of railway works caused by the Cabinet's adoption of the retrenchment policy dictated by the *Seiyu-kai* has caused much discontent in the regions where the works were in progress or whither they would soon have been carried. Deputations from these places are visiting the capital and tormenting the *Seiyu-kai* leaders with futile remonstrances.

But this account of the *Seiyu-kai* emanates from hostile sources. By way of response the organs of the Party depict a most miserable state of affairs in the Progressist camp. They point out that the grand movement for dissolving the Party by way of reconstruction on a greatly widened basis is hanging fire. The promised manifesto remains unwritten or at any rate unpublished, and there is now talk that it will not take the form of a manifesto but be merely a report. One of the *Seiyu-kai*'s journalistic advocates goes so far as to allege that the greatest confusion and dissension reign among the Progressists and that the probable result of all these things will be the reduction of the Party's parliamentary following to about 30 members. The prophets of this catastrophe point out that the Progressists' scheme of reconstruction was founded on a false hypothesis. They anticipated a debacle on the side of the *Seiyu-kai* as a necessary result of Marquis Ito's abandonment of the leadership. But there has not been any debacle, and whatever may be affirmed to the contrary there is not going to be any debacle at present. Therefore the Progressists reckoned without their host, and if they dissolve their organization now with the hope of re-forming it on a larger scale, they will merely find themselves working with their old materials in reduced numbers, and their open door will have served to let out the greater part of their own members instead of letting in new blood.

That is the view put forward by *Seiyu-kai* supporters. And finally there are exponents of opinion who represent the Cabinet also as busily engaged with contrivances to still further shatter and disintegrate the parties. The lowest estimate of ultimate forces assigns 150 members to the *Seiyu-kai* and 60 to the Progressists. Thus these two combined—and they must be expected to combine against the Ministry in every parliamentary crisis—wield a hostile vote of at least 200 in a House of 376. That is an ugly look out for the Government, and plans to repair it are being considered.

That is what both Progressists and the *Seiyu-kai* say.

But no one ventures to predict what will be the outcome of it all. No one undertakes to forecast the state of affairs that will exist when the Diet meets next November for its eighteenth session. Never, indeed, since 1891 has there been a more perplexing situation.

Wednesday, July 29.

The announcement compiled by the Progressists Committee is vague, as has been expected. It deals with the empire's foreign and domestic politics. As to the former, it alleges that whereas Russia's doings in China and Korea are daily becoming more dangerous, the Government does not appear to take any prompt or resolute steps, and that public opinion must consequently be appealed to for the purpose of bringing pressure to bear on the officials charged with the duty of conducting the country's foreign affairs. With regard to domestic politics the line taken is that the Ministry, pretexting the difficult circumstances of the time, is acting unconstitutionally, and that, in this matter also, an appeal must be made to public opinion. To these ends a grand organization should be formed by men willing to divest themselves of all sentimental prejudices. The document concludes by denouncing as erroneous the journalistic statements that dissolution of the Party has been resolved on. No such heroic step has been decided on. What is contemplated is that a campaign should be commenced on the above lines, and that if, in its sequel, a large number of persons be found willing to organize themselves into a powerful association, then the Progressists will not shrink from dissolution should such a step seem likely to promote the ends of the larger programme.

The contention arising out of the compilation of the document has precipitated a split in the camp of the Progressists. Mr. Komuchi Tomotsune has severed his connexion with the Party and will be followed into exile by Mr. Kono Hironaka; Mr. Shiba Shiro, Mr. Hiraoka Kotaro, Mr. Aizawa Neikei and others. Speaking briefly, the cause of discord is that Mr. Komuchi and his friends desire to take for basis of their programme a strong foreign policy, and that instead of limiting themselves to a statement of resolve to bring pressure to bear on the Government, they should frankly declare for the evacuation of Manchuria and for the restoration of the *status quo ante* in that region. They hold, in short, that all domestic squabbles ought to be eschewed for the sake of the great internal interests involved in the question of foreign policy. On the other side stand Mr. Inukai Ki, Mr. Oishi Masami and their fellow-thinkers, who attach more importance to the question of the constitution and who would make that the chief issue in a new platform, relegating foreign affairs to a secondary place. Such a course is construed by Mr. Komuchi as leading merely to a struggle for office and consequent indifference to imperial interests.

It need scarcely be said that this event causes much comment in political circles, for not only do the certain seceders from the Progressist ranks number a considerable quota, but also the general expectation is that they will be followed by so many as to greatly reduce the already minor strength of the Party. In some circles there is a confident prediction that the seceders will be found to be allies of the Cabinet, but our readers will have observed that in almost every cave formed by apostates from a party creed in Japan an official deity is said to be enshrined.

Some onlookers affirm that among the leaders of the *Seiyu-kai* also there is a growing tendency to advocate a strong foreign policy. The movement is said to be led by Messrs. Haseba and Sugita, and for additional planks in their platform they would have retrenchment of local expenditures

and economies in the naval and military departments.

MANCHURIA.

The Russian authorities, says the *Fiji Shimpō*'s Peking correspondent, are sending sixteen thousand men from Siberia into Manchuria, and are moving them, together with the greater part of the Manchurian garrison, in the direction of the sea coast, which they will be employed to defend. It is further alleged by the same correspondent that the Russians are buying up all the grain along the railway from Lutai to Newchwang.

In the *Nichi Nichi*'s Peking correspondence we find a statement that, by direction of Prince Ching, Mr. Lien Fang recently conveyed to the Russian Representative a promise that when Russia had withdrawn her troops from Manchuria China would agree to her two conditions as to sanitation and the customs. To this communication M. Lessar is said to have replied that such an arrangement would impair Russia's prestige; that China ought to take due account of Russian interests in Manchuria; that Russia did not desire war, but that if another country assumed a belligerent attitude towards her, she would not refuse the challenge; and that he was awaiting instructions from St. Petersburg on receipt of which he would make a communication to the Chinese Government.

The *Asahi*'s correspondent partially confirms the above by reporting that M. Lessar seems to be merely awaiting instructions. He has made no communication of any kind to the Chinese since his return from Port Arthur. The Chinese, on their side, perplexed by this policy of inaction, have twice sent the Vice-Minister, Lien Fang, to intimate to M. Lessar that Russia's failure to withdraw her troops from Manchuria was a distinct violation of treaty, and to urge that measures for evacuation should be at once adopted. M. Lessar is reported to have replied that he was expecting instructions from St. Petersburg, and that, for the rest, if China agreed to Russia's demands, the withdrawal from Manchuria would immediately follow.

Prince Sü has granted an interview to the *Asahi*'s correspondent. The Prince declared that China must take upon herself the responsibility of deciding the Manchurian question. If the sat by idly and allowed things to drift into a war between Russia and Japan, her own interests would suffer severely with whichever side victory rested. He attached no credence to the rumours that Prince Ching had been bribed by Russia, but he admitted that the Prince had lost his nerve through old age, and was not competent to arrive at a decision involving great issues. Viceroy Yuan and ex-Viceroy Chang, he declared, were unshaken in their advice to refuse Russia's demands wholly and definitely.

The *Kokumin*'s correspondent supplements the above by an extraordinary statement. He says that the Russian Minister in Peking, a few days ago, addressed to Prince Ching and other prominent Chinese statesmen, a despatch saying that no necessity existed for China to pay any attention to Japan's advice. If Japan had her own resolve, Russia also had hers. Whatever interference might be essayed by other Powers, Russia, having regard to existing conditions, could not possibly think of withdrawing her troops from Manchuria at the present juncture. If China appreciated this fact, there was nothing to prevent the preservation of long peace

between her and Russia. If, on the contrary, relying on Japan, she made light of Russia's wishes, it would be inevitable that Russia and Japan should come to blows. In that event, China's tenure of Manchuria could not be protracted. Japan relied on England for assistance, but a secret convention existed between Russia and England, and if war broke out between Japan and Russia it was certain that from beginning to end England would stand by inactive. The Anglo-Japanese alliance was of no advantage whatever to China.

The *Kokumin* ridicules this document as a clumsy effort to deceive and to intimidate China. Particularly does our Tokyo contemporary denounce the attempt to throw doubts on the good faith of England, and to misrepresent her as having secretly concluded with Russia a convention which would render nugatory her alliance with Japan. Not only is that absurd, but there are practical proofs of its untruth. At all events Japan does not rely on any foreign Power to assert her rights. She relies on herself and will know how to make good her legitimate claims however isolated she may be. The party to be pitied is the Chinese Government, which by listening to Russia's cajoleries and intimidation is in danger of losing the integrity and independence of the empire.

But the *Kokumin* does not formulate the query which suggests itself to us—did M. Lessar ever pen such a despatch?

Several Tokyo journals publish a report that Russia has conveyed to the Powers an intimation that she has no objection to the opening of Mukden and Ta-tung, but that as Harbin has been leased to the East-Asian Railway, that place must remain in *status quo*. Commenting upon this news the *Nichi Nichi* remarks that the *provenance* of such an announcement is singular. Russia might properly inform the Peking Government as to her sentiments about the opening of Manchuria, but when she undertakes to convey direct to the Powers an expression of her will, she virtually assumes the sovereignty of Manchuria. That does not conduce to a settlement of the difficulties. The *Yominri* takes almost the same view. It denounces the whole thing as a mere Russian trick, and declares that such procedure tends only to complicate the situation.

KOREA.

Saturday, July 25.

The Korean Government is said to have definitely refused the demands addressed to it by M. Pavlov with reference to the telegraph question. M. Pavlov had referred to the fact that British and American concessionaires had been allowed to erect telegraphs, but the Seoul Foreign Office pointed out that these enterprises had been preceded by reference to the Korean Government by whom they had been duly sanctioned, whereas the Russian lines had been constructed without any such reference or sanction. There could not be set up any comparison.

It is again stated that the Korean Government, simultaneously with its emphatic refusal to permit the construction of the Russian line from Antung to Yong Am-pho, approached the Chinese Government with a proposal for effecting a junction between the latter's lines in Manchuria and the Korean wires. China replied, however, that under existing circumstances the Manchurian lines are practically in Russian hands, and that to link the two would be merely to place Russia in tele-

graphic connexion with Korea. The Seoul statesmen, however, do not appear to have abandoned the idea.

Monday, July 27.

A long telegram to the *Asahi* from Seoul gives what professes to be the purport of the Korean Government's reply to the Russian Representative's despatch on the subject of the telegraph complication. In all the main details this communication merely confirms previously received intelligence. But we learn from it one curious fact, if it be indeed a fact, namely, that M. Pavlov resented the interference of the Korean Foreign Office on the ground that the timber-felling concession had been made by the Emperor himself. That is surely a singular contention, so singular as to be scarcely credible. We learn also that M. Pavlov admitted the absence from the concession of any provision relating to telegraphs and the presence solely of conditions relating to carts and roads. He claimed, however, that the right to erect telegraphs flowed naturally from the practical enjoyment of the concession, a claim which has at least the advantage of introducing a conical element into the situation. If the Korean Government's attitude be at all rightly reported it is a very strong attitude, as well it may be. Russia is "trying it on" most emphatically, a performance of which she has no monopoly, other Powers being zealous rivals in the same field of diplomatic manoeuvres.

A hundred Russian troops are reported to have arrived at Fen-hwang from Liaoyang. One thing is to be said about all these movements, namely, that the Russian troops in Manchuria must be in fine marching order, and that very excellent arrangements must exist for their maintenance in travelling through the wide regions which they traverse with such ease and rapidity.

It is reported that the *Keiho Maru*, a steamer belonging to the Hori firm, which lately commenced what was expected to prove a regular series of trips between Chemulpo and Wiju, has returned to the former place with intelligence that there is no shipping business on the route and that the project must be abandoned. Mr. Oye Taku and some friends who went in the steamer to Wiju have remained there. If this news be correct it will probably give a set back to the proposals for the opening of Wiju.

It is very justly recalled by the *Asahi Shimbun* that when Russia objects to the opening of Wiju to Japanese commerce and therefore to the commerce of the world, the great Northern Power ignores, or disregards, the third Article of the Russo-Japanese Protocol of 1898, which says:—"In view of the large development that the commercial and industrial enterprises of Japan have taken in Korea, as well as of the considerable number of Japanese subjects residing in that country, the Imperial Government of Russia will not impede the development of the commercial and industrial relations between Japan and Korea." If Japan deems that the opening of Wiju is essential to development of the relations named in this Protocol, Russia certainly is pledged not to offer any objection. Japan does hold that view, and that it is a reasonable view may be inferred from the fact that there is no open port in Korea north of the Ta-dong river, and that the products of the Yalu Valley consequently find no route of direct exit. It does unquestionably seem that circumstances dictate the opening of Wiju, and in opposing that measure Russia ap-

pears to pursue a wastefully invidious policy, for, on the one hand, it is not a policy that can be practically asserted throughout, and, on the other hand, it is a policy which can not fail to suggest sinister inferences.

Tuesday, July 28.

The latest account of the state of affairs at Yong Am-pho is given by the *Fiji Shimpoo's* correspondent at Wiju. He says that there are about 70 Russians there, and that they employ some 500 Chinese labourers and 200 Koreans. There is not yet anything in the nature of a permanent settlement, the buildings being limited to about 120 or 130 sheds for the accommodation of workmen. As to the work in progress, it consist chiefly of riparian improvements. The southern bank of the Yalu is being strengthened and a certain portion of it is receiving a stone facing. This sounds exactly like what was suggested by the first news of a settlement at Yong Am-pho, namely, that measures would be adopted to convert the place into a convenient anchorage, which it is said to be capable of becoming.

The correspondence contains a doubtful statement to the effect that a certain Mr. Cho, who seems to be the chief Korean local official in the district, recently made a survey of the land at the site of the Russian enterprise and handed over a block measuring a square mile.

It is further stated that the Russians have adopted a less arbitrary demeanour towards the timber rafts of other projectors, and that the progress of these down the Yalu is not now interrupted.

Wednesday, July 29.

There appears to be some complication about the transfer of the site for the Seoul-Fusan Railway's terminus at the Korean capital. It is a question of the price to be paid to the people by way of compensation for the cost of moving.

The Seoul electric railway also is a source of trouble at present. A telegram to the *Nichi Nichi* says that for some reason not explained by the correspondent the citizens have agreed not to ride on the cars and the company is consequently sustaining heavy loss. The United States Representative has preferred a demand for compensation at the rate of 200 *yen* daily on this account, and it may therefore be inferred that something of the responsibility rests on the authorities. Our readers are doubtless aware that this electric railway has long been a subject of dispute. The Korean Government failed to pay the sums due on account of the construction and equipment of the line, and in April last the American syndicate by whom the work had been done, offered to compromise for a sum of 700,000 *yen* down, and an equal sum to be defrayed in three annual instalments with interest at 10 per cent. This offer not having been accepted and no *via media* having been found, it appears to have been finally agreed that the line should be handed over to the Syndicate. It was then computed that the average daily sale of tickets would be 2,790, but apparently since the Syndicate began to run the line some pressure has been brought to bear on the citizens and they refrain from using the cars. Supposing the line to have cost 1,400,000 *yen*, it is evident that 200 *yen per diem* would represent gross earnings of only some 5 per cent. on the capital, which would, of course, be totally inadequate. On the other hand, 2,790 tickets even at 5 *sen*, a high average, would amount to only 140 *yen* daily, ap-

proximately. The arithmetic of the question is perplexing but we judge from the telegram that an attempt is being made to freeze out the unfortunate syndicate.

It was understood by the public at large that the two Japanese subjects recently beaten by Chinese free-booters in the Yalu Valley and robbed of the timber raft they were floating down the river, had been allowed to go free after their adventures. But a telegram to the *Kokumin Shinbun* now represents these men as having been detained as well as beaten, and further declares that their captors were Russian subjects. The telegram adds that a combination of Chinese and Japanese was formed in Seoul in consequence of the event, and delegates having been sent to the Yalu, the incarcerated men's release was obtained after considerable trouble.

The same paper (*Kokumin*) published news that in response to the British Minister's application for the opening of Wiju, the Korean Government on the 21st instant, intimated that the opening of the place depended on Korea's sovereign choice—a singular reply, being nothing more than the recitation of a truism. But the *Asahi* adds that this was supplemented by a statement that the matter is under consideration and that no pressing hurry exists.

This little place which, owing to Russian doings in the Yalu Valley, has sprung into sudden notoriety, is the subject of a lengthy communication to the *Asahi Shinbun* from a representative of the Hori Kaisha which recently made an abortive attempt to establish a line of steamers between Chemulpo and Wiju. We learn that although the newly-settled Russian population of Yong Am-pho varies from day to day, its number may be roughly stated at 40 persons. Among these there are men accompanied by their families. The principal buildings are a workshop made with an iron frame and a zinc roof, and a wooden office also roofed with zinc. There are several small edifices for residential purposes. The great work of the colony is the constructing of an embankment along the Yalu so as to make a good anchorage. This embankment, or at rate the fillings connected with it, are said to be 21 miles long and the necessary earth is obtained by digging canals connecting Yong Am-pho with the river, the material being conveyed to the embankment by a line of railway. A piquant flavour is imparted to the operation by the fact that these canals are said to be employed for storing timber taken from other nationals who have the temerity to engage in the Yalu lumber industry. Apparently the work of felling timber at Peng-ma has not yet been seriously commenced but preparations are being made on a large scale. The local inhabitants confirm the report recently circulated that a plot of land measuring a mile square has been handed over to the Russians at Yong Am-pho by the principal of the Korean officials sent from Seoul to inquire into the state of affairs. This official, Mr. Cho, does not appear to have made any definite settlement of the complication, but he is said to have started for Seoul with the draft of a settlement in his possession.

This correspondent adds that the Russians have taken entire possession of the telegraph station at Antung and that they do not allow any telegrams to be sent along the wires unless the language used be Russian or French. Much inconvenience is thus caused to Chinese merchants who have hitherto been in the habit of using the line, and

they are constrained to obtain the assistance of their countrymen in Russian employ in order to procure the privilege of transmission for an occasional message. The laying of a cable from Antung across the Yalu has not yet been completed, some of the necessary materials being on their way from Port Arthur.

Thursday, July 30.

As to the recently received news that Mr. Cho, Chief of the Bureau of Lands and Forests in Seoul, had sold to the Russians at Yong Am-pho a plot of land measuring a square mile, it is now alleged that Cho's instructions were to re-purchase the land already acquired by the Russians, and then to let it to them on condition that when the term of years mentioned in the lease expired, the land and all edifices standing on it should be handed over to the Korean Government. This arrangement is said to have been effected, and further to have evoked a protest from the Japanese Representative in Seoul, to which, however, the Korean Government replied that they saw no reason for foreign interference. Certainly the Korean Government has the right to make leases of land to foreigners in any part of its dominions. What it has now done, however, is to lend its assistance for the purpose of legalizing a distinctly illegal act. A precedent of that kind may prove very troublesome, for it amounts virtually to declaring that if any foreigners want to settle in the interior of Korea, they have only to settle, thereafter invoking diplomacy to make good their arbitrarily obtained title. In short, this action on Korea's part would be a practical declaration that the Yalu Valley is open to all the nations having treaties with the peninsular empire. We observe that, according to the *Kokumin Shinbun*, the alleged lease has not yet been actually granted, and the term of years is still under consideration. But we presume that Mr. Cho must have pledged himself so far as the fact of giving a lease is concerned.

It is stated that a leading Korean merchant at Chinnampo has been suddenly arrested, thrown into prison and most cruelly treated. A number of his countrymen repaired to the police station to remonstrate, but they could not obtain either redress or explanation, the police's reply being merely that they were obeying orders from the central Government. Subsequently a deputation of forty tradesmen embarked on a steamer with the intention of appealing direct to Seoul. Before they could set out, orders arrived to stay them. The despatch adds that local trade has been disturbed by the event and that the Japanese merchants are suffering heavy losses.

JAPANESE OPINION.

It is suggestive that the *Fiji Shimpō* and the *Asahi Shinbun* both take virtually the same view of Russia's measures to increase her military and naval forces in the Far East. Each of these leading journals agrees that the great Northern Power is simply trying to intimidate China and Japan, and neither of them seems to be much impressed by the essay. The *Asahi* regards the whole of Russia's policy in this part of the world as a failure and wonders that the St. Petersburg statesmen themselves have not realized the fact. The great Trans-Asian line is simply a military road. Its main purpose is to carry troops for its own protection and for the purpose of garrisoning unproductive regions whence Russia can

derive no profit. Her total imports into China last year did not exceed 28,000 roubles, which is about one six-hundredth part of the cost of maintaining the railway. She thought to substitute Dalny for Newchwang and to make the former the great emporium for the foreign trade of the three provinces. But no mercantile firm of any importance has shown the least inclination to open an establishment at Dalny. When the land there was recently put up to auction, the very choicest and best situated lot fetched only 37 roubles per *tsubo*, whereas land at Fusan, whence the railway to Seoul has not yet been opened and will not be opened for at least two years, sells at 60 *yen*. There never was such a costly and unproductive enterprise as the Trans-Asian railway since the world began, says the *Asahi*, and it is inconceivable that Russia's finances should continuously withstand the strain to which her empire-building in the Far East is subjecting them. As for the doings in the Yalu Valley, our contemporary regards them in the nature of a mere diversion, a part of the general record of failure. They have not frightened little Korea in the least, and in spite of all her movements, efforts and sacrifices, Russia has not yet succeeded in obtaining any fresh concessions from the Chinese. She tried to negotiate a secret treaty last year, and was ultimately obliged to give an unconditional pledge for the evacuation of Manchuria at fixed dates. This year she has been trying vigorously to remedy the situation by exacting conditions for the fulfilment of her pledges, but she still remains in the presence of unsuccess, and the measures of intimidation now being taken by her, are not likely to accomplish anything. In fact, the *Asahi* treats the whole subject in a most confident tone, and so does the *Fiji*, which thinks that Japan would have no difficulty in obtaining the command of the sea and in driving the Russians from Manchuria since her immediately available strength is greater than that of the Northern Power and her natural opportunities are far superior.

These expressions of opinion coming from such sources are certainly worth noting.

RUSSIA IN MANCHURIA.

Telegrams to the *Fiji Shimpō* from Dalny state that Russia's military preparations in Manchuria are proceeding apace. She is said to have issued orders for the distribution of fifteen thousand troops in regions where guards have been hitherto deemed sufficient. Steps are also being rapidly taken to construct two forts at Dalny. The work is reported to be in progress by night and by day. Among the measures of military increment here referred to, one is the sending of two regiments to Kirin; another is the assembling of six divisions in the Liaotung Peninsula. This last step serves at once to provide guards for the coasts of the peninsula and to suggest the evacuation of other districts since the troops are drawn from Kirin and the Amur region. It need scarcely be added that large purchases of coal are reported and we further note a statement that the embargo upon the export of grain from Newchwang has been renewed with the object, it is believed, of enabling the Russian authorities to acquire large stores.

Some of these rumours are confirmed by the Peking correspondent of the *Asahi Shinbun*, but of course there can be little doubt that they are all much exaggerated.

The *Kokumin Shinbun's* Peking corre-

spondent wires that the Russo-phil party among the Chinese is gradually gaining the ascendancy. Its leaders hold that an understanding with the great Northern Power is much more likely to conduce to lasting peace than reliance on Japan. Prince Sü, Viceroy Yuan and ex-Viceroy Chang are now said to be the only prominent advocates of an anti-Russian policy. The same authority mentions a rumour that the Empress-Dowager has instructed Prince Ching to assume the whole direction and responsibility of the negotiations relating to Manchuria and has informed Viceroy Yuan that there is no further occasion for him to come to the Palace for the purpose of making reports or tendering advice about this phase of the empire's foreign affairs.

DEATH OF MR. DAVID JACKSON.

It is with deep regret that we announce the death of Mr. David Jackson, Manager in Yokohama of the Hongkong and Shanghai Banking Corporation. Mr. Jackson's condition had not been supposed to warrant anxiety, and it was therefore with a shock that the community received the sad intelligence within a few hours after seeing him in the streets of the city. Death came, we believe, about two o'clock on Monday morning, the immediate cause being aneurism of the aorta. He took a trip to Kobe some few days ago and returned last week apparently in good health. On Sunday morning he attended as usual divine service at Christ Church, and in the afternoon visited his bathing-box at Honmoku with his wife, afterwards spending a few minutes at the Y.U. Club, where it was remarked that he was looking in capital health and spirits. Returning home immediately, Mr. Jackson soon sought rest but about the hour we have mentioned his wife was roused by the sound of coughing, and, hastening to his side, found him just passing away.

Mr. Jackson was in his forty-eighth year, a native of Ireland, and a brother of Sir Thomas Jackson, formerly Chief Manager of the Bank, and latterly closely associated with its London operations. The whole of the deceased gentleman's business career had been passed in the service of the great institution. He came to the Far East in April, 1878, and was for some years stationed in Shanghai, after which he was agent of the bank at Hankow. In 1888 he went as agent to Bombay and remained there till 1893 when he came to Yokohama as Manager, and with the exception of absence on leave has been here ever since. It is understood that he had intended retiring next spring. Mr. Jackson and Mr. T. S. Baker, it will be remembered, were decorated by the Emperor of Japan for their services in floating the recent 5 per cent. loan and only by the last mail there was received the *London Gazette* announcing the granting of the King's permission for them to accept and wear the insignia of the Fourth Class of the Rising Sun.

Mr. Jackson was most popular both in the Bank and among the community and his death in the prime of manhood is greatly regretted by a very large circle. A genial, kindly and sterling friend and a splendid man of business—his acquaintance with the intricate laws of banking in all their ramifications bordered on the phenomenal—he was loved and respected by all who had contact with him. Mr. Jackson was a steady patron of sport and the Y.C. and A.C. lawn tennis competition for his challenge

cup was just beginning. He was married but leaves no children. To his sorrowing widow the condolences of the community are respectfully extended.

On Tuesday the remains of Mr. David Jackson were consigned to the grave in the General Cemetery, in the presence of a large assemblage of mourners. In Christ Church the coffin was surrounded by a mass of flowers, while on it lay one solitary wreath of Passion flowers; the building was crowded. At 5.30 p.m. Rev. W. P. G. Field began the service. The 39th Psalm was sung in opening and after the usual offices the hymn "Now the Labourer's Task is o'er," the music being rendered by Mr. W. Karl Vincent, and an augmented choir. The bier was then removed to the hearse, the following, all members of the Hongkong and Shanghai Bank, acting as pall bearers: Messrs. J. F. Cox Edwards, P. de C. Morris, P. R. Scott, E. W. Townend, C. A. S. Palmer, C. de C. Hughes, S. Wheeler and H. Burnett. After the hearse walked the widow, escorted by Dr. Wheeler, and behind came Mrs. E. Whittall and Mrs. T. S. Baker with Mr. James Walter and Mr. C. Gibbens. Next there were Messrs. T. S. Baker and A. H. Dare as chief mourners, and then followed a large procession of leading official and mercantile men, both Japanese and foreign. These included the heads of the chief foreign banks and firms and many Japanese connected with banking throughout the empire.

At the graveside the officiating clergyman performed the remainder of the service, after which the coffin was lowered into its last resting place and, the benediction being pronounced, the company dispersed.

The wreaths and other floral tributes sent were many and beautiful, the Church being indeed heaped with these tokens of condolence and affection. They came from the following:

Sir Claude and Lady MacDonald; Sir Thomas and Lady Jackson; Sir Ewen and Lady Cameron; the Head Office Staff of the H. & S. B. C., Hongkong; Mr. and Mrs. T. Wright; the Yokohama Staff of the H. & S. B. C.; Ah Fai, Compradore of the H. & S. B. C., Yokohama; the Portuguese Staff of the H. & S. B. C., Yokohama; the Six Office Boys H. & S. B. C., Yokohama; No. 2 Mess H. & S. B. C., Yokohama; Mr. and Mrs. Thos. S. Baker and Miss Baker; Mrs. Townend; Mrs. J. F. Cox Edwards; Mr. Sydney Wheeler; Mr. S. H. Hayashi; the Kobe Staff of the H. & S. B. C.; Ah Chuk, Compradore of H. & S. B. C., Kobe; the Portuguese Staff of the H. & S. B. C., Kobe; Mr. and Mrs. Maclean; Mr. and Mrs. Murray; the Chartered Bank of India, Australia and China, Yokohama; the Junior Officers, Chartered Bank; Mr. Tatsuo Yamamoto, Governor of Bank of Japan; Mr. Korekiyo Takahashi, Vice Governor of Bank of Japan, the Yokohama Specie Bank; Mr. N. Soma, President of Yokohama Specie Bank; Mr. H. Bekkey, Yokohama Specie Bank; Mr. Kamenosuke Misaki, Yokohama Specie Bank; Mr. Juichi Soyeda, President of Nippon Kokyo Ginko; Mr. K. Uematsu, Mitsui Bishi Co., Tokyo; the Staff, International Banking Corporation; Mr. S. Oata, Mitsui Bank; Mitsui Bussan Kaisha; Mr. K. Okayama, Mitsui Bussan Kaisha; Mr. K. Ishii, sub-Manager Dai Ichi, Ginko; Mr. S. Hanjia, 100th Bank, Yokohama; Mr. Tsunezo Katohda, Dai San Ginko; Mr. R. Yamagata, Manager Dai Ni Ginko; Mr. Kenga Mori, 74th Bank; Mr. Kinsaku Soda, the Soda Bank; The Soda Bank; The First Bank; The Second Bank; The Third Bank; The Seventy-fourth Bank; The One Hundredth Bank; The Tokio Koshinjo, Tokio Branch; C. Campbell, Kobe; Mr. J. W. Copman; Mr. and Mrs. J. Happer; Mr. and Mrs. Betts; Mr. and Mrs. L. H. Abell; Mr. and Mrs. J. Strauss; Mr. F. E. Wilkinson; Mr. and Mrs. E. B. Stuart Edwards; Mr. and Mrs. Oscar Hayemann; Mr. P. Douille; Mr. S. N. Yamaguchi; Mr. N. P. Kingdon; Mr. and Mrs. C. J. Strome; Mr. W. L. Keane.

LOCAL EXPENDITURES.

The *Jimmin* has an interesting article on the subject of local expenditures. It gives figures showing the growth of these outlays but unfortunately these figures do not in every case relate to the same years, so that synthesis becomes difficult. The facts are sufficiently striking, however:—

LOCAL EXPENDITURES ON ACCOUNT OF EDUCATION AND PUBLIC WORKS.

	Yen.
1892	8,576,398
1902	25,913,920
	CITY.
1889	1,037,721
1899	5,419,138
	COMMUNAL.
1889	8,910,276
1899	23,688,695
	LOCAL INDEBTEDNESS.
1891	2,128,245
1901	40,707,972

Side by side with these figures our contemporary places the fact that whereas the number of persons distrained on account of tax defalcations was 244,063 in 1893, it mounted to 332,109 in 1903. If this growth of expenditures represented a wholesome development of educational and other public enterprises there would be some consolation. But it does not, according to the *Jimmin*, represent anything of the kind. What it shows is that the dissensions of political parties have been carried into the region of communal administration. Party politicians have simply sought to curry favour with the mercantile and manufacturing classes by voting large sums for public outlays, and thus the case stands that for the sake of grasping power themselves these schemers have subjected the people to almost intolerable fiscal burdens. To correct that abuse will be the aim of the *Seiyun-kai* henceforward. They will make it the device on their electioneering standard. But are they themselves innocent? The *Jimmin* leaves that question unanswered.

THE INDUSTRIES BANK.

The Industries Bank (*Kogyo Ginko*) held its half-yearly meeting on the 25th ultimo. The following report was presented and adopted:—

Gross Profits.....	Yen. 925,780
Expenses, &c.	572,944
	352,836
NET PROFITS.	Yen.
To Reserve against losses.....	30,000
To Reserve for equalizing dividends	180,000
To Dividend (at 5 per cent. annually)	62,500
To Rewards to Directors	35,000
To Special Dividend (at the rate of 1 per cent. per annum).....	12,500
To Special Reserve	30,000
Carried forward	3,836
Total	352,836

This was the third semi-annual meeting since the Bank's establishment. Mr. Soyeda, President of the Bank, in presenting the report, said that during the period covered by the accounts, namely, from January 6th to June 30th, the money market had been very stagnant and the results of banking operations had not been satisfactory. The policy followed had therefore been of a conservative character, quality of security being regarded as of more importance than volume of transactions. The debentures, amounting to five million *yen*, the issue of which was authorized at an extraordinary meeting, had been successfully floated to the extent of three millions, thanks to the aid of the Imperial Household Department and to the exertions of the branches and agencies. Since November last they had been engaged upon the building of the Bank's new premises, which, it was hoped, would be ready for occupation next year. The total expenditure upon this account could not yet be stated, but the sums hitherto paid out aggregated 34,492 *yen*. He alluded briefly to the Bank's share in the business of selling fifty million *yen* worth of 5-per-cent. bonds abroad. The total had been issued in three instalments, the first in December last, the second in January, and the third in February. There had not been the least hitch in the affair, subscribers coming forward readily not only in England but also elsewhere. Inasmuch as the Bank had been asked by the Treasury to sell the bonds at the exact figure fixed by the Government, no profit had been realized on that account, but in consideration of the success that had attended the transaction, the Hongkong and Shanghai Bank had most generously paid over a portion of its gains to the Kogyo Ginko, and this amount together with the fees paid by the Government had been carried into the accounts. Being, however, an exceptional asset, the greater part of the money had been placed in the reserves. The amount received from the Hongkong and Shanghai Bank is shown by the accounts to have been 394,342 *yen*.

RUSSIAN TRADE WITH THE FAR EAST.

Mr. Kawakami, commercial agent at Vladivostock, reports that the opening of the Trans-Asian Railway has not brought to Russian merchants the advantages that were expected. Out of the total imports—320,000,000 roubles—into China from foreign countries Russia's share is only 28,000 roubles. This is partly due to the great difference in freight by the Hamburg route as compared with the Odessa-Vladivostock, a difference of 150 per cent. The St. Petersburg merchants moreover allege that

the building of the Manchurian branch of the line, instead of improving trade prospects for Russia, tends really to remove the obstacles placed by nature in the path of imports from that direction, and by thus opening a route of which aliens will take main advantage, will have the effect of closing a market already under Russia's control, namely, that of Vladivostock and the Amur. If Russia wants to see her products compete successfully in Chinese marts with the goods of other countries, the State must bear from 50 to 75 per cent. of the cost of marine transport and must also take steps to have shipping facilities increased by a hundred or two hundred per cent. In a word, the aim of Russia ought to be to find an entry for her merchandise *via* the Amur River, and from that point of view the building of the Siberian Railway will prove an impediment rather than an assistance. So long as Vladivostock and Nikolisk were free marts, there was a fair prospect of the Amur route being ultimately chosen by European goods, and if Russia wants to see the business in the hands of her own people, what she has to do is to revert to the free system in that direction and to close the southern roads, namely, those *via* Liaotung and the Manchurian railways.

This is given as an exposition of the opinions entertained by the Russian Chamber of Commerce in St. Petersburg. They add that the opening of the Manchurian railways has already diverted trade from the Amur regions, and it is said that all the Russian merchants doing business in the latter are bitterly disappointed. The sum of the matter is that these trade authorities regard the building of the Trans-Asian Railway as a failure from a commercial point of view.

OKAYAMA ORPHANAGE INCORPORATED.

"It is not for such as us to say anything to you about the management of the Orphanage," said one of the members of the new Board of Trustees of the Okayama Orphanage, to Mr. Ishii, the founder of the institution, at the first meeting of the Board. "We have nothing to do," he continued, "until you die and we hope that you will live longer than any of us."

"We are like children," said another trustee, "who have to learn their father's business and then help him, and carry it on after he is gone."

Mr. Ishii spoke during the meeting, and afterwards, of the ways in which the Board could strengthen his hands and this is the substance of what he said:—

"When the orphanage became large it seemed necessary for the support of the children, and for the good of the nation, to arouse an interest in the care of orphans. For this purpose, taking some of the older children, we went through the country with a band and a magic lantern telling of the needs. Up to the present time we have been through the greater part of the Empire and have obtained about 10,000 supporters who contribute one *yen* a year to the institution. By the withdrawal of the teachers this work has been a hindrance to the education of the children. In the future I want to give myself up to the direct care of the children, while the trustees keep the needs of the orphanage before the people. It will be necessary to have an agent to keep in communication with the supporters, and it may be necessary to make some tours with the band, but the

great need now is the education of the children.

"In order to educate the children well it is necessary to have a better arrangement of the buildings. Houses have been built, or bought, heretofore as means and opportunity allowed, and they are scattered here and there. Now some fields have been bought on the edge of the city near the present buildings, and it is my purpose to buy more, so as to gradually move all the buildings into one enclosure.

"I am troubled about finding suitable places for the grown-up children as they leave the orphanage. In England and America orphan children can be put out with families who will bring them up to work, but there are few such opportunities as yet in Japan. We have many calls for maid-servants but, in general, it is not safe to send the girls out. It is my purpose, however, to increase the number of children apprenticed in families, and to keep in close touch with them through visits.

"As to the trades that the older children can enter, there are temptations in the various kinds of business and I wish that more of the children could be placed on farms. It may be that their children, or grandchildren, will be able to withstand the temptations of a business career but it is hard for them to do so. Thinking of this difficulty, I have thought of establishing a farm colony in Korea, or in Hokkaido. Land has been offered free in the northern part of Hokkaido.

"I want to improve the *Kojin Shimpō* (*Orphanage News*) as an evangelistic agency. It is sent monthly to all the supporters of the orphanage. I wish to improve it also as a means of communication with those who have been in the orphanage.

"It is my purpose to gather an endowment fund of 200,000 *yen* through contributions of 100 *yen* and over. In this work I ask especially for the aid of the trustees. About 6,780 *yen* has already been collected."

Such is, in part, the future work of the Orphanage. No changes are made by the incorporation, which was carried out simply to ensure the continuation of the present system of management. One of the articles of incorporation states that the foundation principle of the orphanage is Christianity. Mr. Ishii was urged by some to choose for the Board of Trustees men of national repute but he chose rather to have men less well known in the country, but better known to the orphanage. It is hard now to realize how difficult it was to establish an orphanage in a land without an orphanage, and to establish a Christian institution where there was but a small Christian community. But the work has been done, and it has stimulated various enterprises of the same kind.

In order to help in carrying on this work there are needed:—

(1) Contributions of money or clothes, for the children, who support themselves in part by their own work. There are now 232, and 644 have been cared for in all.

(2) Supporters (*ianjō-in*) who pay an annual fee of one *yen*—about 3 *rin* a day.

(3) Life members (*shikwa-in*) who contribute one hundred *yen*, or more, to the endowment fund.

Contributions may be sent to Mr. Ishii Juji, or to Rev. J. N. Pettie, D.D., Kadota Yashiki, Okayama. August is a good time for sending contributions, for the stream of contributions is always at its lowest during that month. F. M.

*The Board of Trustees is composed of the following ten members: Messrs. Kagawa and Komoto, Rev. J. H. Pettie, D.D., and Dr. Suga, of Okayama; Rev. W. L. Curtis, Niigata; Messrs. F. Müller and Y. Tokutomi, Tokyo; Mr. H. Orita, Kyoto; Mr. M. Ohara, Kurashiki; and Mr. S. Tamura, Kobe.

THE ELECTRIC TRACTION QUESTION IN TOKYO.

Thursday, July 30.

A scene of much confusion was witnessed in the *Seinen-Kwan* in the Kanda district of Tokyo on the 28th ultimo when a general meeting of the Tokyo Street Railway Company was held for the purpose of discussing the question of amalgamation with the former Horse Tram Company. Mr. Amenomiya, President of the former Company, having been summoned on the 27th to the Department of Home Affairs and warned against the methods of intimidation and violence that were beginning to disfigure the dispute between the advocates and the opponents of amalgamation, great precautions were taken to maintain order, all outsiders except newspaper reporters being excluded and a force of some thirty police and gendarmes being present. At first things went quietly enough. Mr. Motoda Hajime pointed out that the problem of amalgamation involved a very serious side-issue, inasmuch as dissolution of the Street Railway Company must precede the step, and in the event of dissolution it appeared possible that the charter might lapse. He therefore moved that a committee of ten be appointed to examine this question, and that the meeting be prorogued pending the committee's report. For the other side Mr. Isobe Shiro contended that no such danger existed. The charter, he said, would lapse only in the event of there being no successor to the company's business, whereas in this case a successor was provided. Before this question of a committee could be decided, a member called attention to Article 161 of the Commercial Code which declares that persons having a special interest in the result of a resolution are unqualified to vote. Several of those about to vote, being holders of shares in the Company with which it was proposed to amalgamate, seemed to fall under the veto of that Article. The President supported the objection, whereupon a disturbance quickly arose and Messrs. Isobe and Yamaguchi proceeded to the platform and seemed disposed to resort to physical violence, which disposition was quickly converted into reality by Mr. Kawakami, and soon wrestling and boxing matches were in progress here and there throughout the hall. Order having been at length restored by the expulsion of Mr. Kawakami, the taking of a closed ballot was announced. But before proceeding with it the President announced that the powers of attorney of proxy-holders must be examined as there was reason to suspect fraud. This led to another scene of violence, but the President's ruling held, and the examination commenced. It had not ended when the clock struck midnight, whereupon a member moved that as the meeting had been convened for the 28th, it could not be carried on to the 29th. Once again everything was in commotion, but finally the President announced the meeting closed and left the hall, followed by all his supporters. Then the other side occupied the chair and carried on the meeting. They rejected Mr. Motoda's proposal by a large majority and voted for amalgamation with equal unanimity, the meeting coming to an end at 1.30 a.m. Whether these resolutions will have any binding force is the next problem. It is a curious complication.

Friday, July 31.

Both parties to this trouble have appealed to the Home Department, the Amenomiya partisans contending that the resolutions

adopted at the meeting on the 29th ultimo after the President had left the chair, have no binding force, and the other side claiming that they have. The question is discussed by the Tokyo press, which shows a similar difference of view. Some writers say that Mr. Amenomiya, President of the Street Railway Company and *ex-officio* chairman of the meeting, behaved illegally when, on his own authority, he declared the meeting closed. A motion for continuing was before him, and he should have put it to the vote in the ordinary way instead of substituting his own decision for that of the majority, whatever it might have been. *Per contra* it is contended that midnight having passed, the chairman had competence to declare the meeting closed without reference to the choice of the members. The question really turns upon a provision of the Commercial Code, namely, that no decision adopted by a meeting can be binding on a Company if the procedure followed in arriving at the decision be opposed to the Company's regulations. In the case of the Street Railway Company the President is *ex-officio* chairman of every general meeting and unless he himself waives his right to occupy the chair, no meeting can be conducted without him. He had not waived his right, however, on the 29th, and therefore the subsequent appointment of another chairman invalidated all the proceedings taken under the latter's authority. As for the question of time, we ourselves fail to see that it possesses any validity. A general meeting of shareholders might continue in session for a whole year were the members so minded. Mr. Amenomiya's ruling appears to have been unquestionably arbitrary, but for that he cares little, we imagine, if the law can be technically cited in his support. It is nevertheless alleged that the authorities are likely to recognise the resolutions passed in the absence of Mr. Amenomiya and his party, in which event we shall probably see a law-suit instituted by the latter, and Tokyo will have to whistle for a large section of its electric railways. Happily the Tokyo Electric Railway Company has stood aloof from all these complications and is going on quietly with its business.

THE STOLEN BONDS.

It appears that the planner of the theft of bonds was a man called Hibiya who had received a good education in America and was counted a member of the "High Collar Party." The bonds were abstracted at his suggestion, and it was by him that some of them were employed as security for a loan obtained in Yokohama—a loan which is said to hit one of the foreign banks rather heavily.

Alluding to this subject the *Shogyo Shimpō*, after making some severe remarks upon the corruption that seems to prevail in official circles, asks what conceivable reason there can be for keeping redeemed bonds and misprinted bonds month after month in the Treasury. From that point of view our contemporary thinks that some responsibility rests on the authorities.

The *Official Gazette* announces that the stolen bonds, 42 in number, have now been completely traced. It gives the number of each. Thus there remains no cause for anxiety on the part of the public.

Tokyo journals state that of the bonds abstracted from the Treasury by Ikeo, ten of five thousand *yen* each were lodged with

the Chartered Bank by Hishiya, a friend of the thief's, and against them the Bank made an advance of 35,000 *yen*. A question is now raised as to whether the Bank or the Treasury should suffer. Among the stolen bonds, 22 were defective owing to typographical errors or discrepancy in numbers. These, of course, no careful bank would have taken as security, nor could any bank, having accepted such paper, evade responsibility for the error. But the other 20 bonds were faultless in all essentials. Their only defect was that they had been redeemed. A bank could not have detected any disqualification, and if such bonds found their way out of the Treasury, no matter by what process, the Treasury should be responsible to the public. But from that argument two vital points are omitted. The first is that the numbers of all redeemed bonds are published in the *Official Gazette*. A bank dealing in such securities should keep itself informed as to these numbers. The second point is that reference to the Treasury was always possible and might have preceded the loan transaction. To submit the bonds for official inspection before advancing money on their security would seem to have been a proper precaution. The fact that Ikeo was an official of the Okurasho does not appear to affect this last consideration, for unless he borrowed the money on behalf of the Treasury, which was obviously incredible, his official connexion should have inspired distrust rather than confidence.

On reference to the Manager of the Chartered Bank in Yokohama we learn that the bank had and has the best reason to regard the bonds as genuine.

MOONLIGHT AT KAMAKURA.

Ah! what a scene was that! The moon,
the great white witching moon,
Lay beaming as the Sun-God beamed in the
transcendent noon,
Touching the tired waves with light, with
dancing diamond light;
A risen glory on the brink of vast triumphant
night.
Athwart the sea, the fitful breeze in whisper-
ed wan lament,
Sighed in the silent hush of night, a song
unsung and spent.
And through the glamour of the Stars, the
magic of night's scene,
Fuji, crowned in her snow born gown, uprose
a Virgin-Queen.
Floating beneath the silent sky, a pallid
ghost of dreams,
A phantom-vision, weirdly wrapped in
Moon's immortal beams:
As maiden pure on bridal night, clad in
white robes of lace,
Uplifts her head, and lonely stands, waiting
her Love's embrace.
Ah! What a scene was there, that wond-
rous night! My soul was filled
By memories of past joys; by mystic dreams
divinely willed.
Free were my whispered thoughts; my
gaze it wandered far,
To where, above the snow-capped mount,
trembled one tiny star.
There shone my Hope, poised radiantly o'er
Fuji's sainted crest,
My spirit swayed;—a Heaven was gained,
for one scared soul's unrest.

E. M. d'A.

Kamakura, July, 1903.

THE CONVENTION CANARD.

We have to-day a resurrection, *à la* Berlin, of the canard about a Kuropatkin convention. This thing has been in the head of the Berlin newsmongers for some time. On June 18th the correspondent of *The Times* in the German capital telegraphed thus:—

In diplomatic circles here it is stated that Russia has for some time past been endeavouring to dissolve the Anglo-Japanese Alliance, and that the visit of General Kuropatkin, Russian Minister of War, to Japan was arranged for that purpose. General Kuropatkin is said to have been selected as being one of the most experienced Orientalists in Russia and one who has been most successful in Asiatic affairs. He bears, it is said, an official mandate from the Russian Government to offer Japan material advantages in the East in return for her adopting an attitude of neutrality with regard to the development of Russia's Manchurian policy, which comprises Korea as a Russian sphere of influence. Naturally, Japan is expected to sever her connexion with Great Britain gradually.

This is a plain forecast of the falsehood to which General Kuropatkin's visit gave rise in the region of yellow journalism in Tokyo. It is unnecessary to repeat, we should imagine, that no convention of any kind was concluded with the Russian Minister of War, and that the Berlin story is made out of whole cloth. Concerning the allegation that Russia regards the Korean peninsula as within her "sphere of influence," we can only say that we do not believe she does anything of the kind in the face of her existing conventions with Japan.

Of course the news from Berlin about the publication of the alleged Kuropatkin convention has caused some surprise in Tokyo, and equally of course the *Niroku*, which originated the canard, takes refuge under the German development. The Tokyo journal's behaviour in this respect may be compared to that of a man who seeks to deduce confirmation of his own falsehoods from their echo. It is palpable that if the Japanese Government had concluded any secret treaty with Russia while the Anglo-Japanese alliance was still in force, they would have exhibited extreme bad faith. The matter is not worth discussing and we may be assured that London has been duly informed of the baselessness of the Berlin rumour as it had been warned more than a month previously against believing anything of the kind. But what interests us is that there should be in Tokyo and Yokohama persons so grossly misinformed as to telegraph or write such news to Europe. The correspondent of the *Daily Mail*, whoever he may be, is a flagrant offender in this respect. A few days ago he placed the Russian and the Japanese fleets off Hakodate and ready to come to blows, for which lie it really seems impossible to conceive any fragment of foundation. Whether the correspondent of a sensational journal considers it necessary to be sensational and therefore untruthful—for the two traits are usually complementary—or whether there are in our midst men who, seeing their account in war, endeavour to promote its advent by circulating alarmist tales, one can not clearly distinguish, but in either case the result is miserable.

THE HOUSE-TAX ARBITRATION.

This question has not enjoyed immunity from the thoughtless misrepresentations that disfigure the majority of disputes between foreigners and Japanese. Commenting on a statement that Mr. Ochiai, a Secretary of the Office, visited Kobe and Nagasaki recently to collect information for the use of the com-

pilars of Japan's case, a local contemporary says:—"This hardly bears out the assumption of the *Mail* and other alleged Japanese organs that the recent postponement was due to the foreign side. In fact, there is a growing belief that the delay was obliged by Japanese unreadiness." There is no "assumption" whatsoever in the matter. The simple fact is that both postponements were made at the request of the Governments of France, Germany and Great Britain, and that in agreeing to the second postponement the Japanese Foreign Office explicitly stipulated that it should be the last. We are aware that discussions of all kinds are marked by an exercise of extreme courtesy in Tokyo, but that the parties who are ready should sympathise with the party which is unready by begging the latter to agree to a postponement, is a notion too quaint to be entertained. If the quality of the anti-house-tax case is to be inferred from the methods of its representatives, the trouble of going to arbitration is superfluous.

A MANILA POEM.

"Last summer"—writes a correspondent from the Lakeside Hotel at Chuzenji—"three sweet children from Manila, while summering at the above hotel, brought me, one lovely Lord's Day, the poem enclosed. I think it is not quite complete, and the music I failed to remember. If you could print it and ask your readers for sweet charity to tell where the tune can be found, I shall be grateful and should pass along the information to my own and other people's children":—

- 1.—Jesus who lived above the sky
Came down to be a man and die,
And in the Bible we may see,
How very good he used to be.
- 2.—He went about, he was so kind,
He cured poor people who were blind,
And many who were sick and lame
He pitied them and did the same.
- 3.—And more than that, he told them too,
The things that God would have them do.
He was so gentle and so mild
He would have listened to a child.
- 4.—And such a cruel death he died
He was hung up and crucified.
- 5.—And those kind hands that did such good,
They nailed them to a cross of wood.
- 6.—And so he died and this is why
The Bible says he came from Heaven,
That we might have our sins forgiven.
- 7.—He knew how wicked man had been
He knew that God must punish sin,
So out of pity Jesus said
He'd bear the punishment instead.

REQUIEM MASS.

On Thursday forenoon a Requiem Mass for the Pope took place in the Cathedral, Tsukiji, Tokyo. There was a large attendance, and in the places reserved for officials were members of the Diplomatic Corps and distinguished Japanese. These were for the most part in uniform. The Cathedral was draped with black, and the officiating clergy wore full robes in respect of the occasion. The Foreign Ministers present were the British, Belgian, French, Dutch, Siamese, Russian and Austro-Hungarian, with their respective Secretaries and Military Attachés. The Spanish, Italian, Chinese, and American Ministers were represented by members of their legations. Among the Japanese officials present were Baron Komura, Minister for Foreign Affairs; General Terauchi, Minister for War; Baron Kodama, Minister

for Home Affairs; Viscount Kagawa, Baron Nishi, Viscount Tanaka, Messrs. Chinda and Yoshida, of the Foreign Office, Shiba, of the Home Office, and Fujii of the Privy Seal Office. Marquises Yamagata and Oyama sent representatives. There was a large number of clergy present, the leading part in the solemn ceremony being taken by the Most Rev. Archbishop P. M. Osouf, whose assistant priest was Rev. F. Evard, his deacon Rev. M. Steichen, and sub-deacon Rev. A. Beuve.

NOTES ON CURRENT EVENTS.

In the columns of the *Asahi Shimbun* we find a comparative table of the amounts of income tax collected during the part two years:—

	Yen.
1893	1,237,950
1894	1,359,151
1895	1,495,779
1896	1,796,837
1897	2,091,889
1898	2,347,894
1899	4,800,157
1900	6,341,892
1901	6,856,705
1902	7,436,988

Of course the great increase shown by the returns for 1899 was due mainly to a change in the rate of taxation and to improved methods of collection. But whatever allowance be made for these factors, the growth of the people's wealth is unequivocal. The following figures show the taxed income in each year:—

	Yen.
1893	91,313,444
1894	99,470,716
1895	107,553,679
1896	127,299,738
1897	147,676,844
1898	168,480,424
1899	277,603,070
1900	356,124,579
1901	392,851,052

It can not be doubted that the returns of taxable income furnished by tax-payers are very defective.

The figures relating to Japan's foreign trade for the first half of the current year are 125 millions of exports and 166 millions of imports. The largest previously recorded figure for imports was in 1898, when the trade for the whole year amounted to 277½ millions, the figure for the first half being 163 millions. In exports also there has not previously been any such result. As to the excess—41 millions—on the side of imports, it is accounted easily by examining the one item of rice. In February this staple was imported to the extent of 6 millions; in March 10 millions; in April 9 millions; in May 4 millions and in June 3 millions, a total of 42 millions. Turning to the column for specie, we find that imports exceeded exports by 15 million yen. That must of course be independent of the balance of ordinary trade.

Mr. Tsuzuki Keiroku has been appointed Chief Secretary of the Privy Council, the former Secretary having asked permission to retire in order to make room for a younger man.

It appears that the *Kasagi* has suffered very little damage, and that by discharging 400 tons of coal she will probably be floated off without difficulty. She grounded on a sandy spot and will be easily repaired.

The *Kasagi* has been successfully floated off. There was more difficulty than had been anticipated. Eight hundred tons of ammunition had to be taken out of the

vessel. A steel hawser employed by the *Kongo* to drag off the *Kasagi*, parted, and this caused some delay. The whole night of the 24th was devoted to removing the ammunition and other matters, weighing altogether 1,000 tons, and on the morning of the 25th the *Kongo* paid out a five-inch cable which served to float the cruiser. There was found to be little damage to the hull, and the vessel proceeded at once to Aburaya Bay, escorted by the *Takasago* and the *Kongo*.

The capital has been almost deserted by the various Chefs de Mission and their families, as is usual at this time of year. Lady MacDonald left for Chiusenji on the 19th ultimo. The United States Minister and Mrs. Griscom set out for Nikko on the 27th. The French Minister and the Italian Minister are at Chiusenji, and there is talk of the speedy departure of Baron and Baroness Rosen for Nikko. Baron and Baroness d'Anethan have been at Kanakura for some time. The German Minister, however, remains at his post, and so do the Representatives of Spain, Holland and Austria-Hungary, the last named official having only just returned from making the ascent of Fujiyama.

Even Count Inouye's intervention and advice have apparently failed to introduce order into the disturbed affairs of the Higashi Hongan Temple. Tokyo journals state that the only result of his intervention has been to add its expenses to the Temple's debts. Of course where Count Inouye fails there can be little hope of success by ordinary methods, and it results that drastic steps are now talked of. To common-place outsiders the remedy seems to consist in putting an end to the extravagance which has brought affairs to their present condition; in other words, getting rid of the Otani administration. But if that were possible Count Inouye would certainly have insisted on it.

The *Jimmin* publishes a table showing the increase of Japan's mercantile marine during the past 10 years:—

Tonnage in 1892.....	214,849
1893.....	225,218
1894.....	320,378
1895.....	386,163
1896.....	417,643
1897.....	486,509
1898.....	648,314
1899.....	796,930
1900.....	863,936
1901.....	917,879
1902.....	934,961

With regard to the personnel, the same journal says that the number of officers holding certificates of qualification to navigate foreign waters has increased thus:—

1892.....	1,542
1893.....	1,596
1894.....	1,680
1895.....	1,818
1896.....	2,001
1897.....	2,228
1898.....	1,576
1899.....	1,680
1900.....	1,799
1901.....	2,042
1902.....	2,231

No man who studies the newspapers or listens to the talk in train, or bus, can deny that public opinion generally favours a patient inquiry into the merits of Mr. Chamberlain's proposed inter-Imperial tariff scheme. "Strange abrupt questionings" are beginning to agitate the minds of men who had come to regard our so-called Free Trade system as eternally settled. If Mr. Chamberlain finds many opponents among members of his own party, he is making converts

in the fold of the Opposition. It is significant that men of Liberal sympathies like Mr. T. A. Brassey and Mr. Saxon Mills have their doubts whether it is either wise or possible to oppose a blank negative to Mr. Chamberlain's proposal. Mr. Chamberlain says he is in for a big fight; but there seems to be an uncomfortable consciousness on the part of his opponents that he has won important ground at the very opening of the campaign. He will certainly not be disheartened by the debate started in the House of Lords by Lord Goschen. All the old shibboleths, all the old fears, did duty once again, and the only noteworthy thing about Lord Goschen's speech was that so hard-headed a man should have relied upon rhetoric about the people's food and the prosperity of the Empire. The Duke of Devonshire, whilst not sharing Mr. Chamberlain's views, is open to conviction, and cruelly reminded the Free Traders that we have never had Free Trade in Great Britain.

—Public Opinion.

The following sentences were given for translation into Japanese at the entrance examination of the High Commercial School in Tokyo:—

- (1.) She could have borne to live an undistinguished life, but not to be forgotten in the grave.
- (2.) The man the least pardonable is the one who declines to correct his faults, unless it be he who prides himself on them.
- (3.) Men spend fortunes to gain a few months or years of life, but who ever heard of anyone cutting off years for so much a year.
- (4.) It often happens that changes of which a man is part lose something of their true significance in his eyes.

Surely, says a correspondent, these questions furnish an example of how not to start a young man on a business career.

There has been another suicide at the Kego cataract. Tokyo journals say that this is the thirteenth. The last victim is Yoshida Takejiro, a youth of 23. Having served faithfully and zealously for many years as apprentice at a timber-merchant's in the Fukagawa suburb of Tokyo, he set up on his own account. Recently during a journey to Hokkaido to buy timber, he stated to a friend that he looked forward with supreme discontent to the life of a lumber-man, and that to end it all in the cataract basin at Kego seemed the more satisfactory plan. The repository of this confidence doubted whether it was not wholly in jest. He nevertheless sent information to the Nikko police, but their precautions proved unavailing, and on the 22nd ultimo Yoshida leaped from the cliff. He left a brief document saying that he knew the public would call him a fool or a maniac, but he was prepared for that. A Tokyo newspaper's comment is that the sooner these idiots make away with themselves the better. Probably in the heart of some survivor there is intimate knowledge of the cause that drove each of these youths to drown his sorrows in the rush and roar of the cataract.

It is contended by the *Kokumin Shinbun* that all the movements now in progress for giving backbone to the empire's foreign policy are altogether useless from one point of view and pernicious from another: useless because the country's mind being already made up with regard to these great problems, no occasion for demonstrations presents itself; pernicious because such measures tend to suggest to outsiders that some necessity exists for strengthening the national attitude. Doubtless that is a line of argument which will

appeal to academical minds, but it has never been admitted in European countries that when the Government and the people hold the same views with regard to foreign politics, the former can afford to dispense with the latter's indications of support. Japan has been so quiet throughout the whole course of the Far-Eastern problem's recent developments that there is some danger of the world misinterpreting her mood. An unequivocal demonstration might be of service.

The thief that broke into the Exhibition building at Osaka and stole a quantity of jewelry has been apprehended. He proves to be a petty tradesman called Nakao Genosuke. Nearly all the abstracted articles were found concealed in his house.

Statistics published by a Tokyo contemporary show that a very marked discrepancy exists between the number of applicants that seek admission to the Tokyo High Commercial School and the number that gain admission:—

Year.	Number of Applicants.	Number Admitted.	Per-centage Admitted.
1899.....	537	103	19.18
1900.....	760	140	18.42
1901.....	1,127	216	19.16
1902.....	1,235	250	20.24
1903.....	1,309	250	19.11

These large proportions of failures are not to be attributed to defects on the part of the applicants; it is wholly a question of insufficient accommodation, and our contemporary naturally enlarges upon this unsatisfactory state of affairs.

PROFESSOR KOCH AND TUBERCULOSIS.

The Berlin Medical Society assembled on July 9th to hear Professor Koch, of the Imperial Health Office, report the result of prolonged experiments on the tuberculosis commission in infecting calves with human tuberculosis. Prof. Koch's observations prior to the celebrated London address, caused the Health Office to appoint the commission to make systematic experiments. The commission's investigations cover three forms of introducing tubercle bacilli in calves.

First, subcutaneous injection; second, in food, and third, by inhalation. The preliminary reports cover only the first form, but the experiments with the other forms continue. The experimentation covered 39 separate cultures, 23 from adult and 16 from children. The results were that 19 calves subcutaneously treated did not show the slightest change of condition, and seven showed more marked symptoms. But the propagation of tuberculosis in the body did not occur. On the other hand, four inoculations from tuberculosis children infected calves with a disease which resembled a weak type of animal construction and two of this number died from tuberculosis.

The commission summarizes as follows: "The series of experiments strengthen Prof. Koch's view, that animal consumption as the cause of human consumption, does not play the role generally attributed to it, but definite judgment requires further experimentation." In the discussion which followed, Prof. Orth, the late Prof. Virchow's successor, strongly combated the view that human and animal consumption were dissimilar and non-transferable.

T. King, keeper of the "Cosmopolitan Saloon," No. 136, Yokohama, who was detained at the Negishi jail on the charge of a murderous assault upon his wife (Japanese) and a female servant on May 7th and has been undergoing preliminary trial in the District Court, was discharged on the evening of July 24th under the writ of the Preliminary Judge, in accordance with Art. 78 of the Penal Code, which provides that there is exemption from penalty when the prisoner was deprived of reason at the moment of the action.

THE PROGRESSISTS.

WE have already stated that the leaders of the Progressists believe the time to have come for re-organization on large lines, their basic idea being the formation of a big party having foreign politics for principal plank in its platform. We have also explained that Count OKUMA, in pursuance of this project, appointed a council to consider details. The members of council met at Mr. INUKAI's residence on the 22nd instant. Their discussion revealed considerable difference of opinion. Mr. KOMUCHI took the view that a stalwart and positive line must be radically followed in foreign politics, and that if war resulted it must not be shrunk from. He further maintained that if the present Cabinet was found to hold these opinions, it should receive the support of the new party, which would assist and supervise the Ministry's settlement of the Chinese and Korean questions. Mr. HIRAOKA approved, on the whole, of Mr. KOMUCHI's declaration but desired to eliminate the conditional clause as to the Cabinet's consensus, his contention being that the party should frankly assist those in power. Mr. INUKAI—who is understood to be always very near Count OKUMA,—admitted the necessity of a strong foreign policy but denied that the time was ripe for talking of war. He further held that the present Cabinet has no active policy, and is unequal to the task of dealing with foreign affairs, being thus unworthy of sympathy. Mr. OISHI MASAMI went further than Mr. INUKAI. So far from contemplating any support of the Cabinet, he held that the business of the hour was to form a big party for driving the Cabinet out of office. Dr. HATAYAMA was absent, having set out for Hokkaido, but it may be taken for granted that his views would not have tallied with those of Mr. INUKAI. Opinions being thus varied, a vehement discussion ensued, lasting until the time of candle-light. How it ended the public did not immediately learn, but the anticipation was that in order to avoid acute dissensions, the proposed manifesto would have to assume the vague form customary in the case of such documents in Japan. On the other hand the movement for organizing a big club under the presidency of Prince KONOVE seems to be gaining ground. It is said that the Club will re-print the memorial recently issued by the seven professors and will circulate it as a declaration of opinion.

We recently alluded to a project for forming a large association consisting of all the parties and coteries with the exception of the *Seiyu-kai*. This project appears to be making way more rapidly than is either the Progressist's reconstruction or the *Shako Club*'s organization. Doubtless the reason is to be found in the fact that the otherwise heterogeneous elements of the proposed association have a common standpoint as regards foreign policy. Their representatives held a meeting in the Atago-kan on the 23rd

instant, and decided that the interests of the nation demand the adoption of an unwavering strong policy at this juncture, and that if the Cabinet is in favour of such a policy, the support of the new association should be extended to it. A deputation was accordingly appointed to wait upon the Prince Minister and ascertain his views. The proposers and approvers of such a course might have known from the outset that Count KATSURA's lips would be sealed on such a subject, but the deputation is nevertheless said to have waited on him, and to have received the stereotyped reply that the time is not suitable for making any public announcement of the Government's foreign policy. The deputies therefore withdrew, and it was subsequently decided that, whatever view the Ministry might take, it was the duty of the Association to maintain and assert its own convictions.

Doubtless our readers will perceive that things are in a very confused state. No less than three movements are on foot: one for the reconstruction of the Progressists with the object of greatly enlarging their circle of supporters; one for forming a club under the presidency of Prince KONOVE; and the third for organizing an association of all parties except the *Seiyu-kai*. From this apparent welter, however, one fact emerges clearly, namely, that a spirit of much unrest is abroad with regard to foreign politics. In that sphere all sections of the Progressists are agreed. Their difference arises solely from the question of supporting or opposing the KATSURA Cabinet. In that sphere also the promoters of the *Shako Club* are absolutely agreed, as may be inferred from the fact that they seek to place themselves under the standard of Prince KONOVE. And in that sphere finally the projectors of the mixed association are agreed, as will be gathered from the account given above and from the name they adopt (*Taigai Ko-ha* or strong-foreign-policy party). In a word, outside the ranks of the *Seiyu-kai* there seems to be an almost unanimous trend of public opinion towards treating the country's foreign relations with ungloved hands. We are not alarmists, we think, but it appears to us that such indications of national sentiment must not be ignored. The Japanese are by nature calm and self-collected. Displays of passion or emotion are seldom made by them even in the presence of incentives which would evoke vehement exhibitions in Europe or America. Thus they have remained strikingly tranquil throughout the Manchurian crisis, though seldom in the history of the world has a nation had ampler cause for resentment and indignation. But this placid temper of theirs has the disadvantage that when once roused it becomes correspondingly uncontrollable. Is there no danger that the limit of self-control may be passed? We think there is, and we can not pretend to deny that much justification exists: justification not merely in Russia's doings, but also in the impenetrable mystery that shrouds

the whole course of the dispute. To this day no one except those in the innermost circle can say what line Russia is now actually pursuing towards China and what line the Powers are pursuing towards Russia. The Japanese public has to take everything on trust. What it sees is that Russia is steadily strengthening her position, and what it does not see is that any measures are taken either to elucidate or to curb her enterprises. To obtain trust it is necessary to repose some confidence.

THE YALU VALLEY.

WE are not surprised that leading Japanese journals are beginning to awake to the importance of events in the Yalu Valley. It is long since the matter was anxiously discussed in these columns, our conviction being that Russia was deliberately seeking to obtain in the Valley a *pied à terre* to be utilized either as a make-weight in the Manchurian account or as a commencement of the anti-Korean aggressions which must, as a matter of strategical and imperial necessity, follow in the wake of the absorption of Manchuria. We judge that the Japanese regarded the incidents occurring in that region mainly as a counter-irritant devised by Russia, and that they were consequently deterred from any display of concern. But it has never been Russia's habit to sacrifice accomplished facts. Such wastefulness, indeed, is not the habit of any country obedient to expansive impulses. If the footing obtained in the Yalu Valley were not ultimately utilized for its original purpose, it would still remain a footing utilizable for other purposes. Russia wastes nothing and she has a fine architectural faculty for poisoning big edifices upon apparently insignificant foundations. The *Asahi* now shrewdly recalls the story of the celebrated lumber concession. It was obtained when the KING of Korea—he had not yet made himself EMPEROR—was a refugee in the Russian Legation; that is to say, obtained under abnormal circumstances and without recourse to the usual channels of diplomacy. Then it lay, a dead letter, in the pigeon holes of the Russian chancellerie until the moment came when the concession was about to lapse by flux of time, a danger that equally threatened the contemporary concession of a French railway from Seoul to Wiju. Russia, however, always conservative of opportunities, obtained a renewal of the charter. Still there were no signs of giving practical effect to the provisions of the document, nor did any signs become apparent until the very moment when the Manchurian problem entered an acute phase. That is a suggestive synchronism. Of course we are bound to remember that to render profitable the enterprise of timber-felling in the Yalu Valley some market of tolerable propinquity must be available, and that Russia's plans for building railways from the Liao Valley to the Yalu created precisely such a market. Here then is a reasonable commercial ex-

planation of the time chosen to utilize a hitherto neglected privilege. But it has also to be noted that the building of these very lines is itself a conspicuous indication of ambitious designs in the direction of the Korean Peninsula, and thus we find ourselves reasoning in a vicious circle when we attempt to adapt ordinary fiscal theories to the doings in the Yalu Valley. It would further seem that the "asylum concession"—as this lumber charter may justly be called—suffers from the defect of vagueness and that Russia, not unnaturally, has sought to avail herself to the full of its elastic terms. At one moment she was found felling timber in the forests of Musan on the Tumen; at another her woodmen were busy on the sacred mountain of Peng-ma, while for the general use of the enterprise a settlement was established at Yong Am-pho, a telegraph was built to connect Korea with Russian Manchuria, and camps were organized for policing the Yalu and seizing any timber rafts that unchartered adventurers might attempt to float down the stream. In fact this seemingly innocent concession, which in its origin had no purpose larger than the procuring of some railway sleepers, has been cleverly expanded by Russia into a potent instrument of empire-building, and what many Japanese have been disposed to regard as a mere Manchurian counter-irritant, may prove to be the beginning of a mortal malady for Korea. The thing is to have the limits of the concession defined, say some authorities, and to that end we heard, some time ago, that a mixed commission of Koreans and Russians—including that ubiquitous personage, Baron GUNSBURG—had been appointed. But whatever limits may be set to the concession—and we may rest assured that they will not be narrow limits—Russia's presence in the Yalu Valley looks very like an accomplished fact. Whether she drifted thither on the crest of the big wave of empire that now carries her across the face of Asia, or whether she went there merely with the idea of throwing out a spare anchor for the Manchurian ship, there she is beyond all question and there, we expect, she will remain. The only thing to be said is that a Japanese concessionaire is disputing her supremacy. Mr. ABE TAISUKE acquired his rights by a species of vicarious triangulation, but they are valid rights all the same, and it will be for Japan to safeguard them.

THE SEOUL-FUSAN TELEGRAPH.

OUR readers remember that the Korean Government recently addressed to the Japanese Representative in Seoul a communication requesting the abolition of the Japanese line of telegraph from Seoul to Fusan. This despatch was doubtless suggested by the terror of precedent that always tends to destroy the faculty of discrimination in small countries exposed to the aggressive enterprises of big. Japan once belonged to

the category and we can recall many instances of similar timidity on her part in the old days. One is conspicuous. It happened just thirty-two years ago, if we remember rightly. The Government in those days allowed its own foreign employees to travel in the interior without being furnished with passports, whereas other foreigners, desiring to pass beyond treaty limits, were required to comply with the formality of pleading ill-health or scientific research as a pretext for the desired permission. A certain Power happened to be then represented in Tokyo by a particularly active official. Seeing, or thinking that he saw, an opportunity in these facts, he approached the Japanese with a claim that what was permitted to one foreigner must be permitted to all, or the plain principle of justice would be violated. Of course if there ever was an occasion warranting discrimination, this was one. For the sole object of passports was to guard against the admission of a dangerous class of foreigners into the interior where they would be beyond the reach of their own consular tribunals and at the same time exempt from the jurisdiction of Japanese tribunals. A passport having the cachet of a foreign minister or consul served as a guarantee of the respectability of its holder and the consequent improbability of his coming into collision with the police. That is all the purpose it did serve, and no one ever suggested that it served any other. Thus to require that passports must be carried by the Government's own foreign employees, whose respectability was already vouched by the fact of their employment, would be plainly inconsequential. Nevertheless when the Japanese were required to choose between a legitimate exercise of their right of discrimination and the extension of the free system to all alike, they shrank from the former selection, and being evidently forbidden to make the latter, had recourse to the expedient of ordering that in future their own employees must carry passports, a decision rendered still more comical by the fact that an employee was not required to make application through his consul, so that, in sum, the Japanese Authorities, in granting him a passport direct, offered to themselves their own guarantee of his respectability. The moral of the event was that by preferring unwarrantable claims foreign diplomatists sometimes had the misfortune to restrict the privileges they aimed at enlarging. The recent action of the Russian Representative in Seoul seems to belong to the same category. He adduced the Japanese telegraph from Fusan to the capital as a precedent for the line his own nationals were building from Antung to Yong Am-pho. Plainly the two stood on wholly different bases, the Japanese line having been constructed when Japan was fighting in Korea for Korean independence, and its continued existence after the war was over was officially sanctioned by the Korean Government. Yet when the Seoul-Fusan wires were

pointed to by M. PAVLOW as a precedent for allowing Russian subjects to build lines in the Yalu Valley, the Koreans, rather than make a troublesome and dangerous discrimination, called upon Japan to remove the wires. Mr. HAYASHI is reported to have replied in very emphatic terms, reciting the circumstances under which the line was originally constructed and the approval subsequently given to it. There is not the least probability, we imagine, of the Seoul-Fusan telegraph being removed, but there is every probability that the pusillanimous and unintelligent procedure of the Korean Government will be taken full advantage of by a diplomatist so shrewd as M. PAVLOW is. He will now say, not unnaturally, that Korea, by calling on Japan to remove the line, has constructively declared the illegality of its existence, and that if she winks at a breach of law where Japan is the offender, she must show similar complaisance to Russia. That, of course, will amount to contending that two wrongs make a right, but we must frankly confess that M. PAVLOW has not hitherto shown himself over-subservient to ethical logic.

THE HOKKAIDO AFFAIR.

WE observe that a Kobe journal has published a letter about the recent arrest of a German subject in Hokkaido. The writer of the letter states a case which creates a very bad impression against the Imperial Estates Bureau. We do not think that his allegations can be accepted literally. The story is that Mr. MAUERER made a contract with the Imperial Estates Bureau giving him the right to fell a certain amount of timber during ten years in the province of Teshio. So far there seems to be no question. But Mr. MAUERER claims—or, at any rate, we may assume that the claim put forward by the correspondent is Mr. MAUERER'S—claims that the Bureau "promised and assured him" that there would be no objection against using Chinese labour. When, however, he attempted to make arrangements for a supply of such labour, the police of Tokyo refused to grant permits for Chinese workmen, and the Imperial Estates Bureau declined to give assistance "as it was only verbally agreed upon." Now there are in this story two points, one of which is almost certainly incorrect and the second is so extremely improbable that it may be dismissed as a myth. The former point is the assertion that the Imperial Estates Bureau "promised that there would be no objection against using Chinese coolies." The Bureau can not have given such a promise, for the simple reason that it has no power to give it. It is affirmed in the letter that several of Mr. MAUERER'S friends in Tokyo advised him not to rely on verbal promises given by Japanese officials. This statement, whether it had its origin in Mr. MAUERER'S imagination or whether it truly embodies the advice of his friends, must

be regarded as an interesting illustration of the blind race prejudice by which some Europeans are swayed. For if the history of the past thirty years teaches anything, it teaches that Japanese officials have fulfilled all their promises and carried out all their engagements with scrupulous good faith where foreigners are concerned. Be that as it may, however, it is wholly incredible that the officials of the Imperial Estates Bureau can have made, either verbally or in writing, a promise which they had no power to carry out, and which could not be carried out, as they must have well known. The second point which, in our opinion, may be dismissed as a myth is the story that the officials of the Bureau declined to give assistance in the matter of the Chinese coolies "as it was only verbally agreed upon." Had an agreement been made, verbally or otherwise, the officials of the Bureau would not have tried to elude it, and to pretend that they assigned such a reason for acting with bad faith is extravagant.

The next episodes in the story are that Mr. MAUERER attempted to proceed to Teshio in a steamer purchased by him at Otaru, and that he was forbidden to do so since Teshio is not an open port. Thereafter he lost command of himself and behaved in such a manner as to necessitate police interference. Naturally many people will sympathise with Mr. MAUERER. We certainly sympathise with him. But it is amusing to find his champion assailing Japanese "business" methods on these grounds. What we consider strange are the business methods of Mr. MAUERER. Is he ignorant that there are such things as treaties and regulations, and that foreigners carrying on an enterprise in Japan must do so in conformity with such treaties and in obedience to such regulations? Does he not recognise the necessity of informing himself by ordinary inquiry about the conditions under which his ventures must be carried on? And among the friends who were so ready to warn him against the bad faith of Japanese officials, was there none kind enough to remind him that even in Japan the laws of the land must be observed by foreigners? When he contemplated making a purchase of timber from the Imperial Estates Bureau, the most rudimentary principles of business should have suggested the advisability of ascertaining how the timber was to be felled and shipped, and whether the mere act of making such a purchase carried with it the right of over-riding international agreements and police regulations. The officials of the Household Bureau can scarcely be blamed for not suspecting that their *vis-a-vis* knew nothing about the conditions and restrictions under which his enterprise would have to be carried on. They assumed him, and were justified in assuming him, to be duly acquainted with the character of the work he was about to undertake, and they dealt with him on that assumption. Mr. MAUERER's defender al-

leges that it was the duty of the Imperial Estates Bureau to ascertain whether the contract could possibly be kept, and adds "it certainly is of no use to allow a man to enter into a contract if there is no possibility of carrying it through." That is silly hyperbole, more or less excusable, perhaps, in the mouth of an indiscreet partisan, but silly hyperbole all the same. The contract can be carried out. There is no difficulty in carrying it out. All that is necessary is to work with Japanese agents.

Unhappily this question does not escape the injudicious comment that seems to be inevitably evoked by every difficulty between foreigners and Japanese. The correspondent of the Kobe paper writes;—"In any case this incident is a fresh proof that the equality of the law for foreigners and Japanese as guaranteed in the Treaties is at present only of paper value," and he concludes by affirming that "the envy of the Japanese competitor and the help afforded to him—willingly or unwillingly by the small officials—prevent the foreigner from carrying out any undertaking in Japan." Now either Mr. MAUERER has been unlawfully treated or he has not. We affirm that he has not, and we do so on the strength of the pleas put forward by his own defender. What Mr. MAUERER attempted to do is not sanctioned by the treaties and is forbidden by the laws of the land. If his champion had said that no individual foreigner is allowed to over-ride the treaties and the laws, he would have been stating the case correctly, whereas he imports into it an element of recrimination which serves only to display his own injustice and to augment the odium which such invidious accusations can not fail to bring upon the foreigner.

KOREA.

IT begins to look as though Korea were destined to be the point where the storm over-hanging the Far East will break out. Russia's acquisition of land at Yong Am-pho by processes which even her best friends and warmest advocates must agree to describe as spoliative, and the Korean Government's extraordinary display of weakness towards this aggression, make a picture of a very disquieting nature to Japan. On the one hand there is a great Power—a Power which could crush Korea to fragments between two fingers—yielding to aggressive impulses of a most unscrupulous nature; on the other there is Korea not even making a show of serious protest but, on the contrary, assisting to legalize the lawless acts of her menacer. As a practical display of the way to "get there" by over-riding obstacles, we may admire Russia's doings, and indeed the tribute is due to her that the men she has at the front are magnificent empire-builders. Their methods are picturesquely independent of moral restraints, and when failure overtakes them we feel the same kind of sympathetic regret that is evoked

by the discomfiture of the courageous *chevalier d'industrie* in a work of fiction. But Japan, being ultimately the *corpus vile* of these exploits, must view them without any touch of romantic admiration. She must see that in northern Korea there has been created a situation abounding in dangerous contingencies. With the Seoul Government invertebrate and Russia indifferent to international obligations, this empire may find itself confronted at any moment by accomplished facts of the most unpleasant character. It may find the whole of the Yalu Valley virtually in Russia's possession and the mouth of the river commanded by Russian forts at Yong Am-pho and Antung. It will be agreed by the least truculent onlookers that Japan dare not leave these conditions to shape themselves at hazard. She must take measures to guarantee her own interests whatever perils have to be faced. M. PAVLOW is incurring a very grave responsibility. That he should do the best he can for his country goes without saying, but that in doing so he should be so reckless as to create a situation intolerable to Japan, is not patriotic. For the preservation of Manchuria to China we should strongly deprecate the drawing of the sword by Japan, chiefly because it appears to us that China has lost all force of imperial cohesion, and that any attempt to re-attach Manchuria to her would be futile. But for the preservation of Korea against the territorial aggressions of a Power like Russia, whose shadow is steadily moving southward over the whole face of Eastern Asia, we believe that a life-and-death struggle would not be out of proportion to the gravity of the danger. Korea herself is behaving in almost a childish fashion. Her courage seems to be limited to dealing with telegraph poles. Last year she ventured to pull up the line built by Russians at Kyong-Sheung, on the west of the Tumen, and this piece of temerity did not involve any penalty. Now she has repeated the experiment on the banks of the Yalu, and to-day news comes that she extended her destructive manoeuvre to a telephone erected by the Seoul-Fusan Railway Company within the compound of the new station at the Korean capital. There is some dispute about the site for the station and possibly this enterprise against the telephone may not have been a governmental protest against the unauthorized construction of such means of communication by foreigners. But it appears that recourse to force had been preceded by a communication from the Korean Government to Mr. HAYASHI, and also that Korean policemen led the assault upon the poles. The Japanese police, however, were too vigilant for the assailants, who were driven off when one post had been pulled up, their ringleaders being apprehended. Probably this will prove a trifling episode, but altogether the waters in the Korean region are getting troubled. Somebody wants to fish there, evidently.

CHURCH NOTES.

(SPECIALLY WRITTEN FOR THE "JAPAN MAIL.")

The history of the Declaration referred to in Reuter's telegram a few days ago, which was signed by four thousand Clergy of the Church of England and presented to the Archbishops of Canterbury and York, would seem to be this. Owing to the ritualistic extravagances of a certain number of the Clergy, and in particular owing to the outrageous practice of the Vicar of S. Michaels, Shoreditch, there has been an increasing desire on the part of the main body of the High Church Party by some formal act to disclaim any connection with the very small Romanising section in the Church—Romanising, *i.e.*, in the true sense of the word, as introducing customs and practices *distinctively* Roman and not English as well. At the same time, a certain number of Low Church people, of whom Lady Wimborne was the most prominent representative and the mouthpiece, have been appealing, through the *Nineteenth Century* magazine and elsewhere, to the members of the "Historic High Church Party" to separate themselves definitely from their more advanced brethren. The Declaration was drawn up to meet these two currents of feeling. It was whispered that the Bishops and others in authority were anxious that it should be widely signed. It is not surprising therefore that it has received such a measure of support.

At the same time, it is scarcely a direct answer either to Lady Wimborne's appeal or to the wishes of the average High Churchman. It was drawn up in such a form that *any* loyal member of the Church of England might sign it; and as a matter of fact, it has been signed by members of very diverse schools of thought. The object in giving it this enlarged scope, apparently, was that it might serve as a rallying flag for the great bulk of the Clergy, all except the extremists on either side, and to show to the world that there was a great deal more unanimity on certain fundamental Church principles than the clamour raised over details and over certain exceptional occurrences would lead people to suppose. But it is no longer a High Church pronouncement, it may be taken rather as reflecting the average opinion of the whole Church of England Clergy.

The keynote of the Declaration is loyalty to the Prayer Book: and that, of course, is a duty which every Church of England clergyman is bound to recognise. But this, as it points out, involves a frank acceptance of the Ornaments Rubric (the last rubric in the P. B. before the "Order for Morning Prayer") as sanctioning the whole ceremonial system which was lawful under the First Prayer Book of Edward VI. This would include the Eucharistic vestments, Altar Lights, and the use of Incense (perhaps)—obviously a great deal more than the average churchman of to-day would understand or care for. A lesser ceremonial usage ought therefore to be recognised, the justification for which must be found in widely prevalent custom. Practically therefore, so long as the services are decently and reverently conducted, they may be as plain as any Low Churchman would desire. The claims of Evangelical Churchmen are thus recognised; but in signing the document, they agree, on their part also, to recognise the claims of any congregation which may desire a more ornate form of service.

The next clause mentions the complete

restoration of the Synodical action of the Church as an object for Churchmen to aim at. Meanwhile "the admonitions and requests of the Bishops, acting in formal consultation with their clergy, should be obeyed." And there is a final paragraph which protests against the Church as a whole being judged by the conduct of a few. Here and there are some, no doubt, who without any authority are introducing foreign usages; S. Michael's Shoreditch, was a glaring instance. Others there are who deliberately fall short of the plain directions of the Prayer Book. The daily recital of Morning and Evening Prayer which is enjoined—or rather its habitual neglect—would be an instance of this: as also the neglect of the regular Sunday Celebration of the Holy Communion, of the observance of Saint's Days, and of the whole P.B. system of Fast and Festival. All such sins of omission are equally condemned. Nor do those ministers who "cause still graver anxiety by minimising or even denying fundamental doctrines of the Creed" escape notice. Some unhappy statements recently made by one or two Broad Church Clergy, in which they were understood to deny such fundamental Articles of Faith as the Virgin Birth, and the Resurrection of the body, are no doubt here glanced at. The Declaration is a protest therefore against laxity of discipline in so far as it has invaded the ranks of each one of the three great parties in the Church of England, High Church, Low Church, and Broad.

The proceedings at the London Diocesan Conference this year were encouraging from the point of view of this Declaration. Mr. Athelstan Riley, perhaps, after Lord Halifax, the most prominent High Church layman to-day, moved the following resolution:—

"That the best hope for the settlement of the existing unrest in the Church of England is to be found in a more scrupulous adherence, on the part of all Churchmen, to the directions of the Book of Common Prayer."

Prebendary Webb-Peploe, an Evangelical of the Evangelicals, was only by an accident prevented from seconding this resolution, and spoke in its favour; and eventually it was carried unanimously with cheering.

To turn to a matter of local interest. The new stained glass window, presented to Christ Church, Yokohama, by Mrs. Frederic Lowder in memory of her husband, has just been put in, and it is a very notable contribution to the adornment of the Church. The subject is our Lord in the Temple, sitting in the midst of the Doctors, "both hearing them and asking them questions." It is ideally treated, the child Jesus being represented as seated on a magnificent throne, with the doctors standing around Him on either side, or sitting at His Feet. This of course is scarcely a true representation of the historical fact. But that is as it should be. It is the artist's business not to be the slave of a too literal realism, but to interpret facts. And in this case he has followed the best traditions of early Christianity in looking through the outward circumstances to the deeper reality which lay behind. The window is a costly gift and will be very greatly appreciated by the worshippers in Christ Church; and their regrets will be renewed that the lady who has presented it no longer occupies her accustomed place among them, having finally left Japan. It is a worthy memorial of her husband, whose likeness may be not obscurely traced in the face of one of the doctors, who, in teaching, is also learning wisdom from the lips of the Holy Child.

SOME HOURS OF IDLENESS.

CONCLUSION.

We left secluded Kure just as the purple mists of evening were beginning to drape the surrounding hills and islands in night's elusive veil. On all sides the swift, though unwieldy-looking junks, like tired sea-birds, were scurrying homeward, while the tiny steamers—whose numbers on the Island Sea are simply Legion one and all seemed bent on reaching their respective ports in the shortest possible space of time. The inter-island and coasting traffic of the Island Sea must be very great to judge by the number of vessels met with in the course of a day's tour upon its waters. I don't know how it may be in the winter months, but at this season of the year all the steam vessels were crowded with passengers, no matter the hour of the day, while cargo also seemed forthcoming at every little village and hamlet that they call at. In addition to the steamers there are also whole fleets of old-time junks, whose varying style of white sails contribute so materially to the beauty of these lake-like waters. But a great deal of the charm of the Inland sea is broken by the incessant tooting of the fussy steam-packets. The Captain's hand seems forever on the cord that liberates the blast of the syren, and of course each Captain is bent on out-Heroding the other in the matter of producing a diabolical noise. Yet this is but another of the thousand and one intolerable nuisances which the Japanese, through their absence of "nerves" mayhap, bear with the utmost complacency. Our big 6,000-ton ocean-going liner did not make half the rumpus going into or out of harbour that a little 75-ton Inland Sea steamer considers it incumbent to produce at all hours of the day and night, and of course the smaller the craft the greater the fuss and fury.

Moji was made early in the morning and to escape the coaling, the weather being actually fine, we went ashore, crossing over to Shimono-seki. The "sights" were easily done, for there is little to see beside the temple where Li Hung-chang negotiated the Peace-treaty with Marquis Ito; the place where the veteran diplomatist was shot, etc. These finished, an hour or so were agreeably passed on a moderately secluded elevation, from whence we could see, stretched out at our feet, the busy and exceedingly pretty panorama of Shimono-seki straits and the coaling-station at Moji. It is all very beautiful, but to quote Mr. R. C. Lehmann:—
One dewy patch of English lawn is worth a province here.
One velvet patch of English lawn, and on it running free,
The little fair-haired short-frocked maid who's all the world to me.

After a day of sunshine at Shimono-seki, it was disappointing to have to pass into the rain and mist again—but there it was, waiting for us, as it were, round the Narrows, and it kept us company till we were nearly home. Indeed, at one time, matters grew so bad that our prudent Captain, finding he could not see half across the deck, anchored down late at night—and then made the welkin ring for some three hours with plaintive blasts of his fog-horn, a musical diversion for which we were not so thankful as we ought to have been.

* * *

Looking through the well-selected library of the *Sanuki Maru* this morning I was rather set back by coming across an old acquaintance whose presence on the shelves was, to say the least, a matter of some surprise. Who would expect to find *Tristram Shandy* amid such an environment? And who, we wonder, takes the old book down to help while away the drowsy hours of the ocean voyage? How well I remember my first introduction to *Tristram*. What a vast sea of recollections comes surging up as my eye runs over the title page. In fancy again I see an old-world village, nestled deep down in the heart of leafy Warwickshire,—the Warwickshire of golden cornlands, not the grimy Warwickshire of the iron-workers—and in one of the ancient red-brick farm houses which still stud the land, I find myself renewing the pleasures of happy boy-

hood. School-days were just over and still some distance ahead lay the first disenchantments, griefs and disappointments of life's battle-ground. Before the window stretches the village green whereon stand the stocks and two mighty elms, sole survivors of seven which were reputed old—so village tradition ran—in the days of the Mercian Kings. Even in those years my delight was chiefly derived by browsing among books and high up in a garret of that old house where the older and seldom-required portions of the library had over-flowed from the orderly seemliness of the study, I chanced one afternoon upon *Tristram Shandy*. Shall I confess it, I was bitterly disappointed in the book. On and on I read and never the nearer did I seem to get to the heart of the matter. Corporal Trim and dear old Uncle Toby came along and fought and refought the battles of the Low Countries, the Widow Wadman glanced up from the page, and yet the elusive story of *Tristram Shandy* would not come to heel. Not till the last page was reached did I realise that Sterne was playing a huge practical joke on his reader—that he intended all along to cheat him out of the story. Honest, high-minded Oliver Goldsmith somewhere roundly denounces the book, finding no excuse for Sterne's indelicacy and suggestiveness; for myself I frankly put it down in disgust, but it was the bare-facedness of the fraud that embittered me. Yet Sterne's works have become classics of our language and by the same token his *Tristram Shandy* has been selected by Sir Edwin Arnold and the minor literary lions of the *Daily Telegraph* for inclusion in "A Library of the Hundred Best Books," and so finds a place on the bookshelves of the *Sanuki Maru*!

Another day of rain-steeped idleness lay before me and I passed it in the company of Froude. What an excellent storyteller he can be when in the vein! One can almost forgive his propensity for misreading older authors, misquoting of authorities, and garbling translations of ancient charters, for the exquisite clarity of his style. His "Divus Caesar" gives one a better idea of the shameless abominations, the incredible follies, as well as some of the virtues of old Rome, than all the sensuous imagery of "Quo Vadis" can do—though perhaps I am prejudiced, for was not that novel one of the "literary successes" of its year! I like Froude when he is dealing with some mediæval character such as St. Hugo of Avalon, a monk of the Grand Chartreuse, who was invited by Henry II. into England, became Bishop of Lincoln and was the designer and in part builder of that most beautiful of old English Cathedrals—Lincoln. A wonderful man was Hugo and wonderful was the work which he accomplished in the land of his adoption. He feared not Henry, neither did he bow the head to Richard Cœur de Lion—that strange, ruthless Angevin who sucked so much out of his kingdom of England and yet of the tongue of the people knew not one single word. When Richard, hard-up as usual, applied to the land for money to carry on the war with France, Hugo attended the Council convened by the Archbishop of Canterbury to consider ways and means of satisfying the King's insistent demands. The Archbishop declared that Hugo should levy a subsidy upon his clergy of Lincolnshire.

"Do you know, my Lord," the Primate said, "that the King is as thirsty for money as a man with the dropsy for water."

"His Majesty may be dropsical for all I know," Hugo answered, "but I will not be the water for him to swallow." And he kept his word.

A stern upholder of the rights of the poor, the oppressed, the widow and the fatherless in the dark, bad days when such rights were rarely acknowledged by those holding authority, Bishop Hugo's fame shines from afar with a flame of refreshing brightness through the pen of Brother Adam, who afterwards became Abbot of Ensham. His manuscript lies in part in the famous Bodleian Library in Oxford and part in the Sorbonne at Paris. Hugo's deathbed reminds one somewhat of the scene with which we associate the end of the Venerable Bede. Says Froude:—

As his time drew near, he gave directions for the disposition of his body, named the place in Lincoln Cathedral where he was to be buried, and bade his chaplain make a cross of ashes on the floor of his room, lift him from his bed at the moment of departure, and place him upon it.

It was a November afternoon. The choristers of St. Paul's were sent for to chant the compline to him for the last time. He gave a sign when they were half through. They lifted him and laid him on the ashes. The choristers sang on, and as they began the Nunc Dimittis he died.

So parted one of the most beautiful spirits that was ever incarnated in human clay. Never was man more widely mourned over, or more honoured in his death. He was taken down to Lincoln, and the highest and the lowest alike poured out to meet the body. A company of poor Jews, the offscouring of mankind, for whom rack and gridiron were considered generally too easy couches, came to mourn over one whose justice had sheltered even them.

John was at Lincoln at the time, and William of Scotland with him; and on the hill, a mile from the town, two kings, three archbishops, fourteen bishops, a hundred abbots, and as many earls and barons, were waiting to receive the sad procession.

King John and the archbishops took the bier upon their shoulders, and waded knee-deep through the mud to the cathedral. The King of Scotland stood apart in tears.

It was no vain pomp or unmeaning ceremony, but the genuine heartfelt recognition of human worth.

The story of Hugo of Lincoln deserves a place in every biography of English Worthies. It ought, as Froude suggested, to be familiar to every English boy. Such men as he were the true builders of our nation's greatness. Like the "well-tempered mortar" in old English walls, which is hard as the stone itself, their actions and their thoughts are the cement of our national organization.

* * *

As we drew nearer to Yokohama the heavens gradually cleared and when we turned our head up the Bay towards the Quarantine, the stars came out from an absolutely clear sky. Speculation was rife as to whether we should get into harbour that night, and it looked at one time as though we wouldn't, but the doctor passed us speedily and the Captain gave the order "Full speed ahead"; then he slowed down again and skillfully manoeuvring his vessel gradually brought her to anchor. It was just about 8.30 p.m., when a saloon-steward came up and said,

"Steam launch alongside, sir"—and I knew that my hours of idleness were at an end.

A. B. B.

LAW CASE.

CLAIM ON PROMISSORY NOTE.

In the Tokyo District Court, says the *Yorodau*, the hearing of a case brought by Capt. A. E. Bouguin against G. Kuga, claiming a sum of money on a promissory note, which had not been paid by defendant at the due time, was begun on July 21st.

FIRES.

Fire broke out about 1 a.m. on Tuesday on the premises of a shoemaker in Motomachi, Sanchoime, but two streams of water from the hydrants easily suppressed the outbreak. The Police Fire Brigade turned out promptly. The damage was slight.

Fire broke out on freight car of a train on the Nippon railway which left Matsuda Station at 2.46 p.m. on July 28th for Kanemachi. The fire was caused by sparks from the engine.

The incendiary who started the fire in the shop of a foreign furniture dealer named Takarada, Motomachi, early in the morning of July 28th, was arrested the same day by the Kotobuki-cho police. The criminal is a young female servant named Kaku, 15 years old, in the service of the dealer. She has confessed that she believed that she could get back to her parents' house if the house of her employer was burned. She piled shavings in a corner therefore to which she set fire.

THE COLONIZATION OF SIBERIA.

(SPECIALLY WRITTEN FOR THE "JAPAN MAIL.")

A writer will probably come some day to describe for us the Russian emigrant in Siberia as Maxim Gorky has described for us the Russian peasant at home, and for this future novelist or poet a great deal of material is constantly accumulating. Approaching as it does in some respects the colonization of Western America, the settlement of Siberia is on the whole, however, a very different kind of movement to that which went on somewhere about the middle of the last century in "the Far West." The free and easy ways which so enchant us in the late Bret Harte's Californian stories are replaced in Siberia by ways which are anything but free and easy owing, of course, to the heavy hand of omnipresent officialism. The present writer was at one time inclined to imagine that this was not so, that greater freedom prevailed in the new colonies than in European Russia, and that in time the once-despised Asiatic dominions of the Tsar would be the salvation of old Russia. He soon found, however, that in spite of the attractiveness of this theory from an artistic point of view it did not fit in with the facts of the case. The facts are that, owing perhaps to the old penal settlement traditions, officialdom is even more powerful in Siberia than in Russia proper. From the story-writer's point of view this is probably an advantage for the lights are stronger and the shadows deeper than they were in California some half-a-century ago while the foreign spy, the exiled nobleman, the anarchist, the Cossack, the picturesque Buriat, the ride by night in a sleigh, the wolves, with the settler's drab village and the settler's homely self, wife, and children to form a sufficiently quiet background, are all ingredients which could be made to form many a literary masterpiece.

To descend, however, to matters of fact, it will probably be a long time before Siberia becomes as well-settled and as prosperous as Western America or even Western Canada, not only on account of the obstacles which nature has opposed to such a consummation but on account of the equally formidable obstacles placed in the way by man. One of these is the restrictions which would probably be placed by the Russian authorities on wholesale foreign immigration and the wholesale introduction of foreign capital, the lack of which makes the Siberia of to-day so torpid and comparatively unenterprising. This torpor necessarily affects the country in many ways; and an article in the St. Petersburg *Viedomosti* shows how it affects the education of settlers' children. The picture the writer in this article draws of the educational position in some parts of Siberia is appalling and the contrast between the zeal of Chinese settlers in Russian territory not only for Chinese learning but even for Russian learning and the alleged ignorance and apathy of the Russian colonists would lead one to conclude (were it not for the historical fact that learned nations, like the ancient Greeks and the mediæval Italians, were seldom great empire builders) that some parts of Siberia might be annexed or "occupied" by the troops of the Celestial Government to the great benefit of the Russian inhabitants. Having an object in view, it is probable, however, that this Russian writer overcharges his picture; and of course, facts are altogether opposed to the theory that a Chinese Governor would make a better administrator even of a Chinese district than a Russian Governor would make. Manchuria is a case in point if Dr. Morrison's letters to the *Times* on the state of that Province are to be trusted. It is satisfactory, by the way, to see the semi-official *Viedomosti* publishing such an outspoken letter, in which it is plainly stated that Russia should spend less on warlike armaments and more on education.

The article appeared in the St. Petersburg paper on May 12 (23) and runs as follows:—
"The emigration movement in the Ussuri district increases, from year to year, and must in future increase still more as in Siberia (exclusive of the Primorsky and Amoor Provinces) there is at present hardly any free land fit for cultivation left."

"What contributed greatly to the increase of the emigration movement in the Ussouri country was this, that the colonization of this territory by Russians had been long regarded (and this view of the matter was greatly strengthened after the Chinese war of 1900) as a means of assuring Russia of the victory in the political and economic struggle with the Yellow Race. The Russian colonists in the Far East may be regarded as the advance guard of the army which is to conduct this fight, as the bearers and planters of European civilization.

"Under these conditions one might of course venture to hope that the Russian colonists in the Ussouri district would have placed at their disposal all possible means for increasing their knowledge and improving their minds, that they might assimilate to the full European enlightenment and European culture. But it would seem that these very natural expectations have been disappointed.

"The Ussouri district, into which the waves of the emigration movement poured most strongly, lacks even the most elementary means by which European education is imparted, I mean primary schools. I do not speak of free libraries or of public reading rooms: in the district of which I treat, the emigrants do not even dream of these things.

"The principal colonization district in the Ussouri territory at the present time is the Middle Ussouri division, which extends from south to north for the distance of 250 versts (from the Shmakovka station on the Ussouri railroad to the Rozengartovka station on the same line) and which is inhabited by a population of 11,000 people of both sexes. And for the children of all these people, scattered over an enormous area, there are only, so far as I am aware, four primary schools. Moreover, these schools are situated in the most southerly extremity of the district and can only therefore be attended by the children from five or seven settlements. All the other settlements have no schools, and in those settlements therefore the children must perforce grow up without any education.

"It is true that in the vicinity of the above-mentioned district there is a railway school at the Muraviev-Amoursky station and, in some Cossack settlements, the so-called village schools.

"But only the children of the railway employees are allowed to attend the first mentioned school, and the others admit only the children of the Cossacks. Consequently these schools are of absolutely no value from an educational point of view, so far as the ordinary colonists are concerned.

"In the valleys of the rivers Raubeche and Ulache, which take the second place at the present time in the Ussouri district in point of the extent of the land colonized, there are about twenty villages with a population of more than 3,000 persons of both sexes. And for all these settlements, scattered over an area equal to that of any department you please in European Russia, there is only one church school—a primary school—in the village of Beltzovy, in the northern corner of the territory in question. This school is the most convenient for the children of settlers from the two nearest settlements to Beltzovy but for the children from the other settlements it is unavailable and they must therefore grow up without any education whatever.

"On the coast of the Japan sea, beginning with the valley of the Sudzuhe and going on to the harbour of St. Olga district, we find that there are by the post road (or near to it) for a distance of 230 versts, about 10 villages in which live about one thousand people of both sexes. And for all these people there is only one school, a parish primary school under ecclesiastical supervision in the village of Permska, in the southern extremity of the village. This school can only be used by the children from the village of Permska. The young generation of settlers in the remaining villages are doomed *volens-volens* to remain ignorant.

"Such is the state of education in the two most important parts of the Ussouri district which we have colonized. This bad state of things stands out still more distinct and glaring in contrast to the state of education among the Chinese living in the Ussouri country and who are all

as a rule educated, that is, are able to read and write Chinese. For their children, born in the Ussouri district, they ordinarily get teachers (principally from Shantung Province). These Chinese teachers are not only to be found in the towns, but also in the waste *taigu*, sometimes at a distance of a hundred *versts* from the towns, where one may sometimes see their characteristic figures, seated on the ground surrounded by a circle of their students.

These Chinese teachers do not desire and do not receive very much by way of remuneration (only from 10 to 20 roubles a year from each student) but they enjoy the public respect and esteem to an extent that would make one of our town teachers turn green with envy.* The Chinese teacher is far better off than the master of the house in which he teaches, with regard to lodging, table and attendance, for his pupils place themselves at his disposal and serve him for nothing. Children who give tokens of special talent for the study of Chinese learning are sent by rich Chinese to Mukden (in Manchuria) to complete their studies there. In such a way do the Chinese in foreign countries maintain among the youthful members of their community the connection with the home country and feed their minds with the national learning.

"But we, Russians, are, in the present condition of our educational system, allowing the children of our settlers in the Far East to grow up in ignorance. Hundreds of millions of roubles of the national wealth have been wasted, but wasted on warlike armaments.

Can it be impossible to spend some fifty or one hundred thousand roubles on providing schools for the children of our settlers who understand, it is clear, the advantages of education and who are sincerely grieved that they cannot give their children even an elementary education. Is it not hard that while young Chinese, after mastering their own system of knowledge, ordinarily turn their attention to the study of Russian which they learn to read and write, the children of our own colonists who have come hither to plant European civilization in this part of the world, should almost generally be illiterate? I may be putting it bluntly, but I must say I believe the Government ought to stop this short-sighted policy, for the time is forever past when guns and bayonets prove better means than popular education in the international struggle, not only on the arena of culture but even in the arena of international politics."

YOKOHAMA GENERAL HOSPITAL.

The annual meeting of subscribers to the Yokohama General Hospital, to which non-subscribers were invited, was held at the Chamber of Commerce Room, No. 14 Bund, on Friday, July 24. Mr. F. S. James occupied the chair and there was a good attendance both of ladies and gentlemen, including the other members of the Committee, Messrs. H. Keswick and J. Colomb.

The CHAIRMAN said: Ladies and gentlemen, My position as Chairman of the Hospital Committee entitles me to take the chair at this meeting without having been voted to it. I shall retain it for the formal business of the meeting which ends on the election of a new Committee. It will then become a question whether you will elect a chairman of your own. If this is done, I shall vacate the chair and you will be able to discuss anything you wish.

The remarks which Mr. JAMES made in addition to the report were as follows:—

This is the Annual General Meeting of Subscribers to the Yokohama General Hospital for the purpose of receiving the Report and Accounts made up for the past 15 months to 30th June, 1903, and also for any other business in connection with the Hospital.

Strictly speaking, only subscribers should have * If there are many Russian teachers in the position of "The Schoolmaster" in Gorky's *Otverjennie* I should not be surprised that they are not as a rule so respected by the public as their Chinese confrères. —Translator.

been asked to attend, but as a general wish was expressed by some non-subscribers, an invitation was extended to anyone interested and I am glad to see that it has been so largely availed of.

The Report and Accounts were distributed some days ago, so I do not think it will be necessary for me to read them both before asking you to pass them. I shall be very pleased to answer any question that you may wish to put in connection with same.

You will notice that there is a balance of *yen* 102.45 owing to the Honorary Treasurer, against which stands a dependency of *yen* 615 due for account of Infectious Ward. The payments made for account of Infectious Ward include two years premium on Fire Insurance policies, besides the cost of a new boiler.

In the account for charity patients a sum of *yen* 486.30 has been paid for Japanese nurses. The general account shows an amount of 1,415.54 for Hospital Equipment, besides *yen* 138.501 premium on Extra Fire Insurance. Under the lease held by Dr. Meere the buildings and contents belonging to the hospital proper are covered for *yen* 18,000 but the Committee considered this was insufficient, and so took out a further insurance to the extent of *yen* 14,000.

The dwelling-house and hydropathic establishment is the property of Mrs. Davies, but if the hospital is worked on the lines in the report the present committee think they can arrange in such a manner that there will be no occasion to purchase them from her so long as she remains at the hospital. Before his departure Dr. Davies transferred to his wife his right in the hospital. Though this transfer was not officially brought to the notice of the present Committee, they consider that in equity the rights of Mrs. Davies are those which were transferred by Dr. Meere to Dr. Davies.

Mrs. Davies must therefore be consulted before any change of tenure is possible.

Nothing further has been heard about leasing the land on which the hydropathic establishment stands to the Chinese for a hospital, but it has been pointed out to me that the suggestion, as printed in the report, is incorrect. I understand now that the idea was for the Chinese to erect a ward of their own with operating theatre attached, but to be run under the supervision of the General Hospital.

The Infectious Ward is quite separate from the General Hospital and is situated at Aizawa, a little beyond the Gardeners' Association. Fortunately for the community it has not been much in requisition, but has nevertheless to be kept in an efficient state in case of emergency. The ward has been in charge of Dr. Wheeler who kindly offered his services in the case of any charity patients being admitted.

I am indebted to Mr. Kilby for a suggestion in reference to this ward. He thinks it might be possible to arrange with the Japanese authorities to take it over and run it themselves, giving the right of admission to European patients. By this means some *yen* 1200 per annum would be saved to the community. It would be a valuable gift to the authorities, as the buildings are in first class order and insured for *yen* 13,700, but it is a question whether it would be advisable to give up our right, in order to merely save the yearly outlay.

A few days since the committee received a letter from Mrs. Marshall Martin, saying that a friend of hers, travelling in Japan, had made an offer of *yen* 3,000 for the equipment of a new operating theatre subject to the following conditions.

The Foreign Community to provide sufficient funds by the 10th August to build the theatre, estimated to cost *yen* 2,000. The theatre and equipment to be in charge of one competent surgeon to be appointed by the Hospital Committee, said surgeon to have entire charge of operating room, and equipment, but any recognised surgeon having a patient in the hospital to be allowed the use of same. On receiving this letter I went round to a few friends with the object of getting the necessary funds guaranteed by the date mentioned, but found that this condition: putting the building and equip-

ment under the sole charge of one surgeon was a fatal bar to support.

I then approached the would-be donor and tried to induce him to change this one condition, but this he is unwilling to do, and so the original offer stands.

After consultation with Dr. Munro, I find that the building will cost about *yen* 3,000.

Now, ladies, and gentlemen, you have the full facts, and I should like to hear an expression of opinion on the subject. The offer is a generous one, and it seems a pity that the opportunity should be lost. A new operating theatre properly equipped would be a fresh addition to the hospital, and would help to draw patients having to undergo operations, who might go elsewhere if we did not improve on our present theatre. Subscriptions for this object should be quite separate from the general fund. The easiest way to raise the money would be, for a certain number of people to guarantee the amount and then collect subscriptions, paying pro-rata any sum short subscribed, but I wish specially to impress on would-be subscribers to the general fund, that no portion of this, can be set aside toward the *yen* 3,000 required. It must be kept entirely apart and a separate list opened. In the report you will see that the Committee say, the Hospital may revert to the community. I think from opinions freely expressed, now that we have the chance of getting the working into the hands of the community, it will not again be anxious to make a fresh lease with anyone. Its past experience in that direction has been most unsatisfactory, so I hope and trust you will support a proposal to run the hospital as a nursing home for at least 3 years, the framing of rules and all details to be left to the incoming Committee. The reason why I mention 3 years is, because in making arrangements with an European nursing staff, it is the shortest term that a nurse will make any engagement for, and as, if our proposal meets with your acceptance, we shall have to make an agreement with Mrs. Davies to act as Superintendent, besides getting out a nurse from England, we must feel sure that the community is willing to lend its full support. It is very essential that we obtain the services of a certified European nurse to help the Matron. The Japanese nurses are good and attentive, still, the nursing staff cannot be considered efficient till one more European is added. The present system of nursing gives the same attention to all classes of patients, whether they be charity or 1st class, but in order to keep this up the matron must have a thoroughly reliable nurse under her. It must be remembered that a hospital or nursing home has become an absolute necessity to Yokohama. Our present hospital is open to all nationalities and is largely availed of by the various shipping companies, most of whom have always subscribed liberally, and I feel sure they will continue to do so, and I hope they may see fit to increase their subscriptions, more especially when it is known that patient, from the steamers are mostly 3rd class who although helping to keep up the hospital do not cover the necessary expenditure. The charity patients are of course a very heavy charge on the funds. There seems to be an idea in Yokohama that the present hospital is too large for the requirements of the place. Now, ladies and gentlemen, the present hospital is not too large; in certain ways it is not large enough. There is accommodation for only five 1st class patients, six second, and about twenty 3rd class and charity patients. There is an insane ward, isolation ward, pharmacy and operating theatre, besides nurses' rooms, mortuary, boiler and series of pipes for keeping the wards at an even temperature during the winter months and the place is lit throughout by electricity. The present site is an almost ideal one, very central, close to all the other hospitals and most convenient for the doctors. From various notes in the daily papers one would be led to suppose that the Hospital Committee wished to run counter to the general body of subscribers. This, ladies and gentlemen, is not the case. In the report they have placed before you their ideas and recommendations, and having given much time and attention to the subject, feel that they are better able to know what is required, and advise

with a greater knowledge than anyone who takes up the question on the spur of the moment. The Committee's task has been a most difficult one, and it should be remembered that up till the present time, the difficulty has been to get anyone to take an interest in the institution. I see by the papers that there is a doctor who is anxious to take over the hospital, presumably on lease. Who he is I do not know, but I sincerely hope and trust that you will not entertain any such proposition. Our previous experience has been that if the hospital did not pay, the charity and 3rd class patients were neglected, and I maintain, ladies and gentlemen, that those are the patients who should receive the same good care and nursing, as the 1st and 2nd class, who are able if necessary to obtain luxuries. It is not necessary to have a resident physician. We have good doctors in Yokohama who I am sure will not refuse to attend the 3rd class and charity patients, simply because we can only afford to allow them a small monthly fee. If the hospital is to be run as a commercial speculation, it will fail as a hospital, and I have no hesitation in saying that the community will have a repetition of previous experiences. It is impossible to estimate the sum per annum required to run the hospital on the lines proposed in the report, as there are no statistics to work on. A great deal will of course depend on the number of patients admitted. Years ago it was found difficult to pay the expenses of the hospital, which was the cause of its being leased, but since then, the Community has largely increased and is better able to subscribe, as was shown a short time since, when over *yen* 20,000 was collected for a Japanese Famine Fund. To run the hospital as a 1st class hospital is run in Europe or America is out of the question at present, but to run it more on the lines of a nursing home, (which is really more adapted to the wants of the community) is quite feasible, and I feel sure that the money will be forthcoming for this object, if you will only give the scheme your undivided support.—(Applause.)

Since writing these notes, added the Chairman, I received a letter last night which I will read to you:—

THE GENERAL HOSPITAL.

Yokohama, July 23rd, 1903.

TO THE CONSTITUENCY OF THE GENERAL HOSPITAL.

It having come to my notice that you are to convene on the 24th inst. for the purpose of considering plans for the better management of your hospital, and being informed that there is at present no house surgeon, or resident physician, in said hospital, and presuming that you will certainly make provision for such at your coming meeting, I beg to offer my services as such.

Having had some thirteen years experience in hospital work I am thoroughly convinced that no hospital can be successfully managed without a house surgeon.

Being almost an entire stranger in your midst it is with considerable reluctance that I offer my services or make application for such a position, but I believe I have in my possession sufficient evidence of my standing and professional ability. For seven consecutive years I was superintendent of the largest hospital in Cape Colony, but on account of the late war and other good and sufficient reasons I was obliged to disconnect. Just previous to my coming in your midst, I was superintendent of the Los Angeles (California) Sanitarium, but on account of the ill-health of my wife I was obliged to quit an otherwise desirable position.

I beg to submit the following proposition for your kind consideration:

Providing satisfactory arrangements can be made with Mrs. Davis, the matron, concerning the property, and the goodwill, etc., I am prepared to take up the work on similar lines to that undertaken by Drs. Davis and Meere. I am aware that matters are most extraordinarily complicated, and it may be most difficult to make satisfactory negotiations.

Should the committee not see its way clear to continue the hospital on the plans which I have suggested, and desire to have it conducted as a Nursing Home only, I would be pleased to offer my services gratis four hours each day, i.e. to charity and 3rd class patients. Those hours would preferably be 8 to 10 a.m., and 5 to 7 p.m.

Before closing, allow me to state that I am thoroughly convinced that the committee, (or some person or persons) are to be congratulated on having obtained the able assistance of Mrs. Davis, and

should I be favoured with a position in the hospital I would be pleased to retain her services.

Most Respectfully Yours,

R. SELDEN ANTHONY, B.S., M.D.

The CHAIRMAN intimated that the Committee had considered and decided that non-subscribers could not vote for the passing of the accounts, and of the report and the election of a Committee.

On the motion of Mr. Williamson Jones seconded by Mr. Stedman the accounts were adopted.

In reply to Rev. W. P. G. Field,

The CHAIRMAN said his remarks just made with reference to the transfer to Mrs. Davies were to be taken in conjunction with the statement on the same subject in the report.

In reply to Mr. Thorn,

The CHAIRMAN said that though the ladies of the Nursing Fund indirectly subscribed to the hospital they could not be allowed to vote.

Mr. THORN in that case did not see what the ladies were there for.

The CHAIRMAN said if they wished to continue and elect a Chairman they could do so.

Mr. THORN said from all he had seen and heard that the main object of their being there was to have a voice in the election of a Committee.

The CHAIRMAN said it was unfortunate that he was not approached on the subject.

Mr. A. M. KNAPP pointed out that it been intimated that "questions of detail, affecting the right to vote, etc., will be settled at the meeting." This had been published ostensibly by the Committee and they not contradicted it.

The CHAIRMAN said he was responsible for that, but he did not remember saying that the question of voting would be settled at the meeting.

Mr. E. FLINT KILBY, who said he came there as an outsider and not as representing his firm, expressed the opinion that the meeting was a meeting of subscribers and that outsiders had not the right to vote. If they had there might be complications, such as that which would have been involved by the election of a Committee (which included his name) for he considered it absolutely impossible for any new Committee to take the work over without the three gentlemen who now formed the committee.—(Applause.)

Mr. KNAPP declared that the meeting was on an illogical basis. He suggested that a special committee should be appointed to take into consideration all the affairs of the Hospital with reference to reorganization. He suggested it should include the names of the present Committee, the medical men, and the ladies who had done so much for the hospital.

Mr. H. G. PIGOTT asked whether the hospital belonged to the community or to the subscribers.

The CHAIRMAN said to the community, but in reckoning subscribers they must have a limit to the number of years they would go back.

Mr. THORN did not think it was a square deal that those who had subscribed for a matron should have to sit there like a lot of sticks.

After some discussion, Mr. Kilby proposed that a committee of the present hospital committee, with three added, and if the meeting wished three ladies, who he thought would certainly be of assistance, be formed to go into the whole matter and call another meeting. He thought the hospital should certainly not be run as a commercial speculation and he also thought all patients should be of one class. He spoke highly of Mrs. Davies' services. Finally, after some discussion, he expressed the view that the present meeting should be adjourned for the report of the special committee and that the present committee should continue to serve.

The CHAIRMAN said the present Committee were quite prepared to resign, though they said in the report that they would be willing to serve again.

Dr. MUNRO thought the Hospital Committee should continue their services and that it would be a great loss to the community to be deprived of them. He urged, however, that medical men should be eligible for election to the committee. He expressed his pleasure that the community had at last recognized its responsibilities in connection with the hospital. He thought it would be a mistake to allow the offer that had been mentioned as to an operating

theatre to slip through their grasp, because it would cost the community not more than *yen* 3,000 to fulfil the conditions of that offer. He concluded by eulogising Mr. James' work in connection with the hospital.

The CHAIRMAN, responding, said the Committee had done their best to put the hospital on a firmer basis but they did not seem to have the true support of the community. For that reason they did not propose to serve any longer.

On the motion of Mr. Dodds, seconded by Mr. Reiffinger, Mr. Kilby was appointed one of the Special Committee. On the motion of the Chairman seconded by Mr. D. Marshall the name of Mr. Surth was adopted, and Mr. Knapp's name was added on the motion of Mr. Williamson Jones, seconded by Dr. Munro.

Mr. KILBY's motion as finally put read as follows: "That a special committee consisting of the General Hospital Committee and three others, other than medical men, be appointed to report on a scheme for carrying on the hospital and report to a meeting of the community who will vote on it." This was seconded by Mr. Dodds.

Dr. MUNRO proposed that medical men should be eligible for the Committee and Mr. Pigott seconded.

Mr. KILBY thought it would be very invidious to have a medical man on the committee.

Dr. MUNRO did not see why the knowledge of the medical men should not be placed at the disposal of the community.

The amendment was carried.

On the motion of Mr. Pigott seconded by Mr. Mueller, Dr. Munro was elected to the committee. Mr. MARSHALL thought before the next meeting some estimate should be prepared of the cost of running the hospital.

The CHAIRMAN said the next meeting could not be fixed now and it was pointed out that arrangements must be carried out before August 10th with regard to the offer that had been made.

On the motion of Mr. Williamson Jones cordial thanks were voted to the Chairman and his colleagues, and, Mr. James briefly replying, the proceedings closed.

GRAND HOTEL CO., LD.

The annual general meeting of the Grand Hotel Company, Ltd., was held on Monday afternoon. Dr. Hall, chairman of the board, presided, and there was a very small attendance.

The Secretary read the notice of meeting.

The CHAIRMAN said that as the report and accounts for the past year had been in the shareholders' hands for some days he would take them as read. They exhibited a satisfactory state of affairs which he had no doubt was fully appreciated. He had nothing to add to what was set forth in the report, but he would be glad to hear any remarks or answer any questions.

There being no questions nor remarks, the Chairman moved that the report and accounts be adopted.

Mr. KNAPP seconded. The motion was adopted.

The CHAIRMAN said this was all the business of the meeting, which then terminated.

YACHTING.

Yachting was not a particularly enjoyable sport on Saturday, though a fine southerly breeze blew the boats over their respective courses in good time. But rain again fell during the afternoon and spoiled much of the fun.

Two 39-raters, *Mary* and *Golden Hind*, raced across the bay to Bandzuhara and back for the *Maid Marion* Cup. The former took the lead and kept it all over, the breeze being hardly strong enough for the yawl. *Mary* arrived home at 4h. 37m. 10s. and *Golden Hind* at 4h. 45m. 50s., but her club allowance made the latter's time work out at 4h. 39m. 05s.

The cruising class had a race to Nagahama for prizes presented by the club on arbitrary handicap. *Spray* got to the Nagahama buoy first at 3h. 51m. 30s., *Dainyo* next at 3h. 55m. 35s., *Asagao*

third at 3h. 57m. On the way back to the Lightship *Dainyo* succeeded in cutting down *Spray's* lead to one minute and forty-five seconds, increasing correspondingly the gap between herself and *Asagao*. *Surprise*, however, won the race on handicap, the corrected times being:—

<i>Spray</i>	h.m.s.
<i>Wanderer</i>	5.17.05
<i>Dainyo</i>	5.29.45
<i>Surprise</i>	5.14.30
<i>Asagao</i>	5.03.05
	5.11.50

Dainyo protested against *Surprise* on the ground that she crossed the starting line before gunfire.

For a prize presented by the Honorary Secretary and a second by the club the 21 raters went round the Lightship and twice round the Mandarin Bluff mark. This was a good race, *Edna* and *Winsome* having a close tussle till just close to the mark on the first round, but the former got through her opponent's weather and passed the mark first. She maintained her advantage throughout the race till caught on the very line by *Vixen*, which had come away into second place and did the trick in beating up the harbour. *Yugao*, however, gets first prize and *Chocho* second, but two record points go on club time to *Vixen* and one to *Edna*. The following are the corrected arbitrary times:—

<i>Sunbeam</i>	h.m.s.
<i>Winsome</i>	3.37.20
<i>Edna</i>	3.35.10
<i>Sella</i>	3.34.32
<i>Chocho</i>	3.33.50
<i>Yugao</i>	3.33.10
<i>Vixen</i>	3.31.25
<i>Daisy May</i>	3.34.25
	3.33.40

The "Larks" also had a race resulting in victory for No. 10 which in addition to the Honorary Secretary's prize also captured two record points, No. 4 being second and gaining one record point, No. 11 third. The times were:—

	h.m.s.
1 (Thompson)	4.43.50
2 (Manley)	4.34.35
4 (Mason)	4.28.25
6 (Poole)	4.36.25
8 (Russell and Allcock)	4.35.15
9 (Kingdon)	4.37.50
10 (Watt and Drummond)	4.25.35
11 (Abbey)	4.28.58
12 (Sander)	4.32.20
14 (Eyton)	4.42.20

NEWS OF THE WEEK.

Prince Arisugawa proceeded on July 24th to Ikao hot spring.

A case of suspected cholera was reported on July 23rd at Tokyo.

The Italian cruiser *Lombardia* arrived on July 29th at Nagasaki to undergo repairs.

A case of cholera was reported on July 24th at Ehime, and another on the following day at Tsuruga.

The U.S. transport *Dix*, which has been lying at Yokohama, entered Uruga on July 27th for repairs.

A case of cholera was reported on July 27th at Echi district, Iyo province. The same day another was reported at Tokyo.

Baron Yamamoto, Minister for the Navy, who recently returned from Kobe, proceeded to the Palace on July 27th to have audience of the Emperor.

The steamer *Kubo Maru* has been chartered by the Department of the Navy. She will proceed from Nagasaki, where she is now taking in coal, to Yokosuka.

The British sailing vessel *Omega* sustained damage to spars and rigging on July 23rd during the voyage to Shanghai, and put in to Nagasaki to repair the defects.

Tokyo papers report that Mr. K. Ishiwata, living at Hongo, Tokyo, has invented an artificial

grinding stone, which consists of asphalt, wood-wax, *kiri* oil, and emery.

It is said by the *Mainichi* that Counts Inouye and Kabayama will be appointed members of the Privy Council.

The Russian volunteer steamer *Vladimir* arrived at Nagasaki on July 29th. After taking coal there she will leave for Vladivostok.

The honorable decree of *Hakase* (doctor) was conferred on Mr. Kanii and five other learned men on July 29th by the Minister of Education.

The name of Lord Lytton is mentioned as the probable successor to Lord Tennyson as Governor-General of the Australian Commonwealth.

A telegram from Sapporo states that the trial of a German who is alleged to have assaulted a Japanese the other day was begun in the local court on July 28th.

Princesses Tsune and Yasu proceeded on July 29th to the detached palace at Hakone. Princes Michi and Atsu left for the same place on the following day.

Tokyo papers state that General Kuropatkin, who left Port Arthur on July 16th, is expected to arrive at Moscow on August 1st and at St. Petersburg the following day.

Mr. Komuki, Chief Secretary of the Privy Council, has tendered his resignation. Tokyo papers state that Mr. K. Tsutsuki was appointed to the vacancy on July 25th.

The *Jiji* states that Mr. Kishimoto has purchased a steamer of 3,000 gross tons from a British firm at Kobe. The ship is now on her way to Kobe. She will be run between Japan and China.

A Tientsin correspondent under date of July 28th to the *Niroku*, states that bandits are raging in Huai-an, Chili. Viceroy Yuan has despatched 500 soldiers to the scene to put down the riot.

The preliminary trial of Mr. Kawashima, secretary of Chiba Prefecture, who was suspected in connexion with the text-book affair, concluded on July 24th and he was committed for trial.

Local theatre-goers will hear with much regret the news that Miss Janet Waldorf, who with her company passed through Yokohama recently, died of pneumonia in New York on the 10th ult.

Part of the ceiling of the room of the 1st section, Kanagawa Kencho, fell down at 1 p.m. on July 22nd. Mr. Sumikura, one of the officials, who was on duty, sustained slight injury on the head.

A case of dysentery was reported on July 25th on board the steamer *Kasuga Maru*, which arrived here on the 19th from Melbourne. The ships was disinfected by the harbour police. The patient is one of the crew.

N. Horibe, president, and T. Matsuzaki, manager of the 8th Bank, Kumamoto, who are charged with fraud were sentenced on July 23rd in the local Court to two years' imprisonment, with hard labour and a fine of *yen* 20.

A telegram from Matsuyama states that the steamer *Toyo Maru* sank on July 23rd off Hakata, Echi district, Iyo province. The *Asahi* states that she stranded before sinking. The cargo and passengers were saved.

The Minister for Education, on July 28th summoned the high officials of the Department and held a secret conference when, it is reported by the *Asahi*, the Minister declared his decision to abolish local educational inspectors.

The receipts of the Nippon Railway Company for the half-year ending June 30th, 1903, are reported by Tokyo papers to be *yen* 5,115,106.38. Of this *yen* 2,224,500.51 were from passenger fares.

On July 24th, an educational official connected with the text book affair was sentenced in the

Tokyo District Court to 4½ months imprisonment and a fine of yen 15. The bribe, yen 1,730, which he had received, was ordered to be confiscated.

Baron Shibusawa, Chairman, and Mr. Okura, Vice-Chairman of the Tokyo Chamber of Commerce, paid a visit to the Ministers of State on July 27th, when they made a statement with reference to the protective policy which had been decided upon by the Chamber.

Owing to the heavy rains, the section between Kikitsu and Okusa of the Kyushu Railway was damaged on July 23rd, and traffic was suspended. Repairs were to be completed the following day. At Nagoya, all the rivers overflowed their banks and many hundred houses were inundated.

Y. Abe, chief accountant of the Meiji Life Insurance Company, was arrested on July 27th on a charge of having embezzled yen 15,000 belonging to the office, since 1898. It is alleged by the *Yorodzu* that he lost about yen 15,000 on rice speculation and spent the remainder in dissipation.

Barons Sone, Kodama and Kiyoura, Ministers of State, held a conference on July 23rd in the official dwelling of the Premier to discuss the budget for the following year. The Premier was absent at the time on a visit to Marquis Ito, President of the Privy Council, and Marquis Yamagata.

We are informed by Mr. K. Kawai, Assistant Superintendent, that Mr. Narita, Superintendent of the Foreign Mails Department in Yokohama, has resigned of his own free will, and Mr. Aonuma, who holds the same post in the Post Office at Kobe, has been appointed to succeed him.

Eighteen lighters towed by two steam launches from Osaka experienced a gale on July 24th off Kobe. The tow ropes parted and though eleven took refuge at Nishinomiya seven others were much tossed about. Thirty bales of cotton yarn, about five hundred bales cotton, and sundry other cargo was wetted.

It is stated by the Kagacho police that Messrs. Sale and Co. have missed from their godown, No. 167, 50 coils wire (valued at yen 300), 10 packages Mangia metal (yen 200), 2 pieces silk (yen 40 and cash yen 280). Since June 30th a Japanese godown man named T. Ito employed by the firm is alleged to be missing.

An accident occurred to the locomotive of a train due from Kodzu at Shimbashi at 8.43 a.m. on July 23rd. The trouble happened between Totsuka and Hodogaya. Another engine was at once sent from Yokohama and took the place of the damaged locomotive. The train arrived in Tokyo about an hour late.

With regard to the case of the Russo-Chinese Bank versus its former Chinese compradore, Yuen Sih Sung, claiming yen 170,000 and the counterclaim of yen 630,000, the *Mainichi* states that the ground of the latter is that the plaintiff has arbitrarily sold houses at Shanghai belonging to the compradore.

The *Yokohama Shingo* states that the steamer *Benvenue*, which Mr. K. Yamashita, coal merchant, Yokohama, has purchased from Messrs. Cornes and Co., has been re-named the *Kiso Maru*. To celebrate the occasion the new owner entertained over seventy foreign and Japanese gentlemen at the Chitose restaurant, Yokohama, on July 25th.

The appeal of an educational official who appealed against a decision rendered in the lower court, was heard on July 28th and the judgment against him was dismissed on the ground that the evidence was insufficient. In connexion with the textbook affair he had been sentenced to 1½ months' imprisonment with hard labour and a fine of yen 5, and the bribe yen 200, which he received, was ordered to be confiscated.

The *Asahi's* Tientsin correspondent states that the Japanese warships *Tokachiho* and *Chiyoda* arrived at Taku on July 24th. Rear-Admiral

Uriu arrived the following day for an interview with Admiral Senba, commander-in-chief of the squadron. The Admirals then paid a visit on Viceroy Yuan, Governor-General. On the evening of the same day the Admirals and their personal staff were entertained at the Japanese consulate.

Marquis Ito, President of the Privy Council, say Tokyo papers, entertained at 7 p.m. on July 27th at his official residence, three of the *genro* statesmen, Marquis Yamagata and Counts Inouye and Matsukata, and Count Katsura, the Premier, Barons Yamamoto, Sone and Komura and Lieut-General Terachi, Ministers of State. After the repast a conference took place which lasted for several hours. It is stated that Barons Kodama and Kiyoura were absent in consequence of previous engagements.

Mrs. A. M. Drennan, twenty years a Missionary of the C. P. Mission in this Empire, died at her former home, Pilot Grove, Mo. U.S.A., June 28th, 1903. She had been in feeble health for some time and returned to the home land on furlough last October. She stopped for some time at Pueblo, Colo., last May. She started to attend the Woman's Missionary Convention, but was suddenly taken ill at her old home and died on the above named date. Together with her mission a large circle of friends and acquaintances, both native and foreign will mourn their loss, in her death.

We regret to state, says the *N.-C. Daily News* of July 22nd, that Mr. Hector Sampson, of No. 3, Peitaiho Lane, was found dead at his residence yesterday evening, under circumstances which undoubtedly point to suicide. About seven o'clock last evening his boy went to call him, thinking that he was asleep, but found his master lying dead on the bed, with an old Winchester rifle grasped in his hands and the head almost blown to pieces. The trigger of the rifle was somewhat rusty, and there was a corresponding rust mark on one of deceased's toes, so that it is thought that he discharged the trigger with his toe. A gentleman living in the house opposite says he heard a noise like the report of a firearm some time between six o'clock and half-past. Deceased leaves a widow with whom the deepest sympathy is felt. For some months past he had complained of severe pains in the back of the head.

The Shire Line steamer *Pembroke*, which has been in the Cosmopolitan Dock for some time, has had her No. 2 tank and hold tightened by means of soft patches and cement in order to float her out of dry dock, and came out of dock on July 19th. She is now, said the *N.-C. Daily News* of July 20th, lying alongside the Associated Wharves, Pootung, as in the present condition she is unable to double anchor (as required) in mid stream. It is now under consideration what further steps are to be taken to enable her to proceed to Hongkong, where she is to undergo repairs at the hands of the Hongkong and Whampoa Dock Company. It is not yet decided whether it will be necessary to fit her with a false floor or dash-plate bulk-heads. When patched up, she will proceed to Hongkong with a coast pilot to assist the master, Captain Liddle. The temporary repairs are being carried out under the entire direction of Mr. Mumford, surveyor to Lloyd's agents, Hongkong, who came up to Shanghai for this purpose.

AMERICAN MATTERS.

It is estimated that the output of whiskey in Kentucky this season will be 25,000,000 gallons. Almost no old whiskeys are offering, and the trade is most conservative. There now seems to be comparatively little danger of overproduction, as many of the distilleries have already closed down, and the remainder will during the next few weeks.

Good parents and really patriotic citizens, says *American Medicine*, have long dreaded the annual epidemic of deaths, accidents, tetanus, increased illness, etc., which has invariably followed a noisy Fourth of July. The more

noise the more death and injury, but the less patriotism, is a pretty safe rule. The "Chicago idea" is said to be to celebrate noiselessly by means of good literature, speeches, etc., but Minneapolis tries to abolish the noise-making and replace it by innocent games and athletic sports. These methods are surely more hygienic, and will cheat the doctors out of their yearly crop of emergency cases and accidents, but from the "antis" we will scarcely get credit for such worthy or unworthy motives.

To a conspicuous degree the University of Chicago has branched out into a publishing house of periodical literature devoted to educational matter and to scientific and philosophical research. It now announces a new quarterly, with the title *Modern Philology*, which is to make modern languages and literature its field. The periodicals issued from this press already include *The Biblical World*, *The School Review*, *The Botanical Gazette*, *The Astrophysical Journal*, *The American Journal of Sociology*, *The Journal of Geology*, *The Journal of Political Economy*, *The American Journal of Theology*, and *The American Journal of Semitic Languages and Literatures*.

Mr. Ernest Schmidt, a Frenchman with a German name and the biggest man in Brooklyn, was buried on July 2 in a coffin made especially for him. Schmidt weighed 520 pounds and measured a fraction over six feet two inches in height. He died in the Home for Aged and Infirm of fatty degeneration of the heart. Schmidt's shoes cost him \$12 a pair. Like his hats, they were so big he had to have them made to order. This was true, in fact, of everything that he wore and ate. Even his bathtub was manufactured especially for him. He was a silk expert by occupation. Once he fell off a street car, landed flat on his back and couldn't get up. It required the efforts of two muscular policemen and several bystanders to get him on his feet.

An appraisement just completed of the estate of the late Dean Eugene Augustus Hoffman of the General Theological Seminary of New York places its value at \$6,226,000. The assets are mainly real estate, but there are also some very desirable securities. The entire personal estate amounted to \$2,663,442. In real estate, Dean Hoffman owned several Fifth-avenue parcels, valued at \$1,000,000. His entire real estate holdings were worth about \$2,750,000. His will leaves \$100,000 to the General Theological Seminary, \$50,000 each to the Domestic and Foreign Missionary Society of the Protestant Episcopal Church and the New York Historical Society, and \$25,000 each to the New York Protestant Episcopal School and to the fund for the relief of widows and orphans of deceased clergy. The bulk of the fortune is given to his widow and children, the former getting \$75,000 a year for life.

The Barr colony in the Saskatchewan valley has been abandoned owing to discord and dissatisfaction among the thousand English immigrants composing it. These settlers were induced to join the colony by a patriotic English clergyman, Rev. T. M. Barr, who made all the arrangements and personally conducted the party. The Dominion Government set aside a special tract of land in Saskatchewan Territory for the benefit of the settlers. Troubles began as soon as the party reached Canada, and only 300 out of the 1,000 settled on the lands allotted to them. The remainder preferred to locate elsewhere. Now the projector of the enterprise has renounced all connection with it, refunding all sums paid by the immigrants when they joined the movement. The failure of the colony is said to have been due to shortage of supplies at the settlement, but the probability is that inexperience and inability to adapt themselves to the new life in the wilderness were chiefly responsible for the failure.

"A great deal is said about exports of gold when they are made; but," remark the *Engineering and Mining Journal*, "very few people stop to reflect that they are really much less in

amount than the metal we are adding to our stock, which is already the largest owned by any nation in the world. In the recent gold export period some \$15,000,000 was sent to Europe. This seems a considerable amount, but our own production is about \$6,500,000 a month, and we are receiving considerable amounts from the Canadian Yukon. The Treasury Department's estimate of the available gold in the country on June 1 puts the total at \$1,261,445,124. For various reasons we are inclined to think this an over-estimate, but the fact remains that the United States has over \$1,250,000 in gold. No other country in the world can reach this figure. It is true that comparatively little of it is in circulation, in the east, at any rate, but it serves as the solid basis for government and bank issues, and is, therefore, really in the service of trade."

July 1st witnessed the transfer of the various bureaux which fall under the control of the new Department of Commerce and Labour. As the result of the changes made the personnel of the new department comprises 1,289 persons in Washington and 8,836 throughout the rest of the country, and it has appropriations to its credit for the current fiscal year amounting to \$9,796,847. Secretary Cortelyou, says *Bradstreet*, seems to have taken hold of the work with a realizing sense of the important part which the department may be made to play in the administration of governmental affairs. In a brief address to the attendant chiefs of the bureaux the other day he said that no other department has a wider field if the just expectations of the framers of the legislation creating the department are realized. No other department, he said, will have closer relations with the people or greater opportunities for effective work. This view of the Secretary is entertained by some at least of his subordinates, as, for example, the new Director of the Census Bureau, who said that Mr. Cortelyou had before him, perhaps, the greatest opportunity that ever fell to the lot of a cabinet officer in time of peace. Much, of course, must depend upon the enthusiasm, the intelligence and the organizing capacity brought to the work of the new department; but its first chief will, as he should, hear none but messages of hearty goodwill at the outset of his important work.

When Alaska was ceded to the United States by Russia in 1867 for \$7,200,000, he would have been deemed a rash prophet who would have predicted that within forty years the value of the salmon exported annually from Alaska would exceed the entire purchase-money paid for the possession. And yet the figures of the Federal Bureau of Statistics already show an annual shipment of canned salmon from Alaska valued at upward of \$8,401,124. Says the *Philadelphia Public Ledger*: "The total value of the Alaskan shipments to the United States during ten months of the current fiscal year was \$10,701,060, exclusive of gold exports valued at \$4,369,496. During the interval, merchandise valued at \$6,831,070 has been imported into Alaska from the United States, and it is estimated that the value of the American shipments to Alaska during the fiscal year will be between \$10,000,000 and \$12,000,000. The total trade interchange between the possession and the United States for the year will exceed \$20,000,000 in value. The Alaskan trade with Canada and other countries is also becoming important. It is valued at nearly \$2,000,000 a year at present. . . . The discovery of gold in the Territory in 1887 worked a marvelous transformation, but the prosperity of the region does not rest wholly upon the supply of the yellow metal." During the last week in May, twelve large steamers left Puget Sound for Alaska, carrying three thousand passengers. In addition, a great quantity of machinery was shipped. "What was once ridiculed as territory of no value," observes the *Philadelphia Press*, "will sustain a population of millions, and may yet prove a very important addition in every way to the United States."

CORRESPONDENCE,

A CHILD'S HYMN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In answer to your correspondent from Chusenji regarding a child's religious poem from Manila, I can tell him that I learnt the verses myself when a small child in England at a time when they were well-known in most Nonconformist families. They have remained in my memory though I have forgotten many others. There were, I think, six verses, and the two half verses 4 and 5 of your correspondent's were one, thus—

4. But such a cruel death he died
He was hung up and crucified;
And those kind hands that did such good
They nailed them to a cross of wood:

The next verse from which a line is dropped should be.

5. And so he died, and this is why.
He came to be a man and die.
The Bible says he came from Heaven
That we might have our sins forgiven.

I should have little difficulty, I think, in getting the old hymn book containing the verses, but I am not so sure about the tune, to which they were sung. I was taught the hymn as a recital, though it has some faint association in my memory with a sad, slow and rather droning tune which I might recognise if I heard it. But in those days hymns were less wedded to particular tunes, especially among dissenters.

Yours,

X.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

LONDON EDUCATION BILL.

London, July 24.

The London Education Bill has been read a third time in the House of Commons.

THE FRENCH VISITORS.

Many of the French deputies visited the Houses of Parliament and dined at the House of Commons with the commercial parliamentary committee in company with Mr. A. J. Balfour, Mr. Joseph Chamberlain, and Sir Henry Campbell Bannerman. The speeches dwelt on the growing friendship between the two countries and declared that there was little ground for serious future differences.

The newspapers cordially welcome the sentiments expressed and describe the demonstration as unparalleled in the history of the House of Commons.

THE POPE'S BEQUEST.

The late Pope's will leaves the whole of his property to the Church.

THE KING IN IRELAND.

Over sixty addresses were presented to the King in Dublin.

ANGLO-FRENCH RELATIONS.

Later.

The Lord Mayor gave a state reception at the Mansion House to the French deputation.

ENGLAND, THE COLONIES AND GERMANY.

Lord Cranborne, speaking in the House of Commons, denied that our relations with Germany had been a succession of blunders. He said that the Government desired to be on good terms with everybody, but that it put the Colonies before everybody. Referring to Canada, his Lordship said it was impossible to continue under the conditions complained of.

Mr. Chamberlain repeated the declaration that England could not allow Germany's anti-Colonial discrimination to continue without taking all steps to terminate it.

MR. CHAMBERLAIN'S POLICY.

London, July 24.

Regarding Mr. Chamberlain's fiscal policy, the Duke of Devonshire has declared that

Mr. Chamberlain spoke for himself alone. No member of the Government had yet said a single word to identify himself with that policy.

MANCHURIA'S POSITION.

London, July 25.

Lord Cranborne, Parliamentary Secretary of State for Foreign Affairs, says that the policy of Great Britain in Manchuria was well-known for it was contained in the Anglo-Japanese agreement and in other diplomatic instruments in which the special interests of Japan in Korea were recognized and in which British interests in China were re-asserted. It was, however, indisputable that Russia occupied a rather special position in Manchuria.

THE KING IN IRELAND.

London, July 26.

The King on foot visited the slums of Dublin, and was uproariously acclaimed by the populace.

Their Majesties have visited Maynooth, where they received three Catholic archbishops and twenty bishops. The King fittingly referred to the late Pope.

THE FRENCH DEPUTIES.

The French press is much gratified by the reception of the members of the Chamber of Deputies in England.

AUSTRALIAN DEFENCE.

The Australian Federal Executive has adopted an army organization scheme, providing for a mobile field force capable of entering upon military operations at the shortest notice wherever Australia desires. It will consist of 27,753 men with 84 guns, and also a garrison force, largely of volunteers.

A LABOUR VICTORY.

London, July 27.

Mr. Henderson, the labour candidate, has been elected for Barnard Castle.

THE ROYAL VISIT.

Their Majesties the King and Queen have left Dublin amid exceeding enthusiasm. They will arrive to-day. The King has made a donation of £1,000 to the poor of Dublin. In a farewell message he said they deeply appreciated the loyalty and affection displayed throughout their visit.

INTERMENT OF THE POPE.

The interment of the Pope at St. Peters was attended by the Diplomats and the leaders of Roman Society. The body was escorted by a guard of nobles to the temporary sarcophagus.

THE PAPAL ELECTION.

London, July 28.

It is expected that the Conclave on July 31st will consist of sixty-two Cardinals, making forty-one votes necessary to elect the new Pope. The Cardinals in Rome at present number forty-five.

ANGLO-GERMAN COMMERCIAL RELATIONS.

It is understood that the negotiations as to the future commercial relations of Britain and Germany continue by the exchange of notes between the two Governments.

RAILWAY DISASTER IN SCOTLAND.

Later.

An excursion train crashed into the terminal buffers at St. Enoch's Station, Glasgow; thirteen were killed and twenty injured.

ROYALTIES AT BELFAST.

Their Majesties the King and Queen have arrived at Belfast, where there was a repetition of the enthusiasm displayed at Dublin.

THE "AMERICA" CUP.

London, July 29.

The *Reliance* has been selected to defend the *America* Cup.

THE ALLEGED CONVENTION.

The *Standard* says the text has been published in Berlin of the convention between Russia and Japan alleged to have been signed when General Kuropatkin was in Tokyo.

SOUTH AFRICAN LOAN BILL.

The South African Loan Bill has passed the second reading in the House of Commons.

CONSUL-GENERAL KILLED AT CAIRO.

Mr. Long, American Consul-General at Cairo, while visiting General Wingate at the Hotel Dunbar, fell downstairs and was killed.

REQUIEM MASSES.

Requiem masses for the Pope have been held in Paris, Rome and London in the presence of thronged attendances.

THE KING.

The King embarked at Buncrana and is now cruising on the West Coast of Ireland.

THE LONDON EDUCATION BILL.

London, July 29.

The London Education Bill has been read a second time in the House of Lords.

PLACING THE RESPONSIBILITY.

A Somaliland Blue Book has been issued which contains a despatch from General Manning declaring that Colonel Plunkett's disaster was due to his disobeying Colonel Cobbe's orders. Plunkett paid the penalty of his disobedience with his life.

AUSTRALIA FIRM.

July 30.

The Australian Commonwealth, replying to Mr. Chamberlain, has firmly declined to reconsider its decision regarding the non-employment of lascars in mail steamers. It insists that it is acting for the preservation of the purity of the race and that its object is to encourage the recruiting of British seamen.

(RECEIVED AT THE LEGATION OF FRANCE.)

ADMIRAL BAYLE.

Saigon, July 24.

Admiral Bayle is named commander-in-chief of the Far Eastern squadron.

THE LATE POPE.

No incident marked the course of the ceremonies observed in connexion with the Pope's death. The Conclave will meet again on July 31st.

THE FRENCH DEPUTIES IN LONDON.

Saigon, July 24.

At the banquet given to the French members of Parliament in London, Messrs d'Estournelle, Balfour and Chamberlain spoke of the advantages resulting from an *entente* between England and France. Mr. Chamberlain added that diplomacy and arbitration would suffice to settle all difficulties, that a treaty was not indispensable and that mutual sympathies would aid the work.

THE FAR EASTERN SITUATION.

Saigon, July 26.

The English journals publish somewhat sinister dispatches on the situation in the Far East. They pretend that Russia and Japan are making warlike preparations.

THE LATE POPE.

The lying in state of the body of

the Pope in the Basilica of St. Peters has terminated. Enormous crowds passed the body.

ALARMIST REPORTS.

Later.

The *Daily Mail*, of London, publishes with reserve a dispatch from Tokyo, according to which Japan is making preparations in view of a war with Russia. The squadrons of the two Powers are before Vladivostok, ready to come to blows.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)

STOCKS IN NEW YORK.

New York, July 27.

The Japanese Consul-General in New York telegraphs that although stocks have fallen heavily there is no change in commercial and industrial circles, and business continues good.

THE STRAITS SETTLEMENTS AND CHINESE.

Singapore, July 27.

The Government of the Straits Settlements has announced through the columns of the *Official Gazette* that on and after the 9th instant (?) effect will be given to the embargo upon the landing of Chinese emigrants, as enacted in 1894, coming by sea from or through Amoy.

(FROM THE "JIJI SHIMPO.")

RUSSIAN MOVEMENTS.

London, July 23.

According to the Odessa correspondent of the *Standard*, Russian soldiers numbering 130,000 have been mobilized for immediate despatch to the Amur region by railway.

After the return of General Kuropatkin, a meeting of the Council of Ministers is expected to be held to discuss military affairs.

Eleven Russian torpedo-boats are expected to start from Kronstadt on the 28th to reinforce the Pacific squadron.

The Russian Volunteer steamer *Smolensk* (12,000 tons, 20 knots) has passed Constantinople. Apparently she does not carry any cargo. Her destination is Port Arthur. Five other ships of the Volunteer fleet are yet at Odessa.

FRENCH DEPUTIES IN ENGLAND.

A hundred French deputies who are on a visit to London have been welcomed in various ways. Last night they were entertained at the House of Commons where Mr. A. J. Balfour, the Premier, and Mr. J. Chamberlain, Secretary of State for Colonial Affairs, were present.

VENEZUELA.

London, July 24.

The rebels in Venezuela have attacked the troops of General Rolland at Ciudad Bolivar. After desperate fighting which lasted for 56 hours the latter were defeated.

THE ROYAL VISIT.

Last night the King gave audience to six hundred persons at Dublin whose loyalty was clearly manifested.

THE LATE POPE'S OBSEQUIES.

The obsequies of the late Pope are expected to take place to-morrow night.

KING FERDINAND.

It is rumoured that King Ferdinand of Bulgaria has fled from Sophia in consequence of the discovery of a secret intrigue on his part.

RUSSIA MOVING SUPPLIES.

London, July 25.

The Russian Minister for the Navy has chartered two steamers, the *Moscow* and *Kheson*, to carry military stores to Port Arthur. The former left in June for her destination and the latter is expected to leave Odessa shortly.

RUSSIA'S EXPLANATION.

It has been declared at St. Petersburg that recent military preparations are only precautionary. After commenting on the possibility of war, the *Novoe Vremya* states that the success of Japan is hopeless.

THE SIBERIAN RAILWAY.

London, July 27.

It has been rumoured that passenger traffic on the railway which traverses Manchuria through Vladivostok and Irkutsk is soon to be opened, but is meanwhile postponed.

RAILWAY ACCIDENT.

A terrible railway calamity has occurred at Glas-

gow. Thirteen persons have been killed, and many others injured.

U.S. MILITARY APPOINTMENT.

General Wade of the United States Army has been appointed Commander-in-Chief of the Philippines.

BULGARIA.

Prince Ferdinand of Bulgaria has arrived at Coburg (after having deserted his capital, Sophia).

(FROM THE "ASAHI SHIMBUN.")

THE BAGDAD RAILWAY.

London, July 27.

The construction of the first section of the proposed Bagdad railway has been commenced.

(FROM THE "DEUTSCHE JAPAN POST.")

THE KAISER'S CONDOLENCES.

Berlin, July 25.

Cardinal Oreglia has answered in very friendly terms the telegram of condolence sent by Kaiser Wilhelm on Pope Leo's death.

VESUVIUS.

Vesuvius has made a new eruption in the direction of Pompeii.

THE SILVER COMMISSION.

The Silver Commission has passed a resolution for a uniform money currency throughout China; the Commission desires silver coins with a value regulated by law and a fixed proportion between gold and silver.

The American-Mexican commission are very much satisfied with their reception at Berlin.

MANCHURIA.

The negotiations between the United States and China, regarding the opening of Manchuria, have been successful.

AFFAIRS IN THE FAR EAST.

Berlin, July 28.

A Liffan's telegram from Hongkong, announcing as news that war between Russia and Japan is imminent, is nonsense. The French press and even the English papers write calmly and peacefully. America is satisfied. A Russian declaration concerning Manchuria is expected.

THE BALKANS.

The fresh friction between Serbia and Bulgaria is regarded by the Powers as not dangerous.

THE POPE.

For the new Pope's election France supports openly Cardinal Rampolla, the Secretary of State of Pope Leo, who led the politics of the Vatican in a way amicable to France. Germany observes neutrality as before.

THE KAISER.

Kaiser Wilhelm will return from his trip to Norway on the 12th of August and goes, for the first time, to the Castle Wilhelmshöhe near Cassel.

(FROM THE "N. C. DAILY NEWS.")

RACING NEWS.

London, July 18.

The following is the result of the Eclipse Stakes of 10,000 sovs., run at Sandown on the 17th inst.:-

Mr. J. Gubbins's *Arcturion*, 4 years 1
Mr. R. S. Sievier's *Sceptre*, 4 years 2
Sir J. Miller's *Rock Sand*, 3 years 3

Before the Eclipse Stakes was run, *Arcturion* was purchased by Count Lehndorff for twenty thousand guineas, but is not to be delivered until the end of the racing season.

MORE JUSTICE TO IRELAND.

Ireland has won the Elcho Shield at Bisley. Scotland and England tied for second place.

OPEN DOORS IN MANCHURIA.

It is understood at Washington that the ports to be opened to the trade of the world will be Mukden and Tatungtao.

London, July 17.

It is semi-officially announced at Washington that the Port Arthur conference took an important step in Russia's plans, to arrange the internal administration of Manchuria in such a manner as to allow of the opening of the ports desired by the United States and Japan, without an undue sacrifice of Russian interests.

The *Standard* is sceptical as regards Russian promises about Manchuria, which are entirely conditional on the future evacuation of Manchuria by the Russians.

TIRELESS ENERGY OF THE WAR OFFICE.

Tests are being made with the view of equipping the army with quickfiring. Four experimental batteries are expected to be ready in August.

REVOLUTIONARIES IN PEKING.

Peking, July 19.

Two revolutionaries were arrested here yesterday

and will be very shortly beheaded. More arrests are expected to follow.

THE AMERICA CUP.

London, July 20.

The trials of the new *Shamrock* in American waters have been very successful. Captain Hoff, formerly skipper of a Cup defender, believes that *Shamrock III* will win the Cup.

THE CAMPAIGN IN SOMALILAND.

London, July 21.

Lord Stanley, Financial Secretary to the War Office, assured the House of Commons that the War Office had no intention whatever of undertaking enterprises in Somaliland involving any great expense.

MR. CHAMBERLAIN'S ZOLLVEREIN.

London, July 22.

The Tariff Reform League has been inaugurated in London, the Duke of Sutherland presiding.

There was a crowded gathering of Peers and Members of the House of Commons of both parties. The League intends to start a propaganda throughout the Kingdom.

In a debate in the House of Lords numerous references were made to the possibilities of invasion of the Indian frontier and hence the necessity for increased power of defence.

MORE MONEY FOR THE WAR OFFICE.

London, July 23.

The House of Commons has adopted a resolution proposed by Mr. Brodrick, authorising the expenditure of £5,000,000 on military works, including the provision of huts for the 25,000 men to be kept in South Africa.

London, July 24.

Speaking in the House of Lords, Earl Spencer expressed his belief that while the Duke of Devonshire stood firm, the Cabinet would never adopt Mr. Chamberlain's policy. The position of the Government is simply that there is a case for enquiry.

THE MANCHURIAN QUESTION.

Speaking in the House of Commons, Lord Cranborne said that as regards Manchuria, the Government would be delighted to come to an agreement with Russia, but they were never able to ascertain what Russia wanted.

It was very unsatisfactory that Manchuria was not yet evacuated; Japan was becoming uneasy, and the United States was anxious for a settlement.

The correspondent of the *Standard* at Tientsin wires that since the 15th of July there has been incessant increase and concentration of Russian forces at Port Arthur.

FINANCES OF RUSSIA.

The Russian periodical, *Ostobashdenye*, of Stuttgart, has published the report of the secret sitting of the Russian Imperial Council held in January last, when M. Witte, Russian Minister of Finance, made his statement on the financial situation of the Empire. This document, of which the Russian Government has not disputed the authenticity, throws (says *The Times* in reproducing the report) a flood of light on Russian finances, and shows conclusively at what ruinous cost the Russian policy of expansion has been hitherto pursued, and to what an intolerable strain the financial resources of the country are being subjected.

From M. Witte's estimate, it appears that during the past 10 years the expenditure has risen from 1,000,000,000 roubles to 2,000,000,000 roubles. The year 1900 was characterised by renewed and rapidly increasing deficits to be met by the Treasury, in consequence of railway enterprise. The deficit for 1900 amounted to 2,600,000 roubles, and in 1901 jumped up to 32,900,000 roubles. In 1902 the loss to the Treasury in connection with the exploitation of railways will be found to have reached 45,000,000 roubles, and in 1903 not less than 51,000,000 roubles; to which must be added for the second half of the year a further loss of 9,000,000 roubles arising out of the exploitation of the Eastern Chinese Railway, which is to be thrown open to traffic on July 1. Thus in 1903 the total excess of railway expenditure over receipts will reach the enormous sum of 60,000,000 roubles. For the year 1904 we must double the deficit on the Eastern Chinese Railway, and in 1905, as soon as the Siedletz-Bologoye and Orenburg-Tashkent lines are opened, fresh contributions will have to be made by the Treasury for their maintenance—namely,

8,200,000 roubles for the former and 7,300,000 for the latter, or altogether 15,500,000 roubles. Within two years the deficit on the working of the entire railway system will reach 84,500,000 roubles.

The Minister of Finance was compelled to ascribe this situation mainly to the enforced construction of railways of a political and strategic character during the last 10 or 15 years.

A close scrutiny of the division of State expenditure into ordinary and extraordinary shows a gigantic increase of approximately 42½ per cent.

An enumeration of the heavy sacrifices already required from the people in order to satisfy these enormous demands showed that within the last 15 years taxes on the rents, petroleum, matches, and sugar had been introduced; taxes on alcohol, wine, beer, tobacco, and imported articles of popular consumption such as tea and cotton had been increased; the stamp duty had been increased; the taxation of trade and industry had been reorganised and largely increased; the State monopoly of the sale of alcoholic liquors had raised their cost to the public. These measures had produced 1,500,000,000 roubles during the period under review, but the tax-paying resources of the population had limits which could not be exceeded without detriment to the economic prosperity of the country, with which its internal strength and its international position were bound up. The Council of State, therefore, agreed with M. Witte as to the impossibility of a further increase of taxation to meet the continuous increase of departmental demands.

EXPORTS.

RAW SILK.

There has been a large business during this week, shippers buying freely for both America and Europe. Prices for fine sized Filatures have advanced. Kakedas are also *yen* to above the lowest point, but there is no change in quotations for full sized Filatures and Re-reels. Advances from consuming markets are a trifle better, but do not appear to be such as to warrant the large business done on this market.

SAVE YOUR HAIR

With Shampoos of Cuticura Soap and Light Dressings of Cuticura.

This treatment at once stops falling hair, removes crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates hair follicles, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itches, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, and for all the purposes of the toilet, as well as by millions of women in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves to women and mothers.

COMPLETE TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Australia Depot: R. Towns & Co., Sydney. British Depot: 27-28, Charterhouse St., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CO., Sole Props., Boston, U. S. A.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses. CUTICURA PILLS are alternative, antiseptic, tonic, digestive, and the purest, sweetest, most successful and economical of blood and skin purifiers, humour cures, and tonic-digestives.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, AUGUST 8TH, 1903.

BIRTHS.

At No. 216 Bluff, on the 2nd August, the wife of EDWARD C. DAVIS, of a Daughter.

At No. 2,063, Negishi, on Monday, the 3rd August, the wife of CHARLES V. SALE, of a Son.

At St. Leonards-on-Sea, England, on the 22nd of June, the Wife of K. F. CRAWFORD, of a Daughter.

MARRIAGE.

At His Britannic Majesty's Consulate, Yokohama, GEORGE MASON BOYES, youngest son of the late Captain Frederick Saner Boyes, R.N., to ROSALIE LEONORA KUHN, eldest daughter of the late Maurice Montague Kuhn, of Yokohama.

SUMMARY OF NEWS.

CARDINAL Sarto, Patriarch of Venice, has been elected Pope.

DURING July 243,965 tons of coal was exported from Moji.

BARON YOKOYAMA died on the morning of July 31st from fever.

A MAN apparently about 25 years of age was killed on the railway near Kanagawa on Aug. 2nd.

A THUNDER-STORM raged in Kodama district,

Saitama prefecture, on the night of July 30th. A 1 year's imprisonment with hard labour, and a fine of yen 5 to yen 10.

BARON KODAMA, Minister for Home Affairs, on the morning of July 31st inspected the harbour works at Yokohama.

BARON KOMURA, Minister for Foreign Affairs, was, on August 1st, promoted to the junior grade of the Third Rank.

SATURDAY being the Swiss National Holiday, Swiss residents in Yokohama marked the occasion by hanging out flags.

It is officially reported that General Kuropatkin arrived, a little in advance of his expected date, at St. Petersburg on July 28th.

A CASE of cholera was reported on the night of July 29th at Kanasugi, Tokyo. Another appeared at Okayama on the following day.

MR. F. W. PLAYFAIR, British Consul at Moji, has been transferred to Tamsui, Formosa. He will leave on August 9th for his new post.

SURGEON KOIKE, Director of the Medical Bureau in the Department of War, will shortly leave for China to inspect sanitation in that country.

A TRAIN on the Sanyo Railway was derailed on the morning of Aug. 5th at a point between Shimada and Kudamatsu. Slight damage was caused.

MR. KONDO, President of the Nippon Yusen Kaisha, arrived at Fusan, Korea, on Aug. 4th, by the steamer *Kokura Maru*, en route for Vladivostok.

MR. CHANG I SHIN, Chinese Acting Consul, Yokohama, has resigned, and Mr. Chean Lien, First Secretary of the Legation, Tokyo, has been appointed to the vacancy.

THE preliminary examination of G. Nakao, who stole several articles from the Osaka Exhibition, was concluded before Judge Kojima in the Osaka District Court on July 30th, and he was committed for trial.

A JINRIKISHA coolie named S. Fujiwara (33) who during the strike in Osaka the other day attempted to set fire to a steam launch in the river, was sentenced on July 30th in the District Court to 6 years' minor confinement.

Two foreigners who attempted to get away to San Francisco as stowaways were found on Aug. 1st, by the harbour police, on board the steamer *America Maru*. One of them is a German and the other British.

Y. HAYASHI, clerk of the village office of Kumagai, Okayama Prefecture, and four others were arrested on July 30th on a charge of having broken open an iron safe and stolen yen 1,700 belonging to the office.

MR. AKIYAMA (51) an official of the Sanitary Bureau, Department of Home Affairs, committed suicide by hanging himself on the night of July 29th. Temporary insanity is reported to be the cause of the tragedy.

THE ex-Sultan Abdullah of Perak has been accorded permission by the Secretary of State to return to Perak, from which he was exiled some 28 years ago in connection with the assassination of Mr. J. W. Birch, the first British Resident.

K. HASHIMOTO and two other police officers of the Yoshiwara station, Shidzuoka Prefecture, who were charged with having tortured a woman and so caused her death, were, sentenced in the District Court on July 30th to from 6 months to

The general meeting of the shareholders of the Yokohama Sanshi Bank was held on July 30th, when losses amounting to yen 90,952 during the first half year were declared. The shareholders decided at the meeting to remove the bank to Kamakura.

TOKYO papers state that Mr. Kishimoto, of Osaka, has purchased the steamer *Benlarig* (1,453 tons) whose Yokohama agents are Messrs. Cornes & Co. It will be remembered that the sister ship, *Benvenue*, was sold to Mr. K. Yamamoto, a Yokohama coal merchant, and re-named the *Kiso Maru*.

THE Authorities of the Yokosuka Naval Station issued a notification that a balloon 18 feet in height and 12 feet in diameter used for testing wireless telegraphy at Akasa district, Totomi province, was lost on July 29th in a strong wind. The finder is requested to send it to the office after liberating the hydragon gas.

ACCORDING to the *Official Gazette*, the number of prisoners throughout the Empire in the end of June was 53,779. Of these, there were 50,530 males and 3,249 females. There were under trial 7,143. Prisoners in the Chichijima jail are not included in the figures as the information was not at hand.

THE amended contract between the Osaka Municipality and the Gas Company, which was submitted by a committee, passed the third reading at the Municipal Assembly and was adopted. The *Asahi* states that the complications which had existed since last year are now resolved.

A TELEGRAM from Nagano states that over two hundred villagers of Kamishina, Ogata district, on Aug. 5th attacked the dwelling of the ex-headman of the village. They are reported to have dealt rudely with the official and his family. Some trouble about a forest is said to be the cause.

A COOLIE named S. Ichikawa (38), living at Kotobukicho, Yokohama, who murdered, on July 21st, another named J. Ichida (29) living at Ishikawa-machi, was discharged on July 30th after preliminary trial in the Yokohama District Court in accordance with Art. 78 of the Penal Code, which provides that exemption from penalty shall be granted when the prisoner is proved to have been deprived of reason at the moment of his action.

TWENTY-TWO wealthy merchants of Yokohama, Tokyo and western cities are promoting the exhibition of Japanese products at St. Louis International Exhibition. They have established a society and obtained the sanction of the Department of Agriculture and Commercial Affairs. It has been decided that they contribute yen 1,000 each towards the expenses. The *Nichi Nichi* states that the Government will give about yen 100,000 to the society as a subsidy.

MR. K. OTANI, president of the Central Tea Guild, will it is said, present an application to the Department of Agriculture and Commerce, for a subsidy towards extending the tea business abroad. The previous term of the subsidy having already expired, the committee of the guild applied in the early part of this year for, and the Government authorities seemed willing to grant yen 70,000 yearly for five years. As the result of the proposed administrative reforms, however, the application of the committee seemed to have been shelved.

POLITICAL NOTES.

Saturday, August 1.

The seceders from the *Seiyu-kai* have issued a manifesto the gist of which is that the failure of political parties is due to neglect of cardinal principles and regard for paltry matters of personal sentiment or ambition. The time has come to correct that defect, which was not flagrant in the early days when, consequently, the parties wielded much greater power. But the manifesto does not contain any enunciation of principles. Its compilers claim that they have a programme but they desire to postpone its announcement until there shall have been an opportunity of consulting with other politicians so that the new party may commence its career in perfect unanimity.

It is noticeable that Messrs. Hayashi Yuzo and Kataoka Kenkichi are not yet associated with this new movement, and that Mr. Ozaki Yukio is standing aside from all political enterprises of every kind.

Count Okuma has shown his usual skill in settling the trouble which threatened to cause a disruption of the Progressist Party. The Count did not publish Mr. Komuchi's resignation, but invited to his residence Mr. Hiraoka, whose treatment by the Party's leaders was understood to be the chief cause of Mr. Komuchi's dissatisfaction. Other members also were invited, and a long conference took place, in the course of which Count Okuma insisted on the vital necessity of subserving petty questions of sentiment to the great interests of the Party and above all of country. Mr. Hiraoka appears to have been entirely convinced by the leader's reasoning, and it is thought that Mr. Komuchi's resignation will be withdrawn and the incident closed.

Tuesday, August 4.

The Prime Minister is represented by the *Chuo Shimbun* as having made some interesting remarks to a friend on the subject of administrative reform. It is impossible to say how accurate the story may be, but it has some internal evidences of veracity. Count Katsura admits that finance was one cause of his recent illness, and that drastic financial measures are essential to his complete recovery. The situation is very circumscribed so far as applicable remedies are concerned. On the one hand a considerable diminution in one of the State's principal sources of revenue, the *sake* tax, has to be faced and funds have to be found for purposes of naval increment; on the other, the Ministry is pledged by the terms of its compromise with the *Seiyu-kai* to restore the land tax to its original dimensions and to refrain from imposing any fresh burden upon the people. Under such circumstances the only possible resource is sweeping administrative retrenchment. This is a subject that has been before the country for many years. It has contributed directly or indirectly to the fall of several cabinets, and Count Katsura does not pretend to possess ability for the solution of such a problem. But he intends to try. In fact, there is no choice. The conditions of the time dictate strong measures. It is not his intention, however, to essay any ideal scheme of reform. He intends to be guided simply by practical considerations. Certain funds have to be found and corresponding economies must be effected. The axe must be applied vigorously and many will suffer from its strokes, but to that the Cabinet has made up its mind. Moreover, there will be many, doubtless, whose comely programmes of

reform will not be satisfied by the facts of the Government's procedure. To that also the Cabinet has made up its mind. As for the commonly uttered criticism that the Departments of War and of the Navy enjoy a kind of extraterritorial immunity from retrenchment, the Premier denies that anything of the sort can be truly alleged. Admiral Baron Yamamoto and General Terauchi are vigorously investigating the question and will lend their coöperation to the fullest extent. On-lookers may say that the Ministry has lowered its flag to the Diet. To that, again, the Cabinet has made up its mind. The one and only question for the Ministers of the Crown is how best to serve the country's interests, and they intend to keep that question before them uniquely.

Professor Takahashi, one of the Seven who signed the celebrated strong-policy memorial, speaks now through the columns of the *Yomiuri Shimbun*. He tells us at the outset a curious piece of news, namely, that at the time of the Crimean War, France, Italy and England came to the conclusion that although they could check Russian aggression in the Balkan Peninsula, they could not control it in the Far East, and that it would consequently be advisable to make Japan and Korea into neutral States guaranteed by Europe, as Belgium is. The Crimean War happened two years before Commodore Perry's treaty and we were not aware that Japan and Korea then occupied a practical place in the councils of European statesmen. Professor Takahashi, however, is a good authority. Thereafter, he goes on to say, Japan by her own exertions raised herself far above the position of a State requiring any foreign guarantees of neutrality. But Korea remained in the morass of helplessness, and accordingly Russia, some time after the war of 1894-5—here the Professor is vague, probably with intention—proposed the neutralization of the peninsular empire. Japan rejected the proposition. Now finally Manchuria is before the world. Neutrality under an Occidental guarantee seems to be the only hope of rescuing Manchuria from becoming a Russian province. If it does so become the hand will begin to move back on the dial, and Korea will fall under the shadow of an inevitable peril, which, when it overtakes her, will again give rise to the question of saving Japan herself by means of a guarantee. The Professor's conclusion is that Japan must now strain every energy to secure the neutralization of Manchuria. If she is content to drift into a condition of existence by sufferance—a very comfortable state of existence in one respect since she would not need an army or a navy—then she has only to sit quiet until her fate overtakes her. But if she wants to be a virile, self-protecting Power, she has to raise strong hands at once against a menace palpable beyond all danger of misapprehension.

There can no longer be any doubt that Count Itagaki intends to place himself once more at the head of a political party. The seceders from the *Seiyu-kai* and the expelled members have formed an association called the *Doshi Shukai* (assembly of fellow-thinkers), and Count Itagaki having accepted their leadership, is about to visit the provinces on a tour of political speech-making, in which enterprise he will be assisted by other associates. Count Itagaki was once a great power in the land, and there is something emphatically melancholy in the spectacle of his emergence from political

retirement which seemed permanent and might fitly have been permanent, to put himself at the head of a handful of men who really do not seem to have succeeded in manufacturing an intelligible platform. For certainly we can not suppose that they broke away from the *Seiyu-kai* because of unsatisfied yearnings after the hackneyed shibboleth with which Count Itagaki has supplied them, "liberty, equality and fraternity." We apprehend that very few of them, and in those few it is doubtful whether Count Itagaki himself may be included, could make an accurate statement of what they regard as the practical aims of their formula. They are just wanderers in the wilderness, and that the father of Japanese liberalism should, in his old age, be the leader of such a Bedouin tribe of Ishmaelites, is too pitiable to be ludicrous—a veritable anti-climax to a great career.

On the other hand, the *Seiyu-kai* is still suffering from the shock of recent events. Another expulsion from its ranks took place on the 1st instant. Mr. Yamaguchi, parliamentary representative of Shinano, was the victim, and his misfortune has been followed by the dissolution of the Hokushin branch of the Party. It is not clear whether the sequence of cause and effect is here accurately stated. Our impression is that the Hokushin politicians have for some time contemplated dissolution, and that Mr. Yamaguchi's offence was connected with a visit made by Baron Suyematsu to Nagano for the purpose of combating that resolution. The Baron had been invited by a section of the branch, a section desiring to preserve the *status quo*, but on arrival he was informed that these men had no authority to deliver a representative invitation, and he accordingly returned, *re infecta*. The subsequently expelled member appears to have taken some objectionable part in this business.

It is thought that a similar fate of dissolution will soon overtake the Ibaraki branch of the *Seiyu-kai*. We read in the *Fiji Shimpō* that out of the four parliamentary members of that prefecture, three have joined Count Itagaki, or are working in his interests, and the one remaining can not hope to hold the branch together. A meeting is to be held in Ibaraki on the 6th instant, when a final decision is to be taken, but inasmuch as it will be attended by Messrs Matsuda Masahisa and Kuribara Ryoichi, we assume that the loss of this branch is not regarded as inevitable at the Party's head quarters.

The fact is, apparently, that the *Seiyu-kai* was too large for the ambition of some of its members. Their light was dimmed by the effulgence of the big galaxy in which they twinkled, and they wanted to move in orbits of their own, unextinguished by the proximity of greater planets.

The Tochigi branch is in pretty much the same predicament. Two of its members were expelled from the *Seiyu-kai*, one has resigned and the fourth is expected to follow suit. Naturally the cohesion of the branch ought to disappear. In this case, however, there seems to be some expectation of averting a final rupture. The *Fiji Shimpō* says that in the Shiga branch also there is a serious rupture, one section being for dissolution, another for passing a resolution condemning the change of President, and a third for preserving the *status quo*. In Saitama prefecture the seceders, incited by Mr. Ogawa Heikichi and Mr. Ishiyama Yabei, who took such a prominent part at the outset of the *Seiyu-kai* revolt, have formed a

coterie which declares itself to be a reform club entirely independent of political parties.

On the side of the Progressists it is alleged that Mr. Oishi Masami has not by any means abandoned his idea of organizing a big amalgamated party, and that he is working hard with that object in view.

There are other movements but we refrain from troubling our readers with further details. It is a veritable welter. At the same time, all these local ruptures must not by any means be regarded as fatal blows to the *Seiyun-kai*. They are the natural results of the secessions or expulsions that took place from its ranks at the time of the compromise. So soon as the members of a prefecture cease to be supporters of the *Seiyun-kai*, the attitude of the Party's branch in that prefecture does not become a matter of importance until the time of the next general election.

Wednesday, August 5.

The *Shaho Club*, which was recently much talked of as likely to be organized under the presidency of Prince Konoye, has been definitely formed, but it takes the name of the *Chuo Club* (Central Club). It is, in fact, an amalgamation of three coteries, with the details of which we need not trouble our readers. The founders of the Club say that it is not a political association, but that it will of course discuss political questions should they arise.

There is to be a grand meeting of the representatives of a strong foreign policy at the Kinki-kan on the 9th instant. Speeches will be delivered and the meeting will subsequently adjourn to the Maple Club for a convivial entertainment. It is stated in their circular convening this demonstration that the political conditions in the Far East are of such a pressing nature as to render extremely perilous the least error in foreign policy.

Thursday, August 6.

The view of the *Fiji Shimpō* is that things are in a very parlous condition so far as the *Seiyun-kai* are concerned. Appearances are diligently preserved at head-quarters, but in truth the Party is a cracked vessel, a vessel permeated with fissures, and the moment of its disruption can not be very long deferred. North, south, east and west, everywhere there is dissatisfaction. It is interesting to learn the *Fiji's* opinion—or at any rate the opinion of one speaking through its columns—that this bad state of affairs could have been worse had Marquis Ito remained at the head of the Party. In fact Marquis Ito's withdrawal is thought to have somewhat lessened the factors of discontent. At the same time the appointment of Marquis Saionji to the post of President by the vote of some fifty members only without the convention of a general meeting, seems to have given rise to some murmuring. The Progressists also are declared by the same authority to be in a parlous condition. Their disintegration will not greatly postdate, if indeed it does not antedate, that of the *Seiyun-kai*. All this is regarded as prelude to the organization of a new association formed by welding together the fragments of the old parties. But it is observable that as yet no politician has shown sufficient constructive ability to build a platform on which all the malcontents might take their stand. That is the pressing need of the time. It is beyond question that if any one could furnish an attractive shibboleth he could count on a big following. But the want is nothing new. It appears to us now, looking back to the year when the

Diet first met, that what the parties have been doing all the while is groping after principles.

THE ELECTRIC TRACTION QUESTION.

Saturday, August 1.

Electric railways have been a disgrace to the capital of Japan for many years, a disgrace negatively and a disgrace positively: negatively, because the lack of such adjuncts in such a city at such a period of civilization is miserable; positively, because the disputes by which the work has been delayed are even more miserable. And it appears as though a Donnybrook demon is doomed to inhabit the bosoms of the citizens for all time in this matter. The opponents of the amalgamation scheme—the amalgamation of the street railways and the *Densha* lines—have obtained a legal injunction forbidding any action in pursuance of the resolution adopted at the recent general meeting. Of course the injunction does not mean that the Court of Law regards the resolution as illegal. It is merely a precautionary measure, pending a full hearing of the case. But from the moment that the matter becomes entangled in the meshes of the law, its exit from them is almost infinitely distant. For Mr. Amenomiya and his friends will be able to carry the problem from court to court, and if they please to employ all the available machinery of delay, two years may pass before the highest tribunal pronounces judgment. What that signifies is very much more than what appears on the surface. The Street Railway Company is required by its regulations, and by its charter also, we believe, to increase its capital from 3 million *yen* with which it is now working, to 15 millions in the course of the current year. By way of preliminary to any increase, the whole of the three millions must be paid up, whereas only half of that amount has hitherto been called in. Probably there would be no difficulty about that payment. But should the capital be increased to 15 millions—which would involve the allotment of all the new shares—before amalgamation with the *Densha* Company had been effected, the basis of amalgamation would have disappeared, and the problem would become one of great perplexity. Evidently, therefore, Mr. Amenomiya and his fellow-thinkers have obtained control of the situation. They have only to sit tight and the day is theirs. The Yasuda Bank is on their side, which fact strengthens their situation considerably. It can not be denied that they have manoeuvred with considerable cleverness. Some Tokyo journals urge that it is the duty of the Chamber of Commerce to take up the matter, and that if the Chamber can not effect a compromise, the restraint of business morality must be applied. We really do not see where business morality comes in. From a practical point of view these perpetual disputes make a wretched spectacle, but there is no ostensible reason why the opponents of amalgamation should yield to its advocates. In fact, if the interests of the general public were consulted, victory might be desired for Mr. Amenomiya's side. The strong fact is, however, that many of the best men in Tokyo are ranged on the side of amalgamation, and their personal prestige necessarily attaches to the cause they espouse.

Sunday, August 2.

On the 1st instant the advocates of amalgamating the two companies made application to the Tokyo Local Court that its tem-

porary injunction should be removed. The applicants offered to put up any sum desired by the Court in the nature of security. What the fate of this application was we are not sure. All the Tokyo newspapers, with one exception, report that the application was rejected on the ground of insufficient cause shown. The exception is the *Nichi Nichi Shimbun* which says that the Court decided to hear the arguments of both sides on the 12th instant. It is further alleged that the advocates of amalgamation intend to ask that Mr. Amenomiya, in whose name as President of the company the application for a temporary injunction was made, shall be required to submit his case at once, and further that the court order him to put up a sum of half a million *yen* as security. Another curious feature of the complication is that Mr. Mudaguchi, President of the *Densha* Company, has returned Mr. Amenomiya's letter announcing the adjournment of the Street Railway's general meeting on the 28th ultimo. Mr. Mudaguchi takes the ground that although this document bore Mr. Amenomiya's signature as President of the Street Railway Company, it did not bear his seal, and was consequently out of order. Naturally Mr. Mudaguchi is doing everything in his power to promote the interests of the amalgamation party, but this last move looks rather petty. We read also in Tokyo journals that the advocates of amalgamation have notified the Departments of State concerned that all documents presented on behalf of the Company will henceforth bear the signature of Mr. Toyama, as President. Inasmuch, however, as no formal action has been taken to depose Mr. Amenomiya from his place of President, and inasmuch as the charter doubtless stands in his name, this procedure on the part of his opponents can not have much validity.

TOBACCO.

It is announced that another addition is to be made to the tobacco tax. The method pursued is to classify the 24 qualities of tobacco into seven grades, instead of 5 as hitherto, and to extend the limits of the tax from 24 and 28 per cent. of the selling price to 25 and 34 per cent. Thus the new figures will be:—

	per cent. of selling price
First and Second Qualities	25
Third to Fifth "	26
Sixth to Eighth "	27
Ninth to Eleventh "	28
Twelfth to Fourteenth "	30
Fifteenth to Twentieth "	32
Twenty-first to Twenty-fourth Qualities	34

As for imported leaf, the table of charges will be:—

	per <i>kwan</i> and upwards.
For leaf officially valued at 2.90 <i>yen</i>	25 per cent.
" " 2.30 "	26 " "
" " 1.70 "	27 " "
" " 1.10 "	28 " "
" " 0.75 "	30 " "
" " 0.32 "	32 " "
" " less than 32 <i>sen</i>	34 " "

The effect of this change will be to enhance the price of low grade leaf. The new tariff is to go into operation from August 15th. Some Tokyo journals ascribe the change to the fact that the Government finds itself possessed of a large quantity of last year's leaf which failed to find a sale owing to business depression. On the other hand, this year's crop is about to be harvested, and thus the old leaf will have little chance of finding a market unless some contrast in price can be set up between it and the new.

CHINA.

Saturday, August 1.

A few days ago we were told that the embargo put upon the export of cereals from Newchwang by the Russian Authorities was due to the latter's desire to purchase all available supplies of grain themselves. Now, however, a telegram to the *Fiji Shimpō* from Peking says that in taking this action Russia has been influenced by a request from the Chinese Government and by consideration for the anxiety of the local inhabitants who are beginning to be distressed by the rapid appreciation of their food stuffs. It does not yet appear to be known certainly whether beans are included in the embargo. Beans are an essentially necessary staple for Japanese agriculturists who, use them as fertilizers. One of the greatest inconveniences suffered by Japan owing to the war of 1894-5, was the stoppage of the Newchwang supply of beans.

A telegram to the *Asahi* from its Seoul correspondent says that the Korean Government, having considered it necessary to consult China about the opening of the Yalu Valley, instructed Mr. Pak to approach the Peking Foreign Office. The latter, after a little hesitation, signified that it entertained no objection. The correspondent adds that although the opening of Wiju itself seems still uncertain, it may be taken for granted that some place in the Yalu Valley will soon be included in the list of open ports.

Monday, August 3.

It is reported that some four train loads of troops are arriving daily at Port Arthur from the direction of Vladivostok. These rumours of an increase of Russia's force in the Liaotung peninsula are so insistent that they can scarcely be dismissed as idle.

Tuesday, August 4.

The *Asahi Shimbun's* Peking correspondent sends a strange telegram. He says that the Russians in Manchuria have issued orders that all persons living in the vicinity of the railway stations must vacate their premises within 12 hours, and that if any one fail to do so his house will be burned. The same authority adds that every vehicle of every description in Liaoyang has been impounded by the Russians for military purposes.

Wednesday, August 5.

It is stated (*Nichi Nichi* correspondent) that the Peking Government asked M. Lessar whether he had cognisance of the alleged fact that the Russian Government had given assurances to the Powers with regard to the opening of Mukden and Tantung-kou. The Russian Representative replied that he had no information from his Government on the subject.

It must be confessed that the Foreign Office in St. Petersburg and the Russian Legation in Peking utilize each other very cleverly. The statesmen in the Russian capital seldom have any acknowledged acquaintance with any inconvenient statements made or actions taken by their Representative in Peking, and the Legation in the latter city has an equally convenient blank in its intelligence about St. Petersburg's procedure.

A telegram to the *Asahi* says that the Russians in Manchuria have been endeavouring to engage a thousand Chinese for military service, but that the local authorities at Kirin refused to assist the arrangement. The Russians then sought to accomplish

their purpose in spite of the authorities by offering high pay but very few persons having responded to the offer, it was finally found necessary to engage 800 men at Inchin (?) and transport them to Port Arthur. This news is altogether somewhat difficult to comprehend.

The *Fiji Shimpō* reports, on the authority of its Peking correspondent, that one of the decisions of the Port Arthur conference was the building of forts at Dalny. A sum of 13 million roubles is to be expended on the work. The Russian treasury seems to be inexhaustible.

Friday, Aug. 7.

It is alleged that a grand meeting of Chinese statesmen has been summoned to assemble at the Summer Palace on the 7th instant, and the supposition is that the Emperor and Empress Dowager intend to hold an important consultation about the Manchurian question.

The *Fiji Shimpō* correspondent, by whom the above item is telegraphed, adds that the results, or alleged results, of the Port Arthur conference are beginning to be openly spoken of. Rumour says that General Kuropatkin, Admiral Alexieff and the military element of the Council were for peace, whereas M. Lessar, M. Pavlow and the civilian element were for war. After five meetings, each marked by animated debate, a telegraphic summons from St. Petersburg compelled General Kuropatkin to turn his face homeward at once, and the conference rose without having formulated any definite decision.

Admiral Alexieff has gained a remarkable reputation since his figure first became prominent on the Far-Eastern stage. He seems to be one of those highly gifted men who in every generation have worked untiringly at the task of Russian empire-building. The splendid results of their toil may be very unwelcome to rival nations, but to the men themselves a high tribute is due from all that are capable of appreciating talent and energy.

According to the *Nichi Nichi Shimbun's* correspondent the quiescent attitudes of the Japanese and Russian Representatives in Peking having assumed an ominous aspect in Chinese eyes, the Foreign Office has again approached M. Lessar with pressing inquiries as to whether and when Russia intends to carry out her treaty obligations. M. Lessar replies that he is still awaiting instructions from St. Petersburg. But, says the correspondent, it is generally believed that such instructions have already reached him, and their gist is that Russia will quietly conserve her vested interests in Manchuria and will seek to develop her interests in Mongolia. That is certainly the wisest policy Russia could adopt from a Russian point of view. *Beati possidentes*. If she had always "sat tight" and refrained from hampering herself with promises the situation would be much easier for her now.

There is a rumour that a collision took place on the 1st instant between some of the Russian troops in the neighbourhood of Shan-hai-kwan—apparently outside the Great Wall—and a body of General Ma's Chinese soldiers. The Russians are said to have lost 21 men, and the Governor of Tientsin was at once despatched to make inquiries. It will probably be found that the facts have been greatly exaggerated.

KOREA.

Saturday, August 1.

The incident of the telephone posts at Seoul becomes more ludicrous as the details are learned. It appears that the ground for the Seoul terminus of the Seoul-Fusan Railway was handed over to the latter's representatives on the 8th of July, and they began, soon after, to erect a telephone within the enclosure. The Korean Authorities sent in a protest but the Japanese Representative replied that as the telephone was within the compound of the Company, it could not be regarded as in any degree an unlawful enterprise. Then suddenly there appeared upon the scene several Korean officials accompanied by policemen and coolies. They hastily set to work to extract the telephone poles, and had pulled down one when a party of Japanese police and gendarmes came to the rescue. Thereupon the Korean officials and constables seem to have fled precipitately, the other side giving chase, capturing the extracted post which the Koreans were carrying off as a trophy, and re-erecting it. There the incident, a supremely ludicrous incident, ended for the moment. The Koreans have evidently developed a taste for rooting up wire-carrying posts.

Monday, August 3.

News from Seoul published by the *Nichi Nichi Shimbun*, says that the Crown Prince has asked for permission to retire from active life and has requested that Prince Yong be declared heir to the Throne in his stead. The Crown Prince's relations with Lady Om have always been strained, and the Emperor is said to have inferred that the purpose of this last move is to smooth the path for that lady's elevation to the rank of Empress, the Crown Prince having yielded to some pressure or persuasion brought to bear by her friends. His Majesty has replied in unusually resolute tone. He has declared that so long as he sits on the Throne Lady Om shall not be made Empress. That ought to definitely settle some of the questions which have so long inspired intrigues in Korea.

The treaty of friendship and commerce between Switzerland and Korea having been ratified, the exchange of ratifications is likely to be effected very soon.

The Korean Foreign Office appears to have appreciated that the recent telephone-post exploit was in excess of propriety. It has received a strong protest from Mr. Hayashi and the expectation is that an apology will be forthcoming. The incident itself is of small moment, but if it should be regarded as an indication of a disposition on Korea's part to play into Russia's hands to the detriment of Japan's legitimate interests, it ceases to be insignificant.

Wednesday, August 5.

The Seoul Government is said to be still hesitating about the opening of the Yalu Valley. The latest idea is to open Wiju and to extend the privilege of foreign residence to Puk-hwa-tong, 7½ miles further down the river. But the whole question is still in abeyance.

It appears that the proposed arrangement for re-purchasing from Russian subjects and then leasing to them the lands they have acquired at Yong Am-pho, has not yet been completed. It is under consideration. The terms of the lease would be the same as that of the timber-felling concession.

A certain Mr. Hayon Yan-gun, who has

been ordered to proceed to Japan on a railway-inspection mission, is supposed to be really charged with the duty of inquiring into Russo-Japanese relations.

Thursday, August 6.

The Russian Representative in Seoul persists—according to the *Asahi Shinbun*—in maintaining that the right to lay telegraphs and telephones in the Yalu Valley flows naturally out of the timber-felling privileges granted to his nationals in that region. He maintains that so far from being in a position to dispute that right, the Korean Government's plain duty is to protect the Russians in its enjoyment.

Of course it would be waste of time to enter into any elaborate analysis of such an argument. It is a monstrous argument, palpably monstrous on the face of it. M. Pavlov practically contends that permission to do one thing carries with it permission to do another thing also. Where, we should like to know, are the limits of his contention to be sought. If telegraphs and telephones are essential to lumber-men, what shall be said of railways? This is a very unsightly business. Nothing of the kind would be "tried on" in the case of a Power with capacity to assert its own sovereignty. Conceive an argument of the sort advanced by an Oriental Minister at the Court of an Occidental Sovereign!

The *Asahi* writes a strong editorial about these doings. It contends, with justice we think, that the Yalu Valley problem should be solved at once and independently of the evacuation of Manchuria. If things are allowed to drift in Northern Korea Japan will find herself confronted by accomplished facts, and she will have to deal with Russia from a disadvantageous position. Good judges have always predicted that the permanent occupation of Manchuria by the Great Northern Power would be followed by immediate enterprises against Korea, but Russia has not waited to have her occupation established: she is already stretching out her hand towards the peninsular kingdom. The *Asahi* advises that, since the Seoul Government can not be trusted to deal resolutely with these vital questions, Japan should approach Russia direct and take the matter out of Korea's precarious management.

Friday, Aug. 7.

The difficulties relating to a site for the Seoul-Fusan Railway's terminus and to the erection of a telephone within the enclosure, are said to have been composed through the intervention of Mr. Hayashi and in consideration of a payment of 60,000 yen by the Railway Company as compensation to the people that have to remove their residences on account of the establishment of the terminus.

Work on the section of the Seoul-Wiju line between Seoul and Kaison seems to be progressing. These 40 miles will be opened, it is thought, during the course of next year. The building is in the hands of the Korean Railway Bureau but the rails and plant have been ordered from France at a cost of six hundred thousand yen, the money to be taken out of the proceeds of the *ginseng* farm which has now fallen into French hands. There is a rumour that the French contractors have sub-let the supply to English manufacturers, but how far the story may be credible we can not tell. In any case the Koreans will doubtless be well served.

A Korean paper alleges that the agree-

ment between the Korean Estates Bureau and the Russian land-holders at Yong Am-pho is on the point of being concluded; that the area in question is 200 acres and that the period for which the land will be leased is 99 years. But the concession of 1896, under the terms of which the Russians are now carrying on timber-felling operations, is for a space of 20 years, ending in 1915, and there is no reason to suppose that the Korean Government contemplates granting leases for a longer period. The granting of leases at all under the circumstances is a suicidal act on Korea's part. From the moment when she signs these leases, she will be confronted by the ominous words "vested interests" and "accomplished facts;" words which have unlimited signification when greatly preponderating strength is brought to their interpretation. Besides, the extent of the land in question appears to us to be wholly disproportionate to the nature of the enterprise. Two hundred acres is an area quite sufficient for the formation of a magnificent settlement including a spacious military camp. What on earth can a few lumber-men want with such an expanse of territory? This Yalu Valley business is turning out just as we expected. Another big question will be presently on the tapis, but it will be a question settled out of court, for the issues will have been decided before the world's tribunal is required to judge.

On the 3rd instant M. Pavlov is said to have asked the Korean Foreign Office for permission to erect telegraphs and telephones at Yong Am-pho, but the application was refused. This is a simple piece of news, but if true it marks a change of attitude on the part of the Russian Representative, since he has hitherto contended that the timber-felling concession carried with it the right of setting up telegraphs and telephones. However, if the Russians get a lease of 200 acres of land at Yong Am-pho, and if their roomy settlement extends to the banks of the Yalu so that the southern side of the estuary of the river will be commanded thence as the northern is from Antung, they will doubtless claim the foreshore at either place, and then to prevent the laying of a cable Korea will have to assert her right to the mid-stream bed of the river. Within the settlement, of course, any net-work of wires that the Russians please may be erected. That is simple enough.

The so-called railway inspector, Mr. Hyon Yong-un, left Chemulpho for Japan on the 3rd instant. Rumour, as our readers know, recently ascribed to him the role of a secret messenger to investigate the relations between Japan and Russia. It now alleges that his mission is connected with the Korean refugees in Japan. The refugees are a constant thorn in the side of the Korean Government. We presume that they do not take their exile quite quietly and that now and again they endeavour to devise a return route to their native shores.

ADMINISTRATIVE RECONSTRUCTION.

There is much talk about the administrative reforms contemplated by the Cabinet, but we infer from the tone of the Tokyo journals that everything is still in the region of conjecture. Several papers are inclined to think that the abolition of the Department of Education is tolerably certain, but it appears that the present Vice-Minister, Mr. Okada, has argued ably against such a step and probably succeeded in obtaining a respite for fuller reflection. The appropria-

tions for the Department of Education stood at 4,845,708 yen in the budget for 1902-3. They had more than quadrupled in ten years, the figure for 1892-3 having been 970,074. Of the present total, however, nearly three-fifths represent educational grants which must continue to be paid by the Treasury even though the Department itself were abolished, and, further, since some supervision of educational affairs would be absolutely necessary, two or three new bureaus for that purpose must be organized in other Departments. Thus we calculate that the economy effected by the proposed abolition would not exceed 1½ million yen. We may mention that a feature of the programme is said to be the independence of the Imperial University and the attachment to it of the Normal Schools.

It goes without saying that whatever measures the Government adopts will be the subject of criticism. This is illustrated by the comments of the *Nichi Nichi Shinbun*. The gist of that journal's article is that administrative reform should be based on the idea of improving the machinery of state and promoting its efficient operation, whereas the present Ministry seems to be guided solely by considerations of economy. That is a line of argument which has to be anticipated, but for our own part we really fail to see that the civilian advocates of administrative reform themselves pretend to be guided by any object except the saving of money. It is not pre-empted, so far as we know, that the machinery of the Government is defective or that it does not work smoothly, except in so far as excessive bulk makes it unwieldy. What everybody wants is to economise expenditure, and though there can be no dissent from the *Nichi Nichi*'s dictum that executive efficiency should take precedence of pecuniary considerations, it seems idle to affirm that anything beyond economy is at the root of the outcry for reform.

It is reported that the Government is comparing its own views with those of the House of Peers as expressed in a memorial presented some time ago by the *Kenku-kai*. The memorialists unequivocally condemn the idea of abolishing the Departments of Education and of Agriculture and Commerce. Such heroic steps, they say, would surely prove practically impossible and would involve the downfall of the Government itself. They insist that the axe should be laid to the roots of various appropriations and grants in aid, which, they think, might be largely reduced, if not altogether abolished, without detriment to the public service. They mention as reducible or excisable items the subsidy of 500,000 yen to plate-glass manufacturers; aids to navigation, 6 million yen; expenses of the bureau for investigating state business (*kokumu chosa-hi*) 2½ millions, grants to Hokkaido enterprises, 600,000 yen. From these sources a saving of 7 millions might be obtained. Then they would cut down allowances made by the Home Department on account of local engineering works, thus obtaining another million. In the Departments themselves they think that 5 millions might be economised without resorting to extreme measures, and if to these various savings be added a surplus of 6 million yen from last year, there results a total sum of 19 million yen. They denounce the idea of amalgamating any of the prefectures. Experimental attempts of that nature made in the past have always proved mischievous.

Of course this programme is not likely to be adopted in its entirety. But parts of it may commend themselves.

THE SITUATION.

It is rumoured in Tokyo that events have taken a pacific tendency. The European Powers—France, Germany and England—are said to have signified their desire to see a peaceful solution of the Manchurian problem and negotiations to that end are reported to be in progress, Russia, on her side, being strongly inclined in the same direction. We do not refer to these rumours, however, with the idea of claiming credit for them but merely because their persistence entitles them to some notice. Their circulation is not without an amusing feature, namely, that the *Niroku Shimbun* gravely publishes them with much pomp and circumstance, not as rumours, of course, but as indisputable facts—the *Niroku* which, more than a month ago, informed its readers that General Kuro-patkin was carrying away in his pocket a signed and sealed secret convention disposing finally of the East-Asian complication. Apart from these vagaries, however, we have never supposed that either Japan or Russia wanted war. What we have sometimes feared, however, is that Japan's patience might be over-taxed. The Japanese, as every careful observer must know, are not ill-tempered. Petulance or futile impatience can not for a moment be counted among the characteristics of the race. But will any one undertake to say that they are not passionate? The passion point is not easily reached. Long after an American or a European would be boiling with wrath, the Japanese retains his *sang-froid*. But let the point be reached and he falls more completely under the influence of his anger than an Occidental does. A proof of the fact is before us. It is beyond question that had any European nation been exposed to the same causes of international exasperation that have acted upon Japan since her expulsion from Liaotung in 1895, there would have been a display of vehement resentment. Japan, however, has kept cool. How long may that be expected to last? Perhaps Russian statesmen have some gauge for measuring the limits of such moods, but we confess that we ourselves have sometimes felt anxious of late.

THE GAME OF "KEN."

A correspondent "Enquirer" asks whether there is any literature about the Japanese pastime of *ken*. We do not know of any such literature. In its most widely practised form the basis of the game is that the fully outstretched hand signifies paper; the fully closed hand, a stone; and two figures alone extended, the rest being closed, scissors. Each of the players, counting one, two, three, throws out his hand at the moment of pronouncing three, and the one whose manual symbol is superior to that of the others, according to the theory of the game, wins the trial. Superiority is determined on the hypothesis that whereas a scissors can not cut a stone, it can cut paper, and whereas paper is cut by a scissors it can wrap up a stone. Consequently scissors is inferior to stone but conquers paper; stone is inferior to paper but conquers scissors; and paper is inferior to scissors but conquers stone. There are innumerable varieties of the game—for it is not a mere method of determining a dispute or priority—and they are constantly added to by ingenious young ladies, the dancing-girl class especially, who play it with exquisite grace and judicious enhancement of beautiful hands and arms.

SENTENCES IN THE TEXT BOOK SCANDAL.

The Governor of Niigata Prefecture, Mr. Kashiwada Moribumi, has been sentenced to pay a fine of 25 *yen* for violating official regulations. He was arraigned on a charge of bribery and corruption, but is acquitted of the major offence. Mr. Kashiwada was formerly Vice-Minister of the Educational Department. He belongs to the ranks of the prominent party politicians who obtained office some years ago when the cry of "utilizing the talents" had vogue. Officialdom will naturally refuse to acknowledge him as its genuine progeny.

A curious thing has happened in Gumma Prefecture. Mr. Misobe Korechika, former Governor of the Prefecture, lost his office owing to connexion with the text-book scandal, and made himself doubly remarkable by appealing against the sentence of the lower tribunal and getting a still severer punishment from the higher. He was succeeded in the governorship by Mr. Ogura Nobuchiku. But it soon transpired that the latter also had been implicated in the corrupt practices. He was deposed and tried, with the result that he has been sentenced to 2 months' imprisonment, a fine of 7 *yen* and to make restoration of 500 *yen*. It will be understood, of course, that Gumma was not the scene of Mr. Ogura's exploit. He carried his record with him thither, though it was then a secret record.

We have heard it suggested that the restitution money, the *tsuicho-kin*, taken from the various offenders in these cases of corruption, goes back to the book-sellers who originally disbursed it. It does not. It goes into the coffers of the Treasury. Probably there are folks who think that such contaminated dross ought to be spent on building prisons or improving sewers.

THE OSAKA EXHIBITION.

The Osaka Exhibition was duly closed on the 31st ultimo, the Minister of State for Agriculture and Commerce taking the principal part in the ceremony. So far as the number of visitors was concerned, we judge that the enterprise was a success, for whereas it was originally stated that if three millions passed the stiles the result would be profitable, the returns show that between March 1st and July 28th, the number of entries at the Exhibition itself was 4,179,990, and the number at the Fisheries in Sakai, 927,244, making a total of 5,107,234. But the sales of exhibits make a wretched record. Only 432,522 *yen* worth found purchasers. That sum represents 21.9 per cent. of the total value of the exhibits and 56 per cent. of their number, from which we infer that the cheapest articles only were disposed of. The same conclusion is suggested by the returns of the annexed shops. They sold 4,700,000 articles valued at 1,444,741 *yen* to 2,204,000 persons, so that each buyer spent, on the average, the magnificent sum of 65 *sen*, or about 16 pence. Many critics have remarked that the exhibits were priced too highly, especially in the Fine Arts Section, and the record now published would seem to support that verdict. We have often commented on the very unwise tendency of Japanese art artisans in modern times to assess their productions at nearly the figures commanded by master-pieces of former days, forgetting that the latter owe their value largely to scarcity. This propensity has attained extravagant dimensions in some instances.

Mr. Yasuhiro, chief commissioner of the Exhibition, stated in his speech at the closing ceremony that the total number of exhibits had been 276,000, and the number of exhibitors 130,000, both figures being more than double those recorded in the case of the Fourth Exhibition. The prize-winners had totalled 36,000, and special distinctions had been conferred on 127, which was five times the figure for the Exhibition of 1895. He thought that the progress indicated by these figures was very remarkable in view of the fact that two years had not elapsed since the last Exhibition was held.

From other returns we learn that the total number of Occidentals—Europeans and Americans—that visited the Exhibition was 14,443, and that the number of Chinese and Koreans was 8,677. But these figures are not complete because there is another entry—"special admission" (*tokubetsu niijo*)—in which many persons of foreign nationality are doubtless included. But even supposing that the aggregate of European and American visitors is thus brought up to 20,000, it must be admitted that the number is very insignificant. Facts like these go far to prove how remote Japan is still from the Occident. A great deal is due, however, to defective advertising. The Osaka Exhibition, not being an international affair—though a section was allotted to foreign exhibitors—its directors could scarcely be expected to scatter advertising literature broadcast as is done in the case of an American exhibition, for example. But whatever allowance be made on that account, the Japanese methods are still very unsatisfactory.

THE LOUISIANA EXHIBITION.

Baron Kioura, Minister of State for Agriculture and Commerce, seized the occasion presented by the closing of the Osaka Exhibition to address to the representatives of the various prefectures some useful advice about the Louisiana Exhibition. As a matter of course he urged that every effort should be made to have a display worthy of Japan and calculated to extend the market for her productions. But he also urged the importance of consulting foreign taste as to the nature of the exhibits. That is indeed the difficult question. In early Meiji days the great blunder committed by Japanese art artisans was to obey their own estimate of foreign taste, and the results were lamentable. Doubtless the Japanese merchants at the open ports have by this time acquired some conception of what the average tourist likes, and though it might be desired that they should rise above the tourist's standard, their ideas are now clearer and firmer than they were ten years ago, and we anticipate that comparatively few mistakes will be made in the case of the Louisiana display. It would, of course, be an immense advantage to manufacturers if they could consult competent foreigners beforehand, but that is virtually impossible. When Baron Kuki was in charge of such matters he sought the assistance of foreigners for the purposes of a preliminary examination of exhibits. But never was there a more perfunctory affair. The foreigners soon learned that they were mere figure-heads, and that no one expected them to express any views or would pay attention to any views they might venture to express. Better leave out foreigners altogether than employ them in such a fashion. If we were asked to say anything on the subject our comment would be that exhibitors must

endeavour to reduce their prices to tempting levels. One of Japan's greatest advantages is the cheapness of her art labour, but many of her artisans deliberately sacrifice that advantage by emulating Occidental prices. They have imbibed, we suspect, a mistaken notion that Europeans and Americans value a thing largely in proportion to the price demanded for it by its producer.

NOTES ON CURRENT EVENTS.

The *Asahi Shimbun* has a curious paragraph. It says that although the advantages offered by foreign insurance companies to the persons insured are ostensibly greater than the advantages offered by Japanese companies, yet, by means of skilfully worded provisions in the foreign companies' rules, these advantages are so much minimized as to lose most of their value. Our contemporary adds that the matter is under consideration by the Japanese Authorities. What a poor idea the *Asahi* must have of European and American intelligence! Does it really imagine that shrewd folks in the West have been labouring under a stupid delusion for the past thirty years about the terms given by insurance offices? The only conceivable warrant for our contemporary's assertion is that the Japanese translations of some of the foreign companies' rules are not sufficiently explicit.

It is stated that the committee of the Yokohama silk-men (Japanese) have held a meeting and resolved to ask the association to boycott Mr. W. Assomull, of No. 31. The story is that a Japanese merchant, Mr. Negishi, having agreed to supply to the foreign firm 50 dozens of silk handkerchiefs, sent 5 dozens by way of sample, but when the remainder were supplied, Mr. Assomull found them inferior to the sample and broke off the transaction. Against that the Japanese did not complain, but he wanted back his five dozen samples which Mr. Assomull declined to return, saying that they were forfeited for failure to carry out the contract. This contention he supplemented by thrashing Mr. Negishi. An attempt to settle the matter quietly failed, the foreigner declining to apologise on the ground that his recourse to force had been necessitated by Negishi's bad language. Mr. Assomull has since called upon the Guild and the matter has been settled.

Japanese journals state that an agreement has been concluded between the Daito Kisen Kaisha and the Japan Mail Steamship Company. The former Company's steamers ply on the Yangtse between Shanghai, Soochow and Hanchow, and the Company has hitherto worked in concert with the Osaka Shosen Kaisha. It is now agreed that there shall be joint treatment of goods, the Yusen Kaisha transferring to the Daito Kaisha at Shanghai all cargo carried from Japan by the former's steamers and destined for Yangtse ports visited by the latter's vessels, and the Daito Kaisha reciprocally transferring to the Nippon Yusen Kaisha's steamers at Shanghai all goods from Yangtse ports for places in Japan within the Yusen Kaisha's sphere. We do not gather that the Yusen Kaisha's interests are sacrificed by this agreement. Apparently the three companies are to work in union. There will of course be through bills of lading. The compact is for one year from August 1st.

A telegram from Sapporo announces a shocking event. After a regimental inspection on the 30th ultimo of the cavalry

stationed there, an entertainment was given to 430 troopers. Apparently the food or liquor contained something poisonous, for within a short time 190 men were seized with vomiting and purging. Three expired, 4 are in a dangerous condition, 33 are in hospital and 150 are ill but not so bad as to necessitate hospital treatment.

Sir persons have been committed for trial in connexion with the charges of corruption in Chiba prefecture. Two of them are members of the House of Representatives and four are members of the prefectural assembly. They are accused of taking bribes in their public capacity with reference to the building of embankments and the transfer of the prefectural offices to a new site.

There is some excitement in Osaka which has been communicated to Tokyo and finds expression in the columns of the *Fiji Shimpō*. In 1899 a girl of 13 was murdered in Osaka, having suffered indignities at the hands of her assassin. The police arrested a youth of 18 on suspicion, and he, having confessed, was brought up for trial. Owing, however, to insufficient evidence the accused, Matsuura, was acquitted. He has lived ever since under a social ban, the public being convinced of his guilt. But now suddenly, four years after the event, a burglar charged with a major crime, has confessed that he was the perpetrator of the outrage and the murder, and Matsuura, questioned as to why he made such a confession, alleges that he was tortured by the police beyond all endurance. It is this last phase of the affair that creates excitement, for the accusation against the police does not stand alone, and the *Fiji* thinks that not even yet have all the abuses of feudal days been eradicated.

Considering the active part that some of the great Sovereigns of Europe are taking in both domestic and foreign politics, the *Kokumin Shimbun* argues that the Throne tends to become a more powerful and important instrument of government than ever. Our contemporary does not ostensibly apply this principle to Japan's case, but the application must have been in the writer's thoughts. Japan's immense distance from Europe renders it difficult for her Emperor to adopt the course recently taken by the Kaiser of Germany and the King of England. Even if the Mikado were willing to make visits abroad, it would be more than doubtful whether their royal or imperial recipients could be induced to return them and thus the enterprise would be one-sided at best. In this respect the gulf between East and West seems likely to remain long unbridged. Besides there is the difficulty of language. That, however, will be overcome gradually. The present Prince Imperial of Japan speaks French; and French is current at all Western courts. All the Princes of the Blood, too, study French and several of them speak it fluently. Apart from the points of distance and linguistic communication we have often thought that the Japanese Court is much influenced by the question of reciprocity. The Shah of Persia and the Sultan of Turkey have visited European capitals but no European Monarch has ever visited Teheran or Constantinople. The most that has been done is to send an heir apparent. The present Prince of Wales has been in Japan and is said to retain grateful and pleasant recollections of the welcome he received here. Probably we shall soon hear a renewal of the project for a visit to Europe and America by the Japanese Crown Prince.

Indeed had His Imperial Highness been blessed with a robust constitution the journey might perhaps have been made before now.

The decision of the Philippine authorities that Mr. Frank S. Allen, the English bank clerk who arrived in Manila under contract to the Chartered Bank as an expert accountant is amenable to the United States "Contract Labour Act" and must leave the islands, is arousing much criticism. Mr. Sansom, the Manager of the Chartered Bank, appealed against the decision of Mr. Shuster, the Collector of Customs, in the matter, but the appeal was not upheld. Mr. Sansom will probably carry the case to Washington. The *China Mail* in a letter on the subject denounces the American administration in the Philippines, and says that if this law, which in the present instance is enforced owing to American jealousy of the great British prosperity in the islands, is strictly carried out in the future, it will seriously damage foreign business there.

ODE TO CHIUZENJI.

Even ducks become rheumatic
In this paradise aquatic
Where the Colleagues Diplomatic
Seek repose.

And although the fog's extensive,
And the food's a bit expensive,
Still, there's nothing that's offensive
To the nose.

Baron, Count or Excellency,
Up from Nikko to Chiuzenji,
On a ten or fifteen-yen gee
You must ride;

For a *kago* drives one frantic,
And its not a bit romantic
When a Foreigner gigantic
Sits inside!

Jealous friends may crab the weather,
Say the journey lasts for ever,
And your summer plans endeavour
To upset.

When they praise with all their power
Waterless Karuizawa,
The Chiuzenji grapes are sour
You may bet.

Others say the nerves are calmer
For a view of Fujiyama,
And declare the silk pyjama
Rather toney,

And the greatest pains are taken
That your purpose may be shaken
And Chiuzenji be forsaken
For Hakone.

But I'll stake my reputation
That there is 'n't in creation
Any greater compensation
For the ills

That our exiled flesh is heir to
Than, forsaking all our care, to
Pack a *kori* and repair to
Nikko's hills.

MORAL.

If a husband's autocratic,
Or a wife becomes lymphatic,
Or you find the Asiatic
Too opaque,

If "in corpore insano"
Still a "sana mens" remain, oh!
Take the first train from Uyeno
For the lake.

FOLLY.

IT is to Shanghai that we look for sensations in every Far-Eastern crisis, and it is always possible to count on not being disappointed, for such is the moral atmosphere of the model settlement that even the well-conducted and generally level-headed *North-China Daily News* lends its columns to the purveyors of canards. The latest example is furnished by two articles headed "The Imminent War, by One Who Knows," and endorsed by the Shanghai journal, which says:—"It will be seen at once from their internal evidence that these two articles come from a very well-informed source."

We shall not attempt to discuss the articles in detail, especially as the writer confines himself for the most part to statements which can neither be proved or disproved without reference to inaccessible authorities. Thus when he says that "during the past fortnight the Japanese Government has been emulating the Russians in preparations for war" he makes an assertion comparatively secure against convincing contradiction, for although to ordinary intelligences it should suffice to point out that not the faintest evidence of these preparations had made itself discernible to foreigners living in Japan and living, too, within a stone's throw of the principal centre of military strength, the writer in the Shanghai journal might retort by claiming for himself extraordinary intelligence, a claim which our Shanghai contemporary would probably endorse. But there is in these articles one statement which reduces the whole essay to pure bathos. It is that "there are forty to forty-five thousand Japanese troops in civilian disguise in Korea at the present moment." They are distributed, the writer says, between Fusan, Yuensan, Chemulpo and Seoul, which places he describes as being "full of them." Now what we say is that such an assertion not only throws discredit on the whole of the essayist's allegations but also convicts him of curious deficiency in the matter of sober reflection. It is obviously and glaringly impossible that such a force of disguised soldiers could be lying concealed in the four places indicated. Seoul, Chemulpo and Yongsan—the essayist's spelling of this last name indicates pretty clearly that he writes from Tokyo—have a Japanese population of 9,565 Japanese, including women and children. Imagine the absurdity of suggesting that this population has been quadrupled without attracting the attention of any one except the solitary essayist of the *North-China Daily News*! And what are "troops in civilian clothes"? They are men without uniform and without arms. Where then are the arms of these forty-five thousand masqueraders, and where is the ammunition—nine million rounds at least—that would have to be placed in their hands or in their waggons at the first moment of trouble? Finally, how did they get to Korea? Are we to suppose that the Japanese Govern-

ment, six months ago, began to concentrate this extraordinary force, carrying the men surreptitiously across the sea at the rate of 7,500 per month, or nearly 2,000 per week, which means 300 a day, without attracting any attention? The less the time assigned for the feat the more impossible does it become, and the longer the time the more incredible does the hypothesis grow that Japan began to prepare for war months before the smallest war-cloud had made itself visible on the horizon. And yet a writer who can commit himself to such unreflecting nonsense is belauded by the leading Shanghai journal as "a very well informed source" while his articles are said to have "great inherent probability." It would be difficult to betray greater want of discrimination.

As to the general question whether "an outbreak of war is becoming a matter of days, not of weeks," we record our most emphatic opinion to the contrary. For while we are constrained to think from what we know of Japan's temper and from what we believe to be the limits of her endurance, that recourse to arms must ultimately become inevitable if Russia persists in following her present route, we can not imagine that she will persist. It is the fashion with many writers to heap upon Russia's head all kinds of accusations; to charge her, on the one hand, with inordinate ambition, and, on the other, with absolute unscrupulousness in her manner of gratifying that passion. We do not share that view. It is our conviction that if the history of other nations' aggrandisement could have been written under the conditions that exist to-day, if their acts of imperial enterprise had taken place upon a stage furnished with electric telegraphs, newspaper correspondents and a world-wide audience, then would their record also be at least as unsightly as that of Russia. Then we retain our faith in Russia's respect for her own reputation, and entertaining that faith we find it impossible to imagine that for the sake of carrying out one of the most flagrantly indefensible enterprises of imperialism that the world ever witnessed, she will drive Japan into war. There can be no question whatever about this matter. If Russia forces a fight, she will be absolutely without any sympathy except her own. That is not our conception of Russia's mood. That she should obey the impulse of expansion is one thing. Would it not be supreme hypocrisy on the part of Englishmen to blame any nation for such obedience? But that she should recklessly ignore the rights of other states, and deliberately plunge into a war without anything whatever to extenuate the act, that is what we can not imagine.

THE KOREAN PROBLEM.

WE observe with satisfaction that the *Jiji Shimpō* strongly advocates a course suggested some time ago in these columns, namely, that Japan should lose no time in utilizing on her own account in Korea the

now recognised instruments of scientific empire-building. In other words, she should obtain concessions for the Seoul-Wiju and the Seoul-Wonsan lines. Russia has shown fine ability in the employment of this particular instrument. It remains to be seen whether her enterprise has not exceeded her financial capacity and whether she will be able, or rather willing, to support the enormous outlay demanded for the maintaining of her gigantic scheme of railway construction. But there is not the smallest room to doubt that by the enterprise, an enterprise to which no exception can be taken since it is essentially calculated to promote industrial and commercial development, she has vastly extended her own imperial influence. No lover of peace advocates railway building as a weapon of pure aggression, but it becomes a very nice ethical question whether such a method of conquest may not be legitimately followed in the case of countries which, owing to stagnation of intelligence or blind conservatism, refuse to develop the resources which nature has placed at their disposal and which, in the interests of humanity at large, they have no right to monopolize wastefully. At all events the situation facing Japan is that Russia is employing that method with unsparing hand, and that she is now beginning to acquire in the Yalu Valley vested interests which she has already used as a pretext for the construction of a line of telegraph across the Yalu, and which will very soon furnish a plausible reason for the construction of a railway to Seoul. It is Japan's business to forestall that contingency; doubly her business, because Korea is necessary to her economically and also imperially. Japan, much as she borrows from Germany, has her sympathies in England and America. It is to Anglo-Saxon civilization that she looks for models in her heart of hearts, and since Anglo-Saxon Governments leave to the free initiative of their subjects or citizens all industrial and commercial undertakings, Japan would fain follow the same route. We have sufficient admiration for the canons of Anglo-Saxon economy to applaud Japan's instinct in this matter, but we can not hide from ourselves that hers is a case of not being able to follow the good she sees. Americans and Englishmen can be left to seize all the favourable opportunities offering because their immense wealth and the consequently urgent incentive to find profitable investments perpetually extend the horizon of their enterprise. But it is not so with other nationals: not so at all in the case of some and in a greatly reduced degree in the case of others. What would be Russia's situation to-day had she waited for private hands to carry out the scheme of scientific conquest? She would be little advanced beyond the point where she stood two hundred years ago. A wise instinct has prompted her to do officially what she may not hope to see done privately, and it has been her good fortune to be assisted by splendid agents, who, indeed, may be themselves an outcome of her system. Japan must be classed with the

nations forbidden to rely solely on private initiative. There is nothing to accuse her subjects of defective enterprise, but let their spirit be what it may, their financial flesh is weak, and if the Seoul-Wiju and Seoul-Wonsan lines must wait until private Japanese companies undertake them, the issue can be easily foreseen. It seems to be plainly a case for governmental intervention. What form the intervention should take is a mere question of detail.

"SAKE."

THE question of the *Sake* tax is naturally exciting much interest and causing much comment. In the fiscal year 1875-6, when the Central Government's finances may be supposed to have been fully organized, the yield from this tax was 2½ million *yen* approximately. In the fiscal year 1902-3, the same source of revenue figured in the Budget for 64 million *yen*. In other words, the yield of the tax increased nearly 25 times in 27 years. The growth, of course, was due mainly to augmented rates of taxation. The Government began to exploit this source of revenue vigorously in 1896, after the China-Japan War. It then raised the tax from 4 *yen* per *koku* to 7 *yen*. Again, in 1899, the rate was raised to 12 *yen*, and once more in 1901 it was raised to 15 *yen*, thus becoming nearly four times what it had been 5 years previously. Many publicists held that this extraordinary multiplication of burdens was not excessive, and that the rate might still be carried to a much higher point without affecting the yield. But doubts are now beginning to be entertained. They are founded on the following figures.

Quantity of <i>sake</i> brewed in.....	Koku.
1893.....	3,840,000
1895.....	4,090,000
" 1896.....	4,770,000
" 1898.....	4,600,000
" 1899.....	4,350,000
" 1900.....	4,350,000
" 1901.....	4,870,000
" 1902.....	4,257,037
Estimated 1903.....	3,514,071

It is supposed that the large production in 1901 was a measure of precaution, the brewers wishing to lay in a big stock before the rise of tax became operative. Since then there has been a heavy falling off, and the revenue is inconveniently affected. Last fiscal year, namely 1902-3, the Government estimated a revenue from *sake* which exceeded by 7 million *yen* the sum actually collected. This year their estimate would have proved 12 million *yen* too large, for, strange to say, they seem to have counted on a steadily increasing production. Since, however, the Budget for 1903-4 did not come into existence, the Treasury has to work with last year's estimates and thus the deficit under this heading will be only 7 millions. The question now is whether the limit of taxable capacity has not been

passed, or whether the diminished production may not be due to some abnormal cause. So far as public morality is concerned, the fact of reduced production is a matter of congratulation, unless, indeed, the now ubiquitous beer-hall has taken the place of the *sake* shop. If we come down to the actual price paid by consumers, the broad facts are that whereas the worst kind of drinkable *sake* cost 15 *sen* per *sho* (the 100th part of a *koku*) 15 years ago, it costs 40 *sen* now, and the price of the best *sake* has gone up in the same time from 50 *sen* to 70 *sen*. Drinkers of the first-class liquor do not feel the change at all, but the lower orders have to think now-a-days about the cost of a luxury which formerly the landlords of their inns and restaurants thought scarcely worthy of a special place in a bill. It seems to us doubtful, however, whether the consumption of intoxicants has really diminished in the ratio suggested by the figures for *sake* production. Setting aside beer, what is certain is that any one desiring to do himself the injury of drinking can procure a most efficacious and deleterious compound called Chinese *sakê* at from 10 to 15 *sen* per *sho*. It is abundantly charged with alcohol, and if much of it is imported, much is also concocted in Japan, where empty jars of the Chinese beverage have begun to command a market for purposes of forgery. The Government has not succeeded in enforcing the precautions which alone can render a monopoly successful.

MORE RUMOURS.

TELEGRAMS from London to the *Fiji Shimpō* are of a somewhat contradictory character. The *Figaro* is quoted as saying that Russia is prepared to withdraw from Manchuria all troops except those guarding the lines of railway, and that if Japan evacuates Korea in a military sense, Russia will abandon her rights there. The *Cologne Gazette*, on the contrary, alleges that the Russian Government's views are entirely opposed to the settlement of foreigners in Manchuria in its present disorderly condition, and that fully six years must elapse before such settlement can be safely permitted. That, of course, would involve six years' postponement of the opening of Mukden and Ta-tung.

Neither of these statements commands immediate credence. With the exception of a maximum force of 200 gendarmes stationed at various points along the Japanese line of telegraph from Fusan to Seoul, Russia has conventionally exactly the same right as Japan to post men in Korea. That is distinctly stipulated in the Memorandum of May, 1896. It is unjust, therefore, to speak of a Japanese military occupation of Korea, or to compare the maximum establishment of 800 men that Japan is entitled to keep in that country, with the tens of thousands that Russia, in defiance of her treaty engagements, is keeping in Manchuria. Still more unjust is it—so unjust as to be almost

ludicrous—to cite as parallel concessions the abandonment of Russia's military rights in Korea and the abandonment of Japan's military rights. Japan has 23,235 subjects in Korea, engaged in all kinds of trades and industries and possessing substantial vested interests. It may be doubted whether excluding the Yalu Valley, Russia has two score subjects in the whole empire, and their share in its commerce and manufactures is practically *nil*. The Memorandum of May, 1896, deals explicitly with the question of protecting Japanese and Russian Settlements, and for the purposes of such protection provides that two companies of Japanese troops may be stationed at Seoul, one at Wonsan and one at Fusan, Russia being entitled to adopt the same precautions. Russia's title under this Memorandum remains to the present day a dead letter for the obvious reason that she has practically no settlements to protect, and it is plain that were she to offer, as the *Figaro* apparently reports, that she, on her side, will abandon her rights under the Memorandum on condition of Japan doing the same, the proposition would be glaringly unjust, for it would require Japan to withdraw all protection from her twenty-three thousand subjects while Russia would be withdrawing protection from her twenty or thirty only. This, too, in the face of the object lesson just furnished by Russia herself in the Yalu Valley, where for the protection of such an innocent occupation as timber felling, her first economic enterprise in Korea, she has considered it necessary to employ troops.

As for the *Cologne Gazette's* version, though much more credible than that of the *Figaro*, it represents Russia in a peculiar light. Her statesmen are said to claim that Manchuria is not fit for foreign residence and that it will not be fit for at least six years. What has that to do with Russia, however? When did the duty of policing Manchuria devolve upon her? When did she receive from the Powers a mandate to determine Manchuria's fitness for foreign trade, travel and residence? And does any one deliberately venture to assert that it is Russia's object to make Manchuria fit for such things? Talk of that kind is the purest persiflage. Besides, we may reasonably inquire why and how this disorderly state of affairs overtook Manchuria. China proper has been restored to her normal condition. With the exception of the metropolitan province, concerning which, as it is in foreign military occupation, nothing can be said, every part of the country seems to be as quiet and peaceful as it was before the Boxer troubles. The disturbance produced by those troubles in Manchuria fell far short of the disturbances produced in Shansi and Honan, yet Shansi and Honan are considered not less safe for foreign residence than they were prior to 1900. It would seem a not unreasonable inference that if Manchuria is still disturbed—of which there are no apparent evidences—the fact is rather due to Russian military occupation than likely to be

corrected by the presence of her troops. A six years' limit assigned on such grounds would be comical. Were we Russians we should feel that our Government committed an irrevocable blunder when it fixed a time for evacuating Manchuria. The new programme assigned to St. Petersburg by the *Cologne Gazette* would be a continuance of the same impossible policy. It would be merely sowing the seeds of a fresh crop of violated engagements.

A DECISIVE STEP.

THE *Japan Times* has of late stoutly advocated the despatch of a strong Japanese military force to Wiju for the protection of Japanese life and property and Japanese rights in that region. The *Kobe Chronicle* retorts that such a step "would form a flagrant violation of the KOMURA-WAEBER Memorandum." It appears to us that this interpretation of the Memorandum is altogether contrary to its explicit terms. The Memorandum provides for two things in this context. It provides for "the protection of the Japanese telegraph line between Fusan and Seoul" by an ultimate force of gendarmes not exceeding 200 men, and it provides for "the protection of the Japanese settlements at Sebul and the open ports" by a maximum force of four companies of soldiers not exceeding 200 men each. In other words, the Memorandum arranges for a Japanese garrison of fixed maximum strength in certain places, pending the re-establishment of such a state of good order as shall enable that precaution to be dispensed with, Russia also being entitled to take a similar military measure. We fail to see what such stipulations have to do with an emergency, and we fail further to see how they can be held to be binding on one only of the high contracting parties. If the Memorandum makes it illegal for Japan to send troops to Wiju, did not Russia violate its terms when she sent troops to Yong Am-pho, however small their number? At all events, what the Memorandum explicitly refers to in the matter of these gendarmes and troops, is "the present state of affairs in Korea" in the first place, and "protection against possible attacks by the Korean populace" in the second. The despatch of a Japanese force to Wiju, as recommended by the *Japan Times*, would not be in any sense by way of "protection against possible attacks by the Korean population." It would be by way of protection against aggression from without. We find it difficult to conceive anything more unjust than the *Kobe* journal's rendering of the Memorandum, and assuredly such a rendering can not be reconciled for a moment with any sentiment of sympathy with Japan in her serious difficulties. Russia is one of the parties to the Memorandum. Yet it is gravely contended, in effect, that Russia may flagrantly disregard the *Kobe* journal's interpretation of the document while Japan is to be held strictly to its terms *vis-à-*

vis Russia. For if the Memorandum forbids Japan to station more than 800 soldiers in Korea, does it not equally forbid Russia to station thousands of soldiers at points where their presence constitutes a virtual occupation of the whole Yalu Valley? Russia has deliberately created on the Yalu, a situation entirely independent of the KOMURA-WAEBER Memorandum, and to contend that Japan, in dealing with this new situation, must be tied by an imaginary rendering of the document, a rendering not warranted by its explicit terms and if warranted, then already violated by Russia, is to lay down one of the least reasonable propositions ever advanced by a publicist. We are not arguing in favour of the proposed despatch of troops by Japan as an immediate step, but we certainly do think that she should hold herself in readiness to take such a step at a moment's notice. The Powers will not consent to see a Russian ring fence drawn round Korea. They look to Japan to keep the peninsula open to their trade, and if she palter with the obligation she may easily lose her mandate, to say nothing of the enormous interests she herself has at stake. Here, however, our object is to protest most emphatically against the astounding doctrine advanced by the *Kobe Chronicle*, a doctrine irreconcilable equally with the terms of the Memorandum, with the supreme law of every State and with the most ordinary dictates of friendship towards Japan.

CHURCH NOTES.

[WRITTEN FOR THE "JAPAN MAIL."]

Further details which have come to hand with regard to the Declaration of the 4,000 Clergy reveal the fact that only to a very limited extent has it served its purpose as a flag to which all law-abiding Churchmen might rally. In his interesting and painstaking analysis of the first 142 signatures, our correspondent of Saturday last has shown that 46 are those of members of the English Church Union, 23 of the C.B.S.; and he has given some other figures of less importance. Unfortunately he has told us nothing about the other schools of thought which are represented on the list; so that it is impossible to judge whether or not we were mistaken in our conjecture that the Declaration would reflect the mind of the average Church of England clergyman.

What his figures do undoubtedly show is that a very considerable proportion of the High Church Clergy have refused to sign. Out of 142 names 46, say, roughly, one-third, are members of the E.C.U. (The other figures may be left out of account, as probably nearly all the members of the other societies mentioned would be also members of the E.C.U.) If the above proportion be kept up, only 1,300 members of this typically High Church Society have signed the Declaration, whereas some 2,600 must have declined.

What is the reason of this? For one thing there seems to have been a wide-spread disbelief in the utility of such pronouncements: and truth to say, they have been somewhat numerous of recent years, and not much good or harm has ever come of them. Another reason that has been mentioned is

that the Declaration was not sufficiently explicit: that it would mean one thing for one signatory and something different for the next on the list—which may be quite true, but scarcely seems an adequate reason for not signing. The Declaration asserts a unity of principle on the part of the signatories, the principle specially of a common loyalty to the Prayer Book. Such a consensus, resting on such a basis, might, even if particulars were for the time being set aside, have an independent value of its own: the question as to what that loyalty implied in detail, might be argued out subsequently on its own merits.

The High Church dissentients however for the most part have been content to hold themselves silently aloof. Not so the other side. Extremists of the Low Church party to the number of 16, headed by the three Deans of Canterbury, Peterborough and Norwich have signed a formal protest. They will have none of that toleration of divergent practice which the Declaration countenanced. The frank recognition of the Ornaments rubric as "a lawful inheritance in the English Church" seems to them to be fraught with the gravest danger of disruption. It is a little difficult to follow the reasoning here. Where differences are inevitable, if people will only agree to differ (and that is what the Declaration amounted to) they may still live on under the same roof. Separation would seem to be the inevitable result of each insisting *à outrance* on the assertion of his own assumed rights. And the separation of either of the two great parties in the Church of England from the other would be a blow such as it could scarcely survive and still remain what it is now, the generally recognised Church of the English nation.

Prebendary Webb-Peploe, whom we mentioned last week as having spoken strongly in favour of a "more scrupulous adherence, on the part of all Churchmen, to the directions of the Book of Common Prayer" has brought himself by some curious train of reasoning to join in the above protest. The Book of Common Prayer orders that "such ornaments of the Church and of the Ministers thereof, at all times of their ministration, shall be retained, and be in use, as were in this Church of England, by the authority of Parliament, in the second year of the reign of King Edward the Sixth." Now the second year of the reign of Edward VI. was the year of the First Prayer Book, and the Declaration simply calls for a frank recognition of "the whole ceremonial system which was lawful under the First Prayer Book of Edward VI." There is a verbal difference no doubt between the terms of the Ornament rubric and of the Declaration. One speaks of certain ornaments being "in use," the other of the ceremonial system which resulted from their use. But on the face of it, one would think that considerable mental ingenuity would alone enable a man strongly to support the one set of words and strongly to condemn the other. However, the intricacies of this subject, which the man in the street is only too apt to dismiss with an off-hand judgment of what he calls common sense, are so great that we do not doubt the Prebendary would be able to make out some plausible defence of an attitude which is to all appearances so self-contradictory.

But to return to the general question, what we may ask is the alternative to this "frank recognition" of a more elaborate ceremonial where particular congregations may desire it, which the Declaration insists on?

Simply we suppose that the Prayer Book and its formularies would have to be once again discussed in the uncongenial atmosphere of the secular Courts. The end of that no man can foresee. The experiment has been tried once and it was allowed on all hands to be a dismal failure. If this was the case some twenty years ago when the increased ceremonial had not attained to anything like its present widespread development, is there the slightest prospect that it would be any more successful now? Take for instance the question of the Eucharistic vestments. This is the Bishop of London's summing up of the matter before his Diocesan Conference some three months ago. "The phrase 'mass vestments,' he says "has no meaning; it is a uselessly irritating term. Everyone by this time knows the legal situation with regard to vestments. Apparently sanctioned by the Court of Appeal in 1857, indisputably sanctioned by the Court of Arches in 1870, condemned twice by the Court of Appeal in 1871 and 1877 at a time when less evidence on the subject was forthcoming than is forthcoming to-day, they would probably have been sanctioned in the light of the reasoning of Archbishop Benson's Court, if vestments had been in question in that suit. Every sensible Evangelical hopes devoutly that the question will never be raised in Court again, for this simple reason, that, if raised again, as a leading Evangelical said in public the other day, it is only too likely they will be declared compulsory; it is therefore, for everyone's interest to let the matter rest."

Fortunately these things are well understood, by those in authority at all events, in England now, so that the protesting sixteen are not likely to do much harm.

In this connection and in view of the recklessly prodigal use which some people make of the word "illegal," applying it, as one would imagine, to every bit of ritual of which they personally disapprove, it may be well to enumerate briefly a few points which have been finally decided. After many contradictory decisions in the secular courts on the numerous questions brought before them, at last in 1890 the case of the Bishop of Lincoln, who was accused of various alleged irregularities, was referred to the more expert tribunal of the Archbishop of Canterbury. The matters in question were: (1) Altar Lights. (2) The mixing of water with the sacramental wine. (3) The Eastward Position. (4) The singing of the Agnus Dei immediately after the Prayer of Consecration. (5) Making the sign of the Cross whilst pronouncing the Absolution and the Benediction. (6) The "Ablutions" at the end of the service. After an enquiry so exhaustive as to be to all intents and purposes final, all these practices and ceremonies were declared to be lawful excepting only (5) the sign of the Cross at the Absolution and Benediction. There was of course an appeal to the Privy Council, but Archbishop Benson's decisions were upheld on every single point, and the strict legality of the things in question has never since been questioned.

People who are really desirous of getting at the truth, will, instead of indulging in such a promiscuous use of the word "illegal," be thankful, we believe, for even this amount of certainty. For when we come to study the more recondite questions of vestments, incense and the like, we very soon are made aware that the law, as at present declared, is in a state bordering on the chaotic. We in Japan can better acquiesce, perhaps, in this state of things than people in England,

because, so far at least as the present writer is aware, these disputed "ornaments" are nowhere in use in any Church of England place of worship in this country. But in speaking of their legality the language of downright certainty as a rule is the mark of ignorance and is best left to the irresponsible partisan whose characteristic note, a somewhat truculent and dogmatic assurance of statement, none but the very simple will ever fail to detect.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

The *Fukuin Shinbō* publishes an account of the various attempts at uniting certain Protestant sects and the success which has attended the movement, supplied by Dr. Ibuka Kajinosuke, President of the Meiji Gakuin. The history given is too lengthy for full reproduction here, but we proceed to deal with it as fully as space allows. The headings given are those of Dr. Ibuka. (1) *History of the Movements in favour of Union.*—The desire for union among certain Protestant sects may be said to date from 1873, when the church known as the Nihon Kirisuto Kyōkai was founded in Yokohama. This Church had been Presbyterian in form and had been supported by American mission money, but it was considered desirable at the time to make it thoroughly Japanese and self-supporting. But there were foreign missionaries who did not agree with the action taken and who in Kōbe and Ōsaka founded Churches known as the Kumiai Kyōkai and Nihon Chōrōkōkai. At this time the Kumiai Kyōkai (now Congregational) adopted the Presbyterian form of Church Government, appointing elders and deacons. In 1875 there was much discussion among the churches on the subject of union, which culminated in a meeting of the Japanese and foreign leaders of the Congregational and Presbyterian sections at Kōbe the following year. On that occasion the former were represented by Messrs. Debs and Nijima and the latter by the Rev. J. H. Ballagh and Mr. Okuno. But the parties were unable to come to an agreement and the Presbyterians and Congregationalists each took their own courses. The following year (1877) a union of Presbyterian bodies took place and the new body took the name of the Nihon-Kirisuto-Ichikyōkai. The former Nihon-Kirisuto Kyōkai joined this church. In the year 1887 a movement began in favour of a union between the Presbyterian Churches. At first the prospects of success seemed very bright. The difference in church government and in doctrine between the two sects did not seem to be of sufficient importance to prevent a union. But after two years had been spent in negotiations the late Dr. Nijima and others opposed the union and the movement ended in a fiasco. At that time an amalgamation of various Methodist bodies was on the *tapis* , but, discouraged by the failure of the Presbyterians and Congregationalists, the Methodists decided to leave matters as they were for the time being. (2) *The reason for union and the tendency in that direction.*—I am a strong believer in the possibility of union. There is no doubt that Christ desires that his followers shall be joined in one body. Though there is difference of opinion on some points, in essentials the various Christians agree. In both England and America there is a strong movement in favour of union and we Japanese Christians ought not to be left behind in this matter. (3) *How can the desired union be best effected?*—It is perhaps superfluous to observe that for a union to last it must be a heart union and not mere conformity in ceremonies and the like. We have been informed that there are six Methodist bodies which propose forming one church. (4) *The supply of evangelists and union.*—All churches alike complain of the lack of suitable workers. It seems to me that we should aim at quality rather than quantity. The standard of education should be raised. The Meiji Gakuin, realizing this, altered its rules, making the preparatory course to extend over two years and

making a point of a student's being endowed with real ability before he is allowed to enter on the regular course. Our Japanese training colleges are, however, very imperfect and it is desirable that promising students should be sent abroad. We have made arrangements with several American Theological Training Colleges whereby our students may enter those institutions after finishing their course here. Two or three students were sent over to the States last year and two or three more are to go this year. Though some object to the importance we attach to a knowledge of foreign languages, yet considering how few good books there are in Japanese on Theology, ability to consult foreign textbooks is a *sine qua non*, if men are to keep abreast of the times. It is necessary that our advanced Theological students should be able to read and interpret the Bible in Hebrew and Greek. In the matter of translation alone it is most desirable that our pastors should be able to consult the original and decide on the interpretation to be given to passages. The work of turning out the class of men needed could be immensely facilitated by a general union of the sects in this matter. As things now are, much force is wasted in the maintenance of a number of training colleges for a very few students. All the Theological students and all the teachers in the country put together do not make a large number and far greater effectiveness and considerable economy would be gained by the sects' agreeing to unite their efforts in the training of pastors and evangelists.

In the *Taiyō* (No. 6) appears a long article from the pen of Dr. Inoue Tetsujirō on "Recent Ethical Questions." The questions referred to are principally two in number; viz., that raised by the text-book scandal and the action of the Mombushō in connection therewith, and that raised by the action of the Mombushō in the Tetsugakkan affair. In reference to the latter, Dr. Inoue says the course followed by the Department furnished an opportunity to politicians and to members of various religious sects to come down on the Department. But the attacks on the Department have been prompted by a variety of motives and are not characterized by impartiality. They may be all comprehended under three headings:—(1) It was said that the action of the Department was prompted by a desire to crush private schools; (2) that it was a piece of unnecessary interference with freedom of thought and inquiry; (3) that it was distinctly calculated to encourage pseudo-loyalty and pseudo-patriotism. Christians affirm, says Dr. Inoue, that true loyalty and true patriotism are only to be obtained by believing in their doctrines and represent themselves as possessing a monopoly of these virtues. But such statements influence few people. Furthermore, Christians assert that our ideas in respect to the honour due to the Sovereign need considerable modification; that our worship of the Emperor is idolatry; and that until we become more rational on this subject such incidents as the Muirhead text-book affair are bound to occur. Supposing this is idolatrous, have the Christians no idolatry among themselves? If they no longer worship stocks and stones, they hold certain notions of theirs founded on fancy or imagination in idolatrous veneration. Before they denounce Japanese for their feelings in reference to loyalty, they had better inquire into their own idol-worship. As regards the loyalty which is taught in our schools and which forms an important part of our educational system, it is more necessary to-day than ever it was . . . Christians boast that the political development of Europe was the work of Christianity, forgetting the part played in that development by Greek thought. Liberty, the rights of man, and the like, were the product of the revival of learning, that is, of the increased study of the great leaders of Greek thought. The same may be said of the development of science. In the Muirhead text-book affair it seems to me there are faults on both sides. The words, "So judged, the regicide for the cause of freedom would be condemned" . . . seemed even to clear-headed scholars like Messrs. Kunamoto and Maruyama as open to misinter-

pretation, as teaching that the end justifies the means, and hence Mr. Kumamoto thought it necessary to enjoin caution on the teacher who used this text-book. To say that no explanation of such a passage is necessary, as Mr. Nakajima did, was a mistake. In a letter which appeared in the *Kobe Chronicle*, written by Professor Muirhead himself, it is acknowledged that even in England, where the book in question is used as a text-book, considerable explanation of certain passages therein is needed. But on the other hand, the method of dealing with the question adopted by the Mombushō is open to criticism. It seems to me that the Government needs to exercise great caution in dealing with theories taught by experts and that in all such cases they would do well to consult specialists before deciding on any course of action. No ordinary official is competent to determine learned questions of this kind and to encourage interference on the part of such officials would only tend to obstruct free investigation and unwarrantably curtail individual liberty of thought. The attack on the Mombushō on account of the bribery which has been going on in educational circles has been characterized by singular narrow-mindedness. The universality of bribery and corruption is the result of the teaching of our modern utilitarians, who make a god of money. The western money-loving spirit has for a long time prevailed in this country among a large class of people. That school-teachers should be impervious to influences to which other sections of the community have succumbed was hardly to be expected. The root of the evil is in the new ethical code which is so earnestly preached by certain leaders of modern thought.

* * *

"To preach the Gospel is to preach Theism," is the title of an article in the *Nichiyo Sōshi* (Protestant Episcopalian) in which the writer says: Though we are accustomed to speak of "preaching Christ," or of "preaching Christ crucified" it is quite plain that the majority of Japanese are not at all ready to receive our teaching about Christ. We have to go further back and preach the existence of God, or at any rate Monotheism. This was the way St. Paul preached the Gospel at Athens, and the attitude of the Greeks in Athens to his message finds its counterpart in the attitude of modern Japanese to our doctrines. The majority of intelligent Japanese are atheists, pantheists or agnostics (*Itshiki shakai no hito wa mushinsetsu ni arasareba Pantheism nari; shikarasareba fukashigiron* (不可思議論) nari. A section that believes in one God is found going hand in hand with pantheists. Even the belief in the immortality of the soul is mixed up with discordant elements. But the majority of the nation is given to idolatry of one kind or other. To be preaching such a doctrine as the Divinity of Christ to minds so ill-prepared to receive teaching of this kind is worse than useless. So it comes to this that what it is most necessary to preach to-day is Theism (*Dendō to iu mondai wa yūshin ron to iu mondai nari.*)

* * *

Ippo wa tenzō (A Change is Needed) is the title of a short article in the *Gokyō* (Methodist) of which the following is the substance:—It is to be expected of the Church that it should be able to provide for the spiritual wants of mankind in some way or other. The failure to attract people to our preaching places is something which demands inquiry and self-examination on our part. The leaders of the movement known as the Taikyō Dendō seem to think that if they only shout the word "revival" loud enough people will assemble in large numbers to listen to what they have to say. But discerning folks are not to be drawn by any such methods. To proclaim the fall of man and the doctrine of the atonement will lead to repentance and faith, say some very simple-minded people; but such doctrines are treated with the greatest indifference by the majority of those who attend preaching services. To say that men's hearts and thoughts are the same everywhere and in all times shows great ignorance of facts. Gospel messages that attracted people in days gone by attract no

longer. Our modern world is quite different from the ancient world. This keeping to the old methods of preaching the Gospel is largely responsible for the stagnation in our work. If the message had the attraction for people which it is alleged to have we should have people flocking to our houses for instruction. But there is none of this. The few who do come too often show signs of weariness and leave us. Therefore we need to hit on some new method of reaching people. (*Shūkyō wa nyetaru ga gotoku motomuru hito-bito ga angwai ni kyōkai no mon ni deti sazu. Sekkaku kitaritaru mono mo tachimachi umite saru no rei sukunakarazu. Kyōkai ga nani to ka ippo wa tenzōru-bekarazuru no toki kitaritaru mono to iubeshi.*)

* * *

Among religious magazines there is no more faithful, fearless, honest exponent of Japanese thought and what it deems defects and weaknesses than the Greek Church organ the *Seikyō Shimpō*. In No. 538 we find an article entitled "Ah! Kōtoku naki Kokumin!" (Alas! a people without any public spirit). Last year, says the writer, a certain newspaper started to write on the necessity of more public spirit in modern Japan. The idea took hold of a number of other journals and for some months it was *kōtoku* (public spirit) here and *kōtoku* there. I rejoiced over the change, but I now perceive that the prominence given to this virtue proceeded from a mere passing wave of sentiment and represented no wide-spread conviction as to its importance, for to-day one looks in vain even for the word *kōtoku* in the daily papers and other periodicals. As for improvement in practice, one seeks for it in vain in the railway-train, at stations, public parks and such places. We boast of being a nation which has a high regard for ceremony and so on, but in the behaviour of the general public to persons who are unknown to them there is as a rule no sign of refinement or of proper feeling whatever. Among the abuses enumerated by the *Seikyō Shimpō* as of everyday occurrence are plucking flowers in public gardens, idle scribbling in noted places, the stealing of wine-cups at *sakamori*, disregard of time when unpunctuality causes others great inconvenience, utter disregard of such police regulations as have the public welfare and comfort as their chief object, such, for instance as keeping to the right side of the road. The writer is most despondent and thinks that in some particulars the nation is incurably lard. He ends with the words, *Jitsu ni nibuki nōzui mukankaku no tami nari.*

The same magazine gives an account of the opening of a new church in Kyōto by Bishop Nicolai. On that occasion the Bishop gave a short history of the work of the Greek Church in that city, which we epitomize here. The evangelistic work of the Greek Church in Kyōto was begun ten odd years ago. But at first, for reasons which must be apparent to everybody, we made little headway. But last year our register showed that we have 102 converts living in 28 different houses. The increase in one year, reckoning for the year before last, was 24. Seeing that Kyōto is a great centre of Buddhism and also a great centre of civilization, we thought it important to erect a cathedral here and for this purpose have collected large sums of money from our Russian friends. The *Seikyō Shimpō* informs us that the building is wooden, that its form is that of a cross, that it is over 11½ *ken* in length, 5 *ken* = *shaku* at its broadest part and 14 *ken* in height. The foundation is of granite, the roof of copper, and it has accommodation for 600 people.

* * *

Sekai Sanseiron (三聖論) "The Three Sages of the World" is the title of a work published by the Bunyēikaku, Hakuya-chō, Nihonbashi, Tōkyō; the author of which is Mr. Takahashi Gorō. The book aims at showing wherein Shaka, Confucius and Christ specially excelled, and gives an account of their influence on mankind. The price is 40 *sen*. A work bearing the same title and dealing with the same subject on somewhat different lines has been published by the Shōyōeidō, Tachibana-chō, Nihonbashi, Tōkyō. Mr. Nakanishi Ushirō is the author of this work,

and it contains a preface by Dr. Inoue Tetsujirō. The price is 30 *sen*.

* * *

The *Chūō Kōron* (No. 7) writes in favour of the observance of Sunday as a religious festival even by non-Christian sects. In the opinion of this organ the present practice of using the day as an opportunity for general holiday-making is injurious to public morals in many ways. Since all Government offices are closed and a great many business houses as well, Shintōists and Buddhists would do well to hold special services on those days, and even in the case of people who belong to no religious sect it would be well if they were to organize lecture-meetings and the like on that day. The writer refers to London as a model in the matter of Sunday observance, contrasting it with the capitals of Roman Catholic countries, where, after the morning services are over, people devote their time to pleasure-seeking of various kinds, and he seems to think that the Londoners devote the day to God's service. Japanese homes, says the *Chūō Kōron*, are spoiled by the manner in which the heads of families spend their Sundays.

In the same magazine under the title of "Christian Formalism," Mr. Masaoka Gieyō pens a scathing criticism of the flippancy, irreverence, and claptrapism of certain leaders of the 20th century evangelistic movement known as Taikyō Dendō. He begins by quoting the words of Christ:—"Take heed that ye do not your alms before men to be seen of them: otherwise ye have no reward of your Father which is in heaven." He charges certain leaders of the movement in question with hypocrisy. In the first place, says Mr. Masaoka, why should such a fuss be made over the change of century? Was not evangelistic work needed just as much in the 19th century? Does this loud blowing of trumpets, do these vulgar demonstrations show real faith in those who take part in them? Is this the way that the religious movements which have left a lasting influence on mankind began? Did John Wesley begin his work thus, or the son of the poor miner of Eisleben? When we find pastors shouting at the top of their voices:—"Hold up your hands, you who repent! I ask for one hand; that will lead to 20 more!" we are reminded of cheap-jacks and auctioneers. What value is to be attached to even hundreds of people obtained in such a fashion? There are not wanting abundant signs that the Church to-day has sunk into lifeless formality. When people have to be urged to pray and urged to confess their sins in the way that is common in some churches, it is plain that the whole thing is a sham, an outward show, a make-believe. It is because of this that such strange words as the following reach our ears:—"I am a Christian; but I belong to no Church." It is the feeling that so much which goes on in churches is mere hollow formalism which has driven some of the best Christians in the country to give out publicly that they have severed their connection with the Christian bodies to which they once belonged. Such are Shimada Saburō, Tokutomi Iichirō, Takenokoshi Yosaburō, Kanamori Tsūrin, Ichihara Morihirō, Uchinura Kanzō, and others that could be mentioned. The men who are responsible for the adoption of the flippant methods above-named and for a display of insincerity which has driven people away from the Church, may call themselves pastors of Christ, but in reality they are His betrayers. (*Karera wa Kirisuto no hoku to shō suredo; sono jitsu, Kirisuto uro uro mono nari.*)

* * *

"Under-currents of Thought in the Young Men's World" is the title of a discerning article which appears in the *Shinjin* (No. 7). The late Dr. Takayama Rinjirō, says the writer, was a type of young man which the times have produced by the hundred. He felt keenly all the storm and stress of this age of doubt and gloom. There was a time when it seemed possible that he might find consolation in religion, when he gave expression to the aspirations of young men generally in that essay of his entitled *Jidai no Yōkyū* (The Great Want of the Times). But that which he sought for he failed to find. His whole sky was clouded over with doubt, and

he died a pessimist. (1) The present is an age of mental distress, discontent and solicitude (*Ima wa hannon no jidai nari, fumanzoku, fuanshin no jidai nari*). We see it in the political world; we see it in the business world. Young men are specially influenced by the spirit of the age. What is the cause of the existing depression? No other than the total lack of great men. Where is the man nowadays who for the sake of his convictions is prepared to forego royal rank, forsake wife and children and meditate till he reaches that state of profound intelligence known as 正覺 *Shōgaku* (applied specially to the state reached by Shaka)? Where even is there a man who thirsts for knowledge so eagerly that he is prepared to sit outside the study of a great sage three days and three nights waiting for admittance? (2) Were there more earnestness than now exists, men would not rest contented till they found peace of mind. To give way to despair is not to be commended wherever it may be found. Yet among the under-currents of thought in the minds of young men of to-day, pessimism and gloom are most manifest. Not knowing of any better palliative, many a young man drifts into sentimentalism. The nervous system, the emotional nature of our modern young men are certainly in a very unhealthy state. A great deal of it is physical no doubt. In our religion, as in our literature, there is a deal of sentimentalism. Another under-current of thought is the resort to criticism. Unemotional natures amuse themselves by criticizing in a free manner anything and everything that comes in their way. Now, from the point of view of religion, excessive development of the critical spirit is a hindrance to faith. *Ichinen Senji* (一念專住), single-minded, unmovable steadfastness is what is most to be desired in religion. What we need is a faith that no criticism of any kind can move. Free and irresponsible criticism is not to be encouraged. Sentimentalism ends in infatuation, superstition and bewilderment. Criticism usually ends in doubt and perplexity. Dangerous indeed are the prevailing under-currents of thought in this country! They may be traced to various sources, to education, to the ethical standards of society, to lack of the right kind of home influences, and, more than all, to the confused state of religious thought at the present time. In Germany at the beginning of the 19th century the age of *sturm und drang* was followed by a period of great enlightenment and those flowers of the nation, Goethe and Schiller, burst into bloom. We are passing through a dark period like that described in Goethe's "Sorrows of Werther." My advice to young men is, turn away alike from sentimentalism and criticism and develop your higher faculties.

* * *

In the *Shin Bukkyō* (New Buddhism), the well-known Zenshū priest, Shaku Sōen, writes on "The Religion of the Future" in the following manner:—Religion rests on absolutism, and hence its deeper parts can't be expressed in words. Up to a certain point only it can be explained and it is hardly necessary to say that the expositions given of it should be logical. This condition is fulfilled by our Buddhist Pantheism, but it is not fulfilled by Monotheism, which may be pronounced an "irrational creed." Religious belief must have a rational basis and, moreover, the belief of individuals must be independent, resting on inherent personal conviction, and not on ex-

(1) It is perhaps true to say that few modern writers have exercised more influence on young men than the late accomplished editor of the *Taiyō*. His extreme earnestness and outspoken honesty added to a most fascinating literary style largely account for his great popularity. (WRITER OF SUMMARY.)

(2) The reference is to Banzan, who was so anxious to be taught by Nakae Tōju, the great sage of Ōmi, that though constantly refused admittance, he spent three days and three nights under the eaves of Tōju's house and at length prevailed on the latter to give him instruction. Tōju, it will be remembered, was a philosopher of the Wang Yangming school of philosophy. A full account of his teaching and life will be found in Dr. Inoue Tetsujirō's learned work on the "Wang Yangming School of Philosophy" published a few years ago and fully reviewed in the *Japan Mail*. (WRITER OF SUMMARY.)

ternal authority. It is one of the fundamental principles of our sect that liberty of belief should be allowed to each convert and anything like dogmatism, an attempt to compel men to bow to authority, is denounced among us. Free inquiry and liberty of choice are fundamental principles of our sect. But though men must use their reasoning faculties in determining what they are to believe, reason is not faith. Belief proceeds from intuition rather than from reasoning. . . . To come to other matters, it seems to me that in the case of persons who intend to devote their lives to religious work as priests or ministers of religion, wives and children are a distraction and a hindrance and that therefore the rule of celibacy has a rational basis. . . . Ethics is not religion, and never can altogether take its place. No education can be complete without some religious teaching.

* * *

Under the title, "A Phenomenon Involving Great Contradiction," the *Kōyō* (R. Catholic) says: In respect of secular knowledge people are rather ashamed of ignorance and try to hide it as much as possible; but when it comes to religion many people glory in ignorance. The questions, whence are we, and whither do we go? are left unanswered by most people. They are content not to know. Take the leading journals of this country. While various writers use them as a means of displaying their knowledge of sundry subjects, most of the magazines and newspapers openly confess their ignorance of God. In the estimation of a large number of educated men the term "agnostic" has more honour attached to it than the word "scholar." There are not a few people who utterly ignore the fact that God has given a religion to mankind, who make no attempt to acquire religious knowledge, who glory in their ignorance. In thinking well over this phenomenon we have come to the conclusion that it shows not only defective endowment, but it indicates that the lord of this world of whom Christ spoke (Satan) has established a strong connection between himself and certain souls. (*Kono genshō wa "Gense no O" to yobitaru akuki to kureru no reikon to no aida no tsuyoki rengō wo shimesu mono ni arazaru ka?*)

The *Kōyō* publishes a full abstract from last year's report of the Roman Catholic Foreign Missions in the East; from which we collate the following:—Stations, 32; Bishops, 35; Missionaries, 1,236; Deacons, 1,236; Evangelists, 2,357; converts, 1,300,491; baptized last year 214,559; received from other sects 398; total increase of converts over last year, 17,257; number of baptisms in excess of those recorded last year 4,116. The report for Japan for 1902 is as below.

	No. of Converts.	Tōkyō, 9,541.	Naga- saki, 39,405.	Ōsaka, 3,702.	Hako- date, 4,743.	Totals, 57,195.
Bishops.....	2	1	1	1	5	
Foreign Missionaries.	35	32	28	23	118	
Japanese Priests	4	25	2	1	32	
Evangelists.....	22	185	40	20	267

BAPTISMS.

	Tōkyō, 695.	Naga- saki, 1,437.	Ōsaka, 81.	Hako- date, 58.	Totals, 1,676.
Adults	695	578	228	175	1,676
Children of Converts.	202	1,437	81	58	1,778
Children baptized at the point of death..	318	626	331	385	1,660
Adults baptized at the point of death	416	180	94	121	811
Received from other sects	6	1	5	2	14

The Mission has Kindergarten and other schools, orphan asylums, and hospitals. The baptisms were 723 in excess of those of 1901.

DEATH OF MR. R. A. MEES.

We regret to announce the death of Mr. Rudolphe Adrian Mees, which took place on Monday morning at his residence in Sakuragicho, Yokohama. The deceased gentleman, who had attained his 67th year, was one of the oldest residents in Japan. He came out from Rotterdam (his native city) in 1865 being at first connected with Adrian & Co., and later with the Netherlands Trading Society, which

he represented in Niigata. He then returned to Yokohama, and entered the employment of Messrs. J. Ph. von Hemert & Co., after quitting which he entered business for himself. Latterly and up to his death he was Secretary of the Swiss Consulate-General in Yokohama.

Mr. Mees had not been in good health for some time and on Monday morning he was found hanging by a silk cord in his house. His servants sent out for official assistance but foolishly refrained from at once cutting him down, though it does not appear that they could have saved his life even if they had acted promptly. It is stated that they had been alarmed by his actions on Sunday and watched him carefully, but after three o'clock on Monday morning their vigilance seems to have been relaxed and they woke up four or five hours later to find that what they were guarding against had taken place. Mr. Mees was well known among the foreign community, by whom general regret will be felt at the removal of so old and respected a resident.

"BORN IN JAPAN."

In the Inter-Scholastic Boat Race on the Charles river, between Cambridge and Boston, in May last, the Cambridge Latin School crew won a grand victory. The *Cambridge Democrat* remarks "that great credit is due to Captain Paul Gring, who set to work with a will at the beginning of the season when encouragement was slight and candidates few, determined at least to equal the showing made last year. Capt. Gring is a grand, good fellow. He not only led the Cambridge School to victory, but smashed all previous records of the Race, doing a mile in 5m. 33.4s.; old record, 5m. 42s.

"The Cambridge Latin School therefore, for the first time, holds the Cup. The Boston Athletic Club presented the Captain with a fine Cup for his personal use in honour of the victory.

"Captain Gring's brother, Brainerd, junior in Harvard University, in his first year stood first in his class, of between four and hundred in point of strength, by two hundred points, and stood third on the test of the strongest College boys in the U.S., Arthur Tyng, another Japan born boy, standing first. In his second year he won his position on the University team as the highest pole vaulter, 11 feet, and accompanied his team to both the Yale Annual University meet and the Inter-Collegiate meet in New York. Their oldest brother also has been a regular student of the University of Leipzig for the last two years. At Harvard, and perhaps at Yale also, entrance into the University team is conditioned upon their standing in with University class-room work. All three boys were born in Tokio. These achievements of Japan born foreign children adds but another ray of glory, won by other boys and girls from Japan in various Universities, Colleges and Schools." All honour to our boys and girls, who have done so much to keep up the credit of their parents and of Japan, the land of their birth. One of our girls has just won her school prize for fencing.

CUSTOMS DECISION.

The Superintendent of the Yokohama Customs delivered on July 21st a decision in the matter of a protest filed by the American Trading Co., No. 28, Yokohama. The firm imported accessories of printing machinery which consisted of elastic material and cotton cloth, with a certificate of origin, on which the appraisers of the Customs imposed *ad valorem* duty of 15 per cent under No. 377 of the Tariff. The firm protested contending that the duty should be imposed at the *ad valorem* rate of 5 per cent, under clause 12 of No. 17 of the tariff which refers to the conventional tariff between Japan and France. The superintendent did not sustain either the protest or the original imposition, and decided to impose on the goods in dispute *ad valorem* duty of 10 per cent under clause 1 of No. 17 of the Tariff on the ground that the parts of printing machinery could not come under the provisions of clause 12 No. 17 of the Tariff.

THE BOOKSHELF.

The Wind in the Rose Bush, by MARY E. WILKINS: London, John Murray; Yokohama, Messrs. Kelly and Walsh, Ltd.

THE appetite for the abnormal is a craving that must afflict a very large proportion of the novel-reading public to judge by current booksales. To people so disposed, and to these people alone, can we recommend the collection of stories which Miss Mary Wilkins now gives to the world. Of course they all deal with New England scenes and depict New England ways and habits of thought as only Miss Wilkins' pen can do, but each and every one centres round the uncanny: the weird agitation of a rose bush when everything else is enveloped in a deathly calm; shadows cast on a wall foretelling, or signifying, the death of two brothers; the strange succession of deaths which followed the marriage of Luella Miller; the stranger apparitions and happenings in the south-west chamber of an old New Hampshire mansion; the mysterious noises, sights and processions which proceed from a vacant lot in a certain portion of Boston; and most gruesome of all, the tale of a Lost Ghost—the disembodied spirit of a little girl who was locked up in her bed room and left to starve to death—these are the supernatural subjects of Miss Wilkins' latest fancies, and though all are cleverly told we cannot help thinking that the sooner they fade from recollection the better.

Service and Sport on the Tropical Nile, by Capt. C. A. Sykes, R.H.A.: London, John Murray; Yokohama, Messrs. Kelly and Walsh, Ltd.

CAPT. SYKES is a soldier and he tells his tale in a soldierly fashion—to the point and stripped of all unnecessary redundancies. Yet the volume is very fascinating for all its simplicity and one gets a better idea of what manner of man the author is, what were the materials with which he did his work, and what are the general characteristics of the country around the sources of the Nile than many a more pretentious volume gives, be the "purple patches" of the more fluent book-maker never so frequent. Capt. Sykes entered Uganda towards the close of 1897 on special service, and so hurriedly did he have to move to the front that he had no time to wait for his baggage. "What this meant, can be guessed when I say that my baggage contained two years' provisions, my rifles and ammunition. It meant consequently that during the greater part of my time on the Nile, I never saw a whisky and soda, nor a loaf of bread, and I had to face the pachyderm with nothing but a '303 rifle or such rusty old Martinis as had for generations been served out to the troops." Nevertheless our author had a happy time, cheerfully putting up with discomforts, bouts of sickness, and the thousand and one hardships of a pioneer without a thought of grumbling; but treating even the worst misfortunes as merely incidents in the day's work. It is of such good stuff that the British empire builders have ever been made, and it helps to explain why their labours, on the whole, have been crowned with success. Capt. Sykes has an excellent eye for the beauties of nature and many glimpses are given in his pages of the picturesque scenes to be encountered upon the great inland seas which we know as the Victoria Nyanza and the Albert Nyanza. Of the surpassing loveliness of Mount Kilima Njaro he says—"Kilima Njaro stands on

a pedestal of some 2,000 feet and raises its 20,000 feet sheer from this. The last few thousand feet are covered with eternal snow which glitters in the fierce sunshine and delights the eye with every kind of lovely hue." Feeling that this description is all too bald, the author inserts a picture of the mountain drawn by Major E. A. P. Hobday, R.F.A., which marks it out as being one of the most glorious sights in the world. On his way to the Nile, Capt. Sykes had to pass through some severe variations of climate:

Marching on, we crossed the Mau Plateau, and all felt the intense cold at night so much that we had a fire at each end of the tent. I personally slept in two shirts, a sweater, coat, greatcoat, four blankets over me and four under me! Even then, I awoke occasionally with the cold; and this was on the Equator! The altitude was considerably over 8,000 feet, and water was frozen on the surface most nights. The contrast between this cold and the hot midday sun was trying to the unaccustomed.

Captain Sykes waxes enthusiastic over the Soudanese soldiers who were under his command. He says:

They are gifted with a delightful cheerfulness, under the most adverse circumstances, and are the most thoroughly professional soldiers I have ever met. When recruits are wanted, it is only necessary to walk through their village and select the most likely looking youngsters. You find them ready made soldiers, for the children drill each other as soon as they can walk, and I have often seen one child manœuvring about several smaller children. He will first form them up, give general instructions and see them carried out, hiding his squad for slackness or inattention, all with the serious air of his father. They are first enrolled on half-pay until they are efficient as trained men, when they receive full pay. They are excellent tailors and make their own undress clothes and under-clothing; they make their own shoes; they build their own houses; they till the soil and are first-rate agriculturists. They thoroughly understand the farmyard, a most useful accomplishment, and are equally at home in the garden. In a company one can always find a good shikari, capable of guiding without ever losing himself, and of tracking intelligently, for they have the eye of the hawk and a very keen sense of hearing. Curiously enough their sense of smell is very weak, a blessing for them, for in Africa that sense is more often offended than pleased. They are as a rule devoted to their English officers, who in their turn become equally fond of them; but with all this, when their blood is up, they can be as cruel and inhuman as the veriest savages. * * * * *

I knew one officer whose men loved him so much, that one of them offered all his pay as a gift if he would only return to them, and when he lay seriously ill, his two native officers took it in turns to sit at his door for the purpose of keeping out Death.

Of course there were drawbacks connected with even such admirable soldiers as the Soudanese. Pay day, for instance, must have been approached with much misgiving by the white officer.

Private Murjan Timsah would come forward for his monthly 22½ rupees. All the various wares were spread out—the beads, the wire, and the many-coloured cloths. Wondering whether yellow or red better suited Mrs. Murjan's particular style of beauty, he would stand and scratch his head for some minutes, and eventually he would probably take a pound of beads (valued on the Nile at 2 rupees 8 annas), 4 lbs. of brass wire at 2 rupees a lb., 5 rupees' worth of cloth, and the remainder in specie. Then one would gasp for patience and face the remaining 120 of the company.

Very bright and entertaining are the author's descriptions of various African potentates and their wives whom he had to visit in the course of his service on the Nile, but we have no space to quote them. The rigours of work were occasionally relieved with leave for sporting expeditions, and Capt. Sykes had the pleasure of bagging a couple of elephants, some hippopotami, a rhinoceros or so, and some of the large antelopes. To his regret he never got a chance at potting a lion. Once, venturing too rashly, he was nearly hurried out of life by elephants, the herd stampeding directly for him, but he managed to jump down a nullah just in time

and the arrival of his escort completed his rescue. Most amusing are our author's experiences as an Æsculapius and strange were the prescriptions he concocted, but luck seems to have been with him and his reputation as a cure-all grew with the flight of days. Many and curious were the strange things that fell under Capt. Sykes' observation. At Lango, for instance, he made acquaintance with "baby-houses."

There are generally a row of them, raised about six feet off the ground. They are about the size of a bee-hive, with a small hole for an entrance, through which the unfortunate baby is thrust; the exit is closed, and the baby ceases to annoy. There are truly some funny people in this world; but I suppose, all mothers get sick of their babies at times; and this was a most effective method of getting rid of them. The babies seemed to realise that in these hutches there was peace, for they did not cry inside them. I suppose they discovered also that tears would be idle.

We have quoted sufficiently to give readers an idea of the simple charm of "Service and Sport on the Nile," as well as conveying an idea of the wide range of subjects which it embraces. We can heartily recommend the book for perusal. A word of praise should be given in closing to the illustrator, Major Hobday, who has interspersed the text with a series of most interesting pictures.

LAW CASES.

CLAIM FOR CANCELLATION OF SEIZURE.

In the Tokyo District Court, the hearing of this case, instituted by Mrs. Yuki Nakamura against the Etablissement Orosdi-Back, No. 78, Yokohama, claiming cancellation of seizure with regard to certain property as to which action was adjourned on July 17th, was to be resumed on August 3rd.

JARDINE MATHESON & CO., v. NIPPON KENMEN BOSEKI KAISHA.

The hearing of this action brought by Messrs. Jardine Matheson & Co. against the Nippon Kenmen Boseki Kaisha, Hodogaya, (Japan Silk and Cotton Spinning Co.) asking for a decree of bankruptcy, began in the Yokohama District Court before Judge Kano on August 3rd.

Messrs. R. Masujima and M. Hiraoka were present for plaintiffs and Mr. Inoue for defendants.

Plaintiffs' counsel stated that defendants owed yen 120,000 on June 20th, 1901, to the plaintiffs' which debt the former promised to repay back after two years, viz, on June 20th, 1903. After the due day had passed, defendants frequently asked plaintiffs, to postpone repayment or to reduce the debt or to take the properties of the mill instead of the debt. These requests were not suitable to the plaintiffs at all. On May 25th this year, a committee elected among the shareholders of the defendant company declared that its total debts to various creditors other than Jardine Matheson & Co. were yen 409,118.90, and the value of the whole property was only yen 185,700. The claim for bankruptcy was unavoidable, to obtain repayment of the debt.

Defendants' counsel contended that the company owed some money on the purchase of waste cotton and other materials from plaintiffs, but no such debt as was claimed by plaintiffs.

The parties introduced evidence and gave explanations to the Court, after which counsel entered upon a brief discussion.

The Judge then advised the parties to settle the action out of Court. No decisive answer was given by Counsel.

The suit was adjourned till Aug. 5th, when the decree asked for was granted.

MOURILYAN HEIMANN & CO.'S BANKRUPTCY CASE.

In the Yokohama District Court, the hearing of the case of the bankrupt estate of Messrs. Mourilyan Heimann and Co. was resumed before

Judge Kano on Aug. 5th, when Mr. E. C. Davis was examined as a witness. The witness stated that he had no connection with Oshikawa, Hayashi and Miida, who are creditors of the bankrupt firm. He had an interest in the case. After the usual affirmation he said that after the coming into force of the contract which Messrs. Samuel, Samuel and Co. had concluded with the Formosa Government the value of the camphor transaction amounted to yen 5,951,968.81, on which business, a profit of yen 57,330.63 was realised. After the decree of bankruptcy of Messrs. Mourilyan, Heimann and Co., Messrs. Samuel Samuel and Co., paid to the bankrupt firm yen 7,657.30 on July 18th, 1901, yen 2,556.91 on Sept. 17th in the same year and yen 4,000 on Jan. 31st, 1902, their share of the business. The actual amount payable to Messrs. Mourilyan, Heimann and Co., by Messrs. Samuel, Samuel and Co. should be one-eighth of yen 57,330.63 in accordance with the contract between the firms.

Mr. Sato, barrister, representing one of the plaintiffs (creditors of the bankrupt firm) introduced in the Court a document which, he stated was made by Mr. M. H. R. Harris of the bankrupt firm, but the evidence proved to have no signature. Counsel also presented a copy book in which several copies of letters written by Mr. Harris were contained and asked that the document be compared with the copied letters contending that internal evidence showed it was written by Mr. Harris.

The Judge instructed the Court interpreter to compare them as an expert and to state in writing his opinion.

Mr. Yano, barrister, counsel for another of the plaintiffs, asked the Court to examine Mr. T. Iwai, Director of the Camphor Monopoly Bureau in the Formosan Government, as witness, from whom it was expected that they could learn the value of the camphor transactions between the Government and Messrs. Samuel Samuel & Co., but the Court decided not to do so.

The Court then rose.

TRADE MARK CASE.

The action instituted in the Trade Mark Bureau, of the Department of Agriculture and Commerce, by Messrs Pieper and Flatan, France, against K. Awatsu, Osaka, claiming cancellation of registry of a trade mark was under the instruction of the bureau, brought in the Yokohama Local Court, before Judge Mita, on Aug. 6th to examine Mr. J. Schoeninger, No. 93, Yokohama.

Mr. Nagashima appeared for the plaintiffs and Mr. Ono for the defendant.

The witness stated that he knew that the soap manufactured by the plaintiffs bore the trade mark of an eagle on its wrapper, but he did not remember whether the goods imported in July, 1899, had this mark. At the order of a Japanese merchant, he imported in 1890, a certain quantity of "Eagle" soap, but he could not say what the name of the Japanese was. He again imported soap on an invoice dated Aug. 23rd, 1898, but did not remember the mark.

Cross-examined, he stated that he had two Japanese bantos in his office. They attended to his import business. One of them was now absent, but the other named Morimoto was in the office.

The Court then rose.

The statements of this witness will be transferred to the Trade Mark Bureau Tokyo.

LITERARY GOSSIP.

The annual report of the Committee of the London Library contains some interesting facts. The total cost of the admirable catalogue issued not long ago was £4,250, but the gross charge to the special catalogue account has been only £3,488 7s. 11d. The sales up to the end of April amounted to £1,361 1s. 10d., and there remain in stock 1,700 copies.

A valuable collection of maps and manuscripts, covering the history of the French marine from the 13th century to the Franco-Prussian War, has been given to the Newbery Library, Chicago. The collection includes 4,100 maps and about

6,000 pages of text. The collector was 30 years accumulating the material, which he intended to use in writing a history of the French marine.

The intelligent activity of British scholars in India still continues as brisk as ever and year by year the list of translations of important Indian writings steadily increases in volume and importance. News now comes from Simla that a Mr. Macauliffe proceeds home in March to supervise the publication in English of his translation of the Sikh scriptures, which is nearly complete. This translation was made by special desire of some prominent Sikhs.

The *Athenaeum* says:—"Lovers of Chaucer will learn with much interest that the famous First Chaucer Folio (1532) is now at length, for the first time, to be reproduced in facsimile, with an introduction by Prof. Skeat, who will supervise the progress of the work and add references at the foot of each page. It is noteworthy that, as in the case of Shakespeare, there are four folio editions of Chaucer. Of these four, Thynne's edition of 1532 is the only one of real value, as all the rest are derived from it. It is our only authority for many important works of Chaucer, or such as were formerly assigned to him."

An amusing incident is chronicled in the newly-published "Life of Lord Dufferin." One day when he was Governor-General of Canada the Countess was to be "at home" to receive visitors, so she and Lady Harriet Fletcher sat in state; but nobody came. At five o'clock Lord Dufferin came home, and his wife remarked that not a single soul had called to see them. The servant was duly questioned, and it turned out he had replied "not at home" to every caller. The visitors' book revealed the fact that the callers were 104 in number, so Lady Dufferin promptly sat down and wrote 104 letters of explanation and apology.

It may be news to some that the late Mr. George Bentley was among the literary publishers. It is well known that he did not accept without question the verdict of his "readers," and that he took special interest in the editing of *Temple Bar*. More than this, it appears from a passage in Messrs. Coates and Bell's "Marie Corelli" that, just twenty years ago, Mr. Bentley printed for private circulation a little green-covered volume of prose essays—seven in all—on such subjects as "An Evening with Erasmus," "An Afternoon with Odd Volumes," "How the World Wags," and so forth. To this booklet he gave the title of "After Business."

Much sympathy will be extended by all book-lovers to Mr. E. T. Cook, the well-known journalist, on the death of his wife, who was greatly esteemed in literary circles, as much for her generous and kindly disposition as for her intellectual gifts. She wrote largely for the Press, and her two books, "Highways and Byways of London" and "The Bride's Book," proved her to be possessed of keen humour and rare powers of observation. She was the daughter of the late Mr. T. Forster Baird. One of her sisters is Mrs. A. L. Smith, the wife of the brilliant Oxford tutor; another is married to the Hon. B. Wise, Attorney-General of New South Wales; a third is Mrs. H. B. Irving (Miss Dorothea Baird); and a fourth is Mrs. Threlfall, whose husband is a man of science.

An almost unprecedented demand has been made by the Turkish censor in Constantinople, writes a correspondent, in reference to the printing of the Bible. An American Bible publishing house is experiencing some difficulty in printing the sacred volume, the Turkish censor objecting to the word "Macedonia" in St. Paul's Epistle to the Thessalonians, and insisting on its being replaced by "villayets of Salonika and Monastir." The use of ancient geographical names is generally prohibited in Turkey. The publishing house referred to is probably the American Bible Society, which carries on its work in Turkey in joint agreement with the British and Foreign Bible Society. An official of the latter body stated that the censor's action presents quite a novel experience, but added that that he was per-

fectedly certain that the American Society would cease circulating the Scriptures in Turkey rather than alter a single word.

In the life of Sir Henry Acland, which has just been published in England, there is a reference to the habits of old Sir Thomas Acland as a correspondent which is particularly curious. "His impetuous disposition," says Mr. Atlay, "made him dispense with sand or blotting paper, and the sheet was turned over wet or dry. It is related that when his daughter, Mrs. Mills, brought to him in despair a long letter she had received just after his marriage, not a word of which she could decipher, he refused somewhat testily to assist her, saying that it was his business to write and hers to read." The anecdote may be paralleled by that which is told, we believe, of Lord Westbury, who, though he did not indulge in Sir Thomas's peculiarity, wrote the most illegible hand conceivable. A servant upon one occasion brought him a letter which he found it impossible to read. "Tell your master," he said, angrily, "to take back his letters and not to write to me again until he can send me something I can read." "That's just what my master said, my lord," retorted the servant. "It is your lordship's letter, and he can't read a word of it."

YACHTING.

There were three classes of racing on Saturday. The wind was south-easterly and moderate to light. The 39-raters and cruisers of the Yokohama Yacht Club started at 1 p.m. for a race to Uraga; the 21-raters of the Mosquito Yacht Club competed for a very handsome prize presented by Mr. A. J. McClure, and the "Larks" went over their No. 3 course round the Lightship and the Mandarin Bluff mark.

Five big boats went off and *Mary* led out of the harbour entrance, *Asagao* next, then *Spray*, *Wanderer* fourth and *Dainyo* last of all. The large yachts mostly arrived late on Sunday but we learn that *Mary* was easily first, *Dainyo* second.

After a good race, for a great part of which *Vixen* held the lead, *Chocho* (formerly *Nandeska*) came in first and irrespective of her time allowance won the pair of silver flower vases. *Edna* was second.

The "Larks" started at three o'clock and the wind dropped so much that though fourteen went out only five came home over the prescribed course. No. 4 finished first, securing the club prize and a valuable silver cup presented on handicap. The times were:

			h.m.s.
4 (Mason)		5.41.15
8 (Russell and Allcock)		5.58.40
10 (Watt and Drummond)		5.43.40
11 (Abbey)		5.42.50
12 (Sander)		5.46.05

SHOOTING AT TSURUMI.

The usual monthly match took place on Sunday at the Tsurumi grounds with the result that Mr. J. B. Gibbs captured the gold medal, a very handsome cross, after tying with Messrs. Negishi, J. Eyton, T. Aoyama, L. Eyton and S. Watanabe—his total score in the shoot-off being 40.

The leading scores were:—

	Pts.	1sts.	1sts.	Handicap.
J. B. Gibbs	39	4	40	4
Negishi	39	3	38	2
J. Eyton	39	—	37	—
T. Aoyama	39	4	36	4
L. Eyton	39	—	35	—
S. Watanabe	39	—	34	—
A. Kingdon	38	4	—	4

The standing doubles for Curtis and Harvey's Cup also took place on Sunday with the result that Okamoto was first with 34, the others being: Okudairi 34, J. B. Gibbs 30, S. Watanabe 30, A. Kingdon 30, T. Watanabe 36, L. Eyton 24, Obata 22, W. Jarman 22

AMERICAN TOPICS.

Rear-Admiral Robley D. Evans, now commanding the Asiatic fleet, has been selected as the chairman of the American Lighthouse Board. He will leave Asia in April, 1904, and will probably assume the chairmanship in the early fall of that year. Rear-Admiral George C. Remy, the present chairman, will be retired for age next month.

Three years ago an unsuccessful effort was made in the Mississippi Legislature to abolish the Greek letter fraternities at the State University. Those interested in the subject are now lining up for a renewal of the fight at the next session. Last winter an anti-university fraternity bill was introduced in the Arkansas Legislature, but it failed to pass.

According to a dispatch from Paris Mr. W. K. Vanderbilt, Jr., is confined to his bed in consequence of the injuries sustained by the explosion of his automobile. While driving near Paris his car broke down and he got underneath to investigate the cause. The explosion occurred while he was lying upon his back on the ground. His injuries are painful but not dangerous.

The visit of the U.S. Pacific naval force, under Rear-Admiral Glass, to Alaskan waters is for the purpose of examining islands of the Aleutian group, with the object of ascertaining their strategical importance. The Secretary of the Navy has at his disposal \$900,000 for establishing coaling stations, and in addition to using part of this amount to fortify the naval coal depot at Dutch Harbour, Alaska, he may devote another part to making coal depots.

Professionalism in college athletics is growing in disfavor in the Eastern universities. Harvard has consistently adhered to amateur coaching, frowning down the employment of professional teachers. Columbia University is considering the advisability of abolishing the professional trainer in all branches of college athletics, and the opposition to the employment of professional coaches is reported to be gaining ground in Yale also. Professionalism is the bane of intercollegiate sport.

Gold in what is declared to be almost as heavy paying quantities as in the famous beach sands of Nome is said to have been discovered on the Alaskan shore where the American White river empties into the sea between Cape Yuktag and Icy Cape. Mike Marvich, a prospector, asserts that in June he took out with a crude rocker \$1,200 worth of placer gold in eleven days. The new find is but 100 miles south of the Copper river and the region is said to also contain many evidences of oil.

The Gunnison irrigation tunnel provided for by an act of Congress passed and approved a year ago will be started in the course of two or three weeks. It will cost \$2,000,000. It will be bored in two sections, one being two miles long and the other four miles, cutting through the ridge dividing the waters of the Gunnison from those of the Uncompagne valley, Colorado. Eighty-five miles of irrigation canals will be fed by this tunnel, which will have an average diameter and height of twelve feet.

The latest gigantic building scheme projected in New York provides for the erection of a structure at the Manhattan terminus of the Brooklyn bridge which will be a combination of a court-house, a municipal building and one for offices and terminal purposes, the whole to rise 650 feet above the curb line and to consist of forty-five stories. If it is carried out it will be the tallest structure erected by human hands in the world and will be nearly one hundred feet higher than the Washington monument.

The *Mexican Financier* says of the plan to maintain a 50-cent dollar in Mexico: "The scheme of the government will be the logical perfection of the experiment made by India from 1893 on. Mexico goes India one better. Instead of leaving the amount of money in circulation to be controlled simply by governing the new

supplies, the purpose is to regulate the demand as well, by providing a gold exchange fund which will draw in money when it is redundant, if that condition should ever come to pass, and let it out again whenever it becomes scarce."

Captain Charles Whiteside Rae, who has been named to succeed Rear-Admiral Melville as Chief of the U.S. Bureau of Steam Engineering, was born in Connecticut in 1847. He studied engineering at Rensselaer Polytechnic Institute in Troy, N. Y., and entered the Naval Academy in 1866. His first assignment was to the *Contoocosh* which later, under the name of the *Albany*, became the flagship of the North Atlantic fleet. Captain Rae served on the *Iowa* during the engagement at Santiago in the war with Spain. His new position will give him the rank of Rear-Admiral.

The Georgia Legislature, which has resumed its session, is again making an issue of the factory child-labor question. At the last session a special day was set for the consideration of the bill, but the issue was then postponed through the failure of a quorum. The bill which is before the present Legislature prohibits the employment in factories of children under 12 years of age and requires that those employed under the age of 12 must have attended school six months in the year. The bill is meeting with strenuous opposition from the mill owners. North Carolina, Virginia and Alabama Legislatures passed child-labor statutes last winter.

New York city is just now occupying a peculiar position in its relations to the street railways. A statute which they are evading requires the street-railway companies to issue transfers at every intersection of the local lines. The municipality is, however, powerless to enforce the law, as it provides that an action to compel obedience to its provisions must be taken by the Attorney-General, whose intervention is obtainable only through the State Railroad Commission, and that body is represented to be indisposed to move. The statute is thus practically a dead letter and the railroads are arranging transfers to suit their own convenience.

"Every man who participates in the lynching or the burning of a negro is a murderer, pure and simple." This statement was made by Associate Justice Brewer, of the United States Supreme Court, who is in Milwaukee on private business. "The principal participants in the crime can be held by any court in the land for murder in the same degree as if the crime were committed by an individual. There is going to be a reaction against the atrocious crimes with which the papers have been filled. I expect that it will come soon. I cannot say what form it will take, but there will be an up-rising of popular feeling against lynchings which will result in legislation or a remedy in some other form."

According to the report of the tenement-house committee, New York, below the Harlem, is the most densely populated city in the world. In 1895 Manhattan had 143.2 population to the acre. Paris comes next, with the density of 125.2 per acre, and Berlin follows with 113.6. According to estimates based on the above total, one district in the Eleventh ward contained as many as 986.4 persons to every one of its thirty-two acres. It may be that these figures are equalled in some parts of the world, but the information at hand indicates only one district approaching this—a part of Bombay, which had in 1881 a population of 756 to the acre, in an area of forty-six acres. It should be noted, however, that the Asiatic density is much more oppressive, as it is spread over much less floor space, the New York buildings having more stories. The densest small section of Europe seems to be the Josefstadt, of Prague, with a population of 485.4 to the acre.

Who are the purchasers of the precious stones brought to the United States? The very rich buy some, but it is quite evident that the major part of these luxuries is absorbed by the middling, well-to-do classes who are affected by the mutations in trade. The imports of diamonds and

other precious stones during the fiscal year just ended aggregated over \$30,000,000. Prior to 1887 the total seldom reached \$10,000,000 in a year. After 1887 the value of the imports increased until they reached \$16,000,000 in 1893, but in 1894 they dropped to \$5,500,000. During the four years of hard times that began with 1893 the average did not much exceed \$6,000,000 a year. As soon as the clouds had rolled by the purchases began to enlarge until \$30,000,000 was reached.

Five hundred more marines have been asked for by Rear Admiral Evans, commander-in-chief of the U. S. Asiatic naval force. Rear Admiral Evans objected to the withdrawal of any marines from the Philippines until others had been provided to take their place, and gave as his reason for this that there was imminent danger of trouble in China, which would require the presence of a large force of men to protect American interests.

Many years ago the statisticians of the United States Pension Office made careful calculations to show the number of survivors of the war of the Rebellion for a series of years. The old soldiers are dying off more rapidly than was expected. According to the estimate the total number of survivors in 1902 should have been 930,380, while the pension rolls show only 725,100. To the latter number should be added 2 or 3 per cent to cover those who have never applied for pensions.

Under the new rule adopted by Cornell University for retiring and pensioning professors after the age of 70, Professor Hiram Corson will leave the chair of English literature this year. He is 75, and has occupied the chair since 1870. So much are his services held in regard that after his formal retirement he was appointed to a lectureship in English literature for five years. Though over the psalmist's limit of life, he is still young in spirit, and he is one of the finest lecturers in the university. Corson began active life as official reporter of the United States Senate, and attracted attention by his accurate report of Daniel Webster's speech, in which the great New Englander supported Clay's proposition for the admission of California into the Union. Later, Corson was made private secretary to Lewis Cass, and then to Webster himself. After the death of Webster, Corson was assigned to the head of the Copyright Bureau. From that he followed literature as a profession and was instructor in that subject in several colleges before coming to Cornell. Professor Corson is regarded as the foremost Shakespearean scholar in the country, with the single exception of Professor Furness of Philadelphia. He has written a number of books and monographs on Shakespearean subjects, and his lectures are remembered by all Cornell alumni as among those which gave them greatest pleasure and instruction while in college. Professor Corson is a very fine reader and his reading of passages from Shakespeare's plays is a liberal education in Elizabethan verse.

NEWS OF THE WEEK.

The Russian cruiser *Novik* arrived at Nagasaki on August 3rd from Port Arthur.

A case of cholera was reported in Tokyo on July 31st and another at Okayama on the following day.

Two cases of cholera were reported at Tokyo on August 2nd and another at Ehime on the following day.

Four cases of dysentery appeared in Yokohama on Aug. 3rd. They were at once removed to the Manji Hospital.

The European liner *Awa Maru*, which has war material from abroad, left Yokohama on August 4th for Kure.

According to a passenger from the steamer *Lie Maru* which arrived at Shimonoseki on August 2nd from Vladivostok, the laying of torpedoes in the port commenced on July 24th and was

completed within five days. The stock of coal has been greatly increased. The *Rossia* and three other Russian warships were lying there.

Tokyo papers state that the Government intend to amalgamate the naval and military arsenals by way of retrenching expenditure.

The first of the new crop of rice was brought in to the Kochi market, on July 30th. The price was yen 22.50 per *koku* (*koku*—about 5 bushels).

Six delegates of Kodemma-cho, Kanagawa, presented, to the Governor on Aug. 3rd, a petition asking for cancellation of the permission to reclaim the local foreshore.

The *Asahi* states that the draft contract between the Osaka Municipality and Osaka Gas Company passed the second reading in the Municipal Assembly on Aug. 4th.

The *Asahi* states that heavy rains prevailed at Tientsin on July 25th and flooding was caused. Many houses were wrecked and over a hundred and sixty persons were drowned.

Mr. T. S. Baker, of the Hongkong and Shanghai Banking Corporation, was registered on July 31st in the Yokohama Local Court, as representative of the branch in Yokohama.

The new steamer *Yelko Maru*, constructed for the Nippon Yusen Kaisha at the Nagasaki ship-building yard, will shortly proceed to Kobe. She is to be run between Japan and North China ports.

Mr. Amano, director of the Japanese post office at Mokpho, Korea, intends to open postal communication between Mokpho and Quelpart. The *Asahi* states that the service will be thrice a month.

Marquis Ito left on August 2nd for his villa at Oiso. Marquis Yamagata left on August 1st also for Oiso. After staying there for three or four days, he will proceed to Kyoto to spend the hot season.

On August 2nd a case of cholera appeared at Yokohama and the patient was at once removed to the hospital. The victim is the son, (9 years old), of a blacksmith named F. Orikiwa, living at Tobe-machi.

Count Itagaki, formerly leader of the Liberals, who now intends to organize a new party, will pay a visit to the north-eastern provinces, leaving Tokyo about August 15th accompanied by a number of his supporters.

The *Nichi Nichi* states that Mr. S. Asano and others have established a shipping firm in Tokyo under the name of the Oshiro Steamship Company, with a capital of yen 500,000. Five steamers ranging from 2,166 tons to 2,968 tons will be used.

K. Hishitani, president of the Hishitani Bank, who was arrested at Kobe on the charge of being connected with the stolen bonds affair, arrived in Tokyo on the morning of July 30th under escort. He was immediately removed to the Metropolitan Police Office.

Commenting upon the London telegram now published, the *Jiji* states that the places referred to as about to be opened in Manchuria would seem to be Mukden and Ta-tungkou. Enquiry at the Department of Foreign Affairs, however, furnishes a contradiction of the report.

Mr. S. Shimada, M.P., for Yokohama, delivered a speech on the evening of July 29th at the Hagaromo Theatre. He reviewed the proceedings of the 18th session of the Diet and then eulogised Mr. Ichihara, Mayor, for his action in regard to the improvement of the city.

A remarkable concomitant of the recent great heat in Upper India, says a despatch dated Simla, July 9, is the almost total disappearance of the plague from this area, the Punjab last week reporting only 173 plague deaths and the United Provinces only two. In the Bombay Presidency,

on the other hand, where the rains have broken, 1,096 plague deaths took place last week, an increase of 304 on the total of the previous seven days.

Mr. Y. Saito, ex M.P., Saitama prefecture, was arrested on July 30th on suspicion of fraud and subsequently his dwelling was searched. It is stated by the Tokyo papers that he is connected with Mr. C. Shimidzu who is now in the Kumagai jail on a charge of having embezzled many thousand yen from some farmers of Nakase in a transaction as to the purchase of government forest land.

The Singapore Opium and Spirit Farm for the next three years has been authoritatively confirmed to the present holders who bid \$470,000 a month. The Straits Government will receive \$465,000 of the amount, the odd \$5,000 going as a bonus to Johore. The Johore Farm was let for \$85,000, which, with the bonus, brings the figure to \$90,000 per month. The Malacca Farm is retained by the present farmer, who bid \$31,000 a month for it.

A telegram from Gifu states that M. Kato, a soldier in the reserve, living at Takata-machi, assaulted on Aug. 4th a man named H. Tosa and three of his family and a police officer inflicting severe injuries with a knife. One of them subsequently died. The criminal set fire to the house of the family and then committed suicide. The details are not yet known.

A great coal deposit has been found about 12 miles distant from the Yakumo railway station, Hokkaido. The *Nichi Nichi* states that Mr. Midzutani and two other engineers have made overtures to an American gentleman in Yokohama and the foreigner agreed to put up yen 250,000 as capital, after he has inspected the mine. The quality of the product is said to be the same as that of Yubari, Hokkaido.

According to investigations by the Bank of Japan, the prices of commodities were higher by an average of 0.27 in July than in the previous month:—

No. 1 service (goods for domestic consumption).....	July. 106.32	June. 106.03
No. 2 service (goods for export)....	96.22	96.44
No. 3 service (goods of import) ...	100.38	99.88
Average	103.00	102.73

The rate was calculated from the standard (100) of October, 1890.

Count Kabayama, who recently arrived in Tokyo, had audience of the Emperor and Empress on Aug. 4th. Marshal Marquis Yamagata proceeded to the palace on the same day. Count Arco Valley, the German Minister, paid a visit on Aug. 4th to the Department of Foreign Affairs, to see Baron Komura, but the latter being absent, Mr. Matsukata, confidential secretary, received the German diplomat. The *Asahi* states that Baron Rosen, the Russian Minister, who proceeded to Nikko on Aug. 2nd returned to Tokyo on the 4th.

At Chefoo on the 21st July an interesting boat race took place between bluejackets from the United States battleship *Oregon* and the Italian cruiser *Lombardia*. The event excited great interest in the port, where among other men-of-war, the French flagship *Montcalm* was in harbour. A stake of 2,300 Mexican dollars was put up and the keenest rivalry prevailed. After a stubborn race victory went to the Italians. The crews subsequently went alongside the Italian flagship *Vettor Pisani*, where both were enthusiastically received.

A frightful crime is reported from Utsunomiya. A young fellow named Watanabe employed as pointsman at the station, was in love and contemplated marriage with the younger sister of a local manure dealer (C. Kikuchi). The latter, however, opposed the union. The result of his action was that on the morning of July 30th the pointsman armed with a sword entered Kikuchi's dwelling and with one exception slew every occupant. The victims were Kikuchi, his five young children, and a woman and child who were staying temporarily with Kikuchi. Kikuchi's wife sustained

severe but not immediately fatal injuries. The murderer rounded off the tragedy by setting fire to the house and then committing *hara-kiri* amid the flames. After the fire two swords were found in the ashes which fact has suggested that Watanabe had an assistant in his work of butchery.

The construction of a cable line between Manila and Japan being completed, communication with various places in North America, Hawaii, &c., via Manila, was opened on July 31st. Baron Sone, Minister for Communications, has notified the rates in the *Official Gazette*. The rates to North America by the Pacific cable are between yen 2.82 and yen 3.06 a word, the reduction being between yen 1.02 and yen 52 against the rates on the Northern line (via Vladivostok). To Guam the rate is yen 1.64; to Midway yen 2.14; and Honolulu yen 2.64 per word.

The annual general meeting of shareholders of the Nippon Railway Company will be held on Aug. 4th. Tokyo papers state that the net profit of the first half year was yen 2,675,136.18 to which yen 337,900.79, the balance of last account, has to be added, making a total of yen 3,013,036.97. Of the amount, yen 298,648 is to be placed to legal reserve, to redeem debentures, to make up losses and to pay rewards to employees. An amount of yen 2,325,000 will be paid as dividend at the rate of 5 per cent. (10 per cent. per annum) and the remainder will be carried to the next account.

The C. P. R. steamer *Tartar*, which left the harbour at noon on Saturday, returned between two and three o'clock the same afternoon and anchored on the quarantine ground. It was reported that a Chinese boy 18 years of age had been found to be ill and presenting alarming symptoms, in consequence of which the vessel's return was decided on for the purpose of putting him ashore. Dr. Rokkaku and officials of the quarantine office went on board and the former made an examination the result of which shows that the patient is suffering from a common disease. He was landed and the ship resumed her voyage at 5.18 p.m.

A solemn requiem mass was celebrated for the Pope at the Catholic Church, No. 80, Yokohama, on Friday. The officiating clergy were: Rev. J. Lemarchal, V.G.; Deacon, Rev. Spenner, and Sub-deacon, Rev. J. Guerin. The Archbishop of Tokyo was present and pronounced the final *absoute*. There was a full choir and the music was impressively rendered. The church was draped in black, and there was a good attendance of local residents. Among prominent officials present were:—M. Emile Tronquois, French Vice-Consul; M. G. la Roche, Elève Vice-Consul; M. Max Kutschera, Austrian Consul; M. Pierre Bure, Belgian Consul-General, etc.

A nautical feat, worth recording, took place at Shanghai on July 26 when Messrs. H. Forrester, the Secretary of the Pilots' Association and W. O. Lancaster, swam from the Rowing Club pontoon off the Cosmopolitan Dock to Woosung Creek, a distance of over 12 miles, in 3¾ hours. A few friends accompanied them in sampans, administering a little stimulant as required, but neither man seemed the worse for the effort when the journey was accomplished. Although they were assisted by the ebb tide, says the *N. C. Daily News*, it calls for good stamina and determination to undertake a task that few could care to emulate, at least in the turbid Huangpu.

Mr. A. E. Chalmers, who for some two and a half years has been stationed at Kobe as British Vice-Consul, has been promoted to the rank of Consul, and leaves Kobe in a few days for Shimonoeki to take charge of the Consulate there, in succession to Mr. Playfair, who, as already reported, proceeds to Tamsui, in Formosa. Mr. Layard, the Consul at Tamsui, comes to Nagasaki to take up the post vacated by Mr. Longford, who recently retired owing to ill-health. While Mr. Chalmers will be congratulated on his promotion, says a Kobe contemporary, general regret will be felt at his departure from

Kobe, where he has been a very popular member of the community. There is a possibility, should Mr. H. A. C. Bonar accept the Consul-Generalship at Manila, which has been offered him, that Mr. J. Carey Hall will leave Kobe and come to Yokohama.

EUROPEAN NEWS.

The *Imperial German Gazette* announces that the Equitable Life Assurance Society of New York has finally decided to renounce the right to grant new policies in Lubbeck, Bremen and Hamburg from July 1.

Prince Adalbert, third son of Emperor William, will join the German East Asiatic squadron in October for a year, but he will probably return by way of the United States, in time to visit the St. Louis Exposition.

The famed castle of Rheinfels to which some serious accident appears to have happened, occupies a stupendous craggy rock overlooking the town of St. Goar on the river Rhine, some sixteen miles distant from Coblenz.

With reference to the ocean race between the *Glenshiel* and the *Calchas*, information has been received in Hongkong that the *Glenshiel* arrived at London at daylight on the 15th ultimo, and that the *Calchas* was then passing up the English Channel. This gives the "Glens" an unbroken record of having delivered in London the first Foochow teas for over twenty years.

The Czar has just paid a handsome tribute to the memory of the late Admiral Roustan, who was attached to his suite during His Majesty's last visit to France. Upon the Admiral's tomb he has had placed a golden wreath, composed of branches of olive and oak joined by a ribbon cord of enamel, to which is appended the Imperial seal with the two-headed eagle. The inscription is, "The Emperor and Empress of Russia to Admiral Roustan."

If statements made by Servians in the confidence of the new King may be trusted the Konak in Belgrade is doomed. King Peter will not have his memory haunted by daily contact with the scenes of the butchery. The Vienna correspondent of the *Newcastle Chronicle* states that his prominent supporters arriving in the Austrian capital represent him as having already announced his intention to have the building razed to the ground and replaced by a new palace.

Rear-Admiral the Hon. A. G. Curzon Howe, the new second in command of the China squadron, is a descendant of the great Lord Howe, the anniversary of whose victory off Ushant was celebrated on the 1st June. Not yet 53 years old, he is a member of three British Orders, and a Commander of the Legion of Honour. He was first lieutenant of the *Bacchante*, which took the two sons of the King around the world, was an A.D.C. to the late Queen, and at one time flew the broad pennant of a commodore when in charge of the fleet protecting the Newfoundland fisheries.

A scheme for constructing a ship canal between the Firth of Forth and the Clyde is said to have been definitely arranged. Many propositions have been made to cut the narrow neck between the Forth and the Clyde, and these were put forward with the strongest arguments and most influential support. The canal will start above the naval base and the estuary of the Forth, and will actually commence at Alloa. It will then be carried along close to Stirling, and continue through the valley of the Forth past Kippen, and then be carried by a deep cutting into the Loch Lomond Valley near Buchanan Castle.

The Grand Duke Alexander Mikhailovich, the Chief Director of Russian Commercial Navigation and of Harbours, has been empowered to conclude a contract with the Odessa Steam Navigation and Trading Company for the establishment of regular communication with ports in the Persian Gulf. According to this agreement the

Russian Government grants the Company an annual subsidy of 200,000 roubles for 12 years beginning in 1903. Further, says the *Globe*, the tolls levied on vessels passing through the Suez Canal will be repaid to the Company by the Russian Government.

One of the oldest railway engineers in the United Kingdom has passed away in the death of Mr. Edward Woods, who was born in 1814, and was for many years chief engineer of the Liverpool and Manchester Railway. As long ago as 1838 he contributed a paper to one of the earliest publications of the Institute of Civil Engineers, of which he lived to be president. It dealt with locomotives, and recorded certain changes in the construction of engines of the "Rocket" class, which increased their weight to "no fewer than ten tons." With railway development since those days of the infancy of the system, he had much to do both in this country and abroad.

Mr. Justice Farwell, in the Chancery Division London, on June 20th gave judgment in the case of the Attorney-General v. the Trustees of the British Museum. The question to be decided was the ownership of a number of gold ornaments of great value, dating back to the beginning of the Christian era. Seven years ago the relics were ploughed up by a labourer in a field near Limavaddy, in the north-west of Ireland, over which it was said that, at a very remote period, the sea had flowed. The British Museum purchased the articles, which are of Celtic design, for six hundred pounds, and the Crown, on behalf of the Royal Irish Academy, now claimed them as treasure trove. The Judge went through the evidence at length, and came to the conclusion that the case for the Crown had been established. He, therefore, ordered the articles to be delivered up.

FIRES.

About 8 o'clock on Saturday night fire occurred at the village of Yoyohata, Toyotama district, Tokyo, destroying one building. The clouds being low at the time the fire was reflected over an extensive area of the heavens, and it was supposed in Tokyo and Yokohama that a big fire had broken out.

On the morning of Aug. 4th, fire broke out in a fire-works factory at Toyohashi, destroying the building. One person was killed and six others severely injured.

CORRESPONDENCE.

CHURCH NOTES.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Referring to the article, under this heading, in your to-day's issue, I beg leave to point out that among the first 142 signatures to the "Russell-Wakefield Declaration" are 46 members of the E. C. U.; 23 members of the C. B. S.; 2 members of the Holy Cross Society; 2 members of the Society of St. John the Evangelist, Cowley Fathers; 10 illegally wear Romish Mass Vestments; 60 illegally burn candles in the Communion Service; 77 illegally hide the Manual Acts; 60 illegally mix water with the wine; 5 illegally burn incense; and these are the persons who declare that they wish to "strengthen the hands of the Bishops in securing obedience to the Church's laws."

E. C. U. stands for the English Church Union which, led by Lord Halifax, is organised aggression on the Reformation Settlement and the Protestantism of the Established Church. Up to 1902, 102 members of the E. C. U. joined the Church of Rome.

C. B. S. stands for the Confraternity of the Blessed Sacrament, the chief objects of which are the propagation of belief in the Mass and the "Real" presence, together with the advocacy of Fasting Communion, Prayers and Masses for the Dead, and the Reserved Sacrament.

The Holy Cross Society is the oldest and most mischievous of the Ritualistic organizations; it is composed of clergymen only, or bona fide candidates for Holy Orders, and is a Secret society. It is responsible for that infamous book "The Priest in Absolution," which Archbishop Tait described as a "disgrace to the community." So fearful is this

society of its members being known, that since 1880, only two copies of its yearly printed lists of brethren have fallen into Protestant hands.

The Society of St. John the Evangelist, otherwise the Cowley Fathers, seeks to introduce the Confessional into Parishes under the guise of holding "Missions." The "Fathers" recommend the clergy to consult the notorious "Priest in Absolution" for advice as to hearing Confessions. In their Pamphlet entitled "Suggestions for the conduct of a Mission," we read, "The clergy must be prepared to hear confessions at all times during a Mission from morning to night. Illiterate people will always require the help of a priest to question them."

It will thus be seen that so far from the "Declaration" being the pronouncement of the "Moderate" section of High Churchmen, it is the utterance of men of decided Romish opinions and Romanizing practices.

With regard to the concluding remark that "Prebendary Webb-Peploe, an Evangelical of the Evangelicals, was only by accident prevented from seconding this resolution, and spoke in its favour &c.," the following letter which appeared in *The Times* of Monday, June 8th, signed by Prebendary Webb-Peploe, and 16 other well known loyal Churchmen, speaks for itself, and would appear to contradict your contributor's statement.

Apologising for the length of this letter,
I am, Sir, Yours faithfully, W. K. WILSON.
Yokohama, July 30th, 1903.

REV. H. RUSSELL-WAKEFIELD'S DECLARATION.

The following letter appeared in the *Times* of Monday last in protest against the Sacerdotal "Declaration" promoted by Mr. Russell Wakefield. "SIR,—We do not wish to discuss Mr. Russell Wakefield's declaration as a whole; but we think it our duty to enter a warning without delay against its suggestion 'that the Ornaments Rubric retains the ceremonial system which was lawful under the First Prayer-book of Edward VI., and that for the peace of the Church this ought to be frankly recognized as a lawful inheritance in the English Church.'"

"We feel assured that any such recognition would be so far from promoting the peace of the Church that it would involve the gravest danger of disruption, as we are confident that it would be resisted to the last by a large body of both clergy and laity."

"Your faithful servants,

"HENRY WACE, D.D., Dean of Canterbury.
"W. LEPROY, D.D., Dean of Norwich.
"W. H. BARLOW, D.D., Dean of Peterborough.
"WALTER ABBOTT, the Vicarage, Paddington.
"T. D. BERNARD, late Chancellor of Wells.
"N. DIMOCK, late Vicar of St. Paul's, Maidstone.
"E. A. EARLEY-WILMOT, Prebendary of Wells, and Vicar of St. Jude, South Kensington.
"H. E. FOX, Prebendary of St. Paul's.
"H. G. GREY, Principal of Wycliffe Hall, Oxford.
"D. J. STATHER HUNT, Holy Trinity Vicarage, Tunbridge Wells.
"J. MCCORMICK, D.D., Prebendary of York, Rector of St. James's, Piccadilly.
"J. E. ROGERS, Rector of Walcot, Bath.
"W. H. STONE, Vicar of St. Mary's, Kilburn.
"W. F. TAYLOR, D.D., Archdeacon of Liverpool.
"H. B. TRISTRAM, D.D., Canon of Durham.
"H. W. WEBB-PEPLOE, Prebendary of St. Paul's, Vicar of St. Paul's, Onslow Square.
"F. S. WEBSTER, Rector of All Souls, St. Mary-lebone."

"June 6."

ALARMIST TELEGRAMS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—As reference has been made by you to a telegram from the Tokyo correspondent of the London *Daily Mail* which said that the Japanese and Russian Fleets were face to face off Vladivostok ready to come to blows, I, the correspondent in question, beg leave to explain that the telegram in question must have been mutilated in transit or, more likely, misunderstood in London. A general reference to the state of preparedness ("ready war any moment" were the words I used) of the Russian fleet in Port Arthur and of the Japanese fleet was apparently regarded as part of a preceding sentence describing the concentration of a Japanese squadron at Muroran, presumably to menace Vladivostok.

By the time it reached London the word Muroran had evidently become transformed into something mysterious and dreadful: I am sorry now that I did not add "Hokkaido, Japan."

I am surprised that it did not occur to you that there was a mistake somewhere, and that nobody with a reputation to lose would say that the Russian and Japanese fleets were face to face off Vladivostok.

I may add that it was the *Daily Mail* that asked me to give them a review of the situation. I said

there would be war if Russia did not give way somewhat, and I must say that I still think so.

The Japanese, I admit, are more optimistic. They all say "War! Nonsense! War is entirely out of the question!" But if you ask if they are, then, in favour of letting Russia alone in Manchuria, they at once assure you, heatedly, that they will go to the last extremities sooner than allow Russia to remain there. "But Russia," they add, "will give way. She invariably gives way when sufficient pressure is brought to bear on her. No, of course there will be no war. Quite absurd!"

I remain, Sir, Yours, &c. "X."
[This is not our experience of what the Japanese say.—Ed. J.M.]

"KEN."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR:—Can you, or any of your readers inform me of anything,—English or Japanese,—that has been written on what the Japanese call "Janken," or "Isiken,"—defined as "a game played with the fist."

As far as I have observed it, it is used only to decide questions, disputes, &c. It seems to be pretty generally in vogue throughout the country, not only by children but frequently by men and women of the poorer classes, for example by jinrikisha men in deciding which shall take a fare.

I am anxious to read up the history of the game and will greatly appreciate being directed to any literature on it. With thanks,

Yours, etc., ENQUIRER.

THE INSURANCE QUESTION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR:—In your issue of July 16, you treated the above question so fairly that I am emboldened to ask that you set forth the companies' side of the question, which I will try to place before you in a spirit as friendly as that displayed by you in the article in question.

Of course the question of grave importance is that concerning reserves. Your reasoning as to the amount of reserve that would be required to protect the business written in Japan is entirely correct; but I would like to set you right upon one question, viz: The amount of reserve that must be deposited by the company referred to in your article in addition to the yen 100,000 asked for. This company instead of having done business, as your article would indicate, during the past five years in Japan, has been working that field under the present management for thirteen years. I am, of course, unable to give the exact amount of business they have in force, but it is only reasonable to assume that it is far beyond that designated by you in the article in question. I would further advise you that this company has been writing business in a more or less active manner in Japan for about 20 years.

Reserves upon policies written as long ago as that, would amount to nearly the face of the policy—provided same was written upon the 20 year endowment plan; but, as a matter of fact, a large percentage of this business was written upon the 10 and 15 year endowment plans, consequently this company must have a quantity of business upon its books, upon which reserve equals the face of the policies, and I would say, roughly speaking, that the amount of reserve required to protect this Company's insurance would more than double the one and two-third millions which you mention as probably being sufficient. But this question of amounts is not of paramount importance. The most of the companies operating here being American, chartered under American laws, are subject to the most rigid governmental supervision. As I understand it, the Japanese authorities require as a reserve deposit, either cash, which would of course be impossible, or Japanese Government Bonds. Under these circumstances would the American authorities accept as a reserve deposit Japanese Government Bonds, that are to be deposited with the Japanese Government, and which could not be disposed of by the companies in the event of a threatened depreciation in value. Of course no one can speak authoritatively upon this subject, but it is my impression that no bonds that any government could issue would be accepted by any Commissioner of Insurance, if the companies are forced to purchase such bonds without the right to control and dispose of them as prudence might dictate. If the Japanese Government authorities have the right to prescribe that the companies shall deposit as reserve security Japanese Government Bonds, it must be conceded that they have the right to say that they will not allow that form of security to be changed, for it is not conceivable that in the event of a depreciation of such bonds the Government would allow the holders to throw hundreds of millions of them upon the market to cause further depreciation. Then

again, insurance companies are writing contracts to run to from 10 to 50 years, and even though Japanese Government Bonds at the present time, (and what I say about Japanese Bonds would apply equally to any other form of security,) may be a good investment, is there any guarantee, or can there be any guarantee that these bonds will be good for the length of time mentioned? Such a guarantee would be manifestly impossible. The companies, however, do guarantee that they will pay the amount of money contracted for in the policies.

Now then, if they are compelled to invest in a certain class of securities, the value of which may become more or less impaired, how can such companies make good their contracts to the insuring public? On the other hand, if it were possible for the Government to guarantee that there would be no default in interest upon its bonds, the very nature of such a guarantee would practically put the Government in the position of the insurance company, as it would be taking and guaranteeing the risks, and the companies simply acting as its agents.

The companies, generally speaking, write insurance upon a 3-1-2 per cent. basis. That is, the reserve which is set aside each year, plus 3-1-2 per cent. compound interest, must equal at the end of the period designated in the contract the face value of the policy. Under these circumstances it is necessary that a company shall earn gross about 4-1-4 per cent. interest. It can be easily seen, therefore, that a slight falling off in the value of 5 Per Cent. Bonds would make it impossible for any company to meet its obligations. But permit me to say that the profits of a life insurance company are earned largely by keen financing. By reason of the large sums of money that the life companies control they are able from time to time to buy up large government and industrial loans, far larger than individuals can usually handle. These loans are secured at a minimum rate and are afterwards resold in small lots to individual holders at a substantial advance. It would be manifestly impossible to handle these loans if the reserve was tied up in a stated way. Many of the securities held by the different companies are worth three or four times what was originally paid for them, thus increasing the returns to policy holders by way of dividends. Nearly all of the companies are returning from 50 to 60 per cent. more than they have received from members upon endowments, representing from 5 to 6 per cent. compound interest. Certainly this return could not be made even could it be guaranteed that 5 per cent. bonds should not shrink in value. The companies being mutual in their operations, it would be not only unfair, but unlawful to place the risks of any nationality upon their books that would certainly decrease the earnings of the members who are already insured.

I can understand the feeling that would prompt any government to ask that some part of the assets of a company operating within its jurisdiction should be invested therein, and I can assure you from a long experience, I have never yet known of a company seeking to do business in any country in which it did not also seek to invest some portion of its funds collected therein. I know this to be the case with Japan. Of course the American companies being organized upon national lines and not allowed to own real estate, except for office purposes, are shy about investing money upon mortgages in Japan. I understand that these investments can be made in a round-about way, so that in the event of a foreclosure the companies can protect themselves, but certainly no company would consider such an investment, when other countries offer a more straightforward and safe security. But all this we hope will pass away in the near future, and Japan will realize that in order to attract foreign capital she must allow such capital to acquire the best security that can be offered, viz: real estate. The moment this concession is made I feel sure Japan will go forward by leaps and bounds in such a way that she will gain a permanent influx of foreign capital, of which, I am sure the life insurance companies will contribute as much as any other investing medium, and allow me to say—Mr. Editor—that when all the nations of the world are knit together, as life insurance knits them, the interest in the life of each being the interest of all, and property destruction to any a loss to all, there will come a different understanding as to methods of settlement of international disputes.

As I said before, the life companies being largely mutual in their operations, it will be understood that every dollar collected in Japan must sooner or later be returned to Japan. Every life insured must at some time become a claim, either by death, expiry, or lapse. If from the two first causes, the insured always receives more money than he has paid in; if the contract becomes a claim by lapse, the insured withdraws all monies he has paid the company, less a small charge for withdrawal, all of which is expended in Japan, consequently the claim that is sometimes made that foreign companies are taking a great deal of money out of Japan is clearly a mistaken one. The companies are here to obtain,—first: an average mor-

talidity throughout the world; to prevent a serious loss in any place affecting the companies' business of capital; secondly: they are here to find a more profitable field of investment than that offered at home, where interest rates are very low. This is borne out by the fact that no company has ever operated in any country for any length of time where it did not invest large sums of money.

In reference to the deposit of yen 100,000 required,—that is a small affair, in so far as the life companies are concerned. I do not think there is any company operating in Japan that would object to putting up a guarantee fund that could be easily reached in the event of a suit at law, but, unfortunately, as I understand it, the treaty provisions provide that no tax, charge, or license of any sort shall be imposed upon foreign companies that is not imposed upon native companies. I imagine no company would consent to a violation of these provisions, because the right to violate one provision must entail the right to violate all. Nor should it be to the interest of Japan to force any company to vacate the field, or to keep any reputable company from entering therein.

Japan,—according to the life insurance statistics of other countries—in order to be thoroughly insured, should yield yen 750,000,000 of insurance per annum. At present, there is not more than yen 30,000,000 being written. Under the most favorable conditions it will be many years before she can enjoy that insurance protection that is enjoyed by the rest of the civilized world.

In the above article I have assumed, and it is a mere assumption, that the order No. 146 referred to, requires a deposit first of yen 100,000, and after that, when the reserve calculated according to our home standard amounts to more than the sum in question, a further deposit will be required at the end of each fiscal year.

For the benefit of those who may read this article I would say that this reserve at the end of 20 years, estimating that the business is normal, will amount to about 50 per cent. of the face value of the insurance in force. In other words, if a company should do yen 5,000,000 of business per annum for 20 years, such a company would be compelled to have in the hands of the Japanese Government something over yen 49,000,000 of money. Of course there would in all probability be a considerable shrinkage from this amount by reason of lapse, death and expiry, but on the other hand, it would be only reasonable to assume that a company doing yen 5,000,000 per annum now, would be doing far more 20 years hence, consequently the amount of money deposited would probably be larger, although the ratio to the amount insured would be, perhaps, less; or, to put it in another way, the reserve the first year would amount to about 60 per cent. of the premium collected, constantly increasing until at 20 years it would amount to something over 95 per cent. of premiums paid.

Thanking you for your fairness towards the companies in the article mentioned and for the courtesy of printing this letter.

I am, very respectfully, BASIL H. BETTS.
Yokohama, August 5, 1903.

SCHOOL FOR FOREIGN CHILDREN.

PARTIAL LIST OF PATRONS:—H. E. Sir Claude Macdonald; H. E. Lloyd C. Griscom; Rev. D. C. Greene, D.D.; Rt. Rev. Bishop McKim, D.D.; Rt. Rev. Bishop Awdry, D.D.; Capt. F. Brinkley, R.A.; Rev. B. Chappell, M.A.; Rev. H. H. Coates, M.A., B.D.; Rev. H. H. Guy, Ph.D.; Rev. S. W. Hamblen, M.A.; Richard J. Kirby, Esq.; Rev. H. M. Landis, M.A.; John Trumbull Swift, M.A.

COMMITTEE OF MANAGEMENT:—Mrs. Harper H. Coates, Chairman, 16 Tatsukawa Cho, Hongo; R. S. Miller, Esq., Treasurer, Legation of the United States; Mrs. W. Pengelley Buncombe, 52 Tsukiji; Mrs. F. E. Hagin, 72 Myogadani, Koishikawa; Mrs. S. W. Hamblen, 30-A Tsukiji; Mrs. B. C. Haworth, 6-B Tsukiji; Mrs. Richard J. Kirby, 8 Tsukiji; Mrs. R. S. Miller, Legation of the United States; Mrs. John Trumbull Swift, 9-B Tsukiji.

HONORARY DIRECTOR:—One of the Patrons who is to preside on public occasions.

TEACHERS:—English.—Eleanor Forthingham Haworth, Superintendent of Academic and Intermediate Departments, graduate Rockford College, Lady Principal and Instructor in Latin, History and Literature, Corning Presbyterian Academy, Corning, Iowa. Classics.—Prof. T. Takasugi, Ph.D., taught classics two years at De Pauw Univ., U.S.A., is now Prof. of English in the Higher Normal School and at Waseda University. Mathematics.—Mary Holbrook Chappell, formerly teacher in Ingleside Seminary, German.—Mrs. H. M. Landis, Graduate Royal Normal School for Women (Königliches Lehrerinnen Seminar) Dresden. French.—Mrs. W. Pengelley Buncombe, Diplômée of Rouen Academy. Kindergarten.—Miss Carrie Newman, Superintendent of Primary and Kindergarten Departments. Assistants

in Intermediate, Primary and Kindergarten Departments: Mrs. F. E. Hagin, Mrs. S. P. Fulton and Mrs. H. H. Coates.

DRAWING:—Miss Mary E. Lloyd, Graduate South Kensington School of Art. Vocal Music.—Miss Schereschewsky. Wood Carving and Clay Modelling.—A Teacher sent by the Ueno Academy of Art. Physical Culture.—To be supplied.

NOTE:—As soon as funds allow a first class teacher who is a specialist in Mathematics and Science, will be brought from home for the Academic Department. If funds do not allow, two of the last four subjects on the list will not be begun till the Second Term.

BUSINESS MANAGER:—Mrs. Harper H. Coates, 15 Tatsukoka cho, Hongo, Tokyo.

The great need for a school for foreign children requires no argument when one considers that hitherto, as a rule, each mother has had to teach her own, in most instances endeavouring to carry on three or four grades of work with no proper school room or appliances; and that, if the mother had not strength, time or equipment for this, the children have had either to be untaught, or insufficiently taught, or to be sent home at the tender ages of even seven, nine and ten years. In some cases, where it was impossible to send the children home, or for the mother to go with them, they have been kept beyond the age of fourteen with imperfect instruction, though there is no reason, as far as climate is concerned, why they should not remain in Japan until they have matriculated for College. That this can be successfully done was proven in the case of the school that was carried on for a number of years under Miss Fannie McCrae's able management.

Profiting by the successes and failures of this and other small private schools that have from time to time been started to meet the needs of the community, it is the earnest purpose and strong determination of the present committee (which fairly represents all interests) to establish a school that shall be thorough in its work and permanent in its character, and moreover as broad in its scope as friends and patrons can make it by their support and contributions.

AIM OF THE SCHOOL:—The aim of the school will be to give a thorough training in all the essential branches of learning, and to prepare pupils for University Matriculation. In the belief that normal physical development is essential to successful intellectual and moral development, physical culture will be introduced into the school, and careful attention paid to all matters pertaining to health.

A department of manual training—including carpentry, clay modelling, wood-carving, etc. will be added as soon as the necessary equipment can be secured.

Special attention will also be paid to drawing, nature studies and the correlation of subjects.

Drawing, Vocal Music, French and German will be a part of the regular course. French conversation beginning in the Kindergarten and continuing through the Primary and Intermediate grades, German being added in the third grade. A training class is also contemplated for the assistant teachers in the Kindergarten.

An earnest effort will be made to enable the pupils to use their mental powers independently and effectively and to encourage in each pupil habits of self-control and self-respect. In a word, the aim will be, thorough physical, mental and moral training, to develop character.

None but well-qualified and experienced teachers will be engaged for the work. Pupils will be under the supervision of a teacher during lunch and recreation hours.

RESIDENT PUPILS:—In order to accommodate pupils from the interior, it is hoped that during the coming year, arrangements may be made for a Home, presided over by a Christian lady who has resided in the country for a length of time; in the meantime, the Committee will arrange for the accommodation of a limited number of pupils in private homes.

DAY PUPILS:—The electric street railways to be opened this summer will afford much more easy and inexpensive access to the school than would have hitherto been possible; and an endeavor will be made to provide means of transportation for those out of reach of the tram lines so that the cost will be reduced to a minimum for all alike.

SCHOOL BUILDING:—The Y. M. C. A. Building, 3 Mitoshiro-cho, Kanda, in which class-rooms have been secured, is conveniently located in a healthy part of the city on a broad, quiet street. The electric tram line to be opened this summer will run right in front of the door. Being a substantial brick structure it is as safe as a building can be made in cases of both fire and earthquake, having been especially built with reference to the latter. Three of the classrooms are on the south side of the building, and are well-ventilated and lighted, and provided with desks and blackboards.

A building that can be used exclusively for the school, and, if possible, more centrally located, will be secured as soon as funds will allow.

SCHOOL EQUIPMENT:—The furnishings required

for the school are a good microscope, a magic lantern with slides for the illustration of lessons in art, history and geography, a set of geographical maps, stereoscopic views, photographs, laboratory supplies, outdoor and indoor apparatus for physical culture, work tables and tools for manual training, chairs, tables, piano and other supplies for the Kindergarten Dept., a bus for the transportation of city children off the tram line, and a good school library. Gifts of any of these, or donations of money towards the same will be most thankfully received.

DEPARTMENTS:—The school proposes to have four Departments, Kindergarten, Primary, Intermediate and Academic—there being no elective courses, except in the academic work for matriculation.

The Kindergarten takes children from about four to seven. The Primary and Intermediate Departments cover three years each, and aim to give a thorough training in the fundamental subjects of education.

The objective point of the Academic Department is matriculation into the University, arrangements being made with one of the best Universities for the examinations to be taken here. It is expected that most students will require four years to complete the work of this department.

EXAMINATIONS AND PROMOTIONS:—The promotion of each pupil will be determined by daily work more than by examinations. The marks for daily work will be reported at the close of each half-term, and examinations will be held at the close of each term. Pupils may be promoted during the year at the discretion of the superintendent of each department, when the majority of the teachers in that department recommend such promotion.

When students are promoted, their books will be re-bought by the school if so desired.

CO-OPERATION OF PARENTS:—Parents are urged to co-operate with the school in the endeavor to promote habits of regular attendance, without which satisfactory results are impossible—and to secure faithful preparation of lessons and a proper subordination of other interests to the work of the school.

INSTRUMENTAL MUSIC:—Arrangements will be made by which those who desire may take instrumental lessons on the piano and practice at the school, the teachers for this being chosen by Mrs. J. T. Swift.

TUITION FEES:—Kindergarten, Primary and Intermediate Departments—yen 25 per term for one child from a family; yen 40 for two; and ten yen more for each additional child from one family. Academic Department—yen 40 per term for each student. Fees are payable not later than the middle of each term. No reduction will be made for withdrawal before the end of the term; but in case of more than three weeks unavoidable absence, the loss will be shared equally by the parent and the school.

CALENDAR:—1903. September, Thursday 24.—Autumn Term begins. December, Monday 21.—Autumn Term closes, Christmas Vacation. 1904. January, Monday 4.—Winter Term begins. March, Thursday 31.—Winter Term closes, Easter Vacation. April, Monday 11.—Spring Term begins. July, Friday 8.—Spring Term closes.

APPLICATION FOR ADMISSION:—Application for admission to any of the departments of the school or inquiries about the same should be made to the Business Manager. As only a limited number of boarding pupils can be provided for this year, application should be made early. City pupils should also apply early so that the teachers may have an idea of what size the different classes will be in time to make preparations for the opening of the Autumn term. In applying, parents will please state the age of the children and mention what grade they are likely to be able to enter. Also, what text-books they now have so that only those necessary may be ordered from home.

NOTE:—If mothers who have hitherto been teaching their own children have text-books they would be willing to loan to the teaching staff, a list of these would be thankfully received.

THE POPE'S DYING PRAYER.

A peculiar and pathetic interest attaches to the following Latin poem written by the late Pope Leo XIII. a few months ago. A copy of the poem was presented to every Cardinal of the Sacred College who went to Rome to offer congratulations on the occasion of the Pope's Jubilee.

SUPREMA LEONIS VOTA.

Extremum radiat, pallenti obvolantur umbra
Iam iam sol moriens. Nox subit atra, Leo,
Atra tibi. Arescent vena, nec vividus humor
Perfluit, exhausto corpore vita fugit.
Mors telum fatale tacit; velamine amicta
Finereo, gelatus contigit ossa lapis.
Ast anima aufugiens, excussis libera vinculis,
Continuo ætherias ardet anhelat plagas.

*Huc celerat cursum, longarum hæc meta vicarum.
Explorat, o clemens, anxius vota, Deus!
Scilicet ut tandem, superis de civibus unus
Divino æternum lumine et ore fruatur.
Detur ei ora tuo, cæli Regina, beati,
Que dubiæ errantem per salebrosa via
Duxeris in patriam; materno munere sospes
Carmine te memori, Virgo benigna, canam.*

The translation below is from the columns of the *New York Independent*:—

LEO'S LAST PRAYER.

Leo, now sets thy sun; pale is its dying ray;
Black night succeeds thy day.
Black night for thee; wasted thy frame; life's flood
sustains
No more thy shrunken veins.
Death casts his fatal dart; robed for the grave thy
bones
Lie under the cold stones.
But my freed soul escapes her chains, and longs in
flight
To reach the realms of light.
That is the goal she seeks; thither her journey fares.
Grant, Lord, my anxious prayers,
That, with the citizens of Heaven, God's face and
light
May ever thrill my sight;
That I may see thy face, Heaven's Queen, whose
Mother love
Has brought me home above!
To thee, saved through the tangles of a perilous way
I lift my grateful lay.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

PROTEST AGAINST FOOD TAXATION.

London, July 31.
Mr. H. H. Asquith was the principal speaker at a mass meeting of London citizens, which resolved to protest against the taxation of food and condemned Mr. Chamberlain's proposals.

DISAFFECTION IN RUSSIA.

Later.
Fresh symptoms are constantly manifesting themselves in Russia, pointing to a widespread movement, which is almost revolutionary, among the working classes. The labourers at Nihilologo, in the Caucasus, struck work and obstructed the railways. The troops charged, killing ten and wounding eighteen. There has been a similar outbreak in Odessa. The strikers at Baku have ignited the petroleum works, destroying twenty boring towers.

AFFAIRS IN SOUTH AFRICA.

London, July 31.
The Colonial Office vote has passed the House of Commons.

Mr. Joseph Chamberlain, Colonial Secretary, replying to strong criticisms passed on his policy in South Africa, said that he did not attach the slightest importance to General Botha's letter (referred to by Reuter on July 16). He believed that it would lessen Botha's influence and that it was evidently written to order. He added that, if he found the work of pacification being undone, he would not hesitate to deport the mischief-makers.

THE KING'S IRISH TOUR.

Their Majesties the King and Queen were warmly welcomed in Galway city after a motor tour through Connemara and Galway.

A FRENCH AIR FLEET.

London, August 1.
M. Santos Dumont has offered an aerial flotilla to the French Government for war purposes. The Minister for War has accepted the offer in the belief that aerial navigation is now a practical achievement.

THE SACRED CONCLAVE ASSEMBLES.

London, August 2.

A series of imposing ceremonies lasting for five hours marked the inauguration of the Sacred Conclave. The ceremonies began with the solemn entry and oath-taking by the Cardinals and the functionaries attendant on the Conclave, and ended with a minute inspection of the precincts, with the object of excluding all strangers. With the formal locking of the doors, the Cardinals proceeded to their apartments in the Vatican.

KING EDWARD AND THE IRISH QUESTION.

Their Majesties had an enthusiastic reception at Cork. The Lord Mayor and Corporation participated.

The King presented colours to two Irish Regiments. He made a felicitous address. The ceremony was witnessed by a large assemblage and was greeted with tremendous cheering on the part of the crowd.

In reply to an Address, wherein reference was made to the Land Bill, the King said he hoped that an equitable settlement of the long-standing controversy would be arrived at, for it would powerfully contribute to the contentment and prosperity of his Irish people. But good laws alone would not suffice. They must endeavour to better the industrial training of the young and create a spirit of co-operation among all classes.

Their Majesties have sailed for Cowes.

It is admitted everywhere in Ireland that the King's sympathy and interest have produced a remarkable change, which no legislation could possibly have effected.

A TERRIBLE DISASTER.

London, Aug. 3.

During a Cricket Match at Perth, a stand whereon 1,500 spectators were gathered, collapsed. There was a terrible scene. One person was killed and 150 injured, whereof one-fifth are in hospital.

KING EDWARD.

Their Majesties King Edward and Queen Alexandra have arrived at Cowes.

A GENEROUS GIFT.

London, August 4.

Lord Iveagh has given King Edward fifty thousand pounds sterling for distribution among the Dublin hospitals.

THE KING AND THE IRISH PEOPLE.

The King in an address to the Irish people, said he was deeply touched by the kindness and goodwill of the people as shown to the Queen and himself. The manifestations exceeded expectations and he eagerly awaited the fulfilment of the hope of a brighter day dawning for Ireland. This hope would depend upon the development of self-reliance, co-operation, and the increase of mutual toleration. It was his earnest prayer that means of national well-being would multiply year by year.

Copies of this address will be posted up in every town and village in Ireland.

THE PERTH DISASTER.

Nobody was killed at the Perth disaster. There are fourteen people still in hospital.

THE SACRED CONCLAVE.

The Conclave is still indecisive. An attempt has been discovered to communicate between the Conclave and a neighbouring house by means of flashes from a mirror.

Cardinal Herrera, who fell ill on entering the Conclave, is reported to be dying.

AUSTRALIA AND COLOURED LABOUR.

Sir Edward Barton replying to an influential deputation urging the repeal of the coloured labour prohibition law, said it was

useless to ask for a repeal until prohibition had been tried. He preferred even foreign white to coloured labour.

THE NEW POPE.

London, August 4.

11.45 a.m.

The Conclave of Cardinals have elected as Pope Cardinal Sarto, Patriarch of Venice, who will rule under the name of Pius X.

THE ANGLO-FRENCH ENTENTE.

London, August 5.

A large party of members of the House of Commons are to return the visit of the French Deputies on the 25th November (?) Seventy members have already accepted the invitation.

IRISH LAND BILL.

The House of Lords has read the Irish Land Bill a second time.

THE NEW POPE.

The scene on the announcement of the election of Cardinal Sarto as Pope was very impressive. Pope Pius X. addressed the people from the balcony of St. Peter's. Cardinal Sarto is known as being broad-minded and a friend of the Quirinal.

King Emmanuel has telegraphed his satisfaction at the election.

The general opinion is that the new Pope will be a spiritual rather than a political ruler.

THE VICEROY OF INDIA.

London, August 6.

Lord Curzon's term as Viceroy of India has been extended.

THE NEW POPE.

Cardinal Sarto's election is immensely popular in Italy. There are universal rejoicings in Rome.

THE SHANGHAI NATIVE JOURNALISTS.

On the 6th inst. Mr. A. J. Balfour, speaking in the House of Commons in reply to Mr. Henry Norman's question, said that Sir Ernest Satow had been telegraphically instructed that the Shanghai prisoners should not be surrendered.

MR. WHITAKER WRIGHT.

Mr. Whitaker Wright has returned to London and has been charged at the Guildhall with issuing a false balance-sheet. He has been released on bail of £5,000.

MACEDONIA.

The news from Macedonia is more disquieting. It is believed that a general uprising is imminent.

(RECEIVED AT THE LEGATION OF FRANCE.)

TROUBLES IN ALGERIA.

Saigon, August 4.

The military post at Beni Abbas barred the road of bands of Barradders, who were pillaging. They were stopped just as they were passing the frontier, and several camels which they had stolen were taken from them. Several of the Barradders were killed and wounded. Some of the French soldiers were wounded.

THE SACRED CONCLAVE.

The voting of the College of Cardinals continues; two votes are taken daily. There is no result yet.

THE NEW POPE.

Saigon, August 5.

A telegram from Rome says that Cardinal Sarto has been elected Pope.

(The Almanack of Gotha says that Gueseppe Sarto was born at Nice on the 2nd of June, 1835, and that he was created Patriarch of Venice on June 12th, 1893.)

(RECEIVED IN TOKYO.)

AMERICAN CONSULATE-GENERAL.

The American Consulate at Hankow has been converted into a Consulate-General.

THE KOREAN LAND TROUBLE.

There are indications that the land sold to Russians at Yong Am-pho is to be bought back by the Imperial Estates Bureau and will then be leased to the Russians for a term of 20 years.

(SPECIAL TO THE "JAPAN MAIL.")

FIRE ON THE M. M. "TONKIN."

Kobe, August 6, 3.40 p.m.

Fire broke out on the French Mail steamer *Tonkin* while discharging cargo in Kobe harbour at 2 p.m. The fire is in the forehold, it is believed in Saigon cotton, and is still burning.

Kobe, August 6, 5.30 p.m.

The fire is still burning in the forehold, which is practically gutted. The bridge and front funnel, and two boats were burnt. Officers from the P. & O. steamer *Candia* and other ships are assisting to put out the fire, as well as the staff of the Kawasaki dockyard. The fire is attributed to an explosion of chlorate of potash, of which 1,300 barrels were aboard and 500 of which were landed this morning.

(Note—The Yokohama Acting Agent of the M. M. Company courteously informs us that the fire has been extinguished but the departure of the *Tonkin* for Yokohama has been postponed.)

(FROM THE "DEUTSCHE JAPAN POST.")

THE NEW POPE.

Berlin, Aug. 5.

The election of Cardinal Sarto as Pope is satisfactory to the German Government, which since 1898 has regarded him as a possible candidate for the Papal throne. He had the undivided support of the German cardinals. The Emperor William and Count von Bülow are both personally acquainted with him.

THE STEEL MAGNATE.

Mr. Schwab, the President of the American Steel Trust, has resigned.

BAD COMPLEXIONS

Dry Thin and Falling Hair and Red Rough Hands Prevented by

CUTICURA SOAP

MILLIONS use CUTICURA SOAP, assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA OINTMENT, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap can be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the best skin and complexion soap, and the best toilet and baby soap in the world.

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure torturing, disgusting humours, eczema, rashes, and irritations, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: R. FOWLER & CO., Sydney. British Depot: 27, 28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CO., Sole Props., Boston, U. S. A.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated Liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humours cures. Put up in screw-cap, pocket vials, containing 25 doses. CUTICURA PILLS are purgative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifiers, humours cures, and tonic-digestives, yet compounded.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, AUGUST 15TH, 1903.

DEATHS.

At his residence at Sendai, Miyagi Ken, after a short illness, the Rev. Dr. J. G. CLEVELAND, at the age of 46.

On the 10th instant, at his residence No. 76-A, Bluff, Cavaliere FRANCESCO BIAGIOLI.

SUMMARY OF NEWS.

PRINCE KUNI proceeded to Nikko on August 12th.

THE Italian cruiser *Lombardia* left Nagasaki on Aug. 9th for home.

THE *Asahi* states that Mr. Sonoda, Governor of Hokkaido, will be placed on the retired list.

MR. PLAYFAIR, the new British Consul at Tamsui, Formosa, left Shimonoseki on Aug. 9th for his post.

TOKYO papers state that Japanese Catholics intend presenting a pair of large vases to the new Pope.

THE discontented coal coolies at Moji on Aug. 12th were pacified with a promise of a 5 per cent increase.

A TELEGRAM from Fusan, Korea, states that a case of cholera appeared on Aug. 12th. The patient died.

On the night of Aug. 6th, a thunder-storm prevailed at Sapporo. A Christian church was

destroyed by lightning, and buildings at Takast and Ishikado were burned.

A SON of Dr. Kagami, of Yokohama, was drowned while bathing at Oiso on the evening of the 10th inst.

A MAN named K. Kaneko living at Asakusa, Tokyo, was arrested on Aug. 10th on a charge of counterfeiting.

TOKYO papers state that the Siamese Crown Prince will pay another visit to this country in October this year.

THIRTY-TWO Chinese students enlisted in the Second Division, Sendai, on Aug. 6th, to study military training.

GAS exploded on Aug. 12th at the Hokoku coal mine, Fukuoka, with the result that two persons were severely injured.

GAS exploded on Aug. 4th, at the Nagasawa coal mine, Yamaguchi prefecture. Three men were killed by the accident.

MR. JAMES McNEILL WHISTLER, the noted artist, died suddenly on the afternoon of July 17 at his residence, Cheyne Walk, Chelsea.

IN connexion with the loss of yen 8,000 from the Treasury of Nara prefecture, N. Nakamura, a banker, was arrested on Aug. 7th.

AT the 34th Bank, Osaka, a sum of over yen 3,000 was stolen on Aug. 9th by a jinrikisha coolie, from a collector of the bank.

TEN Chinese women students arrived at Nagasaki, on Aug. 10th from Shanghai. They are to come to Tokyo for their education.

MR. N. WATANABE, chief engineer of the Yokosuka Naval Station, was drowned on Aug. 8th while bathing off Toda-machi with his wife.

NEW rice was shown on Aug. 11th in the Kanazawa market. The quality was good. The price was temporarily quoted at yen 15.50 per koku.

ONE of the soldiers belonging to the 2nd company, 3rd Regiment, Tokyo, was drowned, on August 5th off Omori, where he and others were swimming.

A GOODS car on the up-train which passed Kanagawa at 11 35 a.m. on Aug. 8th over-turned at a point between Kanagawa and Tsurumi, through an axle breaking.

A MAN named M. Kawaji was arrested on August 6th at Shimonoseki on a charge of having counterfeited a Russian note. He had four hundred copies in his possession.

A DOUBLE suicide was reported on the morning of Aug. 7th. It occurred in a brothel at Yairakucho, Yokohama. The girl was named Koto and the man I. Suzuki. A razor was the implement employed.

BARON IWASAKI, president of the Mitsu Bishi Goshi Kaisha, will pay a visit to America and Europe leaving on August 14th by the steamer *Empress of China*. He expects to return by the Siberian Railway.

WE learn that Mr. N. W. McIvor has received the Order of the Double Dragon from the Emperor of China in recognition of the services he rendered as Protector of the Chinese during the Japan-China War, when he held the post of U.S. Consul-General for Japan.

R. FUJIKAWA and three other painters engaged on the steamer *Hokuriku Maru* in the shipbuild-

ing yard at Sakuragi-cho, Yokohama, fell on August 12th from a scaffold and received such injuries that they died on the way to the Juzen Hospital.

MR. S. HOSHINO, member of the Hiroshima Prefectural Assembly, was tried on Aug. 12th at the police station. The charge is alleged to be that he had accepted a bribe of yen 300.

FOUR men were arrested on Aug. 12th at Sakademachi, Takamatsu, on a charge of having counterfeited Korean nickel coins. It is believed that all of their production was sold at Osaka and Kobe.

ROBBERS broke into the Beach House Hotel and the villa of Mr. E. H. Hunter at Shioya on Monday night and carried away watches, jewelry and clothing valued at yen 765 in all. The offenders are still at large.

MR. HASHIGUCHI BUNZO, ex-Governor of Taipei, Formosa, died at his residence in Kojimachi Rokuchome, Tokyo, on the night of 10th Aug. The Emperor conferred on him the third-class of the Sacred Treasure and raised him a step in rank.

SIR Claude M. MacDonald, British Minister, paid a visit, on August 11th, to the Department of Foreign Affairs and there had an interview with Baron Komura. The same day Count Aro Valley, German Minister, also paid a visit to the Department and saw Mr. Chinda, Secretary-General.

A TELEGRAM dated Aug. 9th from Yamagata states that owing to the recent heavy rain, all the rivers over-flowed and many houses were flooded. The bridges over the Mogami river were all swept away. A landslide occurred at Jionji, Nishi-murayama district, and two children were killed.

THE Osaka Municipal Assembly held a meeting on August 11th when it was decided to purchase the mechanics hall of the Exhibition for yen 24,860; to establish a warehouse at a place near the harbour; and to pay yen 17,000 to the police officers who have attended the Exhibition, as rewards.

THE Governor of Nagasaki prefecture has reported to the Agriculture and Commercial Department that seven cows out of twenty-two were attacked by rinderpest and died on the voyage between Korea and Nagasaki a few days ago. He added that the rest of the cows were killed at Hinoura, Minami Tahei-mura, in that prefecture.

THE Kego fall has caused another suicide. Joji (18), son of K. Tatsuta, formerly Secretary of Finance, asked his parents frequently to consent to his visiting Nikko, partly to see the water-fall, but his request was declined. The lad at last threw himself on the railway near Okubo, Tokyo, on Aug. 6th, and was killed.

A TELEGRAM dated August 6th from Osaka states that competition between the Imperial Marine Insurance Co., the Nippon Marine Insurance Co., and the Tokyo Marine Insurance Co. has become very keen within the past few weeks. One of the companies has reduced the rate of premium to half or less than half of the rate that had been arranged between them.

MR. R. NAITO, President of the Aichi Prefectural Assembly, and two educational officials, connected with the text book affair, were sentenced, on Aug. 10th, in the Tokyo District Court, to from 2 1/2 months to 3 1/2 months' imprisonment with hard labour, and a fine of yen 7 to yen 15. The bribes which they had received were ordered to be confiscated.

POLITICAL NOTES.

Saturday, August 8.

Mr. Kato Hiroyuki, speaking through the columns of the *Yomiuri Shimbun*, denounces the idea of abolishing the Department of Education. He conjectures that the example of England has had some influence in directing Japanese opinion towards abolition, but England's case, he declares, is peculiar. Her conservatism alone keeps her from having a Department of Education, and she actually devotes to educational purposes nearly one-tenth of her annual income. The fact is, according to this distinguished philosopher, that the advocates of abolition are influenced not by their professed desire to renovate the administrative machine, but by a latent contempt for education. They see results but do not appreciate causes. They see that Japan conquered China eight years ago, and that she was able to take a creditable place in the world's military federation three years ago. But they do not see that she owed those successes to education. They want to save money for the purpose of increasing armaments, and the first thought that occurs to them is to dispense with the machinery which alone can give efficacy to armaments. And when we come down to arithmetic, what economy would really be effected? The salary of a Minister of State, that of a Vice-Minister and those of a few officials, perhaps a hundred thousand *yen* in all. The project can not commend itself to any man of intelligence.

The House of Representatives, yielding to one of these fits of almost feminine petulance that sometimes overtake even grave legislators, rejected in its last session the small appropriation of twenty-three thousand *yen* sought by the Department of Education for the purpose of compiling text books, in accordance with the policy of undertaking this work officially. Of course the House's decision created a most difficult situation. Books had to be provided; those tainted with the stain of corruption, though doubtless excellent as mere text-books, could not be legally kept in use, and the money required for replacing them had been refused by the House of Representatives. In such a conjuncture there can be no doubt that the duty of the authorities is to ignore the Diet and treat the matter as a question of urgency. That is what Baron Kodama, the temporary holder of the portfolio of Education, is understood to have decided. The requisite funds will be drawn from the reserves, and the item will be included among extra-budgetary appropriations. It may be assumed that we shall hear a great deal on this subject from the politicians of the Opposition. They can easily make out an imposing case. But they can scarcely induce the public to acquit them of a very imperfect faculty for appreciating responsibility.

Tuesday, August 11.

The advocates of a strong foreign policy met in the Kinki-kan at Kanda on the afternoon of the 9th, the principal persons present being Messrs. Komuchi, Sasa, Kudo, Hirakawa, Toyama, Takano and Suzuki. Altogether some eight hundred assembled. These politicians have now resumed a less equivocal attitude. They call themselves the *Tai-Ro Doshikai*, or Society of Fellow-Thinkers with regard to Russia. The manifesto compiled by their leaders was read and unanimously endorsed. Its contents were partly historical. The writers enumerated the self-effacing steps taken by

Japan *vis-à-vis* Russia on five several occasions during the past 8 years, commencing with the rendition of Liao-tung. They then passed on to claim that Japan has a heaven-sent mission to maintain the peace of the Far-East, and that the present policy of drift and opportunism can never accomplish that end. Therefore they asked the meeting to resolve:—"That whereas it is the heaven-sent mission of this empire to make firm the bases of lasting peace in the Orient by requiring Russia to give effect to her treaty-engagements for evacuating Manchuria, and by requiring China to actually carry out the policy of opening that region, we earnestly trust that the Government will not show any perfunctoriness but will carry out these aims at once."

Mr. Nakai Kitaro then introduced an urgency motion to the effect that Russia's procedure at Yong Am-pho in Korea is a violation of her conventions with Japan, and this resolution also the meeting endorsed unanimously. An executive committee of 10 was then elected. Congratulatory messages or expressions of opinion were then read from Prince Konoye, Viscount Watanabe, Mr. Ohigashi Gitsutsu, Count Okuma, Count Itagaki and several others. Prince Konoye declared that Japan's policy is to preserve China's integrity and to act as Korea's guardian, such a policy being dictated by motives of self-protection, of peace-preservation and of civilized progress. He then spoke of the National Union, over which he had presided in former years, and he denounced the arbitrary aggressions of Russia in Manchuria, declaring at the same time that she is already stretching out covetous hands towards Korea. The Prince recalled the fact that on the occasion of the dissolution of the National Union, he had warned them to be prepared for its reorganization, and he concluded by urging them to work zealously in their country's interests.

Count Okuma, in his statement of views, pointed out that the object of the Anglo-Japanese alliance was to maintain peace, and since the date of its signature the nation had heard more or less about the doings of one of the allies in the interests of the alliance's aims. But nothing whatever was heard about the doings of the other. What were Japanese statesmen about to-day and what had they been about in the past? It was said that they had tendered advice to China, but it did not appear that they had taken any direct step as regards Russia. There could be no doubt about the dangerous character of Russia's doings. It was therefore necessary to stimulate the country's statesmen and to awaken public spirit at home, and, at the same time, to recall Russia to a sense of her neighbourly obligations, so that the guarantees of peace might be made complete. Japan was universally acknowledged to be a peaceful nation, but it must not be forgotten that if her vital interests were threatened the whole country would rise into vehement activity as one man. That was a fine motive power in the cause of peace, but the danger of complete inactivity could not be underestimated and he urged the new party to work zealously.

Count Itagaki's main argument was that Russia had required Japan to evacuate Liao-tung on the plea that its possession by a foreign Power must endanger China's integrity and Japan had only to apply the same argument to Russia's tenure of the place to-day.

Several speeches were then delivered. Mr. Kudo Kokan insisted that it was foolish

and futile to talk of negotiating this question without a resolve to appeal to the sword if necessary. He asked what object could otherwise be served by Japan's armaments.

Mr. Otake Kanichi took for text the doctrine that history repeats itself. They knew how Japan had been obliged to step out of Liao-tung. That was written in history. Was it to be supposed that Russia would not have to step out of the same place now?

The meeting broke up with cheers for the Emperor, and the members repaired to the Maple Club.

Thursday, August 13.

This new association is acting vigorously in pursuance of its programme. Its operative committee (*jikko-in*), dividing into several sections, have been paying visits to the various Ministers of State. Baron Komura declined to receive them and so did Admiral Yamamoto. But they obtained access to Baron Kodama, who told them that he thoroughly sympathised with them, though he refrained from making any statement of the Cabinet's policy. They obtained access also to the Prime Minister. He begged them to maintain an attitude of the utmost circumspection and to work quietly for the consolidation of public opinion. The Committee are to continue their peripatations.

Why are the people of Japan so quiet at this crisis, asks the *Kokumin*. Are they without feeling or are they indifferent? Why will they not dance to the piping of the agitators? It is because they have more sense than the latter. They trust the officials charged with the conduct of foreign affairs, and they leave the business of trumpet-blowing and drum-beating to those that find their account in it. The Greeks made a din before they fought with Turkey. Then, at the first symptoms of disaster, they bowed their heads. That is not the way of the Japanese. They are quiet, but in the hour of trial they will be found resolute. On the other hand, if they trust their officials, if they have given to these an unspoken mandate, all the greater is the responsibility devolving on the officials and all the sterner will be the reckoning demanded of them.

CHINA.

Saturday, August 8.

A traveller who has just returned from Newchwang to Japan by the *Tategami Maru* is reported to have stated that the Russian authorities at Newchwang are adopting a very practical method of checking alarmist rumours about war between Japan and Russia. They are treating the circulation of such rumours as a criminal offence. And a criminal offence it certainly is. Men who for the sake of manufacturing a maleable sensation do not hesitate to invent or exaggerate incidents calculated to bring upon mankind the horrors of war, may justly be called the worst kind of malefactors. It is a pity that the Russian Authorities at Newchwang can not have a free hand to deal with journalistic stirrers-up of strife everywhere. Since the Manchurian complication attracted active attention, there have been published by English newspapers in the Far East articles of the most violent and offensive character; articles which apparently derive their unsightly color not from any genuinely patriotic or moral impulses, but merely from a sense of commercial expediency—the desire to obtain notoriety by creating a commotion. It is not difficult to estimate what effect such writings

must produce on the mind of every Russian, and to conjecture how much they can not fail to contribute to the growth of international prejudices. If all writers who seek to elude insignificance by clamour could be dumped down at Newchwang and submitted to the tender mercies of the Russian authorities there, the atmosphere would be appreciably cleared.

Major Watanabe, of the Japanese Legation in Peking, who has just returned to Shimonoseki, is represented as saying that the Empress-Dowager has developed a swelling under one eye, and that a German physician who examined Her Majesty, pronounces a very unfavourable opinion. He says that the malady will probably prove mortal, and he speaks of one year as the apparent limit of Her Majesty's survival. This is indeed an important piece of news if any reliance can be placed in it, but we find some difficulty in imagining that an event of such world-wide moment would have reached the public for the first time through a channel so round-about.

According to the *Jimmin*, which alone publishes the statement, the authorities of the Military School at Nanking have decided to employ Japanese instructors to the exclusion of German. This decision is said to have resulted from the reports made by Chinese officers present at the autumn manoeuvres in Japan in 1901. Our contemporary gives the text of an agreement said to have been concluded by the Chinese authorities of the one part and Major Sakata of the other. The period covered by the compact is two years; the rate of pay is 300 yen a month, with a promise of increase at the end of one year in the event of zealous discharge of duties; the school authorities provide a house and furniture, and it is stipulated that although Major Sakata will have to take instructions from the principal of the School and the Viceroy, he will be independent of all foreign interference. Major Sakata is the first Japanese instructor engaged in Nanking, but there are already some twelve Japanese civilian teachers in the Yangtse Valley.

News has already been received and published as to the intention of the Empress Dowager and the Emperor of China to summon on the 7th instant a great conclave at the Palace, consisting of princes of the blood, ministers of state and other high officials. The *Kokumin Shinbun's* correspondent confirms the intelligence, and gives for reason the receipt of a secret communication from St. Petersburg conveyed through M. Lessar. The gist of the communication will be laid before the Council.

What truth there may be in this story we can not tell, but there is no denying that during the past few days there has been a feeling of negotiation in the air, and that some peaceful exit from the Manchurian complication is anticipated by the public. We need scarcely add that under these circumstances there is a rumour—the third of its kind—that a secret treaty has been concluded between Russia and China.

Monday, August 10.

The *Nichi Nichi* publishes one of those little side-whispers which generally accompany a big noise. It is that the Russian military authorities at Antung have ordered the Chinese to set up the Russian flag under penalty of a fine of 70 taels, and that the Chinese have perforce obeyed. It is not stated whether this was in connexion with any special occasion or under what new

system private individuals are required to display flags. The story comes as we have related it, bald of details and too curious to be credible.

Up to the morning of the 7th instant, that is to say, up to the morning of the day when the much-talked-of council was to meet in the Palace at Peking, the public seems to have remained uncertain as to the cause of the conference. Rumour, however, persisted in saying that some grave communication from Russia was to be taken into consideration, although there was also a suggestion that the thing to be discussed was the attitude of China herself towards the Manchurian problem, even the infinitely patient statesmen of the Middle Kingdom having grown weary of waiting for the fulfilment of a treaty obligation which matured 4 months ago. Two months more ought to see the complete evacuation of Manchuria, and it is not unnatural that Peking should be getting somewhat startled.

Tuesday, August 11.

It is now stated that the conference of high dignitaries in Peking had no other object than to consider the manner of celebrating the Empress Dowager's seventieth birthday, which falls this year. At all events the telegram says that, so far as the public knows, the conference did not consider anything else. On such an occasion it would be in accordance with Chinese custom that the people should present sums of money to the Imperial lady in proportion to their means, but it is stated that in view of the condition of Chinese domestic and foreign affairs, the Empress-Dowager has signified her desire that nothing of the kind shall be done this year.

Wednesday, August 12.

Rumours agree that the Chinese Government in its distress is inclined to turn for aid to the United States. It is even alleged that Prince Ching has actually approached Mr. Conger with a request for mediation, and that Mr. Conger has promised to move his Government in that sense. There is just possibility that President Roosevelt might be induced to take up the matter, but we greatly doubt it. One of the skilful features of Russia's diplomacy has been her care to make America the prominent recipient of all her reassuring communications, and Washington has now been so fully sated with declarations of St. Petersburg's good intentions, that it would be hard for the President to throw constructive doubt on Russia's mood by attempting to mediate. Russia would simply say, "There is nothing to mediate. We are doing the best we can, with the most pacific and benevolent purposes conceivable, and we can not improve upon our conduct." The time to interfere with a great Power is while it is preparing to take a step. Once the foot has been planted opportunity is lost.

Thursday, August 13.

It is stated by the *Nichi Nichi's* Peking correspondent that the Emperor of China is rumoured to have addressed a telegram direct to the President of the United States, requesting the latter to lend his good offices for the disentanglement of the present complication. This confirms the news, received on the 10th, as to the Peking Government's appeal to Washington. We presume that the advisers of the Chinese Throne adopted the precaution of ascertaining whether an appeal made by their Sovereign would meet with a favourable reception. Emperors and Kings do not usually run the risk of prefer-

ring requests that may be rejected. On the other hand, the question remains, has any such step been taken by Peking.

Friday, August 14.

Sir Ernest Satow reached Shanghai en route for Peking on the 12th instant. It is stated that he intends to remain some days in Shanghai before proceeding to the capital. Much surprise has been expressed at Sir Ernest's absence from Peking during the Manchurian crisis, but as to that there are two things to be said: the first is that had Sir Ernest seen any occasion for his presence in China or had the British Government seen any occasion, his return would have taken place long ago; the second, that in view of the conditions existing in the Far East since 1900, any man who disposed himself to wait for an interval of complete quiet would be like the rustic by the river side. Probably Sir Ernest's presence in London was quite as serviceable to the Government as would have been his continued residence in Peking. For his health's sake, however, we regret that his period of leave expires in the middle of August, especially such a sweltering August as this.

YELLOW JOURNALISM IN EXCELSIS.

Many and wonderful are the tales which the American papers print regarding important personages in the Orient. To give an air of verisimilitude to their stories these versatile but most unscrupulous journalists, after manufacturing the yarns from whole cloth, father them on Shanghai—as if that place had not enough of its own inventions to answer for—and once in a while on Tokyo. The following which is printed in the *San Francisco Call* should, we imagine, be awarded the "banner" for unscrupulous invention:—

WISCONSIN GIRL WEDS AN EMPEROR.
SHARES THE THRONE WITH RULER OF KOREA.
DAUGHTER OF AMERICAN MISSIONARY WINS
A CROWN.

EMILY BROWN OF APPLETON IS NOW THE
EMPERESS OM.

Special Dispatch to The Call.

Milwaukee, Wis., July 11.

A local daily prints the following under a Tokio, Japan, date: Last January Yi Heyung, the Emperor of Korea, celebrated the fortieth anniversary of his coming to the throne, and on the same day a beautiful Yankee girl, Emily Brown, the daughter of an Appleton (Wis.) missionary, was crowned Queen of Korea. Her infant son was also proclaimed heir to the throne. Up to the time of her coronation the new Empress of Korea bore merely the title of "Lady Emily," in Korean "Emmy," but now she is called "Empress Om," or, translated into English, "The dawn of the morning."

Emily Brown, with true American shrewdness, after the tragic death of the first wife of the Emperor of Korea and her own elevation to imperial rank, made it a condition that she should retain her Christian name. Although previously only the "first favourite" of the Emperor, she nevertheless was always greatly honoured by the courts of Tokio and Peking.

At the beginning of this year, to the surprise of every one, the Korean *Official Gazette* announced that the favourite had been raised to the rank of Imperial Princess, with the full title of Empress-Queen. The official announcement also stated that after the death of his first wife the Emperor of Korea had been quietly married to "Lady Emily," and in view of the fortieth anniversary the Emperor had seen fit to elevate his wife and son to their proper ranks.

The father of Emily Brown was a Presbyterian missionary and the first Protestant to settle in Seoul, the capital of Korea. His youthful daughter, who possessed a beautiful voice, sang frequently in the mission church. The beauty of the maiden was reported to the Emperor, and the ruler commanded her to enter his harem, which she indignantly refused to do. Two years later she concluded to move into the palace after the Emperor had promised to marry her.

KOREA.

Saturday, August 8.

News comes to the *Nichi Nichi Shinbun* from Seoul that the Korean Government has decided to introduce the system of conscription, and that eight thousand men will be raised, one thousand of them for service in the Capital. A few days ago the telegraph said that representations had been made to the Throne urging the importance of organizing a navy, the spectacle of the *Yang-mu* lying useless at Chemulpo having stirred the regret of some patriotic Koreans. It is certainly time that Korea woke up and equipped herself with the paraphernalia of modern civilization, namely, the means of inflicting injury on others.

Tuesday, August 11.

All reports from Korea go to confirm the recently received news that the Imperial Estates Bureau has agreed to lease the Yong-Am-pho lands to their present Russian holders. It appears to be regarded as certain, however, that the period of the lease will be limited to the period of the timber-felling concession, namely, twenty years, and that the rumour as to 99 years is unfounded. Not that the period is a matter of much consequence. After a Russian settlement has been established for nearly a quarter of a century at Yong Am-pho and after large vested interests have been acquired there, it is not on the slender assertion of a lease's duration that Korea will recover possession.

Another point of uncertainty is the extent of the land concerned. Two hundred acres has been generally spoken of, but that estimate is not now either confirmed or denied. Further, it is suggested that the Korean Foreign Office may not be cognisant of what the Bureau of Imperial Estates is doing—a wonderful and forlorn hypothesis. What is beyond all question is that if Russia establishes herself at Antung and Yong Am-pho, the Yalu will be completely controlled by her.

The Korean Ministry have decided, it is said, not to endorse the proposals for organizing a separate Department of Naval Affairs. The business of the empire's maritime defences is to remain in the hands of those hitherto responsible for it, which means, of course, that nothing is to be done, and that the *Yang-mu* will continue to decay quietly in the harbour at Chemulpo.

Thursday, August 13.

It is now stated that although the Korean Household Department has agreed to the leasing of 350 acres of land to the Russian lumber company at Yong Am-pho, a convention on the subject has not yet been concluded between the Korean Foreign Office and the Russian Representative. Korea has no written constitution, so far as we know. It is not possible to tell, therefore, how far a compact signed by the Household Department without the endorsement of the Foreign Office would bind the country *vis-à-vis* a foreign state. But the public will recollect that this whole business of timber-felling concessions has been hitherto managed independently of the Foreign Office. The concession was granted by the King—then only a King—in 1896, during his time of refuge in the Russian Legation, and the five-years' limit for commencing operations was extended in 1901 by the same authority. If the Russians have been able to persuade the Throne that a spacious grant of land at the mouth of the

Yalu is essential to the successful management of such work as floating timber-rafts down the river, the grant may be held to fall legitimately within the capacity of the power that made the original concession. M. Pavlov has always been shrewdly careful to contend that all the alleged needs of his countrymen in the Yalu Valley flowed naturally and necessarily from the practical enjoyment of the concession made by the Korean Monarch in person, but it is plain that no foreign Representative can insist upon any line of divided authority in such a matter unless he has the complete support of the Court. If, at this juncture, the Court has been successfully persuaded that Russia is the real enemy in the gate and that Japan as a potential protector must be counted a bruised reed, the Foreign Office will probably be thrust aside, or an attempt will be made to thrust it aside, which result would involve very curious complications. It is not easy for Occidentals to conceive such a complete reversal of ordinary routine as that the negotiating authority and the confirming should change places.

The *Asahi Shinbun*, commenting on this important incident, lays emphasis on the timber-felling claim possessed by the *Rizai Kaisha*, a Chinese-Japanese association. This company was formed to take over a lumber concession granted by the Korean Court to a Korean subject. The grant was made, not when the Sovereign was under duress within the walls of a foreign legation, but when he enjoyed the full exercise of his free agency. It would be extravagant—the *Asahi* thinks—that Russia should acquire a large settlement at the mouth of the Yalu for the purposes of the timber enterprise, even if she possessed a monopoly of it, but when the privilege is shared by Chinese-Japanese concessionaires, her arbitrary aggressions become flagrantly unjust. What is wanted in the very first place is some clear definition of what the various concessions involve and what are the limits of the privileges they give. There are those who say that Russia's doings in the Yalu Valley are a mere diversion. Be that as it may, they are bearing very substantial fruit.

Friday, August 14.

According to a telegram in the *Jiji Shimpō*, the Japanese Representative in Seoul has entered a strong protest against the leasing of land to the Russian lumber company at Yong Am-pho. The points made by Mr. Hayashi are that whereas the terms of the lumber concession provide for offices in the neighbourhood of the work, Yong Am-pho is far removed from the scene of actual operations and the formation of a Russian settlement there in alleged connexion with the Company's operations is a plain violation of the agreement. Further, that whereas any transaction such as the leasing of land to foreigners should have been preceded by application to the Korean Government, in this case the Russians acquired the land at the outset without any permission from the Korean Authorities, and if the latter now set their seal upon such an arbitrary arrangement, the sovereignty of the country would be manifestly impaired.

It does not appear from this statement that the Japanese Representative has actually entered an objection to the consummation of the lease. He seems to have confined himself to urging that suitable steps should be taken in the premises (*yoroshiku sengo no shochi wo hodokosu beshi*).

SUBSIDIES.

It has often been suggested that the Japanese lack staying power; that, in short, they are fickle, speedily wearying of one enterprise when the eclat of starting it has failed. We do not attach any credit to such sweeping generalizations, but they undoubtedly derive some semblance of probability from suggestions of the nature of those now advanced by the *Niroku*. That journal has been at some pains to collect figures showing the amounts given by the Treasury in the form of subsidies during the past 13 years. The figures stand thus:—

Year.	Total amount of Subsidies. Yen.
1890	8,578,661
1891	3,296,359
1892	11,963,575
1893	2,666,914
1894	3,074,126
1895	11,931,287
1896	8,258,469
1897	7,339,679
1898	15,393,294
1899	12,674,794
1900	14,181,692
1901	14,034,693
1902	14,646,331

Total 128,039,880

Analysing these figures, the sums granted on account of maritime enterprise during the same period stand as follow:—

1890	953,025
1891	952,200
1892	953,083
1893	949,590
1894	958,600
1895	1,105,424
1896	2,177,394
1897	4,391,560
1898	6,021,333
1899	6,462,680
1900	7,121,211
1901	7,501,233
1902	8,172,046

47,719,345

Of course the Nippon Yusen Kaisha receives the major share of the navigation subsidies. The grant is thus divided among the six principal shipping companies and the Kawasaki Dockyard:—

	Yen.
Nippon Yusen Kaisha	5,171,983
Osaka Shosen Kaisha	401,634
Mitsubishi Goshi Kaisha	417,729
Toyo Kisen Kaisha	1,013,880
Daito Kisen Kaisha	50,993
Mitsui Bussan Kaisha	198,321
Kawasaki Dock-yard	74,158

The capitals of these companies, the amounts paid up and the latest dividends declared, stand as follow:—

	Capital in Yen	Paid Up	Divide d. per cent.
Nippon Yusen Kaisha	22,000,000	Fully	12
Osaka Shosen Kaisha	11,000,000	Half	10
Mitsui Bishi Goshi	5,000,000	Fully	?
Toyo Kisen Kaisha	6,500,000	Half	12
Daito Kisen Kaisha	100,000	73.375	10
Mitsui Bussan Kaisha	1,000,000	Fully	?
Kawasaki Dock-yard	4,000,000	2,500,000	16

It need scarcely be said that in setting forth these figures, the purpose of the *Niroku* is to preach a crusade against subsidies of the above nature and to recommend sweeping retrenchments, such as, for example, the abolition of the American and the European services of the Nippon Yusen Kaisha. In other words, just as Japan is beginning to attract the attention and the applause of the world for her maritime enterprise, she is to shrink back terrified by her own courage and to draw her purse-strings for the sake of saving two or three hundred thousand pounds. We have "little Englanders" in our midst, but it was not expected that "little Nipponers" would so soon appear upon the horizon of Japan's budding reputation.

THE RAILWAYS.

The Japanese Railway Authorities are always glad to receive information from the public as to the state of the lines under their control. We may mention, therefore, that there appears to be a feeling of growing dissatisfaction against the management of the Tokaido road. People were formerly unanimous in their praise of the cuisine and the sleeping arrangements, but we have heard it stated of late by competent observers that the former has conspicuously deteriorated and that an unpleasant degree of dirt and disorder is connected with the latter. Such things are easily remediable.

Another point which really calls for protest is the extreme insufficiency of the accommodation on lines giving access to the sea-coast. Why should the railway authorities endeavour to convert into a purgatory the journey to and from a summer resort? Business men, foreigners and Japanese alike, who travel to Zushi, Kamakura, Oiso, Odawara and such places on Sunday to breathe the sea air for a few hours, must be prepared to undergo a painful ordeal on the way out and back. A railway journey in summer is not unpleasant under reasonable conditions. The brisk movement of the air as the carriage travels rapidly through it, the beauties of the constantly changing scenery, these things ought to constitute an agreeable experience. But travellers are completely robbed of such consolations when they are compelled to pack themselves as tight as sardines, and to endure the sweltering heat of such conditions with the accompanying inconvenience of not being able to view the scenery at leisure. This complaint is so old that we repeat it almost hopelessly. Still we should like to know, as a mere matter of psychological interest, why Japanese railway authorities have an inveterate unwillingness to supply sufficient passenger accommodation—it is not to be supposed that they are incompetent to do so—and why they endeavour to render travelling by their lines as disagreeable as possible. It is not a sufficient explanation to be told that they have to deal with the most patient public in the world. They have no right to abuse their nationals' patience.

Yet another point is the condition of the Tokaido roadway. Things have gone from bad to worse in this respect, and are going to a still more deplorable pitch, so far as we can judge. The rocking and jolting of the carriages is something shocking. We remember the time when reading in a railway carriage was comfortably easy and even when writing memoranda was not too difficult. But now-a-days reading is a painful labour and writing is out of the question. The engineers in charge of the line seem to have left something undone, which is a pity.

The Japan Railway Company held its half-yearly general meeting in Tokyo on the 7th instant, when the following accounts were presented and passed:—

	YEN.
Net Profit for the half year	2,675,136
Brought over from Previous Account.....	337,900
	3,013,036
To Legal Reserve.....	133,757
To Payment of Debts and Interest on same	21,892
To Wear and Tear of Plant	14,991
To Losses	21,008
Rewards to Officials.....	107,000
Dividend (10 per cent. per annum)	2,325,000
To Special Reserve	200,000
To Relief to Employees	20,000
Carried Forward	169,388
	3,013,036

Viscount Soga, President of the Company, explained that the gross earnings of the Company during the half year had been 5,105,106 yen, showing an increase of 126,876 yen, or 2.55 per cent., as compared with the corresponding period last year. The increase did not, however, constitute any indication of business prosperity. On the contrary marked trade depression had produced a reduction in the number of passengers and the quantity of small goods. Special causes had operated, however, to increase the larger class of freight and thus a fairly favourable result had to be recorded. He further stated that on two occasions since last spring sweeping measures of reform had been adopted, each involving a reduction of staff to the extent of 150 persons.

We observe that the 50 yen shares of the Company are now quoted at 76½ yen, so that, as an investment, the stock pays 7.65 per cent. The principal shareholders are:—

	Shares
Fifteenth Bank	301,913
Imperial Estates Bureau	24,422
Baron Iwasaki (H.)	22,982
Marquis Asano	17,947
Marquis Shō (former King of Rikyu)	16,851
Marquis Mayeda	12,352
Mitsui Bank	10,392
Baron Iwasaki (Y.)	10,500
Marquis Tokugawa	10,076

It is a remarkable fact that the Fifteenth (Nobles) Bank should have over 15 millions of yen invested in this stock. One often hears it said that the Bank's capital is, for the most part, in an unliquifiable condition, and that its volume of ordinary banking business is consequently much smaller than that of the Mitsu Bishi or the Mitsui Banks which work with a much smaller capital. A figure like the above explains and justifies the criticism. On the other hand, the main purpose of the Fifteenth Bank is to find safe investments for the funds entrusted to its care by the nobility. Its purchases of Japan Railway stock were made at a time when such a transaction seemed eminently useful in the cause of railway expansion in Japan, and as the shares were bought at figures below par, the Bank's clients have now the satisfaction of not only receiving an income of 10 per cent. at least on their original investment, but also of knowing that their property has appreciated fully 50 per cent.

THE WAKAMATSU FOUNDRY.

The Government has appointed a council of men well known in the worlds of officialdom, business and politics to investigate the condition of the Wakamatsu Iron Foundry, and presumably to give advice as to the best manner of dealing with the troublesome problem. We speak partly from conjecture, for although the names of the councillors (*shōgi-in*) are published, there is no public statement of the functions assigned to them. The names are:—

Admiral Saitō Minoru, Vice-Minister of the Navy.	
Mr. Sakatani Yoshiro, Vice-Minister of Finance.	
Major-General Ishimoto, Vice-Minister of War.	
Dr. Furuichi Kintake, Chief of the Railways Construction Bureau.	
Viscount Hotta Seigo, Member of the House of Peers.	
Dr. Sengoku Mitsugu, President of the Kiushu Railway Company.	
Mr. Hotta Rentaro, } Members of the House of	
Mr. Kuribara Ryoichi, } Representatives.	
Mr. Masuda Ko, of the Mitsui Firm.	
Mr. Shoda Heigoro, of the Mitsu Bishi Firm.	
Dr. Hasegawa Yoshisaburo, Professor of Engineering.	

It is now definitely stated, as might indeed have been conjectured, that the remarkably composed committee which is to examine the affairs of the Iron Foundry, will have to

determine, in effect, whether the enterprise should be transferred to private hands or carried on under State auspices. In either event a radical policy of change will have to be adopted—so it is said—and the Government, desirous of obtaining an unbiased statement of popular views as well as of official, has constituted the committee so that it includes several of the acknowledged leaders of commercial and parliamentary society as well as some of the most distinguished among the younger generation of statesmen. The general anticipation seems to be that the advice of the committee will be accepted, and that this exceedingly troublesome problem will thus be finally solved.

MEETING OF PREFECTURAL GOVERNORS.

On the 10th instant the usual semi-annual meeting of Prefectural Governors took place at the Home Department. The Premier addressed the meeting in very general terms. He hinted that the Government is engaged in administrative reforms which will be published when due opportunity offers and he urged national unanimity in carrying out the policy hitherto pursued, but as no indication about the nature of that policy accompanied the advice, His Excellency's words do not convey anything definite. Baron Kodama was more explicit, but even he confined himself to broad advice as to the necessity, first, of not confusing local with central governmental functions; secondly of directing close attention to the economy and administration of the communities; and thirdly to conducting with absolute impartiality the elections of members of local assemblies.

In his capacity of Minister of State for Education the Baron recommended that the danger should be carefully avoided of allowing sentiment to preside at the building of schools instead of being guided by strictly economical considerations and by due regard to natural requirements. In short, he warned his hearers against being carried away by transient agitations, and thus subjecting the people to outlays that exceeded their strength.

Baron Kioura repeated excellent advice given by him at Osaka with regard to the preparation and choice of specimens for the Louisiana Exhibition. He strongly admonished on the abuse of selling things at nominal prices, as such figures became standards and the progress of trade suffered consequent restraint.

Much interest attached to the statement of Mr. Okada, Vice-Minister of Education, with regard to text-books. His announcement showed that while the critics have been talking, the educational authorities have been steadily working. They have completed the compilation of text books on morality, language, geography and history, which will be ready for use by the schools from the commencement of next fiscal year (April 1st, 1904). With regard to the publication and sale of these books the Educational Department will superintend the book stores in Tokyo, and a similar duty will devolve on the local authorities in the provinces. The text-books of mathematics and drawing can not be ready until 1905. Instructions will therefore be given that schools where the present text-books were to be employable next year, shall carry on teaching without text books until the year after next.

The Prefects subsequently lunched with the Prime Minister.

FOREIGNERS IN TOKYO.

The *Nippon* publishes an interesting list of the numbers and nationalities of foreigners residing in Tokyo:—

Chinese.....	684
Americans.....	298
English.....	198
Koreans.....	90
Germans.....	83
French.....	81
Indian.....	23
Russians.....	10
Canadians.....	8
Swiss.....	8
Austrians.....	6
Belgians.....	6
Siamese.....	5
Italians.....	5
Brazilians.....	3
Dutch.....	2
Spaniards.....	1
Portuguese.....	1

Total..... 1,512

As to the localities in which these foreigners reside, they are as follow:—

Ushigome District.....	384
Kyobashi.....	330
Koishikawa.....	168
Kojimachi.....	124
Shiba.....	87
Kanda.....	84

The preponderance in favour of the first three districts is attributable to educational questions: the Chinese and Korean students and many foreign teachers in schools live in these quarters. Kojimachi covers most of the foreign legations, and Kanda, being the region of the University, has naturally many foreign residents. We observe a note of disappointment, very emphatic disappointment, in the writing of the *Nippon*. It observes that when the barriers of extraterritorial jurisdiction were broken down, a flood of foreign visitors was expected. But they have not come and Tokyo feels lonely and neglected. Our contemporary further quotes an official as insisting upon the marked difference between the quality of the Tokyo foreign population and the population of a commercial open port. In Tokyo the foreign element, apart from students, consists almost entirely of diplomatic officials, men of science and gentlemen (*shinshi*), so that from year's end to year's end they have virtually no relations with the police—in marked contrast with the record of tradal marts such as Yokohama or Kobe.

We wonder whether the *Nippon's* informant intends to exclude merchants from the category of "gentlemen." That would be a strangely ancient proposition, wholly foreign to Occidental ideas.

THE HEAT.

It is many years—10 according to the Meteorological Authorities—since such a wave of heat reached Japan as that now inundating us. Up to the present, the 10th instant seems to have been the hottest day, though a worse record seems likely to be achieved before we emerge into the cool of autumn. Throughout the day on Monday the thermometer stood at 90° F. in the coolest and most shady places, and at 10 p.m. it had fallen only three degrees, while at 6 a.m. on the 11th it registered 85°. Ninety during the day is not extravagant, but a night of such temperature as 85° to 87° is very trying.

One result has been to drive numbers of Japanese to the sea. Zushi and Hayama are crowded and Kamakura is packed. It used not to be a Japanese habit to repair to the sea-shore in summer. They always

preferred a mountain resort in the vicinity of a spa. But foreign example seems to have affected them. Last Sunday the writer of this note counted over 150 people bathing in a little bight at Hayama. They all wore bathing costumes and they spent as much as from two to three hours alternately entering the water and sitting on the sands under the shelter of a wooded promontory. The shallow waters at the base of Yokohama Bluff swarm with hundreds of Japanese every afternoon and evening, while the beaches farther along at Honmoku and Negishi also attract a very large concourse of Yokohama's superheated citizens towards the close of the afternoon.

On the afternoon of the 11th a centre of depression developed in the vicinity of the Riu-kiu Islands. There is as yet no certainty as to the direction in which the centre is moving, but the comparative coolness felt in Tokyo and Yokohama from the evening of the 12th was evidently due to this disturbance.

The heat seems to be very great at Gifu. A telegram reports that it was 99° on Aug. 12th. The *Asahi* states that at Kyoto it was 95.4° the same day.

A resident of Canton writes that the heat there is something worth writing about. But he does not grumble at it as most folk are doing nowadays, for he always calls to mind a quaint jingle he learnt years ago in London, which runs:—

As a rule,
Man's a fool;
When it's hot,
He wants it cool;
When it's cool,
He wants it hot,
Always wanting
What is not.
As a rule,
Man's a fool.

TELEGRAMS.

The *Shogyo Shimpō* says that the Government is earnestly endeavouring to complete arrangements for reducing the telegraphic charges between Japan and foreign countries. The problem has been solved so far as South China is concerned, but until India and North China can be brought into the arrangement there will be no public announcement. To persons in Japan the Asiatic points of communication seem to be the most important. In 1901, according to the *Shogyo's* figures, three hundred thousand paid messages were sent across the wires from this country, two hundred thousand of them going to Asia, sixty thousand to Europe, thirty thousand to America and ten thousand to various places. There has hitherto been a decided preference for the Vladivostock route in consequence of its superior cheapness, but whereas the new reductions will affect the Vladivostock line to the extent of only 20 per cent., it will effect the Shanghai route to the extent of 27. Doubtless the Manila-Hawaii route will henceforth attract a good deal of traffic. The sum collected by Japanese telegraph offices and transmitted to foreign governments or companies for services outside Japan is about 1¼ million yen annually. A reduction of 20 per cent. both ways—which is the average cheapening now contemplated—will therefore mean a total yearly saving of some 70,000 yen to senders of telegrams from Japan. One immense advantage of the Manila-Hawaii line is that telegrams by it reach their American destinations in 4 hours, against 15 hours by the route hitherto used.

STEEL CORPORATION'S BONUS PLAN.

The practical operation of the plan of the United States Steel Corporation in selling stock to employees is illustrated by the settlements recently made in the case of a number of employees who have died. Life insurance, as well as a profitable investment, is afforded. Here is a statement of one of the cases as reported by the *Iron Trade Review* of Cleveland. Peter Collins, deceased, formerly in the employ of the Illinois Steel Company, subscribed to and was awarded four shares of the preferred stock of the United States Steel Corporation at \$82.50. The deceased had made partial payment on his subscription, amounting to \$40, and under date of June 6 the United States Steel Corporation paid to his heirs the sum of \$149.06, as follows:—

Amount paid on subscription.....	\$ 40.00
Dividends credited.....	14.00
	\$ 54.00
Less for interest at 5 per cent. on deferred payments.....	4.94
	49.06
Special bonus of \$5 per share per year for five years which deceased would have received had he lived and remained continuously in the employ of the company.....	100.00
	149.06

Had this workman lived and remained in the employ of the company he would have received as of January 1, 1904, a special bonus of \$5 per share upon his subscription. This would have reduced the price of the stock to him to \$77.50 per share. Each year, for five years, this would have been repeated, so that at the end of the five years his stock would have cost him \$57.50 per share, and he would have received, in addition, dividends at the rate of 7 per cent. per annum on the per value of his stock, or \$28 per annum, less, of course, the interest at 5 per cent. on deferred payments. This figures an average return for the first five years of about 10 per cent. on his investment. At the end of five years he would therefore have four shares of stock costing him \$57.50 per share, or \$230, on which he would receive thereafter \$28 per annum, or 12.17 per cent. on his investment. Thus far fifteen employees, subscribers to the preferred stock under the above plan, have died, and the United States Steel Corporation has settled with their heirs or estates on the same basis as the above illustration.

THE SOMALILAND CAMPAIGN.

The Somaliland campaign is still blundering wearily along, taking its toll of human lives as well as its dole of British treasure. It is a campaign typical of those "little wars" from which the British empire is never free, wars which Lord Salisbury once described in the House of Lords "as the foam-flecks on the advancing wave of modern civilization." These foam-flecks are nevertheless annoying things and those connected with Somaliland are particularly so. As the *Spectator* put it, nobody in England wants Somaliland, or would give a sovereign for it in fee-simple; yet the Government is now pledged to a war which may cost millions in money and hundreds of good English and Sikh lives. And for all this outlay of blood and treasure there is nothing to gain, while perhaps a liability is being incurred which will compel the victors to annex another desert province which can never pay expenses, or police itself, or be free from

the risk of dangerous and costly surprises. The thing began in a natural way enough. When Great Britain took Aden and made it an important post, though it is a place which has been described as "a bit of the floor of the infernal regions thrown up to show us what they looked like"—it was found to be a region that produced nothing whatever, either to eat or drink. Obstinacy develops resource in the British. The water difficulty, which for a moment seemed insuperable, was overcome by distillation, and the food difficulty by buying supplies from the coast tribes of the opposite Somali country, to whom British appetites appeared a source of wealth untold. "Aden was provisioned sufficiently, and as we were much obliged to the coast tribes and a little afraid of their striking, we scattered promises of protection against the universe broadcast. Now the promises have to be kept. Out of the depths of the Somali Hinterland appears an able Mussulman with a gift for preaching and organising, and an ambition which, like that of all Mussulman religious leaders, has no limits except the air and the ocean. His real objective, it is believed, is Abyssinia, which from its history and its situation is a permanent irritant to Mahomedan pride; but in order to gather force the Mullah attacked tribe after tribe, absorbing each as he defeated it, and at last began harrying our own 'friendlies.'" They appealed to Great Britain for help, and, of course, it was given, but it was given in the inept way in which the British commence all their never-ending military undertakings. In the present case the British are co-operating with the Abyssinians and after the usual preliminary muddles, petty disasters, and break-down in transport arrangement, the Indian Army has been placed in full charge of the affair, as it should have been from the first, and before long we may hope to see General Egerton and his staff producing order out of chaos. For there can be no drawing back, firstly, as the *Spectator* points out, "because our good faith is at stake, and secondly, because a retreat evidently due to the Mullah would send a thrill of exultation through all the Mussulman tribes of Africa, and perhaps compel us, and the French, and the Italians to fight for our lives on larger and more important fields. We are all three hopelessly outnumbered, our enemies are brave men with many potential Hyder Alis among them, and if they once believe that attack on the white men can be successful in the end, Europe must either bid adieu to North Africa, or deliberately subjugate it at a cost which will be the despair of statesmen as well as economists." The Mullah in the end will be smashed, for the British have a silent though none the less effective contract with their Government that they must win in the end. All the same it would be infinitely more to their credit could the element of muddle be eradicated once and for all from their national policy.

A YEAR'S TRADE.

Mr. H. G. Parlett's report on the foreign trade of Japan for the year 1902 worthily maintains the traditions of the past and must be set down as masterly in its handling of facts and lucid in its grouping of figures. In his introduction he says:—

Notwithstanding the fact that the sum total of Japan's foreign trade for 1902 was in excess of that for 1901, last year cannot be called a prosperous year. Various causes combined to aggravate the commercial enervation and inactivity from which Japan had been suffering for three years or more,

and from which she was only just showing signs of recovering. It is true that the announcement in February of the conclusion of the Anglo-Japanese alliance gave a temporary fillip to trade, but this did not last, for, with the advance of spring, came a long period of late frosts, heavy rains, and weather so generally unseasonable that much anxiety was manifested, not only on account of the wheat and barley harvests, but also for what is far more important, Japan's silkworm crop. Fortunately the fears for the latter proved unfounded, and in the second half of the year export trade in raw silk reached a height of prosperity hitherto unknown, proving, indeed, the saving factor in the country's commerce for the year. The sale of 50,000,000 yen worth of Government bonds in London in the month of October would have fostered a further revival of activity in commercial circles had it not been for the apprehensions, unfortunately too well grounded, which had been all the summer entertained of a bad rice crop. It had been hoped at first that the harvest might equal that of an ordinary year, but the storms and floods of autumn effectually banished this hope, and the year closed on quiet markets and full banks.

Under the heading, Locomotives, we read:—

The following is an approximately correct list of the locomotives ordered from abroad:—For the Government railways, 30, to British makers. For the Hokkaido Government Railway, 6, to America. For the Hakodate-Otaru Railway, 3, to British makers. In addition the Nippon Railway Company ordered 12 locomotives from British makers, and the Kyushu 12 from American. In Japan itself during the same period three or four engines were made at the Government works at Kobe, in the Sanyo Railway Company's shops and at the Osaka Locomotive Works.

At the beginning of 1903 a certain amount of excitement was caused in engineering circles by the action of the Nippon Railway Company in deciding between tenders they had asked for, for 32 locomotives were ultimately given to the highest tenderer. An explanation of the company's action was subsequently given by the President of the company at a general meeting of the shareholders, but it is doubtful whether it would entirely commend itself to the disappointed competitors.

The final paragraph of the report deals with the question of Foreign Capital and thus epitomises the present situation:—

A great deal has been written and said during the past year about foreign capital, the need for which is as pressing as ever it was, but the obstructions against its influx still exist. In the spring of last year negotiations were started between certain railway companies in Japan and British capitalists in London with a view to raising loans, an expert being sent out from the United Kingdom to inspect the lines of the companies in question. Of course the much vexed question of land tenure at once cropped up. As has been stated in previous reports, no foreigner can singly and individually own land in Japan outside the foreign settlements, though an association of foreigners, registered as a "juridical person," can. The "juridical person," however, is a complication of which the foreign capitalist fights shy though it is believed that an understanding was arrived at according to which money would be advanced to the negotiating companies, provided they were able to get the Diet to sanction certain amendments in the law for the hypothecation of railways. Unfortunately the amending Bill never came before the Diet, for the latter was dissolved shortly after the Session began. Matters therefore remained *in statu quo*, and the railways have to go without their much-needed money. Then, in the month of June, an attempt was made on behalf of the Tokyo Gas Company, but the shareholders thought it calamitous that the foreigner should enjoy equal privileges with themselves, and the result was that the negotiations fell through. The last attempt made to introduce foreign capital is in connection with the Tokyo Electric Railway, and the money is to come from the United Kingdom or Australia. Such a storm of opposition has, however, been raised by a certain though not very reputable portion of the Tokyo press, that it seems doubtful whether the negotiations will reach a conclusion. In fine, Japanese business men want money; they are aware, too, that capital in the West is cheap, that 5 per cent. is there considered a good return for money invested, whereas, in Japan, under ordinary circumstances, it is difficult to borrow under 8 per cent., and then only on the best of security. They would wish, therefore, to borrow of the foreigner at 5 per cent., use in their own enterprises his money, which, at no unreasonable estimate, should return 9 or 10 per cent., or even more, but at the same time debar the alien from sharing in their privileges, and leave him the poor satisfaction of a not always very reliable security.

TELEPHONES.

Some interesting comparative figures are published by the *Nichi Nichi Shimbun* on the subject of telephones. The three cities of Japan, Tokyo, Osaka and Kyoto, have 24 exchanges, 144 places where telephonic messages may be sent, and 120 automatic telephones. The total number of subscribers having telephones in their own houses is 33,418. This sounds a sufficiently satisfactory state of affairs, but when a comparison is made with even the second-rate countries of Europe, Japan takes very low rank. Thus:—

	Number of population per subscriber.	Area in square miles per telephonic exchange.
Norway	61.6	95.6
Sweden	63.2	155.4
Switzerland	76.4	8.4
Denmark	81.5	34.3
Luxemburg	119.6	2.0
Holland	297.8	45.6
Belgium	393.1	112.4
Japan	1,602.6	1,180.7

Certainly these figures are eloquent, but surely even without consulting statistics it is possible to affirm confidently that the supply of telephonic machinery in Japan is wholly inadequate. The really important figures are those not published by our contemporary, namely, the figures showing how many applications are vainly waiting satisfaction in the archives of the Bureau of Posts and Telegraphs, and how many have been satisfied within the past five years. Nothing saves the situation now except that a great many folks, allowing themselves to be carried away by the novelty of the thing at the outset, subscribed for telephones which they now find onerous, and which they are consequently seeking to dispose of. Many advertisements in that sense appear in the columns of the *Fiji Shimpo*. Thus by spending 60 or 70 yen those in most urgent need of a wire can obtain it. But none the less the supply is quite inadequate.

RUSSIA AND MARQUIS ITO.

We do not know whether Marquis Ito will be pleased or chagrined to find himself strongly eulogized by the Port-Arthur journal. In England it has generally been the custom to conclude that when a prominent statesman became the object of laudation in Paris, in Berlin or in St. Petersburg, the time had come for his own nationals to look askance at him. Although on the whole a tolerably miserable prejudice, that kind of instinct is not without elements of common sense. Happily it is no longer active in the case of France. Englishmen would now regard any expression of French public opinion without jealousy or distrust. But unhappily they would not take the same frank view of anything appearing in the journalistic columns of the Russian and German capitals, and we suspect that one of the present causes of Mr. Chamberlain's popularity is the abuse he receives in Berlin and St. Petersburg. That kind of thing contributed materially to make Lord Palmerston beloved in his day. At all events the Port-Arthur journal would have shown more tact had it been less demonstrative. It piles a heap of flattering adjectives on Marquis Ito's name; calls him the influence that makes for Far-Eastern peace and for Japan's security; alludes in a cryptic way to some action taken by him in St. Petersburg while the negotiations for the Anglo-Japanese alliance were progressing in London; and denounces the Katsura Cabinet as having pushed Japan to the verge of

a precipice. We query whether that kind of writing will either discredit the Katsura Cabinet or augment the nation's confidence in Marquis Ito, and we observe with some surprise that our Port Arthur contemporary seems disposed to regard Marquis Ito's appointment to be President of the Privy Council as placing him in a position of greater power than he enjoyed previously. It makes very little matter really what official position Marquis Ito occupies. He is always, and must always be so long as he lives, the tribunal of last resort immediately after the Throne in all questions relating to Japan. But the Japanese public would scarcely be disposed to endorse the Port-Arthur newspaper's estimate of the effect of his appointment to preside at the Privy Council.

RICE.

The very favourable weather now prevailing inspires strong hopes of a fine rice crop. It is of course possible, and indeed the great heat now prevailing renders it not improbable that the close of the season will be marked by tempests which may undo much of the good wrought by previous sunshine. But just now hope runs high, and special interest being thus aroused, the *Nichi Nichi Shimbun* takes occasion to revert to the old problem that however good the harvest may be, Japan never grows as much rice as she needs. In support of this proposition our contemporary adduces figures for the past 5 years:—

Year.	Produce in <i>koku</i> .	Area of land under rice.	Population.
1898.....	47,387,666	2,817,624 <i>cho</i> ⁸	41,718,264
1899.....	39,698,258	2,839,550 "	43,228,863
1900.....	41,466,734	2,828,479 "	43,760,815
1901.....	46,914,943	2,847,468 "	44,235,315
1902.....	40,856,217	2,847,295 "	44,709,815

Finally our contemporary adds a table showing the export and import of rice from Japan during the same years:—

Year.	Export in Yen.	Import in Yen.
1898.....	6,141,118	48,219,810
1899.....	10,282,012	5,950,166
1900.....	3,576,569	9,021,536
1901.....	6,908,913	11,878,958
1902.....	6,676,294	17,750,817

Under the best of circumstances, seeing that the population grows steadily while the area under rice cultivation shows no corresponding development, Japan must expect to be dependent upon foreign countries for a part of her food supply. The *Nichi Nichi* puts the figure at 5 millions of *yen* on a minimum estimate, but if that were all, the matter need not cause much anxiety, seeing that if Japan imports a part of her food stuffs she exports many times as large an amount of other products. Twenty years hence, indeed, when her population will have increased by ten or twelve millions, this problem may become much more serious. But we do not see what she is to do about it. To turn from rice to wheat would be to jump out of the frying pan into the fire for she can be more nearly self-supplying in the matter of rice than in anything else.

THE ELECTRIC DISPUTE.

The hearing of the law suit in the case of the electric railway companies commenced on the 12th instant in Tokyo; not the actual problem itself, but merely the question of an injunction to restrain the advocates of amalgamation from proceeding to carry out the resolutions adopted by them at the meeting which Mr. Amenomiya and his friends declare to have been illegally

constituted. Many side-issues were raised by counsel for each party, but it will suffice to say that, according to present appearances there is not the remotest chance of a speedy settlement, so far as the law is concerned. Several of the leading citizens of Tokyo are known to be heartily ashamed of these disputes, but it is by no means clear that Mr. Amenomiya and his supporters are not taking the wisest course in the interests of the shareholders.

The latest difficulty is that the Street Railway Company wants money to continue its work, and can not obtain it in the present unsettled state of affairs.

COST OF AMERICAN WAR SHIPS.

The contracts awarded for the battleships *Minnesota*, *Vermont* and *Kansas* show, remarks *The Call*, a considerable increase in cost of navy work as compared with the contracts of 1901-2. Newport News, for example, increased its bids for the *Louisiana* 11.14 per cent. over the *Virginia* figures, and in the *Minnesota* the cost is again raised 3 per cent. over the *Louisiana*, making an apparent increase of 14.14 per cent. in two years and five months. While the *Virginia* has 1,052 tons less displacement than the *Louisiana* and *Minnesota*, the horse-power is 2,500 greater in the first named ship than in the latter two, making the *Virginia* relatively more costly to build. On the basis of \$160 per ton displacement and \$63 per horse-power for the *Virginia*, the corresponding data for the *Louisiana* rose to \$176.7 and \$70.5, and is now increased to \$181.6 and \$73 in the *Minnesota*. The following table show the increases:—

Ships.	Tons	Horse Power.	Date of Contract
<i>Rhode Island</i>	14,948	19,000	Feb. 15, 1901
<i>Virginia</i>	14,948	19,000	Feb. 15, 1901
<i>Louisiana</i>	16,000	16,500	Oct. 15, 1902
<i>Minnesota</i>	16,000	16,500	June 9, 1903
<i>Kansas</i>	16,000	16,500	June 9, 1903
<i>Vermont</i>	16,000	16,500	June 9, 1903

Ships.	Contractors.	Contract Price.	Cost Per Ton.
<i>Rhode Island</i>	Fore River	\$3,405,000	\$227.80
<i>Virginia</i>	Newport News	3,590,000	240.20
<i>Louisiana</i>	Newport News	3,990,000	249.30
<i>Minnesota</i>	Newport News	4,110,000	256.80
<i>Kansas</i>	Camden S'yard.	4,179,000	261.20
<i>Vermont</i>	Fore River	4,165,000	260.30

The *Connecticut*, building in the New York navy yard, is estimated to cost \$3,952,000, against \$3,990,000 for the *Louisiana*, building by contract at Newport News. The sum authorized by Congress to be expended on each of these five ships is \$4,212,000, exclusive of armour and armament, leaving \$260,000 for equipment for the *Connecticut*, but only a \$33,000 surplus for the same purposes for the *Kansas*. This latter margin will be entirely wiped out in extras to contractors and work done by the Government to complete the ships and it is evident that there will be a deficiency in the building of the ships of not less than \$500,000 in the aggregate.

THE LATE REV. J. G. CLEVELAND.

The Rev. J. G. Cleveland, Ph.D., for six years in charge of the work of the Methodist Episcopal Mission in Yokohama, where he enjoyed a wide acquaintance, and for the past three years in charge of the work of this Mission in Sendai, passed away suddenly at 1.15 on the morning of Sunday, Aug. 9th, of heart failure.

Dr. Cleveland had been spending the summer with his family in the mountains some distance from Sendai. He had not been well for some days before, being worn

out after some severe evangelistic trips during the hot weather, and also a very severe case of quinsy. The day before a doctor lanced his throat and he seemed so much relieved that his family looked forward to a speedy recovery of spirits and strength, when suddenly, in the night, he called to his wife, "My dear, come to me at once, I am dying." After a few moments of severe suffering he said, "It is all right. It is all right, good-bye my wife, good-bye my children. O God, take care of my family," and his spirit returned to God who gave it.

The funeral services were held in Sendai on Tuesday afternoon, the 11th, at 3 o'clock. They were conducted by the Rev. G. F. Draper, of Yokohama, assisted by many missionaries and pastors. The church was filled by a large congregation, among whom were some of the most prominent people of Sendai, Prince Date, the Governor, the Vice-Governor, and many officials, to whom Dr. Cleveland had greatly endeared himself during his residence in Sendai.

On Monday afternoon previous to taking the remains to the crematory a short service was conducted at the house by Rev. Mr. Jefferys.

Dr. Cleveland was a member of the Star in the East Lodge of Freemasons, No. 640, S.C., and worthily filled its chair as R.W.M. in 1897. He was also a member of the Rose Croix chapter of the 18°. In the Masonic brotherhood he had many warm friends who will mourn the death of one of the kindest and gentlest natures ever called to be a ruler among them.

Dr. Cleveland was born in Centre Brunswick, U.S. in 1857, being in his 46th year. He graduated at Syracuse University, which university gave him his Ph.D. He came to Japan in 1886, and in the 17 years took but one furlough. He leaves a widow and five children to mourn the loss of as true and good a man as ever came to Japan, and one who truly gave his life for the uplifting of his fellow men and the betterment of Japan.

J. L. C.

IDEALS OF THE EAST.

The Women Writers dinner in London this year was presided over by Mrs. J. R. Green, the widow of the well-known English historian. It proved a most delightful affair but the most striking feature was a short speech delivered by a Parsee visitor, the Lady Cowasjee Jehanghir, who was called upon rather unexpectedly for a few remarks. Her address made a profound impression, its simplicity and sincerity striking a chord of feeling in the hearts of all the ladies present. She said:—

Mrs. Green and Ladies—I profoundly appreciate the compliment of having been invited to this most interesting "Purdah Party," and I thank you most gratefully for the high honour implied in your courteous request that I should address a few words of good fellowship to you on this distinguished occasion. But while I have heartily enjoyed the hospitality extended to me this evening, I feel very embarrassed in attempting to give expression to my fraternal feelings towards you in words, and these words, in a language, so to say, foreign to me. My only resource therefore is frankly to tell you exactly the thoughts that have been passing in my mind amidst the delightful company about me. I have called this a "Purdah Party," a party of ladies exclusively, "screened" literally cut off from the other half of the human race—"the mere man." But there the connection of this assembly with anything vernacular in the life of the ever Ancient East ends absolutely. Women have no public life in the East, or only on the rarest occasions, and quite casually. Their lives are wholly domestic, within the doors of their houses. There they reign as Queens, with a sovereignty of which you have no parallel in the West of to-day, and over subjects—their husbands, and their children—whose

devotion to them knows no bounds. Outside their doors they have no real life. I confess I regard old Eastern economy of social life as the more natural; and certainly, so far as the Parsees are concerned, nothing could be happier in its results. Your social life was apparently organised in a similar manner in ancient times; and it would still seem to be truer to your own instinctive ideals, if I may judge from a delicious incident that came to my knowledge a day or two ago. Two dear English children, a brother and sister of 8 and 7 respectively, were asked what they intended to be when grown up. The boy said, "I intend to be a soldier and fight the King's enemies all over the world"; while the little girl, drawing herself up to the height of all her little inches, replied "And I intend to be a Mamma." Ladies, I have felt quite unequal to address you in your responsible, brilliant, and proud position as writers; but I think that in the words of that dear little girl, I have found a way to the heart of all and each one of you, as a fellow-woman. Yes, in the East, in this matter of woman's mission in life, we live nearer the divine beginnings of all things, for happily we still recognise throughout the historic East, that the "True Sovereignty of Woman" is based, as alone it can be securely and most beneficially based, on Motherhood, on the ever divine miracle of the Mother and her pre-born Child.

NOTES ON CURRENT EVENTS.

We read in the *Hochi Shinbun* that the Japanese Admiralty will soon be in possession of three shallow-draft gun-boats for river service. One, the *Uji*, has been built at the Kure dockyard and is now lying at Saseho. Two others have been ordered in England and ought to be on the verge of delivery had not the makers asked for an extension of time until the end of the year. These vessels are of the *Woodcock* and *Woodlark* type—200 tons displacement, drawing only 3 feet of water and armed with quick-firing pieces of small calibre. It is claimed that they will have no difficulty in ascending the Yangtse as far as Chungking. They would, of course, be available for service on the Yalu and the Tadong.

It may be mentioned in this context that according to Japanese journals Viscount Hayashi in London has already received instructions to obtain estimates for a new line-of-battle ship of the *Shikishima* type, and that the Japanese naval experts in England are in consultation with Armstrong's Company and one or two other eminent ship-building firms.

A telegram received in Tokyo gives the gist of a statement published by a semi-official Russian organ and reproduced in the "Political Correspondence" of Vienna. Russia, says this pronouncement, has no intention whatever of swallowing up Manchuria. But in consideration of the large railway interests she possesses there, it is inevitable that she should insist on certain conditions before evacuating the region. The maintenance of Russian influence in parts of Manchuria is not only useful, but also can not impair the commercial interests of other Powers in any way. With reference to the opening of the country a satisfactory announcement will soon be made. Japan herself will reap the advantages of the Manchurian railway. Russia habitually recognises the political and racial interests that Japan has in Korea, and does not entertain any idea of opposing them.

Such is the gist of the utterance as telegraphed.

A new complication has arisen in connexion with the electric-railways' dispute. This time the trouble comes from the *Densha Kaisha* (former Horse Tram Company) which has hitherto been supposed to be all in favour of amalgamation. Certain shareholders of the Company have taken legal action to obtain a reversal of the decision of

the general meeting on July 28th. They claim that the provisions of the Constitutional Code were not complied with in the matter of giving preliminary notice of the subjects of discussion, and further that the President and Vice-President not only exceeded their legitimate powers in previously concluding an arrangement for amalgamation, but also took an unlawful course when they voted for a measure which they had themselves contrived. The complainants finally declare that Japanese companies suffer from grave abuses of power by large share-holders, who adopt whatever courses they deem convenient and profitable without due reference to the views of their less wealthy associates.

The International Statistical Institute publishes some curious information regarding the average age attained in various European countries, which is summarised in the *Leisure Hour*. Norway and Sweden head the list with 50 years. Then comes England with 45½ years, France 44½, Prussia 39, Württemberg 38, Bavaria and other parts of Germany 36. In Austria and Spain the inhabitants have the shortest lives, the average age being only 33. From other countries no complete statistics have been obtainable, but it is computed that Holland and Belgium are pretty much on a level with Prussia, and that Russia and Turkey are not much ahead of Spain owing to the terrible infant mortality in those countries.

With regard to the occupations which ensure longevity, it is the universal testimony of Protestant and Catholic countries alike that clergymen reach the highest age, being close run by gardeners and vine-dressers. Ordinary agricultural labourers, although their occupation is so largely in the open air, are not conspicuous as long-livers, except in France, Sweden, and England. People working with wood are longer lived than those whose occupations are with metals, and both attain a higher age than textile workers and workers in chemical industries. The shortest-lived people are miners, except in England, where the superior mining regulations and admirable sanitary arrangements have a beneficial effect. In England and Norway sailors and fishermen live to a far greater age than in Germany and France.

The telegraph informed us the other day that Lord Iveagh had given £50,000 to King Edward, which the latter distributed among the Dublin Hospitals. Lord Iveagh, like his father before him, has ever been ready to apply his wealth for the benefit of his beloved Dublin. Only the other day, we read, he promised to provide the capital sum of £34,000 to build and equip laboratories and lecture-rooms for teaching science at Trinity College, Dublin, as soon as a sufficient amount has been collected to produce the annual outlay contemplated by the College. The offer will hold good for three years from next May.

The well known artist whose death is announced by the telegram was born at Leeds in 1864, and is the second son of Mr. Philip May, an engineer. The following account of his career is taken from *Men and Women of the Time*:—

He was educated at St. George's School, Leeds. He began his artistic career when he was twelve years old, at which time the Grand Theatre, Leeds, opened, and he became acquainted with the son of the local scene painter, and helped to mix the distemper. Here Mr. May used to sketch sections of other people's designs of costumes, and eventually he designed comic masks and dresses. This brought him orders for portraits, and after a year or two the late Frederick Simpson engaged him to play small parts and to do six sketches a week as advertisement to window bills. He got an engagement

to design the dresses for the Leeds pantomime in 1882, but then determined to come to London as tragedian, his finances at the time consisting of twenty shillings. An aunt had married an actor there, and he sought her out. By his uncle he was next day despatched again to Leeds, but he left the train and walked back to London. Then ensued a time of great privation, and the first turn of good fortune he had was when he met the owner of a photograph shop, who took his drawing of Irving, Bancroft, and Toole and published it. At last a drawing by him of Mr. Bancroft in *Society* brought him to the notice of the *St. Stephen's Review*, where he was set the task of designing a cartoon, illustrations, cover and initials for a Christmas number. A week was given him to do this in. He worked night and day and finished the whole in time. He was employed on the illustrations of the *Review* till an agent came from Sydney to secure an artist. He went out to the Colonies, and was three years on the *Sydney Bulletin*. He was later an artist on the staffs of the *Graphic* and *Punch*, for both which journals he did notable and characteristic work. He travelled for the *Graphic* in America. Since 1892 he had published "Phil May's Annual," and had also given to the world "The Parson and the Painter," 1891; "Phil May's Gutter-snipes," "Phil May's Sketch-book," 1896, &c.

The season called *doyo* came to an end on the 8th instant and autumn commenced on the 9th. It was only a calendar commencement, however, for the great heat experienced throughout the preceding days of the month continued without abatement, the thermometer reading 90° at noon on the 10th, even when placed in the shade and exposed to the breeze. The people are rejoicing, of course, for such weather gives promise of an abundant rice harvest.

It is stated by Tokyo journals that the First Class order of the Rising Sun is to be conferred on Sir Marcus Samuel, Lord Mayor of London, and that several other Japanese Decorations from the Second Class downwards, will also be given to British subjects.

A travelling correspondent of *Commercial Intelligence*, who was recently in Japan, tells a good story, to which he naturally tags a moral, under date at Kobe of May 20. He says:—

Some three or four months ago a local firm asked for agencies in the enquiry column of *Commercial Intelligence*. A London house, which was not very well satisfied with its trade here, promptly sent out a representative who knew the market. The representative arrived here; studied the conditions, ascertained whether the enquiring firm was likely to do justice to the manufactures of his company, secured a few hundred pounds' worth of orders from local dealers, and then offered the local firm his agency. At the same time a letter arrived from another British firm, offering an agency. Both the firms offering the agency were of first class standing, but the local house promptly accepted the offer of the man on the spot. In the other case no terms were even mentioned, and a lot of time would have been wasted in correspondence. In the case of the two firms which came to terms a feeling of personal friendship has been established which will go a long way to smooth over difficulties in the future, and such a footing cannot be established by correspondence.

The tendency throughout Japan is to do away with the middleman, and Japanese traders are endeavouring to establish direct relations with manufacturers. The consequence is that the foreign merchants here are very pessimistic, and give very bad accounts of the present state of trade. A close investigation reveals the fact that a very healthy tone prevails just now. The business may not be so great as in past years, but the conditions are much more sound. At the same time, I must say that the manufacturer's positions is a very difficult one. Should he entrust his business to a local foreign firm, he is not likely to do a very large trade, as the prices put on by the middleman prevent sales. On the other hand, dealing direct with Japanese dealers is attended with a certain amount of risk. If the local merchants would be satisfied with a reasonable buying commission, manufacturers would do well to send their business through them. Failing a satisfactory arrangement in this direction, I would advise direct dealings, even with a risk. Japanese traders have a bad reputation, but signs are not wanting that considerable improvement is taking place in this respect.

Commenting on our remark that "we

do not find in the treaties any provision that "no tax, charge or license of any sort shall be imposed upon foreign companies that is not imposed upon native companies," the *Japan Gazette*, with some show of exultation, quotes the well known provision, that "the subjects of each of the High Contracting Parties * * * shall enjoy, respectively, the same treatment in matters of commerce or navigation as native subjects, or subjects or citizens of the most favoured nation, without having to pay taxes, imposts or duties of whatever nature * * * other or greater than those paid by native subjects, &c." It would seem, therefore, that the *Japan Gazette* discovers identity between the two formulae: "no tax, charge or license of any sort" and "taxes, imposts or duties of whatever nature." We suggest that a little more accuracy is desirable on the part of a journal undertaking to denounce the Japanese Government, or any Government, for violating the letter of a treaty.

The standing committee on Rescue Work in Tokyo, consisting of fourteen ladies, seven Japanese (the wives of presidents of Mission Colleges, and wives of prominent pastors and business men) and seven missionaries (representing as many different denominations), are putting up a new Rescue Home, on land purchased eight years ago at Okubo, a suburb of Tokyo. The building now in process of erection will accommodate forty women; and there are also suitable rooms to accommodate a foreign lady superintendent. Three thousand yen toward this new building has been contributed by the Florence Crittenton Mission in the U.S. and over nine hundred has been collected in Japan. Foreign missionaries, and Christian Japanese women, have given generously, yet the committee need between four and five hundred yen more to complete fence, drains, walks, and some inside furnishings, before they can move their family of fifteen in. Anyone desiring to add their contribution so that the Committee may occupy the new home free of debt, will aid in a most worthy cause, as well as raise a burden from the shoulders of the Building Committee. Contributions can be sent to J. K. McCauley, Karuizawa.

The Manila *Sunday Sun* has the following pertinent comment on the exclusion from the Philippine Islands of a clerk, who came out from home to fill an appointment in the Chartered Bank at Manila:—

Mr. Shuster, Collector of Customs, has decided that one Frank Allen, an employee of the Chartered Bank, has no right to enter these islands, inasmuch as he comes here under contract for a number of years. With all due respect to Mr. Shuster, and without impugning his honesty and sincerity of purpose, I am sorry to say that I consider Mr. Shuster Quixotic and silly in the extreme. Furthermore he is doing his best, although undoubtedly unintentionally, to injure the business interests of these islands and create ridicule for us and our laws in the eyes of foreigners. According to the strict letter of the law, Mr. Shuster could keep out of these islands three-fourths of the people who come here to accept positions. He might have kept out the thousand or less school teachers who came here under contract to serve the government for two years unless otherwise released from their agreement. He might, following out the logical course of his argument, exclude from these islands every American soldier who is brought here under contract, signed and sworn, to give his services and his life if needs be, to the American government at any time during a period of three years. He might, also, turn back to America, all young women (God bless 'em) who come to the Philippines under either oral or written agreement to love honour and obey, for all time earthly, the insular American who has sent for them. He might—but what is the use of specifying? Mr. Shuster might, and for that matter is liable to, do almost anything. He is a slave to duty, an immolated martyr upon the altar

of red tape and restriction, a youthful Canute endeavouring to single-handedly oppose and wave back the sea of common sense and public opinion. When Mr. Shuster is older he will view things in a different light.

Now that the cable is laid and the telegraphic service opened between Hawaii and Manila, it is possible to send a telegram from Japan to Honolulu for 1.32 dollars (gold) whereas the charge hitherto has been \$2.77. That is a very marked difference.

The English Law School (*Tokyo Hogaku-in*) founded some years ago by Mr. Masujima, has been raised to the rank of a university under the name of the Tokyo Hogaku-in Daigaku.

BASEBALL.

A VICTORY FOR THE "BACHELORS."

Close and interesting was the game on Saturday afternoon between the "Bachelors" and the "Stars"; in fact it was probably the best game played this season. At one-time the result seemed a sure thing for the "Stars," who were seemingly jubilant over what appeared an easy victory against the "young'uns," but an unexpected streak of luck in the 8th inning for the "Bachelors," not to mention some all round good batting, turned the tide in their favour and resulted in a win for them by 13 runs to 10, with an inning to spare. The "Stars" went to the bat first and by some good hitting, principally by Merriman, scored three runs before they could be put out. Van Cleve started batting for the "Bachelors," and reached first, Thorn bringing him home on a strong hit over left-fielder's head, a three bagger. The play from now on was close and interesting, the score being 5-4 up to the seventh inning, when, the "Bachelors" becoming slightly rattled, the "Stars" did wonders with the bat and scored four runs, 9-4. Things looked gloomy for the "Bachelors," while the "Stars" ineffectually tried to hide their beaming satisfaction and the spectators displayed sympathy for the "young'uns." But in the end of the eighth the "Stars" went to pieces and the "Bachelors," every one of them, knocked the ball around with a determination to "win or die!" Nine runs were scored before they were put out amid loud yells and much chaffing at the expense of the "Stars." Side remarks such as "fallen stars," "lob-stars," etc., were frequent, and when the "Stars" had batted for the last time, only adding one run, all the "Bachelors" grew hilarious and wore a perpetual grin. There were several good plays throughout, the "Stars" playing an excellent game, and batting very strong. Cowan, the "Star" captain, received a very nasty hit while batting and was obliged to take centre field. Parker, the "Bachelor" second base, played a splendid game, most of the time hopping around on a sprained ankle. E. W. Kilby and Cable played excellent ball, Van Cleve and Edwards pitched very steadily throughout, though the latter at the end, owing to lack of practice, grew rather wild. Thorn's throwing from home was better than it has ever been, catching four men on second and one on third. Mr. Stone umpired and Mr. Devin scored. Tea was served in the Pavilion after the game.

What purports to be the greatest gold strike ever made in Colorado is heralded from Waunita Hot Springs in the Box Canyon district, twenty-eight miles east of Gunnison.

YACHTING.

Yachting on Saturday was confined to two events—a competition for 21-raters, the course in this case being out round the Tsurumi mark, the Lightship, the Mandarin Bluff mark, a second turn to Tsurumi and home—and another for the "Larks," who raced round one of their courses outside the breakwaters.

A faint air direct from the land sufficed to carry the 21-raters with spinnakers out of the harbour and off to the Tsurumi mark where *Chocho*, which in this weather with her large canvas was exactly suited, got round first, *Winsome* second. It was a fairly close race to the Lightship and here *Edna* was first; *Winsome*, having mistread the course and so overstood, being second, *Chocho* third and *Pelee* last. On the second leg to Tsurumi *Winsome* caught up and passed *Edna*, and the order was varied in that respect, *Chocho*, third, *Pelee* having given up. Thence home *Winsome* had the race rather easily in hand; *Chocho's* time allowance did not suffice to bring her within sight of a prize. Times:—

	Finish.	Club Time.	Corrected
	h.m.s.	m.s.	h.m.s.
<i>Winsome</i>	5.02.45	5.02.45
<i>Edna</i>	5.09.26	5.09.26
<i>Chocho</i>	5.15.25	1.22	5.14.03

Fourteen "Larks" went out very prettily before the southwesterly breeze, and though for a time it seemed as if they were going to spend the night at the Lightship, twelve of them succeeded in going round the course. Times:—

	h.m.s.
1. (Thompson)	6.10.05
2. (Manley)	6.04.10
4. (Mason)	6.02.55
6. (Poole)	5.42.55
8. (Russell and Alcock)	6.10.52
10. (Watt and Drummond)	5.47.10
11. (F. H. Abbey)	5.47.20
12. (R. Sander)	5.43.02

In addition to winning the Club first prize Poole captured a silver cup subscribed for by owners and sailed for on handicap.

CUSTOMS DECISIONS.

On August 4th, the Yokohama Customs delivered a decision in a protest lodged by the Nozawa Gumi. The company imported a dairy machinery, including the Alfir Dairy Separator, Champion Churn, and Cunningham's Butter Worker, together with a certificate of origin, and on these the appraiser imposed *ad valorem* duty of 20 per cent. under No. 497 of the tariff. The importers protested, contending that the duty should be 5 per cent. *ad valorem* under No. 13 of the tariff which enumerates implements, tools and farmer's machines. The protest was rejected on the ground that the goods in dispute were not to be classified as machinery needed for agricultural work, but for purposes of manufacture.

The same day another decision was rendered by the Customs on protest filed by the Toyo Shokai. The Japanese firm imported a quantity of cotton and satin trimmings, with a certificate of origin, on which the customs authorities imposed *ad valorem* duty of 25 per cent under No. 62-B of the tariff. The importers protested, holding that the goods were cotton and silk satin and the duty should be 10 per cent. *ad valorem* under No. 349. The protest was dismissed on the ground that the style of manufacture was different from that of satin, and the goods could not be used for any purpose other than as trimmings.

In the Yokohama Customs, a decision was delivered, on August 8th, on a protest filed by Messrs. Berrick Brothers, No. 75, Yokohama. The firm imported two kinds of iron hinges, viz. one 4 inches in length and another of larger size on which the appraisers imposed *ad valorem* duty of 15 per cent. in accordance with No. 263 of the tariff, and of 20 per cent. by No. 271 respectively. The importers contended that duty should only be imposed under No. 263 of the tariff. The protest was sustained on the ground that the hinges in dispute are intended for doors in dwelling-houses.

THE SHANGHAI AFFAIR.

THE British Government has been practically forced into a strange position. In the hands of the Settlement Police at Shanghai are certain Chinese subjects apprehended under warrant from the Chinese authorities on a charge of acting in a manner calculated to disturb public peace and good order. There appears to be some uncertainty whether the gravamen of the prisoners' offence should be sought in articles published by a vernacular journal, the *Supao*, or in utterances publicly made on the 25th of April when a meeting was held at Chang Su-ho's garden to denounce the Governor of Kwangsi, who was suspected of having invited French military aid to quell the rebellion in that province. That part of the question does not greatly matter, however. The undeniable fact is that the accused persons have been guilty of treasonable declarations, whether verbal or written. Their surrender is demanded of the Settlement Police by the Chinese Authorities, and the British Government has instructed its Representative in Peking that there shall be no surrender. So flagrant a conflict of jurisdictions seldom occurs. It is a collision between a system representing the fullest freedom of speech and a system absolutely denying that freedom. Moreover, Downing Street's decision virtually converts Shanghai into an Alsatia for Chinese political offenders, and that is a very hard nut for the Chinese Government to crack. It is our own belief that the doctrine of asylum is considerably abused by the present practice of some Occidental Powers, yet in this particular instance we fail to see how the British Government could have acted differently. What has to be asked is, would these men have been surrendered to Chinese justice had they effected their escape to Hongkong or to Tonquin or to Kiaochow. Most certainly they would not. From the moment that they set foot upon land permanently or temporarily included in the dominions of Germany, of France or of England, they would have enjoyed an inviolable right of asylum against the consequences of their political transgressions, and however questionable such asylum might seem in the case of assassins like the bomb-throwing miscreants of Russia or the savage soldiers of Servia, no one would query its propriety when the offence had been limited to some abuse of the natural privilege of free speech. The Shanghai Settlement is not British territory, or American territory or German territory, but for judicial purposes it is, in effect, the territory of all the Treaty Powers, and whatever privilege of asylum they would extend to political refugees in the home countries, that same privilege must be extended to political refugees in Shanghai even when they are Chinese subjects. We need not consider how it would be if a police-hunted nihilist managed to effect his escape to the Far East and take up his

residence at Nankipoo or on the Bubbling Well Road. It is enough for present purposes that when a Chinese political refugee enters the Settlement he becomes entitled to asylum which Great Britain is not the most likely Power to surrender. Every one can appreciate the strangeness of the incident, and the impossibility of reconciling it with any theory of Chinese Sovereignty. But the whole situation bristles with curiosities, and there is nothing for it but to cling tenaciously to fundamental principles, undeterred by the anomalies that lie in the path.

SHIPPING SUBSIDIES.

TOKYO newspapers attribute to the *Kenkin-kai* a suggestion that among other retrenchments possible and advisable a large reduction might be effected in the subsidies now granted by the Treasury for the encouragement of maritime enterprise. The *Kenkin-kai* is an association including in its ranks a large number of the members of the House of Peers. The advice tendered by such a group of men has therefore much importance. They do not, so far as we can perceive, indicate the exact amount by which these subsidies should be reduced, but if any inference may be drawn from the sum total of the retrenchments recommended by them in certain items of State expenditure, the conclusion is that they would cut down by at least two-thirds the sum now appropriated annually to this purpose; that is to say, reduce it from six million *yen*, approximately, to two millions. That would be a signal reversal of the policy deliberately adopted by the State after the China-Japan war, and we believe that it would be an extremely mischievous reversal. There is, of course, no reason to suppose that the members of the *Kenkin-kai* have allowed themselves to be influenced solely by the desire of saving money. They must have fully considered the consequences of the course they recommend. Those consequences would be virtually to deprive Japan of her merchant marine, or at any rate of that portion of it which includes all her fine ocean-going steamers. Without assistance from the State nearly all the services now carried on by Japanese shipping companies in foreign waters would have to be abandoned, and the vessels must either be sold or left lying in harbour, where they would soon become totally useless. It is scarcely necessary to demonstrate the weight of the blow that would thus be given to Japan's reputation as a progressive nation. The members of the *Kenkin-kai* must be fully cognisant of that phase of the affair. On the ground of pure economy, therefore, their proposal claims consideration. Have they fully examined that ground? We greatly doubt it. For in the first place they seem to take no note of the earnings of the country's merchant fleet in foreign waters. That item alone is of great importance, and there can be no question that it will grow in importance, and that the profits

thus accruing to Japanese subjects will occupy a large place in the records of her foreign trade. At the present moment it may appear that the country is incurring much expense for the sake of educating this profit-winning capacity. But everything must have a beginning. Already indeed the initial stage has been passed, and the Japanese flag floats over a fine fleet of freight-earning vessels. To annihilate at one coup all these results that have been achieved at such cost and labour would be an unhappily retrogressive and uneconomical step. And there is another point. Have the members of the *Kenkin-kai* reflected that if the State abandoned its system of subsidies, it must either equip itself with a fleet of transports or finally abandon its position on the continent of Asia inclusive of Korea? It would be a case merely of taking the hand out of one pocket and putting it into another. Twice since the very early days the Government has made signal incursions into the field of maritime enterprise. The first occasion—we are not speaking of the very beginnings of the country's mercantile marine—the first occasion was when the *Kyodo Unyu Kaisha* came into existence under the aegis of the Treasury. Korea was the main cause of that event. The incident is sufficiently remote to be frankly discussed. Every one intimately informed knows that the consideration which mainly moved the Government on that occasion was a perception that the country did not possess means to protect its vital interests on the Asiatic continent, and that the development of the Mitsu Bishi fleet was too slow to meet the needs of the situation. Therefore the State made a large sacrifice to start the *Unyu Kaisha*. The second occasion was after the war of 1894-5. A large scheme of armaments' increase was then mapped out, and as a matter of sheer necessity provision had to be made for some corresponding growth of the mercantile marine; in other words, of the fleet of transports. Therefore the Government devised and gave effect to a liberal scheme of navigation encouragement, which, however, had to be subsequently modified since it threatened to overtax the convenience of the Treasury. It is this modified scheme which the *Kenkin-kai* would now subject to heroic reductions, thus striking away one of the pillars of the country's efficiency in foreign politics and upsetting the programme of national expansion which the country has pursued steadily since 1896. We find it very difficult to believe that these points have received due attention from the members of the *Kenkin-kai*.

THE INSURANCE QUESTION.

IN our issue of the 7th instant we published a letter from Mr. BASIL H. BETTS; a clear, moderate and business-like letter, which has doubtless been widely read and duly appreciated. Mr. BETTS, at the outset, corrects some assumptions made by us with

regard to the total amount insured by "the most prosperous company in Japan" and with regard to the time the Company has been operating in this country. We place entire reliance in our correspondent's explanation, but as to the disagreement between our own figures and those actually constituting the record of the Company to which he refers, we would point out that we had not any particular company in view, and that the data of our calculation were purely hypothetical though the theory was in agreement with that enunciated by Mr. BETTS.

This very important question presents itself under three aspects. The first is the amount of security that the foreign companies will actually be required to put up. The second is the form which that security must take. The third is the legality of the Government's Order from the point of view of the treaties.

As to the first point, stated in the briefest terms, the case is this: the Japanese authorities are understood to claim that the amount practically required by the Order will never greatly exceed one half of the amount of the premia. Mr. BETTS and other foreign insurance exports whom we have consulted, allege that the amount will ultimately be equal to one half of the sums insured. It will be observed that the difference is between "premia" and "sums insured:" a serious difference, for whereas one half of the premia collected by a company writing twenty million *yen* worth of insurances would be half a million *yen*, approximately, one half of the sum insured would be 10 millions of *yen*. In fact, the latter figure is twenty times the former. It appears useless to enter into an editorial discussion of a matter of arithmetic. We must assume that this discrepancy can easily be explained.

The second point, namely, the form which the security must take, is of much interest. It is here that the value of Mr. BETTS' lucid statement becomes chiefly appreciable. What he says, in effect, is that the great insurance companies of modern times derive the bulk of their profits, not from payments made by policy-holders, but from clever financial manipulation of their assets. In other words, if a company collects a million sterling annually in the form of premia, it looks to obtain by skilled investment of that sum such a return as shall not only pay all its own running expenses but also enable it to share a large bonus with the persons insured. To do that it must have absolute control of its assets; not absolute in the sense of eschewing official inspection from time to time, or declining to comply with any precautions imposed by law in the interests of insured; but absolute in the sense of being able at any moment to transfer its funds from one kind of security to another and to take instant advantage of opportunities such as frequently present themselves to great capitalists. Now the Order in question requires, according to our correspondent, that the for-

eign companies must lodge their security in the form of Japanese five-per-cent. bonds; a practically permanent investment, since the bonds would necessarily remain always in the hands of the authorities. If the sum to be lodged were of trifling amount, say two or three hundred thousand *yen*, such a restriction might be tolerable. But when the amount rises to one half of the policies written, then it is evident that the Company's financial operations would be crippled beyond endurance. Probably in the whole world there is not any one form of security in which an insurance company would be willing to permanently invest its funds. Even English consols, if they carried 5 per cent. interest, would be ineligible. Thus far the ground taken by Mr. BETTS seems to us to be quite incontrovertible. But the question is, has he been accurately informed. Our own information as to the form of the security shows the Japanese expression to be *shumu-kwan-cho no ninkyo shitaru yuka-shōken*, or "negotiable securities sanctioned by the chief of the office having control of the business." That, as we read it, may mean any and every kind of security, foreign or Japanese, and is by no means limited to Japanese State bonds. Here, then, is a cardinal difference, and when we observe that the first point also involves a radical discrepancy, it appears to us that not only more light but also more conference is needed.

The third point is the conventional legality of the Order. We confess that we approach this problem with reluctance as it has already inspired some writing so intemperate as to damage the cause of the foreign companies. All experience of Japanese statesmen goes to show that they observe their treaty engagements with the utmost scrupulousness, and it is a fair assumption that when they take a step which has been under contemplation for three years, they have amply examined it by the light of the conventions. At all events, before engaging in any public discussion of this kind, it is well to be sure of the premisses, and we do not find in the treaties any provision that "no tax, charge or license of any sort shall be imposed upon foreign companies that is not imposed upon native companies." However, without considering actual phraseology, we entirely agree that the spirit of the treaties is to place foreigners and Japanese on an equal footing in Japan for purposes of trade and manufacture. But it is essential that the footing shall be equal. Is it equal in the present case? Do foreign insurance companies carrying on a branch business in Japan, having their assets invested abroad beyond the reach of Japanese creditors, and not being subject to the official inspection and control which Japanese companies must submit to, do such companies stand on an equal footing with Japanese companies in Japan, and are they entitled to claim exemptions equal to those enjoyed

by Japanese companies in one direction while, at the same time, enjoying in another exemptions which the Japanese do not enjoy? We should like to hear what view Mr. BETTS, evidently a man of impartiality, takes of these considerations. It appears to us that since foreign insurance companies doing business in America or in an European State—with, perhaps, a few exceptions—do not in the eyes of the law stand upon the same footing as native companies, it would scarcely be just to claim more favourable treatment for foreign companies in Japan.

THE SHANGHAI CASE.

A TELEGRAM to the *Jiji Shimpō* says that counsels are divided among the foreign Representatives in Peking on the subject of transferring the political prisoners to the Chinese Government. The British and Japanese Representatives oppose all idea of surrender, but the French and Russian support the demand of the native authorities. We do not learn anything about the views of the German or the American Ministers.

Speaking of this, we may allude to a statement made by the *North-China Daily News* that the revolutionary notions ventilated by the men whose rendition is demanded have their origin among Chinese students educated in Japan. Indeed, the Shanghai journal goes so far as to say that "whatever revolutionary tendencies are abroad among the rising generation in China are due to the influence and teachings of students from Japan." This is strongly traversed by the *Japan Times*, which declares that "no Chinese reformers of a revolutionary, that is to say, anti-dynastic tendency, are likely to find here any sympathy, much less support." The *Japan Times* further asks, pertinently, where KANG YU-WEI and his followers learned their scheme of reform, and whether, with any shadow of justice, Japan can be accused of having been the seed plot of their crop of agitation. For our own part we are disposed to ask the *N.-C. Daily News* whether, when foreign sources of revolutionary propaganda in China come to be enumerated, the columns of the English local press in Shanghai must not be placed at the head of the record. It seems to us that they must. Had we read them with Chinese eyes and had their arguments and their earnest outspokenness carried any conviction to our minds, we could not but be advocates of the overthrow of the Manchu rulers, whose corruption, lack of patriotism and total incapacity to administer the affairs of the huge Chinese empire on a basis of national efficiency, have been perpetually denounced, and are still denounced by Shanghai journalists. In truth it is a manifestly unwarranted shirking of responsibility to lay the whole of this burden on Japanese shoulders. We can no by any means follow the *Japan Times* to

the full length of its repudiation. Years ago, years before the war between China and Japan, the Kiao-chow affair, the Port Arthur affair, the Boxer affair, and the Manchurian affair had equipped the most moderate observers with practical arguments against the misrule of the Manchu, we with our own ears heard propounded again and again in Japan the doctrine that only a revolution could prise China out of her conservative grooves. Of course we have no intention of suggesting that any such view prevailed widely in the country, but had it so prevailed, and had we then been asked to indicate its source, we should have unhesitatingly pointed to Europe and America. It is in Europe and America, and above all in the Far-Eastern organs of European and American opinion, that an unflagging crusade has long been carried on against the Manchu dynasty; carried on in times when the notion of Japan becoming China's educator had not even been conceived by the general public. Whatever Japan may have said and done in this matter has been merely a reflection of what the Occident has done and said, and if justice really possessed any of the level-headedness commonly attributed to her, it is not the scribes of the *Sin-pao* that should now be on trial in Shanghai for seditious writing but the scribes of the local foreign press. We are stating hard historical facts without any attempt to discuss their merits. It appears to us quite extravagant, laughably extravagant, to pretend at this eleventh hour that anti-Manchurian preaching finds its present texts in Japan. From a Western pulpit the doctrine of such sermons has been proclaimed for years, and one need only recall the manner of KANG YU-WEI's flight from Peking and the kind of enthusiastic support given to him by English journals in China and Hongkong, as well as the writings that emanated from the press in Singapore then and subsequently, one need only recall these things to be assured that the Manchu have been long on trial in a forum much larger than the school-rooms of Japan and have been again and again condemned. The modesty of the leading Shanghai journal assumes a *sous-pçon* of mockery when, with its own library of files beside its elbow, it attributes the birth of revolutionary ideas in China to the labour of "students from and in Japan," and as for *L'Echo de Chine*, which ascribes the reactionary tendency to the influence of Protestant missionaries, we would ask that journal whether it has adopted the policy of endeavouring to foment another Boxer outbreak.

YONG AM-PHO.

JAPANESE newspapers agree in stating that arrangements for the formation of a Russian settlement at Yong Am-pho have been definitely made. The agreement is said to have been signed on the 20th ultimo, Mr. BODISKO (?) representing the concessionaires. It consists of six clauses.

- 1.—The Korean Government leases to the Russian Timber Company certain lands at Yong Am-pho.
- 2.—The rent on such lands shall be paid by the lessees to the Korean Government. (Some versions say to the Korean Household Department).
- 3.—The Russian Company shall purchase at a reasonable price all rafts of timber floated down the Yalu by Korean subjects.
- 4.—The Russian Company shall pay suitable compensation to the people in the event of the removal of any graves from the leased land.
- 5.—Korean subjects offending against the law within the leased area shall be handed over to the Korean Authorities; Russian offenders shall be handed over to the Russian Authorities.
- 6.—Russian subjects shall not keep oxen and horses at large outside the leased area.

The period of the lease is put at 20 years, and the area of the land is stated to be 400,000 *tsubo*, or 350 acres.

Thus it would seem that Russia has obtained a large concession—a concession four times as spacious as the new Hibiya Park in Tokyo—in such a position as to command the estuary of the Yalu. And it will be observed that while making arrangements for this signal concession on her own account, a concession which practically throws open the whole Yalu Valley to her people, Russia has been steadily opposing the opening of Wiju to the trade of other nations. It will also be observed that this agreement places in Russia's hand a monopoly of the lumber trade in the Valley, since the Company is authorized to purchase all rafts floated down the river by Korean subjects. The facts, then, are accomplished. Russia is firmly seated on the Korean side of the Yalu, and she holds also the Chinese side. She has done well for herself, supposing unlimited imperial expansion to be the aim of her national policy. It would be idle to blame her. Everybody's hand being for himself and against everybody else in international affairs, victory is not to be railed at by the vanquished. But Korea's action is not so easily dismissed. If Korea had it in mind—and she has obviously had it in mind for at least a month—to open the Yalu Valley to Russia, signalling the fact by a big grant of territory, what shall be said of her refusal to open a part of the Valley to other treaty Powers? She has placed herself in a very equivocal position, and so evidently thinks the British Representative in Seoul, who is said to be peremptorily insisting on the opening of Wiju without further delay. We can not, for our own part, express any surprise at the course things have taken. Events have followed in one another's footsteps with a logic of sequence that always enabled on-lookers to be prophetic. If the Japanese regard with indifference the results now confronting them, that is their own business. When Russia obtained the lease of Port Arthur with accompanying permission to extend her Trans-Asian Railway to Liaotung we ventured to say, and our conclusion was copied and endorsed by the Shanghai and Hongkong journals, that Manchuria had then and there been converted into a Russian province. The same fate can not be said to have quite overtaken the Yalu Valley. But it is easily in sight. If Great Britain had insisted on the opening of Talien to foreign trade in 1897, Manchuria would

have been saved to China. If she now insists upon the opening of Wiju, the Yalu Valley may be saved to Korea. But the balance of a situation is hard to preserve when one side acts steadily and resolutely while the other is occupied with thoughts of acting.

THE BOOKSHELF.

English Literature, an illustrated record, by Dr. RICHARD GARNETT, C.B., LL.D., and Dr. EDWARD GOSSE, M.A., LL.D. London, William Heinemann: Yokohama, Messrs. Kelly & Walsh, Ltd.

ALL lovers of English literature will welcome the handsome volumes which Mr. Heinemann has just published in London, and which the Macmillan Company will introduce to the United States. From the time when Green's "Short History of the English People" was issued in an illustrated edition, the demand for a work of this kind has grown steadily, and now that it has appeared nothing but praise can be accorded. The work will consist of four volumes, as follows:—Vol. I. From the Beginnings to the Age of Henry VIII., by Dr. Garnett; Vol. II. From the Age of Henry VIII. to the Age of Milton, by Dr. Garnett and Dr. Gosse; Vol. III. From the Age of Milton to the Age of Johnson, by Dr. Gosse; Vol. IV. From the Age of Johnson to the Age of Tennyson, by Dr. Gosse. The complete set will cost £3 in cloth, or £4.4s in half morocco, while each volume can be bought separately at 16 shillings each. So far only Vols. I. and III. have appeared, but the publisher hopes to have Vols. II. and IV. ready by the autumn.

In the course of the Publisher's Introduction we read that the design of the work was to produce a book which should stimulate and gratify curiosity concerning the leading authors of the British Isles and their literary history. This curiosity, it was felt, could not be confined within the limits of an acquaintance with a few dry manuals. "It appeals to the eye as well as to the ear, and as the reader becomes attracted to the writings of this or that writer, and feels his enthusiasm enkindled, he desires to know, and to know instantly and without disturbance, not only who the writer was and what he wrote, but what he looked like—perhaps at various ages; where he lived, what his handwriting was, and how he appeared to his contemporaries." And so we have presented to the eye curious old manuscripts and missals, coins, seals and portraits innumerable, scraps of handwriting and pages from old books, many of them reproduced in their proper colours, and one and all eloquent of the wise discrimination which has been exercised in their selection.

The literary work of Dr. Garnett and Dr. Gosse as shown in the volumes so far issued, exhibits these scholarly writers at their best. They have taken the greatest pains to make their work harmonious in design and properly proportioned in all its parts, and throughout a high literary level is maintained in which the dominating quality is judicious impartiality and widespread co-ordination such as scholars can appreciate and the ordinary reader freely admire. Some criticism has been evoked in London by the great weight of the books. But this, under the circumstances, cannot be avoided. The illustrations to show to proper advantage required a highly glazed paper, while the reproductions of illuminated manuscripts of necessity called for a thick and heavy material to bring out their multi-

colouring and diapered gold-work with any sort of success. And success has been achieved all through. The great charm of the book to those who can never hope to have an opportunity of examining the originals of these manuscripts, missals, psalters and portraits, lies in the illustrations, and the large section of the reading public to whom this applies will cheerfully put up, we imagine, with the additional weight which the nature of the case necessitates.

Mada Minu Oya, by K. GORAI, Tōkyō, Fukuin Shimpō Sha, 48 Ichiban Chō.

This is a translation of Hector Malot's *Sans Famille* into simple colloquial Japanese, making welcome addition to the small collection of books—many of which are translations—suitable for family reading. In the dedication—written, strange to say, in the simplest colloquial style—to the daughters of the pastor of the Ichiban Chō Church, the writer says that his happiness will be complete if, through reading this story of an orphan boy, they come to realize more the kindness of their parents.

The proceeds from the sale of the book, the first edition of which is nearly sold, the author, a young lawyer, gives to the fund for the erection of a new building for the Ichiban Chō Church. As, besides its use for family reading, the book may be of interest to students of Japanese, two extracts, with a free translation, are given. The book opens thus:—

In the beginning it was my fortune to be left helpless foundling in the world; but, until the end of my eighth year I thought of the woman who brought me up just as my true mother. This was not unnatural for when I happened to cry she embraced me, wiped away my tears and soothed me. Every night she never failed to kiss me, and, when it was cold and snowy, while warming my feet with both hands, she sang pleasant nursery songs to put me to sleep.

In talking to his performing dog, Shiro, the boy says: "You see as we had no permission to perform in the park we happened to be driven out. Do you understand?" Shiro, who was listening without blinking, shook himself and looked at me as if to say:

"Then what shall we do?"

"Well, it can't be helped. I suppose we shall have to sleep out-of-doors somewhere to-night without any supper.

The Japanese version runs:—*Moto wata-shi wa yo ni tayori nai sutegono mi no ue de aru. Shikashi yattsu no toshi no kure made wa watashi wo sodatete kureta hitorino onna wo makoto no hana to bakari omotte ita. Sore mo muri de wa nai no de aru, watashi ga naki demo shiyō mon' nara, watashi wo daki-age nanda wo fuite, sō shite damashite kurerushi. "Ano atai tachi wa mada kō-en no naka de gei wo suru yurushi wo ukete nakatta mon' da kara sore de tsui oidasarete shimatta n'da. Wakatta kai."

Majiroki mo sezu kiite ita Shiro wa karada wo hito-yuri-yurutte watashi no kao wo nagamete iru,

"Jā kore kara dō shimashō," to iu kokoro de arō.

"Sō sa, shikata ga nai kara kyō wa kore kara yūmeshi wo tabe-naide, dokka de no juku seniya narumai."

"HIGHWAYS AND BYWAYS IN CENTRAL JAPAN."

THE HAYAKAWA VALLEY.

[BY THE REV. WALTER WESTON M.A., F.R.G.S., ALPINE CLUB.]

In the course of a paper in the *Japan Mail*, describing a journey, undertaken last summer, in the great mountain mass that rises on the western border of the busy and beautiful plain of Kōfu, the present writer drew attention to the commercial developments bound to result from the opening up of the railway between the capital of the Empire and the chief city of one of its most prosperous provinces.

During the intervening ten months the work of construction and tunnelling has been actively progressing, and the human antitypes of ants and moles engaged in it, are now able to congratulate themselves on the completion of one of the most important lines in the country; for the official opening of the last section took place on June 11 and the long eight years of toil over the short fifty-three miles of hills and dales ended. Kōfu, both commercially and geographically, one of the most interesting inland towns in Japan, can now be reached by an "all rail route" from Tokyo in about 6½ hours, and many and varied will be the effects, both on travel and trade, that this last engineering enterprise of Japan's restless energy are bound to produce.

To trade and labour the boon of increased facilities will be by no means unmixed. By far the greatest part of the carrying trade between Tokyo and the wide thriving Kōshū plain has hitherto been carried on almost entirely by means of the Tokaido Railway to Iwabuchi, then up the Fujikawa to Kajikazawa, a long and weary task, by hauling, sailing or punting against a swift stream with many a rapid to be negotiated, often costing nearly a week of toil; after that pack-horses across the plain to Kōfu, itself the centre of all things thereabouts—and all this costs money. The freight on a bag of flour was 47 *sen*, and a bag of sugar *yen* 1.20 to 1.30; while the carriage of the raw and waste silk, in the reverse direction entailed corresponding charges. Now, however, the snort of the locomotive, as it pierces the mountain rampart that had hitherto barred the way of free access to the Kōfu plain, is a herald of radical change. Not only are these prices from 50 to 75 per cent. less, but transit is even still more reduced. The week's journey dwindles to a day or so, and the whole region will speedily feel the effect of this new mesh in the great network of railways, now slowly, but surely, bringing the fertile mountain-girt plateaus of inland Japan into closer touch with the "heart of the Empire."

The blessings are not unmixed, however, for the present, since the change is greatly felt by the pack-horse owners and the boatmen of the Fujikawa, of whom the latter are especially hard hit, and the number of boats has already fallen in a few months from 800 or 900 to about 200. I am also informed by a very competent authority that one of Japan's greatest industries, the silk-trade, is likely to suffer, in that this opening up of the Kōshū region will probably lead to an admixture of Idzu, Sōshū, and other cocoons, with the Kōshū produce. The natural result will be to the detriment of the Kōshū quality, as has already happened in the case of the Shinshū sort.

Still, to the ordinary observer, the line offers considerable advantages, both in its own course and the scenes to which it proves a welcome stepping-stone, and it was with considerable interest that with my friend Mr. John Kennaway, I left Shinagawa on May 11th last, for a journey through Kōshū and down the Hayakawa Valley, a long projected visit to one of the least known recesses of the "Mountains of Kai."

Beyond the account of the earliest recorded journey, described in that wonderfully interesting 2nd edition of "Murray," made some twenty odd years ago, I had only been able to learn of one other entire traverse of the valley, accomplished by an energetic Englishman in 1894. The experiences of the latter journey seemed to differ little from those of the earlier one, everything being unusually primitive, and the accommodation as rough as the travel itself. Information from

other sources also seemed to confirm the statement of "Murray" that the finest part of the route is only possible in good weather, heavy rains often either destroying what little track there is, or rendering it temporarily impassable through broken bridges and swollen mountain torrents. May in the mountains is always a fickle month, for she is like the little proverbial girl of whom we are told that

When she is good, she is very very good.
But when she is bad she is horrid.

Downpours then are apt to be uncompromisingly hopeless, but there is no sunshine after rain like hers! The journey from Shinagawa to Hachioji was much the same as that of 12 months earlier, except that the sandwiches Kennaway purchased at Shinjuku, in one of the neat tin boxes that then so took my fancy, proved to be covered with great green spots of mould. After all this was but emblematic of the most striking aspect of nature hereabouts, for I have never been more impressed with the variety of Japan's verdure than in the constant kaleidoscopic changes on this route at this season. Almost every village along the line had its show of azaleas, but we could only see enough from the train to excite curiosity and compel us like *Oliver Twist* to want still more.

The finest part of the line is between Hachioji and the Kobotoke-toge, with its many glimpses of picturesque green-clad hills and the flashing, winding river far below. It is here that most of the forty-two tunnels pierce the opposing barriers, their united length totalling the twelve miles, now nearing completion, of the one great boring under the Simplon Pass between Switzerland and Italy. The effect of their passage is interesting but tantalising, and one might compare it to a journey through a gigantic flute. One misses some of the familiar features of the Kōshū Kaidō route, such as the picturesque span of Saruhashi, "the Monkey Bridge," over one of the most striking bits of the Watarasegawa. At each of the many wayside stations a crowd of curious-eyed rustics gather, for the novelty of a labouring locomotive has not yet grown stale in this old-world upland valley.

Before reaching the Sasayo tunnel the train backed up a zig-zag in order to achieve several corners at most acute angles, and then the three miles of the tunnel were traversed in 8 minutes, a greater speed than was attained on any other section of the journey.

The transition from the narrow ravine on the East to the bright, prosperous valley on the west of this part of the hill-girdle of the Kōfu plain was most agreeable and decisive. A half mile stroll down from Hajikano, the first station west of the tunnel, brought us to the *basha* depot, and then a half hour's wild rush in the rear and the dust of half a dozen other lurching creaking vehicles gave us active exercise to an unexpected degree. At Katsunuma we just caught the 6.15 p.m. train for Kōfu, and two hours later saw us at the Yonekura inn. The white crest of Fuji gleamed in the dying sunlight over the rim of the encircling hills southwards, as we crossed the plain, and towards the sun-setting the great serrated snow-clad ridge of Shirane San raised its triple pyramid above the sombre purple of a lower range.

A kind welcome awaited us and we were given the best room in the house, where no ordinary *amado* kept out rain and robbers but smooth walls of solid *kake* eighteen inches thick, whose no less massive doors swung heavily on their hinges and fitted with microscopic exactness in their place.

All was quiet and restful, and our landlord did his best to entertain us, sending in a Japanese dinner interspersed with coffee, green peas, apples and similar delicacies.

The following morning, before we were up, a maid arrived with fish and chicken cutlets, the last fresh meat we expected to have before the end of our week in the wilds.

It was in keeping with such luxuries that we were provided with—in lieu of useless *jirikisha*—a small gaily painted baker's hand-cart—in sky-blue and vermilion with black lettering—for the transportation of our rucksacks and pro-

visions from Kofu to Arino, the first stage of our walk westwards.

The morning was brilliantly fine and very warm; Fuji's fascinating form claimed constant attention, behind us, and straight ahead a delightful scheme of colour passed through purple vetches, bright green corn, a sombre belt of pines, and then, in startling contrast to the deep blue haze of the hills beyond the dazzling snows of Shirane San itself. All the great mountains of Koshu were in view, Hoozan, with the two great granite pillars that form its highest point; the fine forest-clad flanks of Komagatake, with its rugged granite cliffs, and then, on the borders of Koshu and Shinshu, the many peaks of Yatsugatake, seamed with snow-filled ravines—all these peaks are nearly 10,000 feet in height, and rise 8,000 or 9,000 feet above the plain. May there not be something in such surroundings as these that helps to render the Koshu folk more independent, resourceful, and self-reliant than most?

Hard by the hamlet of Enokihara, we passed through an old Shingon shrine dedicated to Kwannon Sama, whose *Honden*, or main building, is now used as a school. Very quiet and stately it stands in a great grove of scented pines. At Hyakuda, some 7½ miles from Kofu, we cross the road that leads north to Nirazaki (and so on into Shinshu) about 5 miles, and south to Kajikazawa, nearly 8 miles. Less than a mile further on we found ourselves at Arino, where I renewed acquaintance with the charming little Surugaya, the inn which so captivated my fancy last year. A willing maid soon brought water for our feet, carp were caught for our lunch from the tiny pond in the garden, and famously we fared. A trellis-trained wistaria shaded the entrance as one stepped from the dusty road, and azaleas of brilliant pink or dazzling white stood out against the varied foliage of the garden. Inquisitive children from the school next door peeped through the knot-holes in a fence they dared not climb, for was not the barbed wire that surmounted it very new, and were not the spikes thereof exceeding sharp? At 2.30 we most reluctantly betook ourselves to the dust and heat again, and by 4 o'clock we had entered the gateway into the hills, passed up the broad pebbly bed of the Midaigawa, and I was at Ashiyasu once again. Here I found the civil and enterprising *soncho*, Natori Unyichi, in whose house I stayed last year, had opened a village store, and two clean rooms with new fresh mats were at the disposal of those who fare this way. The usual kindly welcome made us feel at home and only a long delay in the arrival of our coolie with the baggage, transferred from the scarlet-cerulean bread-cart marred our content.

On Wednesday, May 13th, we were up at 5, cooked breakfast, aided by "home grown" eggs, photographed the proud father with his family and domestics, and at 7 were on our way. Passing by the house of one of my friends of last year, the *on-san* of my Kaigane hunters, we stopped and had a chat, and then descended to the bottom of the valley opposite Kozori, where we crossed the torrent just as it escapes out of a rocky defile called Noto-no-kuchi. A little beyond we saw a fresh proof of the *Soncho's* enterprise in a new bathhouse, named Iwami Onsen, where tepid water flows from a hole in a tall cliff on the opposite side of the ravine into baths artificially heated for the use of a few old folk who come in from the adjoining hamlets. Crossing the spur on the left, we gradually bore southwards, and, in an hour and a half from Ashiyasu, found another mineral spring, the waters of which, supposed to be impregnated with alum, iron, etc., are held to be very useful for the eyes. Our two hunters were greatly impressed with this spring, which they said was discovered by one Suzuki Minosuke, a local celebrity now studying in India. The water is pumped up through an iron pipe that crosses the stream to a remarkably dirty hovel, whose owner has a monopoly of the use of the pump handle over which she keeps jealous watch and ward.

Higher up the valley we found the path gradually dwindling to an ill-defined track that crosses and recrosses the rough boulders of the torrent bed or winds along the foot of broken cliffs on either side.

Bright pink azaleas dot the vegetation-clad slopes high above the valley, and at an altitude of 3,000 feet we touched our first snow in the foot of an avalanche, on its right bank. Here the ravine, known locally as Idezawa, narrows, and in 3 hours from the start the track left the main valley of the now attenuated Midaigawa, and, in the steepest zig-zags I ever climbed, labouriously mounted for nearly an hour westwards to gain the summit of the Naradatoke, 5,120 feet, over which lay our way into the Hayakawa valley itself. Greatly to our surprise, as I was pushing on ahead, and listening to a pigeon's call in the trees, I heard the sound of human voices above me, and soon was greeted by the sight of a nearly dozen young girls laden with bales of charcoal, timber planks, bundles of spade handles and small blocks of wood, not yet shaped, for *getu* (wooden clogs). On reaching the pass, and looking down into the wild valley below me, I found still other toilers struggling up under their burdens. One of these, a consumptive looking girl of 16, let me sit down and shoulder her load, but I found it no easy matter to rise with the 100 lbs. represented by the great wheel-shaped bundle, and get under way up the steep hill side. Cruel as such a burden must be for a young girl, there is evidently a knack in both lifting and carrying it, and the upward movement is largely a matter of balance combined with the judicious swaying motion, one has often noticed in the case of guides and porters in the Alps. Clouds hid all view of distant peaks, and we went down to the woodcutters' huts at the foot of the steep descent below the pass, and there in one of the rough shelters I found the third of my Kaigane companions, Masao, the youngest, but by no means least sturdy, of that faithful trio. After an hour spent in chatting and cooking cocoa, we left at 12.30 for Narada, the highest village of the Hayakawa valley. For the next hour progress was slow, for the track, often almost invisible, proved disagreeable to the highest degree. Rough, broken rocks, which always had the sharp corners uppermost when a member of the party unaccustomed to these regions sat down inadvertently and with undue violence; a torrent that had to be crossed with inconvenient frequency; slippery broken banks on which hob nails were almost useless; and the absence of all view all combined to leave a distinctly disagreeable recollection behind. Indeed of this part of the journey I can find no fitter description, *mutatis mutandis*, than the remarkable terms in which the *Japanese-English* "Guide on Hakone" sets forth the charms and perils of hill walking in that famous region. "For the most part, the celebrated places . . . preserve mostly in steep and unapproachable points, as in precipices or valleys. Here, the most steep and precipitous point in Tokaido is Hakone Mountain, to whose summit we can reach after ascending about ten miles from its either base. Owing to toilsome ascent, many difficulties must be endured by travellers. The result of toleration is pleasure!" One great compensation, however, to the disagreeables and deficiencies of the route, was the abundance of pure delicious spring water, a veritable nectar after the boiled and filtered liquid of Yokohama. As the above-quoted mentor so eloquently describes such delights: "Streams of water issuing forth are used by whole inhabitants. Transparent and delicate liquid is constantly overflowing from the vat, and its purity free from defilement so fully values on the applause of visitors as it is with the air."

We were glad to get out of the torrent bed at last and scramble up the steep hillside on the left bank, gradually rising towards the crest of a ridge by a faint path that traversed the track of a landslide where, in the worst place, long dried creepers twisted into a rope were fastened as a security in case of a slip. This was one of the few open places on the mountain side, but clouds still concealed the massive form of Kaigane on the east. Even in good weather the distant views are limited, owing to the dense vegetation through which the track lies. In this forest, at a height of about 4,000 feet, I found great quantities of a very pretty cream-coloured flower, in shape much like a soldanella, with lobe-shaped leaves on long

slender stalks. The name I could not learn, but I was told that later on, and lower down, it reappeared pink. The crest of the ridge was gained at 2 o'clock, and we at once descended to the bed of the Hayakawa proper, for the torrent we had just left was only a tributary. The main stream cuts its way through a deep cleft whose rocky walls rise sheer from deep green waters that well deserve their title of "the rushing river." Nothing could exceed the delight of our hunters at the prospect of shouldering us and staggering through the swift current, a hundred and fifty yards or more in width, that barred the way. The way that my faithful Shimidzu stepped from boulder to boulder in water up to his waist, with Kennaway's twelve stone and a half (to say nothing of the boots) was a treat to witness. He certainly regarded it as such to go through. Skirting along the slopes on the right bank for a while we again had to cross, this time on a wire suspension bridge of interesting construction. As this was the first, and general type, of a number of such bridges in this valley one description will serve. In Murray's notes on this route (more especially in the very interesting 2nd edition) special reference is made to the primitive structures known as *tsuri-bashi* and *mannem-bashi* which once formed one of the most peculiar features of the route. The former was a rude sort of suspension bridge, with a road-way consisting of planking a-foot wide laid on a netting of ropes made from creepers or bamboo. The latter was merely a long beam fastened to supports fixed in the bank at either side, and was only used at the narrower crossings. Both kinds have now totally disappeared from the valley, and are replaced by neater structures of a uniform style similar to the *tsuri-bashi* in which telegraph wire takes the place of creepers, and occasionally an extra wire, a foot or two above the planking, offers a little extra protection. Still it is an odd sensation to find oneself 70 or 80 feet above a swift, swirling torrent on a plank eight inches wide which sways from side to side and dips and rises with every step. The best plan is to go over alone, as then one can better control one's own movements and with more equanimity, not to say entertainment, observe the antics of the other man! One ceases then to wonder why some of the older forms were known as *mannem-bashi*, "the bridge of ten thousand years."

At 3.15 p.m., after 8 hours leisurely going from Ashiyasu, we found ourselves at Narada. Again the existing descriptions must be revised, for the people, primitive as they are in many ways, are much better off than formerly, though I noticed that the most frequent topic of conversation between them and our hunters was invariably the price of rice. Seldom have they had visitors from the outside world, and we were only the third party of whom the "oldest inhabitant" had knowledge as having crossed the pass into their lovely valley. All own one common surname, Fukasawa, and rarely do they intermarry with outsiders. As we sat on the verandah of the chief man's cottage, we made tea in the presence of a dirty unkempt crowd who examined all our belongings, ourselves, and our actions with intense curiosity. The article that seemed to attract most attention was my camera, which was explained by a spokesman of the assembly to be a telescope! After tea we were taken to see some of the sights of Narada, for these folk regard themselves as unique in their possessions as others consider them in their habits. Some fine cryptomeria on the hillside shade the Shrine of Nara-O, a lady who "once upon a time" visited the place, gave it a name, and a title to fame in the bestowal of many rare objects of both use and beauty. Of these gifts Narada is amazingly proud and the chief of them are known as the "Nana Fushigi" or "seven wonders" of Narada, and doubtless, in the opinion of this numerous Fukasawa family, of the whole world. They are as follows:—

- 1.—A flag, called *kataka no ashi*, whose leaves all spring from the same side of the stem.
- 2.—A couple of crows, no more, and no less. Before the arrival of the Princess, no crows existed in Narada, but she brought a pair with her,

and since that time the number is practically always the same.

3.—*Seitaku-ike*, a tiny pool whose water has the property of rendering soap unnecessary for washing purposes.

4.—*Biraji-ike*—"Betel nut pool"—Articles of clothing embedded in mud at the bottom of the pond for a certain time take the fine black colour known as *binroji-some*.

5.—*Shiwo-ike*—"the salt-pool"—In early times salt was a luxury rarely enjoyed in the valley, till Nara-O bestowed this pool, in the water of which food can not only be cooked but salted at the same time.

6.—*Go-o-sui* "the August Princess's water," a spring with healing virtues of many kinds, but especially efficacious in disorders of the stomach.

7.—The last and crowning marvel of Narada is that Nara-O ever went there at all!

Close by the shrine dedicated to her memory a track turns off to the right (eastwards) to Hirabayashi, whence either Kofu or Kajikazawa can be readily reached. This track would be an easier way of getting into the best part of the Hayakawa valley from either of those places by those who wish to avoid the disagreeables of the passage of the Narada-toge between Ashiyasu and Narada.

At 4 o'clock the rain came on, and we went off down the valley towards Kami Yujima. Abundance of pink azaleas brightened the otherwise monotonously dense vegetation, on the way. By 5 o'clock we were so soaked that we decided to abandon the very doubtful prospects of accommodation at Kami Yujima for the certainty of at least a hot bath and some shelter at the Onsen between us and it. On our left a wild precipitous ravine opened up, on the left bank of the river, and in the dimness of the pouring rain, we saw the smoke and steam of two bath houses struggling upwards. The upper and larger one looking the more likely, we also struggled on, and soon found ourselves once more the objects of unbounded rustic interest on the part both of the keepers of the bath-house and of the motley crowd of bathers of both sexes soaking in the great wooden tank at the front of the building. This *yuba* is, at present, one of the least tempting of the many primitive establishments of the kind I have visited, but no doubt the repairs now in progress will improve it. After a long wait we were shown up to the dirtiest and most forlorn imaginable of rooms, but the offer of compensation and a further wait procured us the use of the best, such as it was, that the *yuba* affords. Dirty *futon*, the paper hanging in shreds from walls and *fusuma*, the wind and wet driving against the tattered *shoji*, combined to render the situation the reverse of attractive.

Still "any port in a storm," and after retiring to drown the thoughts of our discomforts in the sulphur spring, we returned to deal with a feast of trout of considerable size—10 being offered for 70 *sen*—fried eggs and bacon, and cocoa. The *futon* were few and poor, but happily, so were those greatest of my *betes noires*, and in spite of draughts and half a gale with torrents of rain, we slept in comparative comfort.

On Thursday, May 14th, we were up at 6, but heavy rain forbade a start till 9.30, breakfast meanwhile occupying us agreeably on coffee and trout.

Shortly after leaving I found my pocket book with nearly all my money, besides much more valuable contents, was missing, and the faithful Shimidzu was forthwith sent back to search for it at the *yuba*, at Narada, and on the road between. No traces, however, were to be found, and its fate is still a mystery.

After waiting an hour or so we passed on down the Valley, and in less than a mile found a track turning N.E. to Kajikazawa in about 8 *ri*. A walk of some 45 minutes from the Onsen landed us at a point opposite the hamlet of Kami Yujima, which does not appear to be mentioned in "Murray," whilst the paths and bridges here and elsewhere in the valley as there described are considerably different from the present actual condition of things. Several crossings and recrossings are there mentioned which are now non-existent or needless, and the track adheres to the left bank of the river all the way from Onsen to beyond Shimo Yujima.

At various points hereabouts gold is found in the river bed, and I subsequently learned that a "foreigner from Tokyo," had heard of its existence, and was about to work a "claim" in a lateral ravine of the Norokawa just south of the base of Kaigane San.

Shimo Yujima was reached at 11.45, and we spent a couple of hours agreeably in lunch and conversation with the Soncho, whose father, 86 years of age, was a fine-looking old gentleman with white hair. The Soncho spoke of a visit he had received from Professor B. H. Chamberlain 21 or 22 years ago.

Below Shimo Yujima we descended to the river bed again, and saw one of the channels at the side used by prospectors when washing for gold. Here we crossed the torrent on a shaky narrow bridge devoid of hand rails, and a stiff, steep climb of an hour and a quarter landed us on a ridge 1,500 feet above the floor of the valley. The walk through the vegetation-clad slopes where little air was moving on this hot and stuffy afternoon was very trying, but the view down to the rushing stream far below, and the scarred and torrent-seamed hillsides beyond relieved the monotony of the trudge.

Dropping down the now bare slopes, for all the trees had been shorn away on the opposite side of the ridge, we passed a wayside post indicating a former track over the Denzuku-toge, due South of the Shirane San range, then round the Northern extremity of Akaishi San to Okawara in Shinshu. The track however has long since gone to pieces, and was even said to be impracticable some years ago when I ascended Akashi San, the first occasion by a foreign traveller I was told. Hereabouts I noticed quantities of a beautiful white-flowered shrub called *zumi* (*pyrus toringo*), with beautiful pink azaleas in its company.

Once more the track descends to the river-bed and crosses it at one of the most picturesque spots in the whole of the valley by a wire *man-nembashi* some 200 feet in length and 50 feet above the swift green current of the Hayakawa. Half an hour lower down on the left bank came the hamlet of Arakura, not Arakawa as in "Murray," where we rested and made tea, sheltering from the rain at a wayside cottage whose owner showed us with pride a squirrel skin, some gold embedded in quartz, and some gold dust from the river-bed.

At 4 o'clock we left Arakura, but not the rain, behind, and with the valley gradually widening, as the hills decreased in height, the track rose, and soon passed under a long series of sheds that shelter it from the destructive avalanches of shale in this neighbourhood. In a curved hollow of the hills beyond this nestled the hamlet of Misato, probably the best stopping place between Shimo Yujima and Homura whither we were bound. Nearly opposite Misato we were once more forced over the stream by the nearly perpendicular banks on its left, and crossed by a two-spanned *mannenbashi* no less than 500 feet in length. The wet had rendered the narrow planks disagreeably greasy for hob-nailed boots, and the passage needed no little care. The valley now begins to show signs of more fruitfulness and greater care, in the abundance of tobacco and paper shrubs that are cultivated here. At 5.45 p.m. our day's journey was done, as we traversed the most beautiful corner of the whole route where, outside Homura, a miniature Gibraltar rose high above the river, just beyond a wild glen down which a rushing torrent hurried under a quaint and shaky bridge to join the Hayakawa.

At the Hoshiniya we found comfortable quarters and traces of 'civilisation' in prices twice or three times those in similar but less frequented spots. The explanation lay in the fact, as I learned later, that a party of German tourists had been there some years before, and had used the inn in such a manner as justified the imposition of almost any charges that might have been demanded. The march of such 'civilization' like the restive donkey, hits hardest those who come in its wake!

Still, civil attention, of which we needed little, with Shimidzu ever on the alert, was not wholly wanting, and we would gladly have spent an extra night, had time permitted, in order to visit

the interesting gold mines of which we saw the evidences high up on the mountain side above the village.

At 8.15 we had to move on, and soon were over on the left bank near Kyogashima, where the stream only fills a tiny part of the great granite bed through which it flows. Here we diverged from the route described in "Murray" and the remainder of our journey followed the bank, a course which offers the advantages of both a shorter distance and much more picturesque surroundings. It keeps also at a more uniform level and follows much closer to the river, a consideration in the heat of an early summer's day.

At 9.45 we crossed the Amebata-gawa, near to where it debouches into the main stream of the Hayakawa, a striking spot, and just beyond it we found a stone marking the spot, where an Emperor of early times had rested, probably on some expedition to the far-famed glories of Minobu-san hard by. Yet still a little further we were forced into the broad pebbly delta of another tributary stream, the Haruki-gawa, whose many reticulations we had to jump or wade as well as we could. A fine new inn is being built just before the crossing place, and ought to be well worth a visit when completed. The river scenery here was delightful in the extreme and we were glad we had neglected the older way, of which we caught glimpses from time to time as we saw it winding up and down the uninteresting sun-smitten slopes on the other side. Lovely ferns of many kinds engaged attention close at hand, and the exquisite pale lavender of the delicate scented flag *gogwaitsu no shobu* (*acorus spurius*?) was a treat worth coming far to see. At Motodate we halted at a wayside cottage, half hostelry half shrine, for 20 minutes and near here noticed quantities of wistaria of considerable size. At 12.15 we crossed a stream at a point where a track diverges up its glen by a post marked "Shimoyama 41 cho," which would be a convenient way of gaining the valley of the Fuji-kawa over the northern slopes of Minobusan and so of reaching the famous shrine that forms the glory of this region.

Half an hour later we reached a hamlet, not found on the Topographical Survey Map, named Obarajima, but just below the place there marked Awakura. Beyond this the Hayakawa widens and sweeps grandly round an intervening spur, opening out a fine prospect of its junction with the Fujikawa.

A splendid new "suspension" bridge built in 1902 of wood and wire, crosses the former about a mile before that point, and after traversing its 700 feet or so of palpitating length, we quietly strolled into Iitomi, at 2.15 p.m. where, in the quiet cool of the Ogiya, our Hayakawa journey found its completion.

In the earlier part, most praised of "Murray" we were distinctly disappointed, but in the latter, of which we had formed milder expectations, we were agreeably surprised. It is in any case, a journey not lightly to be undertaken in the heat of summer, as the general altitude is but modest, and there is little breeze to be looked for in the somewhat secluded windings of the valley. Still to those who enjoy the combination of considerable scenic attractions with the quaint and primitive old world ways of a peasantry not yet civilised out of native simplicity, it is one of the most interesting routes now rendered accessible by the Tokyo-Kofu railway. The distances are not great, nor are the *ri so cho* (instead of the orthodox 36) as a later Murray suggests, and the whole route can well be combined with the Fujikawa trip within the limits of "the inside of a week" from Yokohama or Tokyo.

At Iitomi my friend had to leave me, and carried out that arrangement by an early start on Saturday, May 16th, the price he paid for the boat journey down to Iwabuchi being but 2 *yen* all the way.

Shimidzu and I, however, after seeing him off, retraced our steps from the river bank, and walked up to a point between Yokachiba and Kiriishi, where we were ferried across to Tambara. From here we crossed the hills via Furusaki to Shoji, the distant snows of Shiranesan and the closer wealth of azaleas, which exceeded anything

I had ever seen, helping to render the walk one of the most delightful imaginable, and a fitting end to an expedition that will long be dwelt on with interest and satisfaction.

LITERARY GOSSIP.

Readers of George Eliot's "Scenes of Clerical Life" will be interested in hearing that "Milby Mill" is about to be offered by auction. It stands across the river Anker at Nuneaton, and is more than once noticed by the novelist in those early North Warwickshire scenes. There is said to have been a mill on the site in the days of the Conqueror.

Berlin is to have a theatre sacred to Shakespeare. Dr. Turck, a well-known writer on English literature, is at the head of the undertaking, which will be in direct opposition to the Kaiser's play-house, representing the conventional traditions. The managers, however, hope by expending a large sum on the decorations of the theatre to draw the Kaiser over to their side. The new Shakespeare Theatre will open with Tuck's version of "Hamlet."

Sir William Des Vœux, in his book of Colonial experiences which has just been published, relates an anecdote showing Lord Rosebery's early interest in Colonial affairs. They met, when Lord Rosebery was a young man, in Brooks's, and casually discussed the question of the Colonies. Sir William was struck with his knowledge of Greater Britain, and presently Lord Rosebery asked him if he knew anything of Mr. Des Vœux, whose Colonial reports contained much more suggestive information than such reports usually do. Years after, when Lord Rosebery was entertained at Sydney, Sir William told the story.

An English contemporary points out that the removal of Fordhook, near Ealing, once the residence of Henry Fielding, the immortal creator of "Tom Jones," has received curiously little notice, even in the local press. The silence is the stranger because of the outcry raised some time ago when Hogarth's house at Chiswick was threatened. It was to Fordhook that Fielding retired in the spring of 1754, feeling thoroughly ill and worn-out after his great attempt to rid the streets of London of robbers. Here he breathed sweet air and drank tar-water, but obtaining no benefit he started on his famous voyage to Lisbon, sailing from Rotherhithe at the end of June.

The Letters written by Madame Waddington during the time her husband was French Ambassador to the Court of St. James prove very agreeable reading. Perhaps one of the most entertaining episodes is an account of a luncheon given at Hatfield in honour of the Emperor William II. and the Empress. Madame Waddington was taken in to lunch by our present King—then of course Prince of Wales. During the meal her pearl necklace came unclasped and she asked the Portuguese Minister to re-fasten it for her; he tried but could not manage it and the Emperor, who was vastly amused, called M. Waddington's attention, to what was going on with the remark: "le Portugal était en train d'étrangler la France." The Prince of Wales then asked to be allowed to try, but he was no more successful and called forth another remark from the German Emperor, "Maintenant c'est plus sérieux—l'Angleterre s'en mêle."

The first four volumes of the Clarendon Press edition of the "Letters of Horace Walpole," edited by Mrs. Paget Toynbee, will be ready in November. There will be sixteen volumes in all, and there will be a limited edition, Demy 8vo, on hand made paper, and Crown 8vo editions on Oxford India paper and ordinary paper, all of which will in the first instance be offered to subscribers. Mrs. Toynbee has obtained the use of over 400 letters not included in the latest edition of the collected letters, and upwards of a hundred of these have never before been printed. A careful collation of the text with the original MSS. has revealed many curious and interesting passages hitherto suppressed, and also many serious errors in transcription. The notes,

except those written by Horace Walpole himself, have been compiled anew by Mrs. Toynbee, who has also prepared a very full analytical index. This new edition will be illustrated with fifty photogravure portraits of Walpole and his circle and with facsimiles.

If, as now seems virtually settled, General Sir J. F. Maurice, is to be the late Colonel Henderson's successor as chief editor of "The History of the Boer War," the selection, says the *Outlook*, could hardly be bettered. He comes of a famous literary family, and has himself been a prolific and authoritative writer of military history and biography any time since he carried off the Wellington Prize Essay more than thirty years ago. As Professor of Military History at the Staff College he was found to possess the valuable gift of imparting to his pupils some of his own enthusiasm, and as official historian of the Egyptian 1882 campaign he will come as no novice to his task. But many important details remain to be settled, including the selection of an adequate staff of coadjutors to ensure that the History shall not lag. In addition General Maurice has first to get out of hand his edition of Sir John Moore's "Diary," upon which he has been intermittently engaged in his infrequent snatches of leisure these many years past. Colonel Henderson's portion of the Official History, delayed by his death, cannot see the light before Christmas at the earliest.

Literary satire is looking up in England; witness the Encyclopedia Britannica skits, Mr. Hilaire Belloc's "The Aftermath, or Gleanings from a Busy Life, Called upon the Outer Cover for Purposes of Sale, Caliban's Guide to Letters," and also such pleasing sarcasms as Mr. Owen Seaman's portrait in *Punch* of Mr. Bertram Blighter—

His novel, "Neath a Woman's Spell."
His book of poems, "Past Repealing,"
Those jeux d'esprit, "Half-hours in Hell,"
That trifle, "Round my Study Ceiling."
All these are in a harmless vein
And leave suburban bosoms lighter,
But cannot possibly explain
The splendid vogue of Bertram Blighter.

A moon amid refulgent orbs,
A bee among a bed of roses,
Their light and sweetness he absorbs
And as his own elsewhere imposes;
So swarming up the rungs of fame
With ever surer grasp and tighter.
He bears his undisputed claim
To be "the well-known Bertram Blighter."

Mr. Sidney Lee was in the United States when the controversy to which Miss Corelli contributed so vigorously about the erection of a Free Library in Henley-street, Stratford-on-Avon, broke out. But since his return he has looked into the matter for himself as one of the trustees of Shakespeare's birthplace, and in a letter he has expressed his views at length. No one can possibly be less open to the charge of disrespect to the memory of Shakespeare than Mr. Sidney Lee, and his deliberate judgment that there is nothing in the scheme of the Stratford-on-Avon Corporation destructive to the historic character of Henley-street is not only reassuring but ought to put an end to the campaign. If the street in question had in it no houses later in style and construction than the sixteenth century there would be sound reason for protesting against the introduction of a lofty modern building overshadowing the poet's birthplace. But there are already modern houses in the street, and the new library is not to be a towering structure. It will not overshadow the famous house, and, so far from destroying anything of historic value, all existing work of really ancient origin is to be preserved, and anything that is new will be made to conform in style with what is old.

Some interesting particulars concerning the *London Gazette* are given in the July *Strand Magazine*. The *London Gazette* is now part of the Constitution, and is the oldest and least read of all newspapers; yet it yields an annual profit of £20,000. In size it may vary from one page to hundred; it is the only paper whose word is law, and its authority is accepted in the witness box. At one time the *Gazette* was published directly

by Government; now it is in the hands of Messrs. Harrison, of St. Martin's Lane, who are responsible for it. A good story is told about the *Gazette* and the battle of Alma. The news reached England on September 30, 1854. Mr. Harrison was sitting in his office when a messenger arrived from the Duke of Newcastle, the First Secretary of State for War, asking him to hasten to Downing Street:—

Hurrying back with the messenger, Mr. Harrison found the Duke in a state of great excitement. "We have such glorious news," said the Duke, explaining the nature of it. But the puzzle was how to make it known. Of course it would be printed in the *Gazette*, but it was Saturday evening, and there were no papers until Sunday, and it was important that the public anxiety should be allayed by the widest possible circulation of such a piece of news. "Nobody knows it, and I don't know how to communicate it," the Duke went on.

Mr. Harrison's imagination jumped at the theatre. He went back to the offices, set up the news himself, and sent men round to the theatres with early copies of the *Gazette*. The result was finely dramatic.

THE LATE MR. BIAGIONI.

Foreign residents generally will learn with deep regret of the death of Cavaliere Francesco Biagioni, which took place on Monday evening. Mr. Biagioni had suffered from a long and painful illness which developed into cancer, and this, combined with a bronchial attack, eventually carried him off.

The deceased gentleman was a native of Italy, from which country he had received, about two years ago, the order of Cavaliere della Corona d'Italia, in recognition of services rendered during his stay in Japan. He arrived in this country about thirty-five years ago and had been at the time of his death connected for twenty-two years with the firm of Dell'Oro and Co. Mr. Biagioni was very popular among all nationals that knew him, his kindly and courteous disposition winning the respect and esteem of all who came in contact with him.

FIRES.

On the morning of August 6th, fire broke out in the stone godown of a hemp refining factory in Sapporo, destroying the building and the contents, valued at about fifty or sixty thousand yen. The cause is reported to be incendiarism. It is added that the factory discharged many workmen a few days ago.

An outbreak of fire occurred on the night of August 5th at Kita-futaba-cho, Honjo, Tokyo, burning down three houses and damaging five.

Fire broke out on August 8th at Kagoshima, destroying thirty buildings. On the previous night, fire appeared in the Nagoya Petroleum Refining Mill, destroying two buildings. The loss is estimated at about yen 16,000. Another fire occurred on the morning of the 8th at Hongo, Tokyo, destroying one house and damaging two.

About 11 o'clock on the night of August 12th, fire broke out in a shed belonging to a straw braid manufacturer, M. Ishikawa, at No. 2,223, Negishi. The flames spread to a neighbouring building and destroyed it also.

PLAGUE.

A case of bubonic plague appeared in Yokohama in the evening of August 6th. The patient is a boy named Hamazo (8) whose parents live at Buta-yato, Nishi-toke, where a case was reported on July 19th. The boy was immediately removed to the Manji Hospital. The usual isolation steps were taken.

Another case was reported on August 10th at Kitagata. The patient was a young girl named Ine (4) and she died before 11 a.m., when the medical officials arrived at the house. The body was cremated in the evening of the same day at Kuboyama.

YOKOHAMA GENERAL HOSPITAL.

The following Report is submitted at the request of the Executive Committee by those Members of the Special Committee appointed at the General Meeting, with the exception of Mr. Smith who was unable to serve:—

After full consultation with the Executive Committee and an inspection of the Hospital, we consider that the premises are quite suitable (with possibly some minor improvements) that it is necessary for this Community to continue to maintain the Hospital under its present title, and that it is impossible to recommend that it should be run by any medical man as a private enterprise. We consider that the present site is eminently suitable and that the question of removing it without the Settlement boundary should not be considered, as an experience of many years has proved that it is very convenient for patients, medical men and friends of patients, and causes little or no inconvenience to residents in the vicinity. To rebuild elsewhere, even if the present premises were disposed of, would be an expense that it would be very difficult to provide for, even if desirable.

We consider that the Hospital can be efficiently managed by a resident Matron, assisted by European and Japanese Nurses and with one or more visiting Surgeons, and that medicines should be dispensed, as far as possible, on the premises, which could be arranged by one of the European Nurses holding qualification as a dispenser, and by this means the medicines could be supplied to leave a profit to the Hospital, at less than their present cost. At least one trained male Nurse (Japanese) should be engaged, who could be obtained from one of the Government Hospitals.

The appointment of Matron and Staff should be left in the hands of the Executive Committee, subject to such arrangements as they might make with the Matron to secure her efficient control of the staff.

Fees are recommended to be charged as follows: 1st Class yen 5.00, 2nd Class yen 4.00, 3rd Class yen 3.00 per diem, the 1st and 2nd Class Patients having private rooms, without medical attendance or medicines and the 3rd Class to include medical attendance without medicines, but that the Committee arrange with the Visiting Surgeons, as to a daily weekly or monthly charge for 1st and 2nd class Patients, should they desire to avail of it.

The Executive Committee to have power to appoint a visiting committee of ladies, who will make recommendations to them on any points that suggest themselves as to its working.

It must be considered impossible to properly conduct any Hospital on a paying basis, and the Community will no doubt appreciate this fact and give it every support. Recent statistics as to London Hospitals show that 56 per cent. of the income is from bequests (a form of support so far conspicuous here by its absence) 37 per cent. from voluntary contributions, which hitherto residents here have willingly given, and only 7 per cent. from Patients' Fees, whilst here the proportion of income from this source has been much larger. This Hospital particularly appeals to Shipping Companies, Landing Agents and all employers of labour, as most of the accident cases comes from these sources, but to every resident it also appeals, as no one knows when he or his friends may require it.

An estimate of the probable cost of maintaining the Hospital is very difficult to give, as the fewer patients in the Hospital, the more the Community will have to provide, the expenses necessarily running on whether few or many patients are under treatment. With the exceptional advantage of situation, climatic conditions and an efficient nursing and medical staff, the Hospital can doubtless be made popular and be more largely availed of by residents than in the past, and it is considered that residents from the outports would gladly avail themselves of it, if judiciously advertised.

The isolated Hospital for infectious cases, after due consideration, we consider should be kept up by the Community, as at any time it might be absolutely necessary and its upkeep is not heavy. The generous offer of a visitor to provide necessary appurtenances for an operating room on condition that this Community provides the building, has been left open till 31st August, and we consider that the offer is one most generously made and of the greatest importance and one that this Community should gladly accept, and that a special Fund should be opened for the object.

We would suggest that in future the following rules be observed in connection with the appointment of Committee and Meetings of Subscribers:

1. That the Committee consist of 7 elected Members, who have power to add two to their number.
2. That at future meetings, only Subscribers or Representatives of Firms subscribing, for the

current year, or at the Annual General Meeting, for the preceding or current year, be entitled to vote, but that any individual subscribing in one sum, an amount of yen 200 or over, be a Life Member and entitled to vote at any Meeting.

With regard to the appointment of a Matron, we strongly recommend Mrs. Davies to the favourable consideration of the incoming Committee: and understand she is prepared to take charge of the Hospital on terms which we think will meet with their approval.

The question of charging Patients for extra nurses where required in difficult cases is one that should have the attention of the incoming Committee, with a view to seeing if Hospital Fees could not be so arranged as to average this expense.

In electing a Committee the Community is reminded of the advisability of electing those who would represent the various Mercantile interests as also different Nationalities, and to secure a representative Committee the names of any who are sent to the Chairman, Mr. F. S. James, No. 119, Bluff, by noon on the day of the meeting, will be printed on a Voting Slip with space to add any names subsequently proposed.

In conclusion, we beg to express our appreciation of the cleanliness and good order of the Hospital, under its present supervision, and of the willing way in which the Executive Committee have met us to discuss this matter, as well as the work they have done for the Hospital under somewhat varied and difficult circumstances, and strongly recommend that they reconsider their wish to resign, as their experience would be invaluable to the incoming Committee.

E. FLINT KILBY.
N. GORDON MUNRO.
ARTHUR M. KNAPP.

MATTERS AMERICAN.

The *Chiefos Express* learns that some excellent shooting was done by the U.S.S. *Wisconsin* lately with her 12 inch guns. She fired 15 shots at the target (a canvas screen 32 feet by 20) at a range of 1800 yards with the vessel travelling at the rate of 12 knots. The first two shells struck the platform of the target, and the remaining 13 went through the canvas.

The foreign commerce of the United States in the fiscal year just ended was the largest in American history. The total amount was \$2,445,610,417, of which \$1,025,619,127 were imports and \$1,419,991,290 exports. The imports were the heaviest on record and the exports were exceeded only by the fiscal year 1901.

The United States team won the Palma Trophy at Bisley, with a record score of 1,570. Great Britain came second with 1,555. The interest in the competition was greater than ever owing to the number and excellence of the competing teams. Canada scored 1,518, Australia 1,501, Natal 1,399, Norway 1,241 and France 1,230.

Mrs. Harriet Stanwood Blaine, the widow of James G. Blaine, former Secretary of State and candidate for president of the United States, died at her home at Augusta, Me., on July 15 after a short illness. Mrs. Blaine's surviving children, Mrs. Walter Damrosch, Mrs. Harriet Blaine Beale and James G. Blaine, were at her bedside. Mrs. Blaine was born in 1830 in Augusta.

The *Tribune* of Chicago has been making a religious census of the governors. Maine has a Universalist governor, Delaware has a Quaker governor, Utah has a Mormon governor. Two of the governors (Rhode Island and Wisconsin) are Unitarians. Pennypacker is one of the four Protestant Episcopalians. Six of the governors are Baptists, seven are Presbyterians, eight are Methodists. Twelve governors are not church members.

Exceptional interest has been excited in social, political and diplomatic circles in London by the prevalent report that Mr. Austen Chamberlain, M.P., eldest son of the Colonial Secretary, Mr. Joseph Chamberlain, is engaged to be married to Miss Muriel White, the only daughter of Mr. Henry White, Secretary of the United States embassy in London. This in itself would be news of international interest, but additional interest is imparted from the fact that Mr. Joseph Chamberlain is bitterly opposed to the marriage. It is

reported that in his opposition is found the reason why the engagement has not been formally announced.

The *Boston Commercial Bulletin* says: "When it gets to a point where an ocean liner has to take out a cargo of sand in her hold to supply the place of valuable cargo, as did a Leyland liner sailing last week and when many of the first-class ships in regular service between this port and England have to be laid up for lack of business, it is time somebody bestirred himself to hold for Boston its place as the second port of the United States."

It is believed that the question of the visit of the Prince and Princess of Wales to the United States will be decided by the time their round of visits to the west of England, which are just about to begin, have been concluded. The diplomatic intermediary, who is chiefly concerned in making the arrangements, said recently that he had nothing official to say for publication at the present time. It is known, however, that the Prince has been informally approached on the subject and that he will accept the invitation.

Mr. Robert Shaw Oliver, who has been appointed to succeed Colonel Sanger as Assistant Secretary of War, is an accomplished soldier and admirably fitted for the post. He was born in Boston fifty-six years ago, and served through the civil war with the fifth Massachusetts cavalry. He entered the regular army in 1867, but resigned three years later to engage in business in Albany. During his residence there he has been an active member of the national guard, and now commands the third brigade of the N. G. N. Y.

The total immigration into Canada for the year ending June 30 is announced as 124,658. The origin of this immigration is given as follows:—

United States	45,980
British Isles	41,787
Continent of Europe	37,891

The arrivals for the three preceding years appear thus:—

	1900.	1901.	1902.
United States	8,543	17,987	26,388
British Isles	5,141	11,810	17,259
Continent of Europe	10,211	19,352	23,732
Totals	23,895	49,149	67,397

The *Jewish Chronicle* states that the community of Hungarian Jews in Chicago recently wrote to the Chief Rabbi of Pressburg (Hungary), requesting him to recommend them a strictly orthodox Rabbi who would be able to preach in their native language. Owing to the great distance it was impossible for a candidate to visit Chicago in order to preach a trial sermon. It occurred, therefore, to the candidate recommended by the Chief Rabbi to speak sermons, both in the Hungarian and German languages, into the phonograph. The records were sent to Chicago, and the sermons, on being reproduced, gave such general satisfaction that the preacher was elected at a handsome salary.

The collapse of the United States Ship-building Company and the appointment of a receiver by Judge Kirkpatrick, of the United States District Court, seem to be generally regarded as incidents highly discreditable to the reputations of Mr. Charles M. Schwab and the other "promoters" of this trust. The *Baltimore American* goes so far as to say:—"This eventuation is the natural outcome of the wildcat scheme of financiering employed in the organization of the concern. Never before in the riot of trust promotion with which this country has been so enormously inficted during the past few years was there perpetrated such a bold-faced, unblushing crime of finance as marked the formation of the Shipbuilding Trust."

The United States Department of Agriculture has decided to make Nacogdoches, in eastern Texas, a big tobacco experiment station, and it is announced that on August 1 a plant for the curing, baling and warehousing of all tobaccos at experimental stations in the south will be opened. This move is the outcome of experiments and tests which have been going on in eastern Texas

for the last year and a half, and coupled with the announcement of the opening of the Nacogdoches curing station, the still further important announcement is made that the Governmental tests have demonstrated that tobacco grown in the soil of east Texas is the equal of, if not superior to, the celebrated costly tobacco grown in the Vuelta Abajo district of Pinar del Rio, Cuba, known as the finest tobacco in the world.

Professor Morgan, of Ruskin university, believes that divorces are caused by women being unable to understand husbands. He has therefore decided to establish a department which will teach them how to do so. Special attention is to be devoted to the housewifery class, in which the student will be instructed so that she will know round-steak from ham and eggs, be able to raise bread without a derrick, to tell when enough prunes are sufficient, and to vary the daily menu without hash. The novelty of Professor Morgan's course will be the psychological studies designed to fit the graduates to select a compatible husband. A man's conduct before marriage, the faculty holds, is no criterion of his fitness; but by the psychological course the expectant brides will be trained to study his disposition and read his mind.—Pittsburg Dispatch.

An editorial on "how to stop lynchings," from the Portland *Oregonian* has been going the rounds of the southern press, each paper adding a word of approval of the *Oregonian's* prescription, which was simply that Negroes should cease to give provocation for mob executions. That this is no remedy at all, remarks *Public Opinion*, is promptly shown by last week's lynching in Kentucky of a white murderer, and by the South Carolina lynching of a Negro because he refused to tell the hiding place of a murderer that the mob was looking for. The *Oregonian* asserts that lynchings would stop if "Negroes would let white girls alone." The fact is that the majority of lynchings are not due to the crime this paper has in mind, but to a spirit of lawlessness which breaks out on constantly lessening provocation. The week's lynching record was increased to three by the Negroes themselves, a black mob in Florida hanging a black assaulter.

John Donoghue, the sculptor who was awarded first prize among more than seventy competitors at the Columbian exposition in Chicago for his classical group, "Sophocles leading the Chorus after the Battle of Salamis," committed suicide in New Haven recently. He was born in Chicago, and studied at the École des Beaux Arts, in Paris, where he soon won notice. He travelled and worked in many countries of Europe. In Rome, in 1885, he produced his "Hunting Nymph." It was in that city, too, that he planned his gigantic winged figure, "The Spirit," using the baths of Diocletian as a studio. It was Donoghue who designed the "St. Paul" in the congressional library in Washington, the "St. Louis of France" of the appellate court building in New York city, and busts of Governor Ames and John Boyle O'Reilly in the Boston public library. Other works were his "Venus," his "Diana," and his "John L. Sullivan," and the best known of all, his "Egyptian Ibis."

Mr. Cannon, of Illinois, who is to be the next Speaker of the House of Representatives, was quoted recently as saying that it will not be necessary to pass any currency legislation at the next session of Congress. There is, he thinks, no reason why the increase in the circulating medium in the coming twelve months should not be as great as in the last twelve months without additional legislation if the business of the country should demand an increase. Mr. Cannon will hold, as Speaker of the House, a position of great power in the next Congress, but for that very reason, says *Bradstreet's*, it is hardly appropriate for him to indicate thus early the line of currency policy which he thinks should be followed by the next House. He seems to forget, also, that one of the demands of those asking for monetary legislation is that the currency shall be made more elastic, so that it may be contracted as well as expanded, as need requires.

NEWS OF THE WEEK.

A case of cholera was reported on August 11th at Akita.

The Japanese Standing Squadron left Otaru for Hakodate on 11th August.

The training vessels *Suma* and *Akashi* arrived at Ominato on the 10th August.

Marquis Ito proceeded, on August 11th, to Tonosawa where he lodges at the Kwansuiro hotel.

The German cruiser *Illis* arrived on August 11th, at Nagasaki from Shanghai to undergo repairs.

A telegram from Nagasaki states that rinderpest has appeared at the village of Taira, Kitamatsura district, and shows signs of spreading.

New rice was shown on August 11th in the Tokyo market from Nigohan, Saitama Prefecture. The quality was good.

Several persons attacked, on the night of August 10th, the village office of Akatomari, Sado, where the election of members of the village assembly was taking place. They carried off the election books.

H. Sakai (36) official of the Department of Communications, was arrested on August 6th on a charge of having accepted bribes from several merchants. His dwelling was subsequently searched by the judicial authorities.

Mr. Dan Leno, who was attacked by mental aberration has, it is stated, so greatly improved in health that he will soon take a sea voyage. Mr. Arthur Collins believes that Mr. Leno will take his usual place in the next Drury Lane pantomime.

Mr. Jacob Phillips, who started the firm of Phillips, Moore & Co. at Hongkong, early in the forties (the firm of which the late Mr. Lewis Moore of Shanghai was a member), and who went home in 1851, has just died in his hundredth year.

The Directors of the Hokkaido Railway and Colliery Company held a meeting on Aug. 9th at the office of the Tokyo branch when Mr. Inoue, managing director, reported on the business conditions of the first half-year. The net profit was yen 907,920.

A correspondent telegraphing from Taipei, Formosa, states that a gale raged in the locality for two days commencing on the night of Aug. 5th. The training ship *Matsushima* and two others arrived at Keelung on the 5th from Manila. They will leave for Fusan shortly.

Mr. H. Takenchi and three other directors of the Tokyo Commercial Bank, who were under suspicion of having embezzled yen 120,000 belonging to the bank, were released as the result of the preliminary trial in the Tokyo District Court, on the ground that the evidence against them was insufficient.

In addition to the names in the Birthday Honours List already reported should be noticed that of Dr. Patrick Manson, LL.D., M.D., F.R.S., C.M.G., Medical Adviser to the Colonial Office, in Formosa, Amoy, and Hongkong before he settled down at home. He receives the honour of K.C.M.G. for special services in connection with tropical diseases.

We read in Vancouver papers that Lady Minto, wife of the Governor-General of Canada, intends paying a visit to Japan this fall. She and her party will sail from Vancouver for Yokohama on board the Canadian Pacific liner *Empress of China*, which is scheduled to depart on September 7. The party will consist of the Countess of Minto, Lady Aileen Elliott, Lady Ruby Elliott and Capt. Bell, A.D.C. The party will leave Ottawa for the coast on September 2nd and in the Government coach *Victoria*. The run westward to Vancouver will be made without stop. Special quarters for the party will be fitted up on board the *Empress of China* when she arrives at Vancouver from the Orient on August 26.

LAW CASE.

JARDINE MATHESON & CO. v. NIPPON KENMEN BOSEKI KAISHA.

The hearing of this action, instituted by Messrs. Jardine, Matheson & Co., against the Nippon Kenmen Boseki Kaisha (the Japan Silk and Cotton Spinning Co.) in which a decree of bankruptcy was delivered on August 5th on the application of plaintiffs, was again brought up in the Yokohama District Court before Judge Kano, on the protest of defendants.

The Court was closed to the public. The decree of bankruptcy given in the case instituted by Messrs. Jardine, Matheson & Co. against the Nippon Kenmen Boseki Kaisha was cancelled on Aug. 10th in the Yokohama District Court, where the defendants had brought an appeal against the decision.

CORRESPONDENCE.

NEED FOR BETTER OPERATION FACILITIES AT THE GENERAL HOSPITAL.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In some quarters, there seems to be an opinion that a properly equipped, "up to date" operating room is a luxury, rather than a necessity, and that Yokohama cannot afford luxuries. As this view may be prevalent, and therefore inimical to the proposed reform in the General Hospital, I take the liberty of troubling you with this address to the public of Yokohama. Although somewhat egotistical, for which I humbly crave pardon, I think that it may perhaps throw some light on modern surgical methods, and thus may help to form a basis on which to form a proper judgment. If I depart from my rule not to parade medical matters in public, it is because this occasion is a very exceptional one, and I feel sure that a statement of personal experience will do more good than volumes of reasoning.

The popular prejudice against "operating theatres" and surgical interference generally, is not without reasonable foundation. Operative surgery has saved millions of lives, during the last century which has passed, and the use of anesthetics has, during the latter half of it, enabled it to do so with comparative immunity from pain. In the pre-antiseptic days, however, it sometimes happened that death resulted from comparatively trivial operations, owing to the entrance into the wound of the deadly micrococci which produce blood-poisoning. Hence the general belief that operations are frequently, if not usually, attended with great risk to life, and should only be permitted as a *dernier resort* when all other means, however speculative, have been tried and failed. This procrastination has, in its turn, been the cause of myriads of surgical failures, the fatal sentence, "too late," being often too visible on the visage of the unfortunates who seek this last resort. In this way a "vicious circle" has been established in which prejudice has prepared the way for failure, and failure has nourished deep rooted prejudice.

I cannot remember the pre-antiseptic days, but when I commenced the study of medicine the antiseptic precautions used were rudimentary, and carried out usually in a half-hearted fashion which courted failure. Lister, the founder of antiseptic, and therefore of aseptic surgery, the man whose beneficent genius turned the work of the great Pasteur to the use and lasting benefit of humanity; Lister had gone to London, and left a few disciples and many half sceptics behind in Edinburgh. When I was clinical dresser, in my second year of study, I fell under the favourable notice of that great surgeon, Sir James Spence, and continued till his death two years later, to act as clinical clerk, during which time I assisted at nearly all his Hospital and private operations. From this experience in the University wards, and frequent visits to those of other surgeons, I am in a position to compare the results then and now, and the difference is as that of night from day.

The antiseptic system then depended on the partial use of antiseptics, chiefly the steam carbolic spray, which, under the impression that the infection came from the air, was employed to kill the invading hosts of microbes. I well remember Spence, in a sarcastic semi-jocular fashion accusing a student of attempted manslaughter, because he had momentarily stepped in between the spray and the "field of operation." Yet that patient did not die!

There were other surgeons who did attempt to try the efficacy of the new doctrine, and, although a contrast of the two schools would be of little use now, I can safely say that I have seen dozens of lives lost, after operations, which would involve not the slightest risk now! In those days, a surgeon never opened the abdomen, nor a joint, for exploratory purposes,

as the mortality was so high (about fifty per cent). Now, with strict aseptic precautions, the mortality following such explorations is less than one in ten thousand! I have seen several deaths result from simple operations, such as that for "knock knee" or "varicose veins," performed by the best surgeons of the day. Now, any surgeon who does these operations aseptically, will run practically no risk at all.

Personally, I have had over three hundred aseptic operations, and in not a single instance, have I seen failure to secure primary union in a wound not previously infected. In such cases, the wound heals as if one had sewed up a tear in a glove. There is no inflammation, no suppuration, and the patient feels little or no pain. Nature works unimpeded, so that the process of flesh-knitting is completed in a few days, stitches are taken out on the eighth day, and firm union already results.

I claim no special knowledge or dexterity in connection with the aseptic technique. If I have met with a degree of success beyond the average, it is solely because personal attention has been given to every detail of sterilisation. It has seemed to me, as no doubt it has seemed to thousands of doctors just as keenly alive to its necessity, that if it was worth doing, it was worth doing well, and that the great secret of success in this method lies in the scrupulous care which is given to each detail.

All towels, sheets, dressings, bandages are sterilised by steam under pressure and are never afterwards touched by unsterilised instruments, or hands. The patient's skin is rendered as sterile as possible by rubbing into it a solution of soap in alcohol, containing in solution the potassium-mercuric iodide, or other antiseptic. After a soaking in alcohol it is then covered with a sterilised dressing, and this process is fully as important as the sterilisation of the surgeon's hands, and should occupy not less than twenty minutes. Thorough cleansing of the surgeon's hands is a very important procedure and not very easy to secure. The hands should be scrubbed for ten minutes, with alcoholic soap and a hard brush, after which the sterile overalls, or other covering, are put on, and the hands are submitted to fresh scrubbing, everything used, including brushes and water, having been previously rendered sterile. With the greatest precautions, soaking in antiseptic solutions, &c., it is not possible to be sure that the hands are absolutely sterile, and for abdominal work therefore, it is wiser to use sterilised rubber gloves. It is needless to say that instruments, ligatures and all material which has to come, directly or indirectly, in contact with the "field of operation" are freed from the presence of living germs, even the basins and other utensils having been previously boiled. Everything being thus "surgically clean," it is the duty of the surgeon, his chief assistant, and surgical nurse, to see that, before or during the operation, no inadvertent contact of sterilised with unsterilised, on the part of others who have not yet developed the "aseptic conscience," is allowed to introduce an element of risk into the proceedings, such as would be furnished by the introduction of a few of the blood-poisoning cocci into the wound. The air is not now regarded as such a fertile source of infection as formerly, but it is not germ-free, and its being in constant motion adds to the risk. It is therefore most expedient that the air of an operating room should be as free from germs as possible, and this object has been secured, I think, in the design which I have made for the General Hospital. In the proposed building there is no direct communication with corridors. On one side, the operating room is approached through the anaesthesia room, the patient never seeing the operating room at all. The two doors are always locked, except at an operation. On the other side, the operating room is reached through two doors, first that of the sterilising hall, and secondly that of the surgeon's "wash-up" room, where hands are sterilised, and clean gowns are kept. The windows do not open, and are merely large surfaces of glass, arranged to admit the greatest amount of light, but ventilators which filter the incoming air, and remove the used air, ensure a comparatively pure atmosphere. This is especially important in prolonged operations where there is greater exposure to infection from the air.

From the above outline sketch, it will be seen that the whole success of the aseptic technique depends upon constant and unremitting care and attention to the slightest details. *No surgeon has a right to operate upon a fellow being unless he is prepared to guarantee a faultless chain of asepsis, so far as human foresight and stringent care can assure it.* It is not only in surgery that the value of the aseptic method is demonstrated. Thanks to it, that dread wolf "puerperal fever" is now seldom seen. In over six hundred accouchement cases I have seen but one, which was not fatal, due to the officiousness of a nurse. The whole system of quarantine, disinfection, &c. is nothing but the carrying out of the aseptic method in other directions, so that its utility extends beyond the range of operating "theatres."

The present operating room was designed by

myself about eight years ago, together with the pharmacy, cold storage and extra accommodation, all of which were urgently needed. For the sake of economy they had all to be built together and there was only one corner into which they could be squeezed. For this reason and for the reason also that aseptic surgery had not yet decided upon the best type of design, there are faults in the room which it would cost much to remedy, and there is no room in this quarter to add improvements. Besides it is necessary that there should be a room for minor surgery, the dressing of certain cases, plaster of paris dressings and special examinations. These proceedings must never be allowed in a room which is devoted to the service of aseptic surgery. The present operating room is eminently suited to such purposes.

But for those cases which occur from time to time, when a human being is in deadly peril of his life, and safety depends on having the best conditions for the strictest aseptic work; for those more numerous cases where health and activity can be retained, as frequently happens in the opposite sex, by an operation, involving practically no risk under aseptic conditions, there must be a place where such work can be done, without the anxiety which it otherwise involves to the patient, and much more, to the surgeon. Surely nothing should be considered of more importance than the safeguarding of human life and the relief of human suffering!

A stranger to these shores has offered to provide three thousand yen for the purchase of the best appliances for securing asepsis, provided the community erect a suitable building for the purpose. This gentleman wishes his name to be withheld, but his catholic humanity, his benevolent aim to aid his fellow creatures calls forth our deepest gratitude and earnest wishes for his welfare.

For an equal sum, a building can be erected of ample size, and the most modern type, thoroughly adapted to the demands of aseptic surgery. I shall be glad to place in that building, for public use, an operating outfit, which embraces the instruments for nearly every possible operation. These instruments, like the aseptic appliances, which have been offered as a gift to the Hospital, will be at the disposal of resident doctors. This latter point was expressly stipulated in the offer above mentioned. I emphasise this point, because there seems to be some misunderstanding about it. Practically the only condition made was that a doctor should be appointed by the committee to take the care of and responsibility for these appliances. They are mechanisms which require such care, and this proviso is a proper and reasonable precaution. It remains for the Yokohama community to decide whether they will take this opportunity to supply a suitable building for the purpose, and thus possess a reliable means, often so urgently needed, of aiding our fellow mortals.

N. G. M.

THE INSURANCE QUESTION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of the 11th instant, you present this very important question under three heads, as follows:—

First.—The amount of security that the foreign companies will actually be required to put up.

If a company issues one contract each year for yen 1,000 for 20 years upon the 20 Year Endowment plan, (which is the average plan of business in Japan,) at age 35, premium yen 52.13, they would receive from those insured yen 10,947, and they would have to put up as reserve, yen 9,248. This leaves a balance of yen 1,699, in the hands of the Company, out of which the expense of management and dividends are provided. Of course, as I stated in my former letter, a large percentage of dividends comes from keen financiering, but a certain percentage is also earned by economical management. This serves to illustrate the point that I want to bring out, viz:—That nearly the entire premium collections of a company are invested in the reserve. These figures it must be remembered, are exact, and as immutable as the laws of life and death, consequently they end the matter in so far as the amount of reserve deposits demanded are concerned.

Second.—As to the form which that security must take. Like yourself, I am not certain that the Japanese Government has ever asked that the companies shall deposit as a reserve fund 5 per cent. Japanese Bonds. The order, as you state, says there must be deposited with the authorities designated "Negotiable securities, sanctioned by the Chief of the Office having control of the business," but a gentleman who called upon the authorities in Tokyo in reference to the matter, advises me that he was told by such authorities that only Japanese 5 per cent. Bonds would be accepted. I immediately wrote to a Japanese gentleman in Tokyo, who could get at the heads of the Insurance Department, asking him to look up the subject and advise me as to just what the Government wanted. He writes me,

under date of July 8, 1903, that after interviewing the proper authorities he learns:—First, that the Department requires a deposit of yen 100,000 in Japanese Government Bonds. Secondly, the Department requires the actual deposit of each company's legal reserve in cash; or, in Japanese Government Bonds.

Under these circumstances I assume that my correspondent was properly informed and that the Government has made a demand that reserve deposits shall be in Japanese Government Bonds, inasmuch as a deposit of cash, without some guarantee of interest sufficient to meet policies at maturity, would be out of the question.

The third point, as you state, is the conventional legality of the order, and upon this point hinges, I think, the most important part of the controversy. You state:—"We do not find in the Treaties any provision that no tax, charge, or license of any sort, shall be imposed upon foreign companies that is not imposed upon a native company."

In answer to this I would call your attention to Article I, last paragraph of the Japanese-British Treaty, which says:—"They (British subjects) shall not be compelled under any pretext whatsoever to pay any charge of tax, other or higher, than those that are, or may be, paid by the native subjects or citizens, or subjects or citizens of the most favoured nation." Article III, last paragraph, also says:—"They (British subjects) shall enjoy respectively the same treatment in matters of commerce without having to pay taxes, imposts, or duties of whatever nature or under whatever denomination, levied in the name of, or for the profit of the government, other or greater, than those paid by native subjects."

The American Treaty has, I understand, the same rights and privileges granted it as the most favoured nation, and would, of course, come under this clause. If there is nothing else in the Treaty bearing upon this subject, and I must confess I have been unable to find anything of such a nature, then the Treaty seems conclusive. At any rate, no attempts that I have made so far, either by letter or through the American or British Ministers, have been able to elicit any further information upon the subject; and yet I must confess that my experience with Japanese statesmen would make me hesitate to believe that they would attempt to issue any such order as the one in question, without some foundation upon which to proceed, and I am sure the insurance interests will be most grateful for any additional information upon the subject.

I concede that the Japanese Government acted in a most liberal spirit in making the Treaty in question, (assuming that there is no rider attached to the parts I quoted), but at the same time, the Treaty, having been made, should not in any way be abrogated. If the Japanese Government thinks it has acted too liberally in this matter, it is within its province to arrange another Treaty with the governments in question. As a well-wisher of Japan, however, I must say it seems a little inconsistent for a government to come forward with a dishonored Treaty in one hand (always provided, however, that the order No. 146 is in violation of Treaty provisions) and at the same time ask that enormous amounts of money shall be invested in its bonds.

As to the equality of footing that would exist between Japanese and foreign companies, I can only say that all American companies hold their books and assets open to the inspection of the Japanese authorities precisely as they do to the American Insurance Commissioners; and any representative, either ministerial, consular, or otherwise, that may be designated to examine into the finances and management of the American companies, will receive every courtesy and be offered every opportunity that they may desire for an investigation of any company's affairs.

As I said in my former letter, these companies are mutual in their operation, giving to their members insurance at the exact cost of producing and maintaining same. This would not be the case did every government under which they operate require that they should invest their assets in bonds issued by them. No two countries perhaps are on an exact par as to the value of bonds they issue, and it would certainly be unfair to the insured of some nations to compel them to invest their money in the bonds of others. On the other hand, it would hardly be fair to allow the Japanese insurers the benefit of the wonderful results of investment and financiering that has been accomplished elsewhere, when their government says that the companies must invest that portion of their assets collected in Japan, in securities that under the most favourable conditions must curtail the companies' earnings. Therefore it must be apparent that one governmental supervision must be accepted or rejected by all; and as a matter of fact, this is the policy adopted by every other civilized country in the world.

There are some governments which require that the assets of the companies operating therein shall not be invested in certain classes of securities, to which requirement some companies object and

refuse to comply, but the certificate of the American Insurance Commissioner is always accepted as to the value of the securities held by the different companies and their manner of conducting business. Some governments require that a certain amount of securities shall be deposited before insurance companies shall do business therein, but these requirements have only been put forward after such countries have developed life insurance companies of their own nationality sufficient to take care of the business therein. This is certainly not the case with Japan. While it may be that some of the Japanese insurance companies are quite as good as those of other nations, the fact certainly remains that it will be many years before the Japanese companies will be financially able to carry the insurance of the Japanese people, as compared with the insurance of other nations. I might mention in passing that no company can take more than 20 per cent. new business per annum and deal fairly with its old policy holders. It should, therefore, not be the object of Japan, in my opinion, to prevent any reputable company from doing business within her jurisdiction, nor do I think there should be any fear that any creditor of the foreign insurance companies now doing business in Japan could not obtain ample satisfaction through the Japanese court. Certainly there has been no instance in which any foreign life insurance company has sought to evade the payment of any judgment rendered against it, and should any Japanese company seek to enter a foreign field, they would find that no country would ask them to put up the reserve collected therein in the hands of the government under which it decides to operate. Should an entrance fee be charged, that is another matter, and one that I do not blame Japan for taking up. If she cannot do so under the Treaties, then by diplomacy have the Treaties revised. If, on the other hand, the treaties permit a charge to be made and Japan chooses to make such charges, it is clearly her right, and those companies who do not care to comply can withdraw, but it seems to me that it would only be courteous and fair for the Japanese Government in promulgating an order of this sort to state under which of the Treaty provisions the deposits in question are asked for, and not leave the question open to discussion. It seems rather difficult to get an interview with any of the heads of Departments at Tokyo, or to get any satisfaction of a nature to finally settle the question; but I presume that the matter will be made plain to us in time as to why the demand for the deposits is made and what disposition will be made of the part of the order referring to reserve deposits.

To recapitulate this last clause:—I cannot see wherein the native companies are in any way placed upon an unequal footing under the arrangement which foreign companies are working. I am aware that in some quarters an opinion prevails that native companies are required to deposit some security before commencing business. This is really not so. Native stock companies, organized for the purpose of making money for their stockholders are required to put up 25 per cent. of their capital stock when chartered. But no such deposit is required of mutual companies, nor do I think there is any charge or tax of any kind levied upon such companies. The 25 per cent. required of stock companies is in the nature of a charter guarantee and not for the privilege of doing business. This is in keeping with similar requirements in other countries. The only remaining question, therefore, if the right of the Japanese authorities to inspect and supervise the foreign companies' assets and investments is conceded, and as I said before, such right is not only conceded but invited, is the advisability of having some assets that can be reached easily in the event of suits at law. This matter can be easily settled by the companies in question giving satisfactory indemnity bonds to cover the amount in question in the event of suits.

Very truly yours, BASIL H. BETTS.

FIRE ON THE "TONKIN."

Shortly before two o'clock on Thursday afternoon, says the *Kobe Herald*, fire broke in the forehold of the French mail steamer *Tonkin*. By three o'clock the flames on the fore bridge and forward part of the upper promenade deck were fairly under control but blazing chunks of wood still kept dropping from the iron skeleton, which was practically all that remained of this portion of the steamer. The port side seemed to have fared worse than the starboard, for it was still too uncomfortably dangerous to invite mere onlookers to risk their skins. The port midship boat was entirely destroyed while on the starboard side the steam launch had been gutted of its woodwork. On the first alarm of fire the *Tonkin's* stern had been towed round toward the wind, the Norwegian steamer *Actin* and the N. Y. K. liner *Kamakura* assisting in this task. In order to prevent the flames from the fore part of *Tonkin* spreading to the after part while the vessel still

lay bows on to the wind, an awning had quickly been spread and this was speedily thrown overboard when it was no longer necessary. This step indeed was rendered necessary as the flames had caught in several places and so that no obstacle or fitting of an inflammable nature should remain, chairs and other things were quickly thrown overboard. The officers and men of the P. & O. steamer *Landia* as well as many of the vessels in harbour, the Kawasaki launch, Water Police and others had come to the aid of the French steamer as quickly as they could do, and several jets of water were playing on the burning portion of the deck as well as into the hold. The hold itself was one dense cloud of smoke and steam and it was impossible to see anything beyond. An iron bulkhead separates the fore hold from the engine room so that when once the deck flames were got under control there was very little chance of the fire spreading to the after part of the ship. By half-past four things were steadying down and it is only a matter of time before the fore hold either burns itself out or is flooded. This latter action does not appear to have been taken probably for sufficient reasons were it known, although the chances of saving any of cargo seemed very remote. Chlorate of Potash seems to have caused all the trouble and it is said that an explosion of this chemical started the conflagration which speedily took hold of the inflammable cargo—mostly of Saigon cotton—that is said to have been stowed away. Eventually it was found necessary to take the *Tonkin* to Mirme, where she was beached and the fire was flooded out.

Latest information with reference to the M.M. steamer *Tonkin* which was on fire at Kobe, was given by the *Kobe Herald* of Friday which said:—

At about half-past six last night it was determined to tow the *Tonkin* down to Mirme where she could be run ashore and where she would not endanger the rest of the shipping. The Kawasaki's tug boat *Matsuko Maru* was selected to do the work and before night the French mail boat had been run aground about fifty yards from the shore and five hundred yards west of the Mirme boathouse. There was a discussion as to whether she should not be run aground stern first so that the scuttling which had been decided upon should be more effective for the fore part of the steamer, but Captain Schmidt said that if this were done the flames would blow aft and endanger the rest of the vessel. The actual scuttling consisted in removing some of the rivets below the water line and this was done about ten o'clock. All through the night the flames were battled with, the coal bunkers which had ignited adding more work for the already tired out men.

A visit to the vessel this morning showed how fierce had been the flames through the night, for the coal bunkers had ignited the alleyways and burned up all the work shops and other things on either side, beside eating through on to the upper deck and charring it up in such a way that it was only with difficulty that one could pick one's way along it. A glance down the big number two hatchway showed that the water was nearly on a level with the 'tween decks and the smoke still coming up was thick enough to blot out everything from sight every now and again. Farther forward the desolation was still more complete, and the smoke thicker, owing to some of the cargo still burning below number one hatch. The men's quarters were entirely demolished and an inspection of the fo'castle head showed that every scrap of wood work had been reduced to charcoal or ashes, while several of the smaller pieces of iron were bent about here and there as if they had writhed under the intense heat. The iron decks were still too hot for bare feet or hands.

As to the actual cause of the outbreak it seems doubtful whether this will ever be known. There are, however, as usual in such a case, a variety of rumours from which to select and it seems to us that the most feasible is that a coolie threw a lighted cigarette end into the hold and that this landed on a broken keg of chlorate of potash which immediately flared up. The outbreak was so sudden that it was impossible to get at the cocks for flooding the hold and it was in attempting to do this that one of the engineers got severely burned and had to be removed ashore to a hospital, where from all accounts he is now doing well. The Messageries is one of the companies which insures its own fleet so that the loss will fall entirely on them and it is impossible at this stage to form even the roughest estimate. It is certain however to amount to a very big sum and the damage, if it can be repaired here, is likely to take some weeks. Doubts are expressed in some quarters as to whether the company will consider it worth while to refit and practically rebuild the fore part of the vessel and from the looks of things now, nothing else can make the *Tonkin* sea-worthy.

Our contemporary added that the fire in the

fore-peak was still smouldering but there was no longer any danger of its spreading.

The *Asahi* states that the steamer *Tonkin*, which was beached after the fire, was floated on the morning of Aug. 9th. She will be taken into the Kawasaki Shipbuilding Yard to have temporary repairs made and will then return to Marseilles. The paper adds that the damage to cargo is estimated at about yen 100,000 and that to the hull at about yen 500,000.

EUROPEAN TOPICS.

Dame Deborah Bowring, widow of Sir John Bowring, a former Governor of Hongkong, has died at Exeter at the age of 85, leaving an estate valued at £13,392.

The Rt. Rev. John Moorhouse, the lord bishop of Manchester, has resigned the bishopric. He was born in 1829 and was appointed bishop of the Anglican See of Manchester in 1886.

With summer weather come accidents in the Alps. A party of scholars from the Zurich University, numbering eighteen, were on a visit of pleasure to Val Piora, near Airolo, in July, when while on the Piz Blas, which is nearly ten thousand feet high, they were overtaken by an avalanche. Three of the excursionists were killed and five injured.

Sir Charles Elliott, Chairman of the Finance Committee of the London School Board, presented his annual statement to the members of the Board last week. The year's expenditure, he said, had exceeded the estimate by only £486. The total increase in the outgoings had been £132,000. For the current year they estimated that they would require £116,000 more than in 1902-3, to be provided by the rate, which would for this purpose be fixed at nearly 15½d., as against the previous rate of 14 2-3d. This represents an increase of nearly one half penny.

A French Agricultural engineer calls attention to the Chinese pony, and suggests its acclimatisation in Europe. Its endurance and courage is remarkable. Last February, in a race from Tientsin to Peking (126 kilometers, or about 84 miles), over bad roads, in a storm of wind and rain, 23 of them ran, and the first arrived in 7h. 33m., the last in 9h. 7m. The result is comparable to that of the Brussels to Ostend race. The principle characteristic of this small horse is to cover long distances at moderate speeds.

A widespread conspiracy for the manufacture and circulation of false Austrian bank-notes has just been discovered, and 40 persons have been arrested. The gang operated mostly in Dalmatia and the Italia Irredenta provinces, which enabled them to work extensively in Northern Italy and the Italian Tyrol. One peculiarity in their methods was to acquire a yacht of their own, so as to move about without being dogged from one railway station to another. Dropping anchor in a coast town, they have disposed of as much as £160 in spurious notes in a day or two.

There will be universal congratulations to Prince and Princess Charles of Denmark on the birth of a son who, it may be of interest to mention, comes twelfth in the line of succession to the English throne and sixth to the throne of Denmark. The new Prince is the King's eighth grandchild, the first being Lady Alexandra Duff, the eldest daughter of the Duchess of Fife, who was born in 1891, and is three years older than Prince Edward of Wales. Princess Maud, as Princess Charles will always be known, is now in her 34th year, and was married to the second son of the Crown Prince of Denmark in 1896.

Only a few weeks ago the Rev. Dr. Langham, whose death is announced, received the degree of D.D. at Glasgow University in recognition of his long and useful life as an evangelist and a scholar. Dr. Langham was for 40 years a missionary in Fiji under the Wesleyan Missionary Society, having commenced his work there when cannibalism prevailed. Since 1898 he had been

engaged in the revision of the Fiji version of the Bible, under the direction of the British and Foreign Bible Society, and the task of perfecting the edition was completed shortly before his death.

THE HONGKONG AND SHANGHAI BANKING CORPORATION.

The following is the seventy-sixth report of the court of directors to the ordinary half-yearly general meeting of shareholders to be held at the City Hall (Hongkong) on the 15th prox. at noon.

Gentlemen,—The directors have now to submit to you a general statement of the affairs of the Bank and balance-sheet for the half-year ending 30th June, 1903.

The net profits for that period, including \$1,435,472.73, balance brought forward from last account, after paying all charges, deducting interest paid and due, and making provision for bad and doubtful accounts, amount to \$3,590,683.17.

The directors recommend the transfer of \$500,000 from the profit and loss account to credit of the silver reserve fund, which fund will then stand at \$6,000,000.

They also recommend writing off bank premises account the sum of \$200,000.

After making these transfers and deducting remuneration to directors, there remains for appropriation \$2,875,683.17, out of which the directors recommend the payment of a dividend of one pound and ten shillings sterling per share, which at 4/6 will absorb \$533,333.33.

The difference in exchange between 4/6, the rate at which the dividend is declared, and 1/8, the rate of the day, amounts to \$906,666.67.

The balance \$1,435,683.17 to be carried to new profit and loss account.

DIRECTORS.

Mr. D. M. Moses, Mr. G. Balloch, and Mr. G. H. Medhurst having resigned their seats on leaving the Colony. Messrs. E. Shellim, H. W. Slade, and E. S. Wheeler have been invited to fill the vacancies; these appointments require confirmation at this meeting.

AUDITORS

The accounts have been audited by Mr. W. Hutton Potts and Mr. A. G. Wood; the latter acting in the place of the Honourable C. S. Sharp, who is absent from the Colony.

A. J. RAYMOND,
Chairman.

Hongkong, 28th July, 1903.

The accounts are as follows:—

ABSTRACT OF ASSETS AND LIABILITIES, 30TH JUNE, 1903.

LIABILITIES.	\$	c.
Paid-up capital.....	10,000,000.00	
Sterling reserve fund	10,000,000.00	
Silver reserve fund	5,500,000.00	
Marine insurance account	250,000.00	
Notes in circulation:—		
Authorized issue against securities deposited with the Crown Agents for the Colonies.....	10,000,000.00	
Additional issue authorized by Hongkong Ordinance No. 19 of 1900, against coin lodged with the Hongkong Government	3,118,158.00	
Current account:—		
Silver.....	74,688,764.18	
Gold, £2,108,271. 17s.		
2d.==	25,132,124.77	
	99,820,888.95	
Fixed deposits:—		
Silver.....	44,758,114.56	
Gold, £4,481,456. 12s.		
4d.==	53,434,925.24	
	98,193,039.80	
Bills payable (including drafts on London bankers and short-sight drawings on London office against bills receivable and bullion shipments)	12,273,675.78	
Profit and loss account	3,590,683.17	
Liability on bills of exchange re-discounted, £6,256,836. 12s. od. of which up to this date £4,471,496 have run off		
	252,746,445.70	

ASSETS.

Cash	33,143,734.24	
Coin lodged with the Hongkong Government against note circulation in excess of \$10,000,000	5,500,000.00	
Bullion in hand and in transit	3,974,550.63	
Indian Government rupee paper	2,207,901.65

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE POPE'S CORONATION.

London, August 7.

The Coronation of the Pope is fixed for Sunday.

The Pope not having communicated the news of his election to the Government of Italy, Premier Zanardelli has instructed the State officials that they may not participate in the fetes on the occasion.

ENGLISH POLITICS.

The House of Lords has read the London Education Bill a third time.

BRITISH NAVAL MANOEUVRES.

The British Naval manoeuvres have begun on an unprecedented scale, extending from Berehaven to Madeira.

THE TROUBLED BALKANS.

Later.

The Porte in a Note addressed to the Powers declares that it is impossible to withdraw the troops from Macedonia, and describes the situation as very serious.

STRIKES IN FRANCE.

There has been a serious strike, accompanied by a riot, in L'Orient. The mob stoned and stormed the Court where the strikers were being tried. The fighting lasted for three hours.

THE MUCH-WORRIED PORTE.

London, August 8.

The Russian and British Ambassadors have made serious representations to the Porte regarding the situation in Armenia. The Porte has consequently instructed the Valis to vigorously repress the excesses of the Kurds. The British Vice-Consul at Bitlis has been ordered to proceed to Mush and report on the situation.

In consequence of the excesses in Macedonia, eight battalions of Turkish troops have been sent to Monastir.

RIOTS IN RUSSIA.

The unrest in Russia continues unabated. The Cossacks have fired on 2,000 strikers at Kieff, killing three and wounding twenty-four.

AUSTRALIAN GOVERNOR-GENERAL.

Baron Northcote will be appointed Governor-General of Australia in December.

NOTE.—Baron Northcote was the second son of the late Lord Idlesleigh (better known as Sir Stafford Northcote), and since 1896 he has been Provincial Grand Master of Freemasons in Devonshire. After receiving his education at Eton and Merton College, Oxford, he was appointed clerk in the Foreign Office. In 1876 he became Private Secretary to Lord Salisbury when the latter proceeded to Constantinople on his famous Embassy. He after became financial Secretary to the War Office and became Surveyor-General of Ordnance in 1886. He married an adopted daughter of Baron Mount Stephen. He is now Governor of Bombay and is 57 years of age.

FIGHTING IN MACEDONIA.

London, August 9.

Four battalions (of infantry), supported by artillery, routed 1,700 Bulgarians near Sorovitch (Macedonia) on Thursday.

MORE RIOTING IN RUSSIA.

The Governor of Nikolaieff sustained a scalp wound and a police officer was mortally wounded in rioting that took place on Tuesday, when 20 (rioters) were killed and 200 wounded.

The rioting in Kieff continued yesterday, the troops again firing upon the rioters and wounding several.

THE IRISH LAND BILL.

The Irish Land Bill has passed through

Committee in the House of Lords. The Irish peers carried a number of amendments against the Government, to which it is expected the House of Commons will not agree.

THE BALKANS.

London, August 9.

The revolt of Bulgarians is provoking a counter insurrection among the Albanians. A number of Turkish troops are being called out, and Sushdi Pasha is hastening from Albania to Monastir with 30,000 regulars.

THE HUMBERT TRIAL.

The trial of the Humberts has opened in Paris.

RUSSIAN CONSUL MURDERED.

London, August 10.

M. Noskowsky, Russian Consul at Monastir, when returning to the town from the plains, was shot dead by a Turkish gendarme, with whom, it is stated, he had an altercation about the gendarme's omission to salute him.

THE PAPAL CORONATION.

The coronation of the Pope was a brilliant ceremony.

FRENCH PREMIER ATTACKED.

M. Combes, the French Premier, was fired at twice with a revolver in Marseilles, but was not hurt.

THE MURDER OF A RUSSIAN CONSUL.

London, August 11.

The murderer of M. Noskowsky has been arrested. The Grand Vizier and the Minister for Foreign Affairs called at the Russian Embassy and expressed regret.

VILLAGERS MASSACRED.

Hilmi Pasha, Inspector General of the reforms in Macedonia, reports that a large force of insurgents has massacred the whole of the inhabitants of several villages in the Clisurus district of Monastir and attacked others, taking many prisoners and burning some alive.

THE SULTAN DEPLORES.

Later.

The Sultan sent a personal telegram to the Tsar deploring M. Noskowsky's death. The Tsar, replying, ordered the Russian Ambassador at Constantinople to demand the immediate and exemplary punishment of the murderer and of all military and civil officers upon whom responsibility for the audacious crime falls.

THE RUSSIAN CONSUL'S MURDER.

London, August 12.

Turkey has assured Russia that the murderer will receive the severest punishment, and that a court-martial has been summoned at Monastir to try him.

MORE FIGHTING.

There has been further fighting near Sorovitch, and 24 battalions have been ordered from Anatolia.

NOT REASSURING.

Mr. Balfour, in the House of Commons, regretted his inability to say anything reassuring as to the situation in Macedonia. It was the duty of Europe to support Austria and Russia so long as they were unambiguously striving to ameliorate the population.

ALARMING INDUSTRIAL SITUATION IN RUSSIA.

London, August 13.

Intelligence from Russia continues to depict an alarming industrial situation. Half a million workmen are involved in the strikes in the south.

PARIS RAILWAY CALAMITY.

A crowded passenger train on the Paris Underground Electric Railway caught fire and ninety perished, all asphyxiated. A later telegram states that the accident occurred at 11 p.m. near Menilmontant. A carriage caught fire and the lights were extinguished. Other trains arrived and were blocked, four trains being unapproachable until midnight. By three in the morning the fire was extinguished. The victims number 84.

THE IRISH LAND BILL.

The Irish Land Bill has passed its third reading in the House of Lords.

"NO QUARTER" IN THE BALKANS.

Later.

Four thousand Turkish troops with artillery have surrounded Krushewo where, it is rumored, the insurgents after repulsing two attacks offered conditional surrender. But when Constantinople was consulted it ordered that no quarter should be given. The revolt is spreading daily. The Bulgarian youths are leaving the villages and joining the bands in the mountains.

ROYALTY AND MARIENBAD.

King Edward has started for Marienbad.

(RECEIVED AT THE LEGATION OF FRANCE.)

ADMIRAL POTTIER.

Saigon, August 7.

Vice-Admiral Pottier died at Rochefort.

THE ATTACK ON M. COMBES.

Saigon, August 11.

M. Combes arrived at Marseilles on the evening of the 9th to preside at the closing of the Congress of Educationists. He received an exceedingly warm welcome. An Italian named Picolo fired two shots from a revolver as the President of the Council passed. Nobody was wounded. It is said that the attempt was not directed against M. Combes.

INSURRECTION SPREADING.

Insurrection is spreading in Macedonia. The Russian Consul at Monastir has been assassinated by a Turkish gendarme.

THE HUMBERTS.

Saigon, August 12.

The trial of the Humberts continues at Paris without interest or incident.

M. COMBES AND THE CONGREGATIONS.

At a banquet in Marseilles, where 3,500 covers were laid, M. Combes declared that he would continue to apply the law to the Congregations. He set out for Paris always much cheered.

THE FIRE ON THE "TONKIN."

(FROM OUR CORRESPONDENT.)

Kobe, August 7, 8 p.m.

The M. M. steamer *Tonkin* was beached at Mirume last night. The fire raged until 2 o'clock in the morning, when it was got under control. The Captain and officers of the British India steamer *Ikhona* lent fine assistance.

The fore half of the steamer is a complete wreck. The ship is half full of water, and the fire is still smouldering.

No lives were lost. The second engineer was injured and now lies in Sano hospital.

The repairs are expected to take quite two months.

(FROM THE "JIJI SHIMPO.")

THE SHANGHAI CASE.

London, August 6.

The British Government objects to the extradition of the Shanghai journalists to the Chinese Govern-

ment, and sent instructions to that effect to the British Minister at Peking.

BRITISH NAVAL MANOEUVRES.

The British naval manoeuvres are being held in the Atlantic. The Mediterranean Squadron, commanded by Admiral Sir Compton Edward Domville, consisting of 23 battleships and 43 cruisers, is attacking a squadron under the command of Vice-Admiral Sir Arthur K. Wilson. A detachment of Admiral Wilson's squadron is at Madeira, commanded by Lord Beresford, and another in English and Irish waters. A torpedo fleet is holding separate manoeuvres in St. George's Channel. The fleet participating in the manoeuvres numbers some 200 vessels.

SUBSIDY TO THE CUNARD STEAMSHIP CO.

The British Government has decided to pay the Cunard Steamship Co. an annual subsidy of one hundred and fifty thousand pounds on the condition that none of the steamers of a greater speed than 17 knots, owned by the company, shall be sold to a foreign power.

THE TROUBLE IN THE BALKANS.

Fighting has occurred in the Balkan Peninsula. The railway has been twice wrecked by means of dynamite in Monastir vilayet.

DEATH OF MR. PHIL MAY.

Mr. Phil May, the well-known artist, is dead.

JAPANESE BONDS.

Japanese bonds have gone up by 15s.

AFFAIRS ON THE CONTINENT.

London, August 7.

Bolice (?) and Saraphoff, (?) have declared a revolution in Macedonia.

The Porte has despatched a note to the Powers with reference to the steps necessary in the present crisis.

Bulgarians have killed fifty Turkish soldiers with bombs, at Conack (?) and Culepho. (?)

Eight battalions of Turks have been despatched to Monastir and three others to Salonica.

Prince Ferdinand of Bulgaria is still absent from home.

JAPAN AT THE MANOEUVRES.

Captain S. Tanari, naval attaché of the Japanese Legation, at London, is present at the naval manoeuvres as the guest of Admiral Wilson.

BALKAN AFFAIRS.

London, Aug. 10.

The revolt in Macedonia is extending. The number of the rebels is 20,000 and half of them are armed with Mauser rifles.

Five villages in the Katothria (?) Kastoria, Monastir district inhabited by Mahomedans have been captured, the villagers killed, and the crops destroyed. There are fears that counter attacks will be made, in which case matters may lead to a dangerous crisis.

The Turkish Government has despatched a number of battalions to the scene.

CORONATION OF THE POPE.

The enthronement of the new Pope took place yesterday and was a brilliant ceremony. Fifty thousand persons were present in the Basilica.

TURKEY'S REGRETS.

London, Aug. 11.

The Grand Vizier of the Sultan has paid a visit to the Russian Ambassador at Constantinople and expressed profound sorrow with regard to the murder of the Consul at Monastir.

A warehouse of the Gibetie(?) Railway has been blown up.

RAILWAY CALAMITY.

Fire occurred in a train on the Paris underground railway with horrible results. A hundred corpses have been found. The remainder are being searched for.

NEW TELEGRAPHIC COMMUNICATION.

The Czar has ordered the establishment of a direct telegraph line between St. Petersburg and Vladivostok.

(FROM THE "ASAHI SHIMBUN.")

THE NEW POPE.

London, August 6.

While the late Pope was descended from an old family of Italian nobles his successor was born in the humblest circumstances, and never had a university education. His brothers and other relations keep shops, and one of his sisters is married to an innkeeper at his native place.

RUSSO-JAPAN CONVENTION.

Berlin, August 8.

The reported convention between Japan and Russia has been declared at Berlin to be baseless.

THE SHIPPING TRUST.

The U.S. navigation trust of Mr. Morgan has concluded a contract with British shipping companies for a term of twenty years. According to the con-

tract, British steamers which entered the trust will still use the national flag.

MACEDONIAN AFFAIRS.

London, Aug. 12.

The Macedonian Committee have circulated a note among the representatives of the Powers saying that the tumults can not be put down unless a Christian Governor is appointed.

THE RUSSIAN RIOTS.

During Wednesday, Thursday and Friday, bands caused riots at Kiev. Sixty were killed and a hundred seriously injured.

(FROM THE "DEUTSCHE JAPAN POST.")

SIR ERNEST SATOW ARRIVES IN SHANGHAI.

Shanghai, August 7.

Sir Ernest Satow, British Minister to China, has arrived at Shanghai. The Chamber of Commerce presents an address this afternoon.

OPIMUM-TAX IN CANTON.

The Viceroy of Canton is trying to resuscitate an additional tax on opium.

THE NEW POPE.

Rome (via Berlin) August 6.

The enthronisation of Pope Pius X will take place next Sunday.

Italy failed to receive an official notification of the new Pope's election, and the Government have, therefore, prohibited their officials from being present at the church ceremony.

THE NEW POPE.

Berlin, August 10.

The new Pope was enthroned at Rome yesterday with great solemnity.

The new Papal Minister of State has not yet been appointed.

ATTACK ON THE FRENCH PREMIER.

An attempt was made on the life of M. Combes, the French Premier, as he was attending the Teachers' Congress at Marseilles. The assailant who is an Italian, was arrested. M. Combes was unhurt.

THE CRISIS IN HUNGARY.

The Hungarian Ministerial crisis continues.

THE TROUBLE IN THE BALKANS.

Russians in Monastir (West Macedonia) have been shot by the Turks.

The unrest in Macedonia presents a serious aspect.

THE MURDER OF A RUSSIAN CONSUL.

Berlin, August 10.

The Sultan has given Russia satisfaction for the murder of the latter's Consul at Monastir. The Consul had refused the sentry because the latter refused to salute him.

GERMANY AND JAPAN.

The Berlin papers give prominence to the statement that the visit of the German squadron to Vladivostok is only one of courtesy and does not indicate any feeling against Japan.

(The German flagship was previous to the visit, and is now in Japanese waters.)

(FROM THE "N.C. DAILY NEWS.")

THE CULT OF REFORM AT PEKING.

Peking, August 1.

Shen K'e-wei, journalist and reformer, was beheaded at Peking on the 31st of July.

THE BEAR'S PAW.

London via Bombay, August 1.

It is reported at St. Petersburg that several hundred Cossacks have been sent into Tibet.

MR. CHAMBERLAIN'S ZOLLVEREIN.

Mr. Chamberlain has denied that he ever proposed to tax foreign raw cotton while exempting that grown in the Empire.

THE KING IN IRELAND.

London, August 1.

Replying to an address at Queenstown, the King said he looked forward to renewing in future years the happy experiences of his present visit to Ireland.

His Majesty has knighted the Rt. Hon. Horace Curzon Plunkett, Commissioner of the Congested Districts Board and Vice-President of the Irish Department of Agriculture, for his eminent services to Ireland.

THE SUGAR CONVENTION.

London via Bombay, August 3.

The Emperor of Austria is to issue on Tuesday an imperial ordinance abrogating the sugar legislation of the empire wherever it conflicts with the Brussels Convention.

A HOLIDAY FOR LORD MILNER.

London, August 1.

Lord Milner, High Commissioner for South Africa, is proceeding to England on leave.

THE ITALIAN BUDGET.

The Italian Financial Year ended on the 30th June shows a credit balance of sixty million lire (£2,400,000).

CUNARD LINE AND THE STATE.

London, August 4.
The agreement between the Government and the Cunard Company, dated the 20th July, has been laid on the table of the House of Commons with a draft of the deed for securing the debenture stock. It will be published shortly.

ARMY AND ITS DOCTORS.

Mr. Brodrick stated that he hoped to announce next session that he had organised a civilian reserve medical staff for the army, formed from the higher class candidates now competing for army medical appointments.

SOMALILAND.

London via Bombay, August 4.

Mr. Brodrick announced in the Commons that ammunition possessing greater stopping power than the service ammunition had been sent to Somaliland.

THE NEW GREEK KALENDS.

Peking, August 6.

Mr. Conger, the U.S. Minister, had an interview with Prince Ching yesterday and again asked for the opening of Moukden and Tatungkou.

Prince Ching assured Mr. Conger that he would open these two places after the Russians evacuate Manchuria, but at present he cannot do it.

Prince Ching asked Mr. Conger to assist the Chinese Government by allowing the Russians to evacuate Manchuria. The sooner they evacuate the sooner the ports will be opened.

THE CUNARD COMPANY.

London, August 6.

The Cunard agreement embodies the provisions already published last October.

The Company holds its whole fleet at the Government's disposal. The officers and three-fourth of the crews must be British, and half the crews of the two new vessels must be naval reservists.

The Government's loan is not to exceed £2,600,000, secured by debentures paying 2½ per cent interest. In addition to these debentures, the Government receives special £20 shares carrying certain eventualities, and a voting power equal to one-quarter of the total votes of the other shareholders.

THE ENGLISH CHURCH AND THE EASTERN.

The Russian newspapers publish a message addressed to the Holy Synod of Russia from the Ecumenical Patriarch of Constantinople conveying an invitation on the part of the sister Eastern Churches for a joint examination of some of the more important questions affecting contemporary Christian life. They also publish the reply to this message from the Holy Synod of Russia, from which the *Morning Post* gives an extract. One of the passages of the reply is to the effect that with rare exceptions English missionaries do not endeavour to convert Orthodox Christians, but that they seize, on the contrary, every occasion to show their respect towards the Holy Apostolic Eastern Church, recognising that she, and not the Church of Rome, is the true guardian of the traditions of the Fathers.

The reply then proceeds as follows: "The love and sympathy which they show to us cannot fail to awaken in us the same sentiments and inspire us with the happy hope of the possibility of an ecclesiastical union with them in the future. There will, however, still be much to be done and to be elucidated before it will be possible to dream of a determined definite step in one direction or the other. Above all, it will be necessary that the desire for union with the Orthodox Eastern Church shall be the sincere wish not only of the High Church party in England but also of the entire Anglican Church. For our part, we must be ready as brothers to help the English with our explanations, always having in view the realisation of their best desires, and be as indulgent as possible towards their very natural perplexities after centuries of separation, but we must at the same time remain firm in our confession of the truths of our Ecumenical Church as being the sole guardian of the heritage of Christ and the sole ark of salvation of the Divine Grace."

EXPORTS.

RAW SILK.

There has been less doing this week, consuming markets refusing to follow the pace as set by Yokohama. Prices are nominally unchanged, but doubtless some "cuts" are made at the scales, and there are considerable rejections every day. Arrivals are plentiful. Stock is increasing and with a little prudence on the part of buyers they may be able still to operate at lower rates.

WASTE SILK.

The Waste Silk market is now fairly open and considerable parcels have been taken on the basis of quotations given below. The position is somewhat similar to that in the Raw Silk market. Consumers abroad hang fire at these prices, and the market is sustained by purchases for native consumption. Meantime if foreign shippers want to be in the market at all they have to pay the prices asked.

ITCHING HUMOURS

SPEEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excoriations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED,

Are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

Cuticura Remedies are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. Export Agents: Messrs. D. & C. Co., Ltd., 10, Abchurch Lane, London, E.C. 4.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, AUGUST 22ND, 1903.

DEATHS.

At Kobe on August 16th, 1903, JOHN CATTO ABELL, in his 64th year.

At Paignton, Devon, on the 8th July, 1903, JAMES WALLACE, formerly Chief Engineer of the N. Y. K. steamer *Wakasa Maru*.

SUMMARY OF NEWS.

THE native party of Hawaii has demanded independence.

TWO cases of cholera were reported on Aug. 15th in Yamaguchi, and Ehime respectively.

THE Italian representative at Seoul and his family arrived at Nagasaki on August 14th en route for home.

IT is said that the United States is contemplating buying the Island of Tahiti from the French Government.

A THUNDER storm prevailed on Aug. 14th at Matsumoto, Shinano province, two persons being killed by lightning.

Y. AMANO, an official of the Hokkaido-cho, was arrested on August 15th on a charge of having accepted bribes.

MR. T. TOKONAMI, Secretary of Tokyo-Fu, has been decorated by the Kaiser with the 2nd order of the Red Cross.

A WORKMAN named T. Hattori (30) was killed

on Aug. 13th by an explosion of percussion caps which he was carrying in the Arsenal, Koishikawa, Tokyo.

THE *Yorodzu* states that the Crown Prince will probably pay a visit to the Exhibition at St. Louis, and may return through Europe.

THERE are now twenty-nine women of title in England who were American girls, including our Duchesses and two Countesses.

THE Emperor and Empress have contributed yen 800 in aid of the poor people in Hiroshima Prefecture, whose fields were damaged by the storm on July 14th.

THE Japanese warships *Takachiho*, *Chiyoda*, and *Chokai* arrived at Chefoo on Aug. 12th. The same day the *Saiyen* left Saseho for Masampo, Korea.

In connexion with the murder recently perpetrated at Tsuchiura, Mr. T. Ikeda and his brother were examined on Aug. 13th and their residence was searched.

A CHINESE tailor named Ching Chong-ho (30), living at No. 106, Yokohama, was arrested on August 16th, by the Kagacho police on a charge of having smoked opium.

A TELEGRAM from Fukuoka states that soldiers belonging to the 12th company of the 24th Regiment made trouble on the night of August 13th. Five of them were more or less injured.

TWO receipts of the Yasuda Bank, Tokyo, for deposits of yen 1,000 and yen 600 were found, on August 16th, at the Omori railway station, by a carpenter named Y. Sawaguchi living at Honjo, Tokyo.

A TELEGRAM from Kobe states that a primary school, in the village of Mikusa, Taka district, which was undergoing repairs collapsed on the 17th August. One person was killed and another injured.

A CONVICT named T. Uyeno (36) who was on his way from Tochigi Prefecture to Tokyo, in custody of a police officer, escaped, on Aug. 18th, through a window of the train at a point near Akabane.

THE 18th being the 74th anniversary of the birthday of Francis Joseph, Emperor of Austria-Hungary, the Emperor and Empress of Japan despatched congratulatory messages to his Majesty.

A PASSENGER train collided with a goods train at 4.25 on August 18th at Shimabashi station. Many passengers were more or less injured. The cause is reported to be the negligence of a pointsman.

THE investigations with regard to the house tax question have been almost completed at the Department of Foreign Affairs. The documents which are to be sent to the Arbitration Tribunal have nearly all been finished.

A PARCEL was received by post on Aug. 15th, at the Isezaki-cho police station, Yokohama, containing a gold watch which a merchant named K. Yamada living at Ishikawa lost on the 9th while travelling in a train between Fujisawa and Yokohama.

THE Suzuki Sugar Import Company in Kobe has purchased an area of land of 16,000 *tsuba* at Ohira, Buzen province, on which to establish a sugar refining factory. The work of construction will be commenced in October this year. A representative of the company has already gone abroad in order to purchase the machinery needed for

the work. The capital of the company is reported by the *fiji* to be yen 500,000.

AUSTRALIAN papers publish the following telegram from London:—The King has stated in reply to a correspondent that he considered that the toast of his health was equally honoured by those drinking it in water as by those who drank it in wine.

A LANDSLIP occurred on the morning of Aug. 13th at Gongenyama, Kanagawa, with the result that one coolie was killed while two others were severely injured. These three coolies were working under the hill, carrying sand and pebbles to be used in the reclamation off Kanagawa.

A MAN named K. Nakagawa (21) living at Yoshida-machi, Yokohama, was arrested on August 14th on a charge of having stolen a bicycle (value, yen 180) belonging to Mr. M. McGill, No. 81, and sold it to another man named Matsu, living at Hinode-cho for yen 25.

TOKYO papers state that as the result of the proposed administrative reform, the post of Governor-General of Formosa will be abolished. Dr. Goto, Director of the Civil Department of the Government, will be appointed Governor of the island.

MR. N. NAGAO, a passenger by the steamer *Taiyoku Maru*, which left Nagasaki on Aug. 10th for Shimonoseki, committed suicide by jumping overboard in the Genkai sea. The deceased left a letter saying that he was disappointed about something but did not like to explain its nature.

MR. M. BABA, of Etchu province, has purchased the steamer *Melanic* (built in 1881, of 2,265 gross tons) for yen 120,000. The Nippon Marine Insurance Company has insured the ship for yen 90,000. She will be used on the service between Osaka and Northern China waters.

MR. K. MAKINO, ex-managing director of the Takamatsu Rice Exchange, was sentenced in the local Court on Aug. 13th, to one month's imprisonment with hard labour and a fine of yen 5 on a charge of having made a false statement when examined in the Court as a witness. He at once appealed.

THE Municipal councillors of Yokohama met on Aug. 13th and decided to extend the gas supply to 440,000 cubic feet, the original quantity being 170,000. The costs of the proposed extension are estimated at yen 90,000, which amount will be temporarily defrayed by the Treasurer and paid back out of the profits in the coming years.

ACCORDING to information from the Japanese Consul at Amoy dated Aug. 1st, cholera for a time prevailed seriously in the foreign concession and native town, but had lately almost disappeared. Three or four fresh cases, however, are now reported daily in the settlement and about thirty in the native town. There has been no case of plague.

THE Fuji Cotton Spinning Company, it is reported by Tokyo papers, has paid yen 126,500 to Messrs. Jardine Matheson and Co. in behalf of the Nippon Kenmen Boseki Kaisha (the Japan Silk and Cotton Spinning Co.) which was recently sued in the Yokohama District Court by the foreign firm. The Fuji Cotton Spinning Co. has purchased the whole property of the Nippon Kenmen Boseki Kaisha for yen 225,000, which amount the former company was to pay the latter in the form of debentures. The purchasers of the property have now, however, paid the amount in cash on the security of the debentures which are to be delivered to the Kenmen Kaisha.

KOREA.

Saturday, August 15.

The *Fiji Shimpō* continues its powerful crusade on the subject of Korea. Our contemporary may be said to adopt from point to point the position taken up in these columns. It is quite evident that no security can be felt by Japan as to the stability of her own interests in a country where such incidents as that of Yong Am-pho can occur. A more flagrant violation of Korea's sovereignty could scarcely be conceived than that perpetrated at Yong Am-pho, where the Russians, without previous reference of any kind to the Korean Authorities, erected buildings and practically established a settlement. Yet Korea's manner of dealing with the situation was to legalize it by a subsequently granted instrument. Anything may happen where such a Power is concerned. To rely on the Seoul statesmen's observance of the ordinary principles of international intercourse would be plainly fatuous. What Japan has to do is to treat Korea in accordance with the indications furnished by Korea herself. She must keep pace with the aggressors, and to that end she ought now to insist upon receiving concessions for the Seoul-Wiju and Seoul-Wonsan lines. Hitherto the Japanese Government has done very little to promote the substantial interests this country admittedly possesses in Korea. Indeed, when the record is carefully considered, the Government is found to have rather impeded than assisted the enterprise of its nationals. Now, however, Japan is evidently confronted by the possibility that interests which she regards as secured to her by all the conditions of the problem, may be unexpectedly snatched from her by some abnormal act on the part of a foreign Power, abetted by unlooked-for helplessness on the part of Korea. Russia has set the example and, however reluctant Japan may be to follow it, she must be guided by necessity rather than by fine scruples.

Telegrams to the *Fiji Shimpō* and the *Nichi Nichi* say that the Korean Minister of Foreign Affairs, in an interview with the Japanese Representative, denied that any lease of land at Yong Am-pho had been signed by Mr. Cho, Chief of the Bureau of Imperial Lands and Forests, and further expressed entire sympathy with the project of opening Wiju to foreign trade.

This denial as to the lease must be received with much incredulity. It is believed in well-informed circles that the document was signed on the 23rd of July. Possibly it had not been brought officially under the notice of the Minister of Foreign Affairs at the time of the latter's interview with Mr. Hayashi, as now reported, but even that is difficult to believe.

Monday, August 17.

There are various rumours. Among other things it is said that the Japanese Government has decided to prefer important demands in Seoul by way of set-off to Russia's acquisition of territory at Yong Am-pho. The *Fiji Shimpō* continues to write in very strong terms. It declares the impossibility of regarding Russia's action at Yong Am-pho as a normal consequence of the lumber enterprise in the Yalu Valley. A big settlement at Yong Am-pho, far removed from the scene of the timber-felling enterprise, is plainly a development of imperial ambition. To associate it with the cutting of trees along the upper reaches of the river can be described only as an attempt to hoodwink the

public. Moreover, the method pursued by the Russians amounts virtually to seizure of a friendly Power's territory in time of peace, and Korea, by giving *post-facto* sanction to that method, has shown herself unable to assert her rudimentary rights of sovereignty. It is further to be noted that the Korean Government, in marked contrast with its treatment of Russia, has uniformly opposed all Japan's enterprises of late. The bank-note question, the illegal levy of transit duties on the Nak-dong, the opening of Wiju—all these matters found the Korean Authorities marshalled against Japan, whereas they yield incontinently where Russian interests are concerned. Japan has good reason to be indignant, and her Government must take strong steps if this country's merchants are to pursue their enterprises in security.

The third article of the Nishi-Rosen Protocol says:—"In view of the large development that the commercial and industrial enterprises of Japan have taken in Korea, as well as the considerable numbers of Japanese subjects residing in that country, the Imperial Russian Government will not hamper the development of the commercial and industrial relations between Japan and Korea." How is that pledge to be reconciled with Russia's opposition to the opening of Wiju all the while she was acquiring for herself a large settlement at the mouth of the Yalu? It seems to us to be entirely beyond dispute that if Russia opposed Japan's application for the opening of Wiju, the St. Petersburg statesmen must have forgotten the existence of the Nishi-Rosen Protocol.

Tuesday, August 18.

Mr. Hayashi is said to have addressed a very strong note to the Korean Foreign Office. The line taken by him, according to the *Fiji Shimpō's* Seoul correspondent, is that the grant made by Korea to Russian subjects at Yong Am-pho is, in effect, the grant of a special settlement. If effect be given to the document, Japan will be compelled either to ask for a similar concession on her own account, or to demand from Korea such other equivalent as shall redress this very exceptional arrangement.

The telegrams indicate that Japan and England are working together in Korea, and that they are pressing for the opening of Wiju as well as of some place in the vicinity of Yong Am-pho. A settlement near Yong Am-pho would appear to be rather a white elephant from the point of view of any Occidental nation.

Wednesday, August 19.

The Yong Am-pho affair continues to excite interest. We observe in the columns of the *Nichi Nichi Shimbun* a statement that the lease obtained by the Russian company contains a clause providing that all foreigners offending against the law within the limits of the concession shall be handed over to the Russian Authorities. Our contemporary criticises that as an impossible condition, and so of course it would be were it a fact, but we can not suppose that the Russian negotiators have made provision for any save their own nationals.

It is rumoured that the delimitation of the lands leased at Yong Am-pho has still to be effected, and that the matter is under discussion between the Korean Foreign Office and the Russian Minister.

Thursday, August 20.

The Korean Court has apparently reverted to its often-abandoned project of celebrating the 40th anniversary of the Emperor's

coronation. The ceremony is to take place on the 21st of September, according to some authorities, on the 28th according to others. There is talk of the simultaneous consummation of Lady Om's patient ambition to be crowned Empress.

Between the upper waters of the Tumen and the Yalu there is a species of no-man's land within the limits of which there have always been uncertainties of jurisdiction, neither China nor Korea accepting the full responsibility. We read in Japanese journals that there are nevertheless thirty thousand habitations of Korean subjects in the district, from which fact it should be a reasonable inference that Korea is chiefly interested in the preservation of order. These people have suffered much of late from the lawless irruptions of Chinese, or Manchurian, banditti and the Korean Foreign Office has approached the Chinese Minister in Seoul with proposals pointing to a clear delimitation of the authority of the two empires. The Chinese Representative is said to have received these advances favourably.

It is rumoured that Li Kon-thaik and Li Yong-ik have combined to carry through a plan for raising in Belgium a loan of ten million yen on the security of Korean mines, twenty per cent. of the amount to be devoted to starting the central bank advocated by Li Yong-ik. These two statesmen have hitherto been bitter enemies. There was a time, not very long ago, when the chief staple of Seoul intelligence took the form of attempts on the part of one Li to compass the disgrace and even the destruction of the other. Apparently they have now found common standing room on a financial platform.

It is stated that the Directors of the Seoul-Fusan Railway have decided to float debentures to the extent of six million yen in the domestic market. The securities will bear 6 per cent. interest and the selling price will be 97 yen per 100-yen debenture. Rumour says that the following banks have engaged to take the sums indicated:—

	YEN.
Specie Bank	1,000,000
First Bank	500,000
Mitsui Bank	300,000
Yasuda Bank	200,000
Third Bank	200,000
Fifteenth Bank	200,000
Industries Bank	200,000
Total	2,600,000

JAPAN IN KOREA.

It is undoubtedly significant of the temper of the most intelligent classes among the Japanese that the *Fiji Shimpō* should depart from its usually calm attitude and should write in the strongest terms about the Yong Am-pho affair. The *Fiji's* view is that unflinching measures must be taken. There is no talk in our contemporary's columns of going to war with Russia. The Russians have taken clever, if unscrupulous advantage of a peculiar situation, and the direct sufferer is Korea, whose sovereignty has undoubtedly been impaired. It is difficult to conceive anything more hopelessly weak than the action of a Power which, finding that a number of aliens have defied its laws and broken their treaty, seeks to evade complications by legalizing their action. Japan, however, has no mandate to force Russia from the situation thus won. What she has to do is to insist that her own situation in Korea shall not suffer from the incident.

In other words, she must obtain from Korea some concession which will fully balance Russia's acquisition. The *Fiji* urges this in the most emphatic manner. Japan, says our contemporary, has always been patient with the Koreans. She has made many allowances for them in consideration of their imperfect international education, and she has suffered correspondingly at their hands. They do not, it would seem, appreciate her forbearance, and it is plain that the reasons hitherto dictating forbearance now suggest the necessity of exceptional measures. By no ordinary procedure can Japan hope to bring Korea to her senses. Mere protests will have no appreciable effect. The Seoul Government must be clearly shown that Japan's patience is exhausted, and that she has no idea of tamely continuing to submit her interests to the risk of being dealt with after the manner of the precedent now established. The *Fiji* does not definitely say what *quid pro quo* should be exacted, but we imagine that nothing less would satisfy it, and we think that nothing less ought to satisfy it, than concessions for the Seoul-Wiju and Seoul-Wonsan lines, together with the opening of Wiju and such other measures as may seem advisable to Japanese statesmen. It is impossible to forget that the causes which operated to bring about the China-Japan war were frequent acts of discrimination by Korea against Japan at the instance of the Middle Kingdom, acting through the instrumentality of Yuan Shih-kai, now Viceroy of Chili. If Korea embarks on the same route, not indeed at Russia's instigation but in obedience to Russia's dictation and aggression, war between Russia and Japan may not ensue—though the danger of such a contingency would be very great—but the break-up of the Korean empire could scarcely be avoided. We are not at all sure that any better solution could be found. Powers which have neither intelligence nor competence to manage their affairs so that their neighbours shall not be perpetually involved in perilous complications, deserve only to be deposed. We are perfectly conscious that the blame rests primarily with Russia, whose feverish ambition impels her to disturb the peace of the whole Orient. But in dealing with situations created by such factors, each State must seek the preservation of its own interests along the line of least resistance, which line in this case, leads to Seoul.

The *Kokumin Shimbun*, also, which shares with the *Fiji* the reputation of habitual moderation, now departs from its quiet tone and denounces Russia's doings in the most emphatic terms. It reviews those doings at some length and comes to the conclusion that a parallel record of high-handed procedure and unscrupulous ambition could scarcely be found. Unlike the *Fiji*, however, the *Kokumin* advocates the address of a remonstrance direct to Russia. It notes the great consideration invariably shown by Japan in dealing with the Koreans and it notes the exceptional position occupied by Japan in the peninsula; a position having its foundations in long centuries of historical relations, confirmed by the war of 1894-5, and recognised internationally by the Russo-Japanese conventions and protocols and by the terms of the Anglo-Japanese alliance. It is impossible for Japan to submit tamely to the events now taking place. She must demand an explanation from Russia, and must also lodge an unequivocal protest in Seoul.

POLITICAL NOTES.

Monday, August 17.

A new political club—the *Kainan*—has been organized at Kochi. Its declared programme is to break down the barriers of existing political parties and to organize an association on broader lines. About a hundred members have joined, but among them we do not observe the name of Mr. Kataoka Kenkichi. It is indeed noticeable that Messrs. Kataoka, Hayashi and Ozaki have stood aloof from all the movements and commotions recorded since their exit from the ranks of the *Seiyun-kai*.

The Kumamoto section of the *Seiyun-kai* has broken away from the Party. Out of eight divisions included in the prefecture only one remains faithful. The seceders have formed themselves into the *Higo Dosli-kai*, and have announced a platform of which the principal plank is the overthrow of the "clan statesmen."

Wednesday, August 19.

We observe that the *Fiji Shimpō* has fallen into a mood of doubt about England's attitude towards the Manchurian question. The basis of this uncertainty is Lord Cranborne's statement made last month in the House of Commons to the effect that Great Britain recognises the exceptional position occupied by Russia in Manchuria. The *Fiji* interprets that to be the prelude of an agreement between England and Russia, the former making to the latter some concession as to the exact nature of which there is as yet no clue. Naturally the *Fiji* is very anxious to know what the concession may be, and is much disquieted lest it should take a form unpalatable to Japan. But we think it absolutely certain that the British Government will not in this matter take any step of which England's ally has not full cognizance, and to which the Tokyo statesmen are not consenting parties. It is beyond all question that Russia does occupy an exceptional position in Manchuria. She has expended enormous sums on the building of railways and she has been in military occupation of the district for nearly three years. The commonest principle of fairness, to say nothing of expediency and the interests of peace, require that these claims should be recognised. At the same time, England is bound to see that Russia's presence in Manchuria, whatever form her presence takes, shall not materially impair the rights already acquired conventionally by Great Britain and by her ally, Japan. Further, Japan also has a special position in Manchuria. The place belonged to her by right of conquest eight years ago, and she was deprived of it by a combination of Powers having Russia at their head: deprived of it for reasons just as valid against a Russian occupation as against a Japanese. If, then, Russia's subsequently acquired position deserves recognition, so also does the previously acquired position of Japan. The task for diplomatists to achieve, a very difficult task it may be frankly admitted, is to find a *via media* such that the three Powers may tread it with a measure of content and without loss of prestige or sacrifice of interests. We entertain no doubt that diplomacy will show itself equal to the effort.

It is an interesting fact that the arguments most unequivocally in favour of war have

emanated at this juncture from men of science in Japan. Our readers remember the manifesto of the Seven Professors. This is now supplemented by an essay from the pen of Professor Hasegawa. He sets out by explaining the well known differences between the international policies of the Anglo-Saxon, the Teuton and the Muscovite races. England and America wait until their merchants have shown the way, whereafter the army and navy are set in motion to protect the interests thus created. Germany leads her merchants and also follows them. She encourages them to push forward holding the flag over their heads all the while. Russia gives herself no concern about the merchants. Her Government takes upon its own shoulders the function of developing trade and expanding territory. Professor Hasegawa seems to think that Japan belongs to the Teutonic category. Her characteristics are loyalty to the Throne and military spirit. He then passes on very frankly to consider whether she could support the strain of a great war; support it in the matter of lives and treasure. As to lives, she can easily afford to lose a hundred thousand men yearly. Her rapidly growing population justifies that estimate. As to treasure, it has to be observed that only a small fraction of the sum expended goes out of the country, and, further, that the Treasury has now in its vaults an unprecedented stock of gold. Professor Hasegawa ridicules the economists who shrink with horror from an issue of fiat paper. He recalls France's experiences in this matter, and quotes the saying that if a fiduciary currency pulled France down, it also raised her up. The gist of his argument is that the country is now excellently situated for going to war, and that something very like a challenge has been addressed to it.

Thursday, August 20.

Mr. Yamane, a prominent member of the *Tairo Dosli-kai*, alleges that among the members of the working committee recently appointed, two are Russian spies. We refrained from publishing the rumour at first, but it is causing some excitement. Several of Mr. Yamane's fellow-members insist that he must either substantiate his charge or take the responsibility. We do not gather that Mr. Yamane has mentioned any names, but he affirms that he has proof of his statements. A meeting was held on the 18th instant at Prince Konoye's residence to consider the question.

THE WEATHER.

On the 16th instant it was announced that a storm had now become inevitable, a centre of depression having actually invaded the main island. Appearances seemed to support this forecast, for the day was more or less cloudy throughout, and the breeze—what there was of it—variously fitful. On the 17th however, disquieting predictions ceased to be heard, and the Meteorological Department announced that the country was surrounded by a belt of high barometric readings. Nothing seems to be certain, therefore, except that the fine weather shows good staying power and that there are as yet no definite indications of its break up.

A continued spell of fine weather is now predicted. The comparative coolness of the past few days is attributed to the proximity of a centre of depression which passed up the sea of Japan and visited a part of Hokkaido.

THE GENERAL HOSPITAL.

Wednesday, August 19.

Every one interested in the General Hospital of Yokohama—which means or should mean all the foreigners in the place—will note with approval the course taken by Monday's meeting. The report of the Special Committee was adopted without criticism, except on the question of appointing a resident physician, and those holding the affirmative view were too plainly in the minority to give effect to their wishes. That question has now been entrusted to the new Committee, who as practical business men will doubtless settle it in the way that will best suit the interests of the community. It is probably just as well that this question was not pressed on Monday. Meetings are curious bodies, and some times, led away by discussion and the side issues that always crop up, do the most inconsequential things. And it appears to us that it would have been most imprudent and thoughtless had the assemblage of residents on Monday permitted itself the dangerous luxury of dividing on the subject. Because in whatever way the vote went—whether it was decided that a resident physician should be appointed, or this proposition was negatived—the hands of the Committee would to some extent have been bound for twelve months, or until another meeting could be called. We hardly think those who advocated the resident physician project quite realised what would be the result if their views were adopted by the meeting. As it is, the Committee have, so far as can be gathered, a perfectly open mind, and may be trusted to do what is at once practicable and in the best interests of the hospital.

It is, no doubt, greatly to be regretted that with the exception of Mr. Mottet, the former Committee, (Messrs. James, Colomb and Keswick) could not see their way to continue in office. But we may to a certain extent understand their feelings in the matter, and certainly they will have the respect of the community in the step they decided upon. Their work has been inconspicuous and yet arduous, and in place of that praise and gratitude which should have been most ungrudgingly given to them they have been subjected to carping and indiscriminating criticism. The incoming Committee, we feel sure, will gladly avail themselves of the advice of their predecessors, and will receive and consider impartially any suggestion that may be offered to them. Let the community perform its part; we have no fear that the Committee will fail.

Thursday, August 20.

If it were possible to obtain accurate statistics of the amounts given in charity, privately and publicly, by the members of the Yokohama community, the figure would probably be surprising. We doubt whether any community in the world has to put its hand in its pocket to the same extent for such purposes, and it is certainly safe to say that no community in the world shows itself more liberal. A large expenditure has now to be faced for the sake of a general hospital. Unfortunately, however munificent may be the mood of the community as a whole, Yokohama has no millionaires capable of endowing a hospital, and what is still more unfortunate is that the small foreign population, partly as a matter of sentiment, partly as one of expediency, desires to have a hospital of its own, independent of Japanese coöperation. By thus reducing the area of assistance the burden becomes proportionately heavy, and the lowest

calculation goes to show that unless about five hundred persons can be found willing to pledge themselves for an annual subscription of at least twenty yen each, a hospital with a resident physician can not become an accomplished fact. Otherwise stated, that means that about one-quarter of the adult population of Yokohama must agree to make this considerable sacrifice. Where else shall we look for a community so benevolent that one man in every four, without distinction of income or station, is willing to subscribe two sovereigns a year for the support of a general hospital? The thing will be managed, we have no doubt. But it is well to understand the precise dimensions of the sacrifice involved. As to details, there has been much difference of opinion, especially with regard to the question of a resident physician. The balance of opinion seems to be in favour of having a physician resident on the premises and constantly available. That is certainly a feature of thoroughly good equipment. But is it really necessary in a place so small as Yokohama, where the delay involved in having to summon a physician would never be more than a matter of a few minutes? If two non-resident physicians undertook to be responsible on alternate days, it would be perfectly possible for either of them to keep himself in sufficient telephonic touch with the hospital. Possibly the matter is not of vital importance, seeing that the sum allotted for a resident physician is only 300 yen a month, and we can not conceive that any two competent medical men would undertake to be available on alternate days for a smaller honorarium. Then there is the question of classes and rates for paying patients. Some folks have raised a sentimental objection to distinctions of class. It is hard to sympathise with such theories. Few of us are so foolish as to be troubled by prejudices against a neighbour because he happens to earn his bread in some of the less "genteel" pursuits. But all of us may justly assert a predilection for the manners and customs of the rank in life to which we happen to belong, and if superior education or more refined habits influence a man's manner of living when he is well and hale, why should he be exposed to the propinquity of a different social atmosphere when he is ill, and therefore more nervously susceptible to all unpleasantnesses? It appears to us to be pure pragmatism that any one should seriously advocate abolishing in a hospital the social distinctions that prevail outside it. Concerning charges, too, it has been said that 5 yen per diem is too high for a first-class patient, medical attendance being separate. We believe that to be the charge at the Tsukiji Hospital, and we know it to be the charge at the Red Cross Hospital, where, however, medical attendance is included. After all, should not hospital charges be fixed with reference to the actual cost of living outside the hospital? No one can obtain accommodation at a moderately good hotel for less than 5 yen daily, and there is no apparent reason why a man should acquire a claim on public charity because he happens to fall ill. All sensible folk now-a-days go into hospital the moment they find themselves attacked by a malady demanding constant attention and careful nursing. They do not and should not expect to obtain these advantages in hospital at lower rates than they would have to pay at home. The only point that perplexes us is to account for the fact that a hospital can be maintained in Tsukiji by private enterprise alone whereas Yokohama, a much larger

community with a proportionately greater demand for hospital ministrations, is asked to pay something like a thousand yen a month. However, the whole thing is in the hands of shrewd and public-spirited business men who may be confidently trusted to make the wisest arrangements.

BARON SONE AND THE LOCAL GOVERNORS.

Baron Sone has addressed to the Local Governors an instruction which embodies simply a statement of the general principle that although officials may have different functions to perform, all should have the same end in view, namely, the welfare of the State. The Minister conveys this counsel in writing as he is prevented by illness from communicating it orally. He then cites some points demanding special attention. The first relates to petty savings banks which resort to various devices for attracting deposits, eluding the laws and deluding the public. The Minister recommends rigid supervision of all these small institutions. He speaks also of the Agricultural and Industrial Banks, and of dishonest practices by their officers, and he alludes to public associations which, under pretence of promoting the general interest, borrow money from such banks or from the Industrial Banks, and apply it to improper purposes. Want of integrity on the part of individuals is mainly responsible, but the Minister thinks that more efficient protection would lessen these abuses. Finally, Baron Sone makes a comment which he probably regards as the most important feature of his instruction. It relates to the financial liabilities of the communes. The records show that applications for official permission to incur local debts aggregated only 1,060,000 yen in 1902 as compared with 3,880,000 yen in 1901. But against that diminution of 2,800,000 yen has to be set the fact that the total debts of the communes amounted to 61 million yen at the close of 1902, whereas they had only been 51 millions at the corresponding period of 1901. The difference is doubtless attributable to the floating of bonds previously sanctioned but not issued, and to the raising of loans not requiring official sanction; namely, short-period loans. This last practice had lapsed into a serious abuse, short-period loans being freely issued with the intention of subsequently replacing them by means of officially sanctioned bonds. Against this last practice Baron Sone directs inspectors to take special precautions, but we confess that we do not clearly gather his meaning, since if proper care be taken when sanctioning the floating of bonds, the latter could not be diverted to the purpose of unwise debts previously incurred. At all events it is clear that the Minister sees many abuses in the management of local finances. Baron Sone speaks also of the sake tax. He attributes the diminished production of sake to the facts that a large supply was carried over from 1901 to 1902 and that a bad rice crop as well as other national calamities deterred brewers and consumers. There could be no doubt that the proceeds of the tax would again increase. Meanwhile local officials should exercise the utmost vigilance and prevent illicit brewing, and as the central Government is taking steps to encourage cheaper and more efficacious methods of production, it will be for the local officials to assist the working of the improved system. Finally, with regard to the camphor monopoly now extended to the whole empire, detailed regulations would soon be issued, but it was to be understood

that the Government's purpose is not to make camphor a great asset of Japan proper, so much as to protect I'ormosa's asset in that commodity, and to insure the future of the industry in general.

Press comments indicate that the meeting of Prefects in Tokyo is regarded as somewhat of a fiasco. The criticism is that all the communications hitherto made to the Prefects might have been equally well made by despatch, without bringing the forty-three gentlemen to Tokyo. But it appears to us as more than probable that had the Government refrained from convening the usual meeting of Prefects, these same journals would have had a great deal to say about the omission. It is not altogether unfortunate that there should be no burning questions for submission to a council of prefects.

A MODERN SATIRIST.

For many months past the most entertaining article in *Blackwood's Magazine* has been that contributed by the writer who heads his work, "Musings without Method." A shrewd yet kindly critic of the world he finds abundant opportunity for the exercise of a nice satirical wit which never grows offensive, aggressive, or banal. In July he turned his attention to the modern journalist and describing the latter's education said:—

"The examples of the great masters will be useless to him. For they aimed at expressing their thoughts in the most appropriate terms, and the journalist will of course scorn so poor an ambition as this one. The public, whom it is his pleasure to cultivate, his honour to serve, understands not words but phrases. For instance, suppose a distinguished editor be dead, the wise journalist will be content to say: 'He has left a blank which cannot easily be filled.' The public, which might have some difficulty in understanding these words taken one by one, palpitates at the phrase. As the saying is, 'it touches a chord,' and the chord responds like an Æolian harp. This, then, is the first and great lesson: never write a characteristic word, and you will always be understood."

Again, the smart journalist's attempt "to achieve banality and yet avoid simplicity" is satirically fostered:—

"Should he be a sporting reporter who desires to explain that Wavelet's Pride was not reserved for the Ascot Stakes, he should use the following phrase: 'The idea that Wavelet's Pride would be reserved for the Ascot Stakes did not materialise.' There is nothing simple about that although it conveys the simplest information. The reporter who wrote it certainly felt a glow when he spelt out 'materialise,' and that glow he imparted to those who read him. Again, should the journalist be asked to declare that there is no advantage in a certain course, he will miss his chance if he do not write that 'the advantage is non-existent.'"

Once in the vein for helping a fellow member of the scribbling fraternity, *Blackwood's* Muser without method warms to his task and tells the popular writer that he will show himself a master of his craft if he explains the direction of a coast or an opinion by "trend." A statesman should not attract attention, he should "loom" or "bulk large" in the public eye. Never write "before"; "prior to" is "at once the simple and better journalism." From this vein of banter the writer emerges at last, to discuss the invasion of the journalist's sphere by the expert advertiser. Not only is he taking up much space which the journalist has hitherto filled, and paying for the privilege of being paid, but "worst of all, he has the knack of interesting the public which once belonged exclusively to the journalist." In short, the journalist must soon follow the man of letters into the dark limbo of forgotten things: a prospect full of delightful possibilities for some good honest folk who love not the modern journalist or his methods.

THE INSURANCE QUESTION.

In our issue of the 14th instant we published a second letter from Mr. Basil H. Betts on the subject of the security which foreign insurance companies doing business in Japan are required to furnish according to the terms of the recent Order. One of the main points under discussion is whether in calling for this security, the Japanese Government is committing a violation of the treaties. Our correspondent is disposed to answer in the affirmative. In his previous letter he referred to the treaties as providing that "no tax, charge or license of any sort shall be imposed upon foreign companies that is not imposed upon a native company." But the treaty articles relating to this matter do not anywhere speak of "companies" or "licenses." Hence we were unable to identify our correspondent's reference. It would now seem, however, that he did not quote but only paraphrased, and in his second letter he clearly sets forth the grounds of his contention that the Japanese Government is violating the conventions. We therefore confine ourselves to this second letter.

Therein Mr. Betts adduces, first, the last paragraph of Art. I. of the Japanese-British Treaty which he quotes thus:—"They (British subjects) shall not be compelled under any pretext whatsoever to pay any charge or tax other or higher than those that are, or may be, paid by native subjects, or subjects or citizens of the most favoured nation." As to this there are two comments to be made. The first is that the word "they" does not mean "British subjects" alone; it means "the subjects of each of the two High Contracting Parties." In fact, this Article, in common with the remainder of the Treaty, is essentially reciprocal in character. The point is not immediately vital, but it will presently be found to have importance. The second comment is that the First Article of the Treaty has no bearing whatsoever upon the question at issue. The First Article provides explicitly for certain things; namely, liberty to enter, travel and reside in the dominions or possessions of either Party; protection for persons and property; free and easy access to courts of justice; liberty to choose and employ lawyers; enjoyment of all rights and privileges accorded to native subjects in connexion with the administration of justice; rights to possess goods, succeed to personal estate, dispose of property, publicly exercise their worship and bury their dead. It is in connexion with these various rights and privileges that the two contracting Parties promise each other's subjects exemption from any charges or taxes higher than those paid by native subjects. The Article contains no word that can be construed as bearing upon the pursuit of an enterprise like insurance. Therefore this Article may be ruled out of the discussion altogether. At the same time we do not at all suggest that its elision affects our correspondent's argument. The First Article is quite unnecessary for the purposes of his contention. He can rest his case solidly on the Third. There it is undoubtedly written that "in matters of commerce and navigation, they"—that is to say, "the subjects of each of the High Contracting Parties," not merely "British subjects"—"shall enjoy respectively the same treatment as native subjects, or subjects or citizens of the most favoured nation, without having to pay taxes, imposts or duties, of whatever nature or under whatever denomination, levied in the name or for the profit

of the Government, public functionaries, private individuals, corporations or establishments of any kind, other or greater than those paid by native subjects, or subjects or citizens of the most favoured nation, subject always to the Laws, Ordinances and Regulations of each country."

Now it is here that the reciprocal nature of the Treaty must be insisted on. The Third Article explicitly and emphatically provides that the subjects or citizens of each of the Contracting Parties shall enjoy within the dominions of the other in matters of commerce and navigation the same privileges and exemptions as native subjects or citizens, within the limits of each country's laws, ordinances and regulations. Let us suppose then, that a Japanese subject went to the United States of America or to Germany with this Treaty in his hand, and claimed the right of undertaking insurance business there on precisely the same footing as an American citizen or a German subject. Would his claim be admitted? Not for an instant. The Authorities would refer him to the laws of the country, which provide that certain special security must be put up by a foreign insurance company in order to compensate for the fact that its assets are beyond the reach of the national tribunals. If then, as Mr. Betts suggests, the Japanese Government acted too liberally in framing this part of the Treaty, so did the German Government, so did the United States Government, and so, in short, did all the Occidental Governments. For they, on their side, promised that within their territories the privileges and exemptions enjoyed by their own citizens and subjects should be extended to Japanese subjects. And if Japan is now "coming forward with a dishonoured treaty in one hand," so also are Germany, the United States and the rest. For they, on their side, are not prepared to grant such privileges and exemptions in the matter of insurance. They very properly refer to their national laws, ordinances and regulations, to which the Treaty explicitly assigns a limiting power, and by which in nearly all countries insurance business is subjected to special treatment.

We regret to differ from our correspondent in this particular, because on the whole we sympathise with his well marshalled arguments and endorse his position. There remains, however, one difficulty. It is that if only such companies as that represented by Mr. Betts were in question, problems about security and assets would at once sink into insignificance. But legislators can not take anything on trust. Their enactments must be contrived to meet contingencies of every kind. Is it not, then, within the range of very conceivable possibilities that were no security required, Japanese insurers might find themselves exploited by a firm of nationals possessing no valid claim to credit of any kind and unable to furnish any trustworthy certificates? There must be some special protection, we think.

COUNT ITAGAKI.

By desire of the new political association—the *Doshu Shinkwai-jo*—Count Itagaki has prepared a long document setting forth the platform and principles he advocates for adoption by the Party. There are 10 general principles, 21 political projects, and finally a statement of reasons. We do not propose to inflict all these upon our readers, but as Count Itagaki and his new followers represent a current of Japan-

ese ideas, we may say that the spirit of the document indicates socialism of a diluted kind. When Count Itagaki stepped out of the political contest a few years ago, he devoted himself to socialistic questions, above all, the relations between capital and labour. These same questions he now offers to the new Party as the best basis it can adopt. He is careful, however, to disavow all sympathy with the extreme views of European socialists. All that he aims at is to establish harmonious co-operation between capital and labour, with such limits as shall not interfere with freedom of competition. This he regards as one of the great problems pressing for speedy solution.

Another interesting point in the Count's programme is that he advocates the recovery of Japan's complete tariff autonomy, and proposes that simultaneously with its recovery the right to own real estate and to work mines should be granted to foreigners.

He also insists upon some modification of the military conscription system so that it may prove less injurious to the bread-winning capacities of the people. But we judge from his language that he proposes, not a shortening of the conscription period, but a larger measure of indulgence in the matter of releasing conscripts who have shown special ability and diligence in mastering their military duties.

The Count briefly announces himself in favour of a policy of protection for Japan. Apparently he does not think this important proposition worthy of lengthy discussion, for it is not alluded to in his statement of reasons. Yet Count Itagaki must be aware that if resort to a protective policy openly underlay an attempt to compass the immediate recovery of Japan's tariff autonomy, the Powers could scarcely be brought into line. Further, we should have supposed that he would see the logical necessity of reconciling such a policy with the basic principles of his whole political structure; the principles of liberty, equality and fraternity. These he announces with all his fine old faith, but, at the same time, he would apply himself to the task of building tariff walls between Japan and the nations.

Another very important doctrine laid down by him is that all enterprises of public utility, as railways, telegraphs, telephones, gas-works and so on, should be in the hands of the State or of corporations.

We have not the least doubt that this enunciation of political doctrines will be ridiculed and even torn to pieces by the enemies of Count Itagaki. And indeed, for our own part, we have often been disposed to regard the "Father of Japanese Liberalism" as a somewhat visionary person; the Jean Jacques Rousseau of Modern Japan. History, however, tells us one thing about him; namely, that if he has lived for the past thirty years in advance of his time, his countrymen have always been ultimately found in the paths already trodden by his feet. His liberalism looked just as incongruous with its surroundings in 1875 as his diluted socialism looks now. But Japanese liberalism to-day is as far ahead of Count Itagaki's 1875 creed as his present socialism seems to be out of touch with contemporary sentiment. He may be a mere theorist in the eyes of some observers, but, on the other hand, he seems to be gifted with some subtle susceptibility which enables him to feel the set of the political atmosphere before its motion has become sensible to others.

CHINA.

Monday, August 17.

It is stated that British official assistance will be vigorously lent to the promoters of the Chingtu-Hankow railway. Their project has been hung up owing to Belgian and French opposition, but Sir Ernest Satow is expected to take up their cause resolutely. Undoubtedly if England intends to assert any claim to influence in the Yangtse Valley she must not allow this line to fall into non-British hands. Chingtu is the capital of Szechuan, the largest province in China, with a population estimated at 79 millions. It is at present a virtually segregated province, depending almost entirely on the Yangtse for means of communication with the outer world, and every one knows what is the nature of the communication furnished by the Yangtse in its upper reaches. Doubtless the engineering difficulties of the proposed line would be enormous, but its effect in opening up the interior of the Yangtse Valley would be proportionately great, for Hankow is within navigable reach of large steamers, and a railway thence to Chingtu would practically bring Szechuan into direct communication with the sea, and into communication with Peking also, for from Ching-tu the Peking-Paotung line will ultimately be continued due south to Hankow.

The *Hochi Shimbun* affirms that in spite of the competition of foreign ship-building firms, Viceroy Chang has ordered four gun-boats to be constructed at the Kawasaki Dock-yard. They are for the protection of the Yangtse, and these four will be supplemented later on. The dimensions of the boats are given as 180 ft. long; 28 ft. beam; 7 ft. draught; displacement 575 tons; horsepower 950, and speed 13 knots.

Tuesday, August 18.

The *Kokumin Shimbun's* Peking correspondent, who seldom sends incorrect information, gives the details of a new secret treaty said to have been concluded between the Chinese authorities and M. Lessar. The gist of the document, according to this correspondent is that the appointment, dismissal, removal and promotion of all Chinese officials in Manchuria are to be matters of consultation with Russia; that the Chinese troops stationed in the Three Provinces are to be under the control of the Russian Representative; that the duty of punishing bandits and rebels is to devolve on the Chinese, but that, in the event of their failure, Russian assistance is to be given; that foreigners are not to be allowed to trade in Russo-Chinese marts in China or to have access to the mines in Manchuria; that the tax-offices are to be under joint Russo-Chinese control; and that the railways will be handed over to the Chinese after 20 years subject to arrangements then made, all foreign Powers being excluded from such arrangements; that the post-offices and telegraphs are to be jointly managed, the power of punishment and reward being reserved to the Russian Representative; that in the event of trouble with a foreign Power in Manchuria, China and Russia are to assist one another, unless China objects, when the task will devolve on Russia alone, in which event Manchuria shall belong wholly to her in the sequel.

It is added that this document is said to bear the signatures of Prince Ching, Wang Wen-shang and Ku Hung-ki, but Chang Chih-tung has denied its existence. It has at least the merit of being fantastic. For

our own part we regard it as a clumsy canard. The *Fiji Shimpō's* correspondent refers to the story of the treaty as probably a Russian invention, designed to show the Chinese how futile Japan's objections are. That is rather far-fetched.

Wednesday, August 19.

The questions that had remained undecided in the matter of the revised commercial treaty between Japan and China are said to have been fully discussed and settled on the 14th instant in a nine-hours' conference between Mr. Uchida and Viceroy Chang Chih-tung. Nothing remains now except the ratification of the treaty. The abolition of *likin* is, of course, included, but the problem of customs' rate has been left for final settlement after the other Powers have concluded their treaties.

It is reported by the *Fiji Shimpō's* Shanghai correspondent that the master, chief engineer, purser "and others" of the steamer *Poyang* have all perished. Their deaths took place when the vessel was en route from Wufu to Kiukiang. Whether the cause was cholera or whether some poisonous meat had been eaten, there is as yet no information. The catastrophe recalls the awful experience last year at the Chefoo School.

The last rumour about a secret treaty has had but a short life. Sent across the wires on the 16th instant, the news was followed on the 17th by an emphatic denial. The *Asahi Shimbun's* correspondent, in announcing the baselessness of the rumour, says that there are symptoms of yielding on Russia's part.

Friday, Aug. 21.

It is stated by the Peking correspondent of the *Fiji Shimpō* that Prince Ching sees much inexpediency in immediately acceding to the Anglo-Japanese proposal that Manchuria shall be opened to foreign trade. He thinks that were such a measure adopted now, it would only furnish to Russia a pretext for evading her promise of evacuation. That promise is to be completely carried out—supposing that Russia intends to show good faith—by the 8th of October, and the Prince thinks it advisable to defer the problem of opening Manchuria until the evacuation is effected. A written reply in the above sense is said to have been forwarded by the Prince to the Legations of Great Britain and Japan. If that be so, it will stand on record as one of the weakest replies ever formulated by a Sovereign State. China's object, we may assume, is to recover possession of Manchuria, yet her Foreign Minister publicly informs Russia that so long as the latter's military occupation continues, the Peking Government will refrain from taking the only steps which would militate against the practical reality of that occupation. The whole business, so far as China's share in it is concerned, must be called supremely farcical. Yet the procedure of Peking is not illogical. The Chinese statesmen are well aware that the sequel of the Manchurian problem is entirely beyond their control. They have no more competence to arrest the march of Russian aggression than a cat has to stay the rush of a tiger. Therefore they are determined to refrain from everything like a defiance of Russia, and to rely entirely on her good will. Probably if they sincerely believed that either England or Japan was prepared to pull the Manchurian chestnut out of the fire for them, their attitude might be different. But seeing no such hope, they

have deliberately chosen the path of deferential consideration, and they are determined to adhere to it.

Telegrams from Peking to Japanese journals say that the news of Admiral Alexieff's appointment to be Governor-General of Russia's Far-Eastern territories is interpreted in Peking to mean the governor-generalship of Manchuria, and that corresponding consternation has been created in the Chinese capital. But of course the Peking statesmen must be aware by this time that the appointment refers only to Kwantung (Liaotung), the Amur district and the territories immediately bordering Russia's railways in Manchuria. There are still doubts about the scope of the new Governor-General's functions, some people being inclined to think that even in matters of foreign policy he will be competent to go above the heads of the Russian Representatives in Peking and Seoul. That is not likely, considering all the circumstances of the case, though it must be confessed that there is an interesting historical parallel between the story of Alexieff and that of his great predecessor Muravioff. Siberia was Muravioff's contribution to the Russian empire, and it is on record that when, in the face of huge difficulties he was working out his splendid plan of annexing the Amur region and defending it, not from Cronstadt, but from Transbaikalia, he met with such pragmatical and vexatious opposition at the hands of the Asiatic Department that the Tsar finally decided to leave to Muravioff in direct consultation with the Foreign Office the settlement of all questions relating to the frontier in the Far East. Similar authority may now have been given to Alexieff, but we doubt it, for the whole problem of Manchuria awaits solution at the hands of a tribunal very different from that by which Far-Eastern questions were considered in 1854, and besides if it was thought essential to officially inform the Chinese fifty years ago of the special powers delegated to Muravioff, the same necessity would surely be recognised to-day in the case of Alexieff. There is, however, another historical parallel of a more picturesque character. It is that the delegation of these special powers to Muravioff immediately preceded the European complications which culminated in the Crimean war, which complications, instead of impeding actually promoted the consummation of Muravioff's big designs. Apparently European complications are now again on the near horizon, just as Alexieff has been appointed Governor-General.

A telegram to the *Kokumin Shimbun* says that in view of the proximity of the date (September 25th) when the two years' veto on importation of arms and munitions of war into China expires, a conference of Foreign Representatives assembled in Peking, on which occasion the Russian Minister urged that the period of the veto should be extended. The other Ministers, however, took a different view. It is easy to understand, of course, that Russia should endeavour to perpetuate the impression of a disturbed state of affairs in China, especially since the prevalence of such an impression would lead to an enforced continuation of China's military impotence. At the same time Russian diplomats probably find this policy not at all palatable. It is hard for them to reconcile such displays of distrust with any theory of neighbourly friendship, and neighbourly friendship has always been

kept in the ostensible forefront of their dealings with China.

It may be recalled here that this veto originally covered a period of three years and extended to all materials employed in the manufacture of arms and munitions of war. Owing, however, to Japan's intervention not only was the period reduced to two years, but also the nature of the veto was changed to materials used exclusively for the manufacture of munitions of war.

The *Fiji Shimpō*, commenting on the lapse of the veto, observes justly that its renewal could not have been varanted except by some fresh outbreak of disturbance in China. Our contemporary points also to the fact that Russia has never paid the least respect to the veto. She has freely imported arms into Chinese territory—Manchuria—for the purpose of equipping Manchurian free-booters who are Chinese subjects. Yet Russia is the Power which now presses for a renewal of this veto.

We doubt whether this last contention can be supported without reserve. Would it not apply also to the arms and munitions formerly imported by England at Wei-hai-wei for the use of her Chinese regiment?

SIR ERNEST SATOW.

During his temporary sojourn in Shanghai en route for Peking Sir Ernest Satow has had some interesting conversation with the Chairman of the China Association. The correspondent of the *Fiji Shimpō* wires the details, and we assume that he is approximately correct. Sir Ernest is represented as saying that England's policy will hereafter be devoted more resolutely than ever to the preservation of her tradal rights in Manchuria, and that she will not sanction any arrangements which impair those rights. As to the railway question, he expressed the opinion that, according to present appearances, railways in China are now employed as an instrument for the empire's partition. Referring to the *Supao* affair, the Minister entirely approved of the action hitherto taken by Shanghai. He further alleged that it is a mistake to speak of the foreign settlement at Shanghai as cosmopolitan (*rekoku kyodo kyorin-chi* are the words of the correspondent). On the north side of the creek the whole area is an Anglo-American settlement.

We anticipate that this last statement will cause some controversy. Yet it is historically unquestionable. There never were, and there are not now, more than three foreign settlements in Shanghai, namely, the British acquired in 1845, the French acquired in 1849, and the American acquired in 1862. It was in 1854 that the first Consular code of regulations applicable to the settlements was drawn up. The Consuls of England, France and the United States did the drafting, although 11 years were still to elapse before the American settlement came into existence. These regulations were to be operative in the British and French Settlements, which thus became an international area. When the American Settlement was added, the French decided to withdraw. They segregated their own area and promulgated special municipal regulations for its administration. The British and Americans, on the contrary, admitted to their amalgamated settlements all nationals that chose to settle there and to submit to the municipal system. In that way the amalgamated settlements gradually lost their exclusive character and acquired a cosmopolitan appearance from a practical

point of view. But the historical truth is that the whole settlement, apart from the French section, is Anglo-American, and Great Britain showed her appreciation of the fact in 1894-5 when she alone took upon herself the duty of guaranteeing the place against being involved in the China-Japan War. Considered by the light of these facts the despatch of troops to Shanghai in 1900 by Powers other than Great Britain, America and France might have been denounced as anomalous. But it must be confessed that Shanghai has virtually lived down its early history.

Sir Ernest left Shanghai on the 14th instant and was to proceed to Peking *via* Wei-hai-wei.

A letter from Mr. Sawara, the *Fiji Shimpō*'s Shanghai correspondent, confirms the news previously sent by him over the wires with reference to a meeting between Sir Ernest Satow and representatives of the China Association headed by Sir Charles Dudgeon. Mr. Sawara says that the interview was private, but that he managed to obtain a report.

Asked what policy England intended to pursue in the Manchurian question, Sir Ernest said that England intended to carry through her convictions with regard to the preservation of the rights and privileges already acquired by her in that region: that she would press for the opening of Manchuria to foreign trade, and that America and Japan would coöperate with her.

Sir Charles Dudgeon observed that in all their commercial and industrial enterprises British subjects worked entirely by means of their own resources and did not depend upon Government assistance. Thus the sum allowed by way of secret-service fund to the British Legation and Consulates in China did not exceed £65,000 whereas Russia had expended no less than 200,000 roubles to obtain a concession for one railway. He trusted that these facts would receive due attention, and that the British Government would adopt a more helpful course.

To this Sir Ernest replied simply that he sympathised with Sir Charles Dudgeon's remarks.

Sir Charles then observed that from the year 1891 to 1900, the imports of merchandise into China had exceeded the exports by 50 million taels on the annual average. In 1901 and 1902, the excess had reached 100 millions. In considering this latter figure they had to remember that it included overland trade and goods carried in Chinese bottoms. Still the discrepancy was such as to cause uneasiness and some remedial measure seemed necessary.

Sir Ernest replied that the best plan seemed to be the promotion of mining enterprises and the improvement of communication facilities.

In answer to another question, which is not given, the Minister expressed great satisfaction that the new commercial treaty had been ratified. As to the 8th Article, however, namely that relating to the abolition of *likin*, its operation would probably be deferred. The stipulation as to a uniform system of coinage would, on the other hand, be vigorously pressed.

Concerning the railway problem, he said that the lines built by Russia with Belgian and French capital, and the lines built by Germany, are of a military and political nature rather than of a commercial. British projectors had obtained a concession for the Chinting-Taiyuen road, but they had lost it through the machinations of the Russo-

Chinese Bank. Further Belgian projectors, acting in Russian interests, were seeking concessions in Honan. Thus British subjects were encountering opposition in their endeavours to build lines in Honan, Shensi and from Hankow to Chintung. In April, 1891, England had concluded with Russia a treaty by which the latter pledged herself not to interfere in any way with British railway enterprise in the regions westward of the Great Wall. Yet they were confronted with this interference, which amounted to distinct opposition. In point of fact, when this railway question was considered, it was found to be a lever for the partition of China.

His Excellency made some other remarks but their purport is of smaller interest and they are not very clearly set forth.

CHANG CHIH-TUNG'S VIEWS.

Saturday, August 15.

Ex-Viceroy Chang has been interviewed by the *Asahi's* correspondent. His Excellency takes the view that China is not strong enough to give effect to her protests against Russia's continued occupation of Manchuria, and that if some third Power intervenes to bring about evacuation, Russia will turn her hand towards Ili. It will be only a transfer of sinister activity from one place to another.

The old Viceroy is not represented as having followed out that train of reasoning. He does not say what he must have said had he pursued the matter to its logical sequel, namely, that since all China's outlying territories are doomed to be eaten up, it really doesn't matter much where the process of consumption takes place. History has been inexorably consistent in this matter. It began to be written in 1873 when Marquis Saigo led a Japanese force to Formosa to exact reparation for outrages against the Riuki islands. From that day Riuki, the first of the buffer states, practically ceased to be a Chinese dependency. Then followed the Kuldja affair in 1878. Russia, on that occasion, set out along pretty much the same route that she has followed with regard to Manchuria. She showed at first the utmost readiness to consider Chinese rights, and declared herself willing to surrender all the territory she had occupied so soon as China took steps to garrison it effectually. But when the moment came to sign the Livadia Treaty, St. Petersburg held the Tekes Valley while giving up Kuldja, thus retaining the passes through the mountains of Heaven to Kashgar. It is true that Russia subsequently conceded to Marquis Tseng's diplomacy nearly everything that she had refused to Chung How's, but this incident nevertheless belongs to the historical series of shocks that have loosened China's hold on her dependencies. The loss of Annam, Tonquin and the war of reprisals in 1885 stripped her of everything beyond the southern borders of Kwantung, Kwangsi and Yunnan. Burmah was torn off with similar ruthlessness, though not without the application of a slight anæsthetic in the shape of the O'Connor tribute. Korea, Formosa and the Pescadores all fell away simultaneously. Manchuria is now virtually gone, and Viceroy Chang seems to think that the best way to prevent Russia's hunger from entering at once upon another acute phase is to let her digest Manchuria at her leisure. But it is only deferring the evil. Ili, Kashgar, Mongolia—all will go as Burmah, Annam, Tonquin, Formosa, Riuki, Korea and Manchuria have gone, and China

will inevitably stand naked before the storm of foreign aggression, raging from the four quarters simultaneously. There is something plaintive and pitiful in Chang Chih-tung's caution: better that the stomach of the great territory-swallower should remain sated for a moment than that hunger should at once drive him to seek a new mouthful. China is like the traveller pursued by wolves. She throws her children one by one to the pursuing pack.

Wednesday, August 19.

A letter to the *Jiji Shimpō* from Peking represents Viceroy Chang Chih-tung as profoundly dissatisfied. Before visiting the capital he had been led to expect that he should find conditions favourable to life-long hope of reform. But everything has gone to prove the fallacy of any such hope. The representations that he ventured to make to the Empress Dowager, believing that he addressed himself to a sympathetic ear, had only the effect of angering Her Majesty. The high officials of the Government, for whose cooperation he looked, uniformly showed him the cold shoulder. Prince Ching, who, admittedly a weak man, was expected to welcome Chang's assistance, refrained from all recourse to him. The important position that he was led to anticipate for himself in the capital, did not take any real form. His counsels as to abolishing the old system of examination and selecting for official posts the graduates of modern schools, were resolutely opposed by the Council of State. Finally he found himself reduced to discharging the functions of a mere examiner, and even in that position he has just received a signal rebuff, for 27 youths passed by him as duly qualified, were rejected *en bloc* by the Council of State, not on the ground of want of scholastic proficiency nor yet because there was any fault to find with the method of their examination, but solely because, having been educated in foreign learning they were likely to entertain revolutionary ideas. It is alleged that the old Viceroy, utterly weary and disappointed, has now only one wish, namely, to return to his post in the Yangtse Valley and continue the task of creating at least a provincial centre of reform.

CHINESE STUDENTS IN JAPAN.

It is stated that a long conference has occurred in Peking between Viceroy Chang Chih-tung and Mr. Uchida on the subject of Chinese students in Japan. One can not be at all surprised that this matter gives much concern to the Chinese Government. During several years past there has been something very like a revolutionary party among the Chinese residents in Yokohama. At one time much literature of an inflammatory character emanated from the head-quarters of this association, and although there has been of late an apparent cessation, or at any rate a diminution, of that kind of crusade, the Chinese Government can not have forgotten it. Japan also offers asylum to all Chinese reformers that find their own country too hot for them, and there are certainly a not inconsiderable number of such persons enjoying her hospitality. Students coming here brought into contact with disturbing conditions, and Shanghai lately gave evidence that it is prepared to receive impulses from Tokyo or Yokohama. In view of all these circumstances we can not but consider it a marked evidence of liberality on the part of the Chinese Authorities that they should

allow hundreds of youths to come to this country for education. Germany, the United States, France, England—almost any Occidental country might seem to them a more suitable academy. But whatever dangers are incidental to a scholastic career in Japan may be largely, if not altogether, obviated by efficient superintendence, and that is the conclusion to which Viceroy Chang and Mrs. Uchida seem to have arrived.

THE EXCHANGE QUESTION.

The *Official Gazette* of the 15th instant contains an announcement restoring the Exchange Regulations to their old form. That is to say, the kind of transaction called *nobutori-hiki* (deferred) will henceforth be allowed for a period of 150 days. The purpose of the much criticised change made last year was to put an end to bargains which have to be implemented within a certain limit of time, and to substitute bargains implementable at a fixed date: in other words, the idea of the Authorities was to put an end to time margins which are believed to encourage gambling. But whether the effort was wise or unwise, its failure is now practically acknowledged, and things revert to their old condition. One result is that the Government will now collect taxes on deferred transactions according to the regular rates.

The Government's action in restoring the Exchange Regulations to their old form, is severely criticised by the press of Tokyo. One journal charges officialdom with using the people's enterprises as a *corpus vile* for legislative experiments, and another says that in the presence of such capricious enactments there can be no security for business men. We do not observe, however, that even the newspapers which condemned last year's revision of the regulations, are sufficiently consistent to admit that reversion to the old form is in any sense meritorious. All seem to fix their eyes on one point only, namely, the somewhat sorry figure cut by the Department of Agriculture and Commerce, when it has to cancel its enactments after a few months' trial. Would it not be more ingenuous to consider seriously whether the Department's original motives were truly reformatory, and, if so, to further consider why its reform has proved impossible?

THE AVALANCHE AT PIZ BLAS.

A Zurich correspondent sends us the following account of the catastrophe that took place on Piz Blas during the last week in June:—Sixteen youths between the ages of 17 and 18, belonging to the Cantonal Gymnase started off on a four-day tour in the Alps, accompanied by two of their Professors. Professor Grobli, a man of 50 years of age, was well known as a careful and experienced climber, and both he and Professor Bodoz were members of the Alpine Club. On the second day of their excursion they had reached Piz Blas, after a march of eight hours through fresh snow, and on a clear grassy spot they stopped to debate about their next movements. Six of the students stood off a little apart from the others, who, with the two Professors had seated themselves a little higher up. When the avalanche began to move, the six youths just saw it in time to spring aside, while at the same moment the other party was swept over the sloping ground, down over a steep cliff, and again on over another slope, a distance of about

100 metres. There was no one who was not hurt at all, but those who were only bruised at once hastened to the assistance of the others. One Professor and two students were past help. The other Professor and one other student were seriously wounded, and several of the others unable to help themselves. One student, slightly hurt, was particularly helpful, and when he was free to go, he started off, with the aid of a map, to seek assistance. In 3¼ hours a detachment of 16 men arrived to carry the wounded down to Piora, but as the population is scanty in those regions, the dead bodies could not be brought down till the next day. Later on the seriously wounded Professor Bodoz and one student, were brought on to the Canton Hospital in Zürich. This student has since died, but the Professor is improving. All the others were brought down in small detachments and were nearly all able to appear at the funeral. It was touching to see them, with their slings, and bandages, and scarred and peeling faces walking by the side of the three hearses. The third student died on the day of the funeral, and might have been buried at the same time, but he was a Jew and of course could not share a Christian funeral. It was a very sad affair. No one was to blame. It just happened. One student was the son of a shoemaker—one of nine children—and as he was particularly gifted, the parents had made great sacrifices to give him a College education.

In an account of the catastrophe in an English newspaper, it was stated that "the party was bound together by a rope, and when one fell over the cliff the others all followed!"

EXHIBITION OF AMATEUR PHOTOGRAPHY

An exhibition of Amateur Photography was held in Taihoku, Formosa, for four days commencing July 18th. It was given under the auspices of the Formosa Society of Photography and Science, of which the American Consul is President. The exhibition was open to societies throughout the Far East, and Shanghai, Foochow, Tokyo, and Manila societies, in addition to individual workers in Yokohama, Amoy, etc., who sent exhibits. The work of the Judges was completed on the 2nd instant, and the awards were as follows:—First prize, Mr. A. L. Manley of Yokohama for landscape on black carbon; second prize, Mr. Wilbur T. Gracey of Foochow for portrait on platinum; third prize Mr. R. Hoki of Taihoku for night scene on velox. Messrs. G. W. Pearson and G. Siemssen of Foochow, Rev. C. E. Darwent, Messrs. M. Chaumont, D. Kennie and R. C. Howlett of Shanghai, all obtained honorary mention. Over 600 prints were hung.

A second series of prizes were given for work done exclusively by members of the Formosa Society, and the result was as follows:—

First prize, Mr. Y. Yokoo for landscape on cloth. Second Prize, Mr. James W. Davidson for sunset scene on velox. Third Prize, Mr. M. Isoda for river scene on velox.

The prizes are splendid examples of Japanese inlaid work in gold, silver and enamel. They were provided from a fund generously presented to the Society by His Excellency, Baron Kodama, the Governor General of Formosa. The Judges were Mr. H. Nagao, Chief of Formosan Public Works, Dr. Okada, a well known

Japanese authority on Photography, and Rev. Mr. Fraser, an enthusiastic amateur in Formosa. The Formosan Society has been in existence four years, and its members are almost exclusively Japanese. The exhibitions which will be held yearly will doubtless do much in stimulating amateurs throughout the East to take up artistic photography.

NOTES ON CURRENT EVENTS.

A very important commission is sitting in London, under the presidency of Sir David Barbour, to discover some means of effectually dealing with the ever-growing traffic of the London streets. To give an idea of the immensity of the problem we refer our readers to the evidence of Mr. Harper of the Statistical Department of the London County Council. He produced a table showing that the total number of registered daily passengers by railway, tram, and bus, to the central area of London alone, up to 10.30 a.m., was 514,155. From the West the number of passengers was 77,898; from the North 113,109; from the East 127,479, making a total of 318,486 from the district North of the river. From the south-eastern districts there were 113,332 passengers, and from the south-western district 823,337. The vast majority of these people desired to travel further than they were conveyed by the railway, and he suggested that the extension underground of railways and tramways through the central area would relieve both pedestrian and vehicular traffic in the streets. Mr. Harper also submitted figures showing that from the five districts mentioned 87 workmen's trains, 300 cheap trains, and 365 ordinary trains were run daily to the central area before 10.30 a.m. Dealing with the increase of population in the ten years between 1891 and 1901, Mr. Harper said the increase amounted to 45 per cent. in the western district, 43.9 per cent. in the northern district, 62.4 in the eastern district, 30.3 in the south-eastern district, and 29.1 in the south-western district.

A commercial journal in England, alluding to the rapid strides which Japanese trade is making in China, says it "is due to the very careful way in which, with the assistance of their Government, they study the Chinese market, and supply exactly the kind of luxuries the people want at a price to suit every pocket." After this it is amusing to read that "although Japan is not generally known as a wine-producing country, Japanese champagne is greatly in demand among local mandarins, who can become quite agreeably exhilarated at the low price of 1s. per bottle." Japanese champagne! Verily it is a case of what's in a name.

Great expectations are formed of the rice crop. There was abundance of water at the time of planting out the seedlings and since the hot season set in the temperature has been ideal. All parts of the country send most hopeful telegrams to the Department of Agriculture and Commerce, and the estimate is that if no untoward calamities occur this year's yield will more than compensate for last year's deficiency. But it is too early to be sanguine. From the last part of August until the middle of September is the dangerous time.

In an article which severely criticises Japan for losing her opportunities, a local contemporary, speaking of the rescue of Peking and the accurate information possessed by the Japanese, says:—

So, with all this knowledge, so remarkably accurate while the others were so deplorably "at sea," the Japanese should have captured the fugitive Emperor and Empress, who actually did not leave the city until the 16th. Hesitation, indecision, diffidence, weakness in initiative, call it what one may, something caused the Japanese to waste time while the prize slipped through their fingers. They were busy selecting the best quarters they could get in the city, they were issuing regulations, they were consulting ponderously and writing despatches, while the Chinese Court was still hiding in terror within the palace, afraid even to run out by the back door. There are, no doubt, very satisfactory and sufficient reasons why the Japanese let the chance go by, but when all is said and done, it was an opportunity lost. A Napoleon, a Nelson, a Kitchener, any strong man of a strong race, would have calmly laid aside all other considerations and seized the Chinese Court, and taken them under his benevolent protection; would have made them continue the administration of the Empire, under his guardianship.

Yes, it might have been very convenient had the Japanese captured the Emperor and the Empress-Dowager—convenient mostly for nations other than the Japanese. But since the writer of the above paragraph evidently believes in the historical accuracy of his facts, we venture to ask whether he ever heard that the Japanese proposed to arrest Their Majesties and could easily have done it, but that they were prevented by the allies; especially by one of them. There was such a thing as an alliance on the occasion in question, and of all the nations that were parties to it, Japan could least afford to break away.

It is officially announced that Okayama has been brought within the telephonic circuit, and the following charges are tabulated:—

Telephone Charge.		Summ. us.
	Sen.	Sen.
From Okayama to Akashi.....	35	30
" Maiko.....	35	"
" Kobe.....	40	"
" Osaka.....	50	"
" Sakai.....	50	"
" Kyoto.....	60	"
" Nagoya.....	100	25

The service became effective from the 15th instant.

On the 13th instant His Excellency M. Lera left Tokyo on a short trip to Europe. He will perform the journey westward and eastward by the Trans-Asian railway. A number of persons assembled at Shimbashi to bid His Excellency farewell, among them being Their Excellencies Baron d'Anethan and Count Arco Valley.

German firms have come out first in the competition for 30 locomotives required by the Japan Railway Company—six-wheel tank engines. The figures are:—

Messrs. Illies & Co.	6 Engines.....	£11,970
do do	do	do
Messrs. Raspe & Co.	do	£11,934
do do	do	£11,924
do do	do	£12,641

Baron Iwasaki (Hisaya) left Yokohama on the 14th instant by the steamer *Empress of China* for a trip to Europe and America. He is expected to return by about the 20th of November.

The anti-amalgamation section of the Tokyo Street Railway Company, under the leadership of Mr. Amenomiya, are losing face by their method of conducting the law suit instituted by them. The question at issue is simply one of an injunction to prevent the pro-amalgamation shareholders from giving effect to a resolution adopted by them in the absence of the other side. But the course of the procedure in the law court makes it evident that Mr. Amenomiya and his friends are determined to employ every conceivable device for deferring decision, and that their great aim is to delay a judicial decision so long that their oppo-

nents must either come to terms or see themselves threatened with the loss of their character. That is not straightforward fighting and it is naturally bringing discredit upon those that employ such weapons. Meanwhile the directors of the Company have voted to deprive Mr. Amenomiya of his position as President, though they have not gone to the length of appointing any one in his place.

The Bank of Japan held its usual semi-annual meeting on the 15th instant, when the following accounts were read and passed.

	Yen.
Net profit.....	2,023,627
Brought over from last account	464,030
Total.....	2,484,657
To Dividend (6 per cent. per annum).....	900,000
To Reserves	200,000
To Rewards to officers	112,000
Extra Dividend (6 per cent. per annum)....	900,000
Carried to next account.....	372,657

We presume that the President made an address as usual, but it has not been published as yet.

The many friends in Japan of Dr. P. Koch, former Director of the German Naval Hospital in Yokohama, will hear with great pleasure that H. M. King Victor Emanuel has just made him a Commander in the Order of the Crown of Italy. This high distinction has evidently been conferred upon the worthy doctor in recognition of the care and attention which he bestowed upon a large number of Italian sailors who during the past few years were sent to the German Hospital and all of whom returned home safe and sound.

A correspondent writes from Miyagi as follows:—

I am glad you are calling the attention of the Railway Authorities to the very unsatisfactory conditions to which passengers have to submit now-a-days in travelling in this country for they are not limited to the Tokaido by any means, but are very general. A few days ago when coming up here from Ueno by the Mito route along the sea, I was made aware of the utter lack of care in the laying of the road-bed, for the rocking and jolting to which we were subjected was often so extreme that I was really alarmed a number of times, fearing that the wheels might at any moment leave the track. I come up here every summer, and remember coming over the same line shortly after it was first completed several years ago, when I remarked on the shocking character of the work of laying the road-bed. It has not improved. A level road-bed is a thing almost unknown in this country, and it seems to be due to the lack of ordinary care, or ignorance of the first principles of laying a track when the work is first done, or else to the habit of leaving the road to itself after it is once laid. I meet with uniform courtesy and kindness from railway officials in Japan, but that cannot compensate for a rough journey. This is surely remediable.

We learn from the *Nichi Nichi Shimbun* that Mr. J. T. Hamilton, of the Equitable Life Assurance Society, and Mr. B. H. Betts, of the Mutual Life Insurance Company, made a visit to the Agricultural and Commercial Department on Aug. 17th with reference to the order requiring the deposit of *yen* 100,000. They were met, it appears, by Mr. Wada, Chief of the Commerce and Industry Bureau, to whom they submitted their views on the subject. After discussion an understanding, according to the Japanese newspaper, could not be arrived at between the parties, and at the conclusion of the interview Mr. Hamilton made a statement (which we have since verified) to the effect that the order was carried into force he was afraid that his Society would be compelled to retire from Japan—though of course the final decision would rest with his directors in New York.

We do not think that there is any

truth in the statement that the Japanese Government has purchased the two Chilean warships—rumour says four, but that is only the usual ratio of exaggeration—now offering for sale in England. The vessels are very excellent craft, but they are of a special type and their addition to the Japanese Navy would impair the latter's homogeneity. Were there any apprehension of immediate war, these line-of-battle ships might be snatched up quickly enough, but since happily that is not the case, and since the Japanese Government has no fund immediately available for the purchase of two ironclads, we class this story as a canard.

General Joseph W. Congdon, President of the American Silk Association, who recently paid a flying visit to Japan, was interviewed on his return to America by one of the San Francisco papers. We give the interview as printed, but would premise that due allowance must be made for the journalist's interpolations:—

"I found the Japanese exportation of manufactured silk to this country was not as great as formerly," said he. "The tendency of the Japanese is to hold up prices. The handkerchief trade, formerly very large in this country, has fallen off as a result of greater trade in cotton handkerchiefs here."

"Exportation from Japan of *habutais* or piece silks, is also greatly reduced on account of frauds, discovered in the New York custom house, caused by the action of importers. We take in America fully one-half of the entire crop of Japan. It will this year be fully 15 per cent. more than the average, but the market will not be brisk on account of the high prices asked by the Japanese, who are taking advantage of the fact that the Italian crop is 30 per cent. less than normal."

"The Emperor of Japan, to whom I was presented, said he looked forward to closer commercial relations with America, particularly with regard to the silk industry, for he regarded the United States as really Japan's best friend among the nations. Personally, he said, he had only kindest feelings for Americans."

"Throughout Japan I noticed preparations seemed to be well in hand for the coming conflict with Russia, and it will be a surprise to me if there is not war, in view of the feeling existing in Japan. The country seems to be ready for any emergency."

During the fiscal year just ended, 921,315 aliens arrived in the United States, an increase of 190,517 over last year, and the largest number which has arrived in any year. The total number from Europe was 814,507, of which 206,011 came from Austria-Hungary, 230,622 from Italy, 135,093 from Russia and Finland, 46,028 from Sweden, 40,086 from Germany, 35,310 from Ireland, 26,219 from England, and 24,461 from Norway. Japan sent 19,968, the West Indies 8,170, and Asiatic Turkey, 7,118.

The Criminal Courts continue to be busy with the text-book trials. Judgments are delivered daily. It has been calculated that, up to the present time, the sums which the defendants have been ordered to restore, including, of course, the cases that have been appealed, aggregate 70,000 *yen*.

A new duty of the scientific housewife, according to Mary Moulton Smith, is to see that the members of her family receive the various elements of food in their proper proportions. "Before the breakfast has been prepared," she says, "or after it has been served and eaten, the housewife should add up the different amounts of proteid, fat, and carbohydrate found in the foods. In the evening you can find out whether you have taken too much of one kind of food or not enough of another." A writer in the *Tribune* comments on this in verse in the following fashion:

Mother's slow at figures, but she always has to count
The proteids to see that we secure the right amount,
She keeps a pad of paper and a pencil near the sink,

And estimates our victuals—all the things we eat or drink.

She lists our carbohydrates and she scribbles down the fat,

And our specific gravity—she always watches that.

Mother's slow at figures, but she wants to do her best.

She's listening to the lectures until she is possessed

Of scientific demons and a regulating-card—

And while she chews her pencil all the eggs are

boiling hard.

She gets bewildered with it, and she has to balance

up,

And the coffee is so sturdy that it almost cracks the

cup.

Mother's slow at figures—so our breakfast's always

late;

The proteids and the hydrates make the task for her

too great.

We never get a luncheon, for she figures on till noon,

And finds we've overdone it, and that almost makes

her swoon.

Mother's tabulating every pennyweight we eat—

Except the meals we smuggle from the restaurant

down the street.

LAWN TENNIS.

The final in the lawn tennis championship of the Y. C. and A. C., for the handsome Jackson Cup took place on Tuesday afternoon under almost perfect conditions. The contest naturally attracted a large concourse of spectators, who followed the games with interest. Van Cleve took the lead at first but fell off and P. A. Cox had matters rather his own way till the final set, when Van Cleve pulled himself together and made a stiff fight for it. Cox eventually won, the score reading:—8-6, 6-1, 6-3.

Dr. Wheeler, President of the Y. C. and A. C., presented the trophy to the winner amid enthusiastic cheering.

The Singles in the K. R. & A. C. Tennis Tournament were played off at the Boathouse on Monday evening, says the *Kobe Herald*, G. T. Shaw, Jur (plus $\frac{1}{2}$ 15) beating C. J. Lucas, (plus 15) by 3 sets, (6-0, 6-2, 6-3) to love. Lucas played a very plucky game against a much stronger opponent, and several good rallies were made. The "Doubles" were played off about a week previously, H. S. Wheeler and G. T. Shaw, Jur (plus $\frac{1}{2}$ 15) beating W. O. Hall and J. G. Murray (plus 15), easily, by 3 sets (6-0, 6-1, 6-1) to love.

COUNTY CRICKET CHAMPIONSHIP.

The following table shows the position of the English counties down to 23rd July:—

	Played.	Won.	Lost.	Drawn.	Points.	Percentage.
Middlesex.....(12)	9	4	0	5	4	100.00
Sussex.....(2)	14	5	1	8	4	66.66
Essex.....(13)	13	5	2	6	3	42.85
Lancashire.....(5)	17	6	3	8	3	33.33
Yorkshire.....(1)	16	7	4	5	3	27.27
Worcestershire... (9)	13	5	3	5	2	25.00
Warwickshire... (6)	12	3	2	7	1	20.00
Somersetshire... (8)	11	4	4	3	0	—
Surrey.....(4)	17	5	6	6	1	9.00
Notts.....(3)	14	2	3	9	1	20.00
Derbyshire.....(10)	10	3	6	2	2	33.33
Kent.....(7)	10	2	4	4	2	33.33
Hampshire.....(15)	8	1	4	3	3	60.00
Leicestershire... (11)	13	1	6	6	5	71.42
Gloucestershire... (14)	10	0	5	5	5	100.00

Figures in brackets represent position last year.
The latest telegrams in Indian papers are as follow:

July 21.—Kent has beaten Hampshire by an innings and 76 runs.

July 22.—Surrey has beaten Somersetshire by 246 runs.

Yorkshire has beaten Notts by 164 runs.

Essex has beaten Derbyshire by 232 runs.

Worcestershire has beaten Leicestershire by an

innings and 10 runs.

The matches between Gloucestershire and Warwickshire and Lancashire and Middlesex were drawn.

THE INSURANCE QUESTION.

IN view of the interest attaching to the question of deposits by foreign insurance companies doing business in Japan, we have collected, and now publish below, some extracts from the statutes relating to insurance in the United States and Canada:—

Alabama.—A life insurance company (domestic) must satisfy the Insurance Commissioner that it has on deposit with the treasurer of this, or the proper officer of some other, State \$100,000 in State or United States bonds or real estate mortgages; certificate of deposit is to be filed, stating the name and amount of each of the securities; that the depository is satisfied that they are worth \$100,000, and that they are for the protection of United States policy-holders. * * * An insurance company must file with the Insurance Commissioner a sealed written instrument constituting him its lawful attorney to accept service in any legal proceeding.

Foreign Companies must, in addition to compliance with the above requirements, make a deposit of not less than \$200,000 with the Treasurer of Alabama or with the financial officer of some other State, for the security of United States policy-holders.

Canada.—Every fire and inland marine insurance company shall deposit with the Minister the sum of \$100,000 for the benefit of the policy-holders in Canada. Such deposits may be made by companies of the United States in the United States securities at their value not exceeding par, or any other securities approved by the Treasury Board at such valuation as the Board may direct. If from the annual statement, or by the examination of the conditions of any company, it appears that its re-insurance fund and liabilities in Canada exceed its deposits or assets in Canada, then the company shall be called upon at once to make good the deficiency, and upon failure so to do its license shall be cancelled. Life insurance companies are required to deposit fifty thousand dollars with the Minister upon admission to do business, and to make additional deposits from time to time sufficient to equal the re-insurance reserve upon policies in force in Canada, or to place such sum in the hands of trustees in Canada for the benefit of policy-holders resident therein, under a trust deed to be approved by the Minister. Reserve computed by institute of actuaries' table with interest at 4½ per cent.

Connecticut.—Every foreign insurance company doing business in this State must possess a cash capital of not less than \$200,000, and must deposit with the Treasurer of this State or the local public officer of some other State of the United States, not less than \$200,000 in securities authorized by law for investments by savings banks, to be held in trust for the benefit and security of the policy-holders of such company in the United States.

Iowa.—Every company organized under another government, transacting business in this State, shall have a capital of at least \$100,000 invested in stocks and securities, as required. Such stocks and securities, to the amount of \$200,000, shall be deposited with the Superintendent of Insurance, Auditor or chief financial officer of the State in which such company is located.

Kansas.—Foreign life companies must deposit with the Treasurer of this State \$200,000 in bonds or securities for the benefit of the policy-holders of any such company, citizens or residents of the United States, or furnish the superintendent with a certificate from the proper official of some other State showing that a deposit of like character and amount has been made with him.

Kentucky.—The same as Kansas.

Massachusetts.—Every foreign life company must deposit or keep in the hands of trustees in exclusive trust for policy-holders in the United States the net value of all its policies in the United States, and not less than \$200,000.

Minnesota.—Every foreign company must deposit with the proper official of some one of the States for the security of all its policy-holders in the United States, securities to an amount equal to the capital required of like companies under the laws of this State.

Mississippi.—No agent of a foreign company shall transact any business without first having filed in the office of the Auditor a statement under oath * * * furnishing evidence to the Auditor that the company has invested in the stocks of some one or more States of this union, or of the United States, of at least par value, the amount of \$150,000, held by citizens of the United States.

Missouri.—Every foreign life insurance company must either deposit in this State or in some one of the other States of the United States for the benefit of the policy-holders of such company, citizens or residents of the United States, \$100,000 in safe stocks or securities.

New York.—Every foreign fire and marine insurance company must have within the United States, deposited with insurance departments or held in trust, and invested in securities of the same general character as those which companies of this State are permitted to hold, not less than \$500,000, and not less than \$200,000 if a life or casualty insurance company. * * * Every such fire or marine company shall deposit with the Superintendent of this State, for the security of policy-holders residing in the United States, a sum of not less than \$200,000 in stocks of the United States or of the State of New York; or in bonds secured by mortgage on improved, unincumbered real estate in the State of New York, worth 50 per cent. more than the amount loaned thereon, or stocks or bonds of any country or incorporated city of that State authorized to be issued by the legislature, such stock or bonds not to be received by said Superintendent at a rate above their par value or above their current market value. * * * Every foreign insurance company doing a life, casualty or fidelity insurance business shall make a deposit with the Superintendent in securities to the value of \$100,000, and fire and marine insurance companies shall deposit securities to the amount of \$200,000.

Ohio.—Every foreign company must make a deposit with the Superintendent of \$200,000 in the stocks of the State of Ohio, or of the United States, for the benefit, in case of fire companies, of policy-holders in this State, and in case of life companies, of the policy-holders in the United States.

Tennessee.—Companies foreign to the United States shall make a deposit with the Treasurer of the State or with the financial officer of some other State of the United States, or with trustees who are citizens of the United States and approved by the Insurance Commissioner, to hold funds in trust for the benefit of policy-holders and creditors in the United States, a sum of not less than \$200,000 in securities approved by the Insurance Commissioner, which sum shall be deemed for all purposes of the insurance law, the capital of the company.

These extracts show clearly what special measures the law prescribes in the case of foreign insurance companies doing business in the United States or in Canada. We observe that, according to Japanese journals, the representatives of some of the foreign companies in Japan are disposed to cite the treaties in support of their claim that the agency of a foreign company should enjoy for the purposes of its operations in Japan exactly the same privileges and immunities as a purely Japanese company enjoys, and we observe also that one of our local contemporaries endeavours at this early stage to transport the question into the region of sentiment by a menace that if the Japanese Government persists in its present course, it will incur the same reproach of moral obliquity that already attaches to many Japanese merchants. There could be no greater mistake in our opinion, from the point of view of the interests of the insurance companies themselves than this attempt to unjustly convict the Japanese Government of a breach of conventional good faith. The result must inevitably be to bring the foreign companies into disfavour and to create on the side of the Japanese Authorities a mood of resentment not conducive to a mutually acceptable settlement of the question. The treaties do not provide, and were never intended to provide, that foreigners should enjoy in Japan business privileges which they would not enjoy under similar circumstances in a European or American State to which they were alien. Everywhere legislators have considered it necessary that the agencies of foreign companies whose assets are beyond the reach of native tribunals, shall be required to furnish, in the interest of policy-holders, security in a special form. It is obviously extravagant to contend that

the framers of the treaties had any idea of interfering with Japan's right to adopt precautions which their own legislators consider essential. A foreign company claiming privileges and exemptions equal to those enjoyed by a Japanese company must be in all respects on the same footing as a Japanese company, and the Government of the foreign company's State must be prepared to grant to Japanese companies within its own territory corresponding privileges and exemptions. The case for the foreign insurance agencies—a case admitting of excellent arguments on other grounds—is only injured by this unfair and unreasoning attempt to interpret the treaties in a unilateral sense, and to contend that they deprive Japan of legislative competence which Occidental countries deem it essential to exercise in the interests of their own nationals.

YOKOHAMA GENERAL HOSPITAL.

The adjourned general meeting of subscribers and others in connexion with the Yokohama General Hospital, took place on Monday. There was a fairly large attendance, including many ladies.

Mr. F. S. JAMES, Chairman of the Executive Committee, said the meeting had been called for the purpose of considering the report issued by the special committee and also for the election of an executive committee to carry on the work of the hospital. He had great pleasure in proposing that Mr. J. Dodds should take the chair.

Mr. E. FLINT KILBY seconded the proposal. Mr. DODDS thought it would be better that a member of the Committee should take the chair and so be able to answer any question that might be asked on subjects of which he knew only from the newspapers.

Mr. JAMES thought Mr. Dodds was the very man for the chair, being outside the committee, and members of the committee being present could answer questions.

Mr. JAMES put the proposal to the meeting, and there being no dissidents, Mr. Dodds took the chair.

The CHAIRMAN said from the large number attending the last meeting and the interest apparently evinced in a question that so vitally concerned the whole community it might have been expected that there would be a larger attendance on that occasion to decide the very important question before them—that was to say how the General Hospital was to be carried on. He presumed that the weather and probably the absence of some from Yokohama accounted for the small attendance. (A number of persons entered later.) He hoped the result of the present meeting would be satisfactory to all concerned. He then read the report of the Committee appointed at the last meeting.

The CHAIRMAN remarked that the report was only signed by three members but he understood the Executive Committee approved of it.

The Executive Committee were understood to assent to this.

Mr. JAMES WALTER strongly urged the necessity of a resident physician. There had been several schemes suggested but he thought the only solution was to have a representative committee to canvass the community and ascertain what funds would be coming from year to year. The community never had been canvassed and he suggested the first thing was to appoint a representative committee.

In reply to Mr. A. M. Knapp,

Mr. WALTER said he wished to suggest the appointment of a sub-committee apart from the Executive Committee.

Mr. F. FLINT KILBY said the question of a visiting as against a resident physician had had the full consideration of the committee and of the special committee. The hospital was a

small one: the average number of patients was under ten and they could not expect any physician of standing to give his whole time for that. If they appointed a resident physician they probably would not get the best available, but if they had visiting physicians they could doubtless make satisfactory arrangements. The experience of the past few weeks during which the hospital had been under the control of the visiting physicians had been quite satisfactory. Having eulogised Dr. Reidhaar for his services in that capacity, Mr. Kilby said he believed the medical profession would take an interest in the hospital, the hospital was centrally situated and even if they only appointed one doctor others would be willing to attend should he not be available. He thought the incoming committee should make up their minds to obtain subscriptions for at least three years, which was the minimum period for which they could engage nurses. The committee must apply to individuals, and he was sure if the matter was properly put before this community the necessary funds would be provided.

Mr. KNAPP moved that the report of the Special Committee be adopted and that all details of management including the appointment of a resident physician or that of a board of attending physicians be left to the judgment of the incoming committee.

Mr. S. KOMOR thought the question of a resident physician should be voted on at this meeting. As to the question of funds he could suggest to the committee how these could be collected. He did not see the name of a single employee on the list though there were seventy names of firms. Also he thought there should be only first and third classes. He proposed that there should be a resident doctor at the hospital.

Mr. L. E. DAVIS also spoke in favour of having a resident physician.

Mr. I. BUNTING wanted to know the cost of the respective classes of patients, the cost of medical attendance and of nursing. If that information could be got they would be able to decide about a resident physician.

Mr. KNAPP said he would be in favour of a resident physician if the funds were forthcoming from the community. He asserted that some of the most successful hospitals in America were conducted on the system of having a board of attending physicians.

Mr. JAMES said that the answer to Mr. Bunting's question as to the cost of patients would depend upon the number of patients in the hospital. There were no statistics to go by.

Mr. WALTER asked what was the deficit in running the hospital?

Mr. JAMES said it was impossible to answer the question. The hospital was not run by the community and if it were, it would be impossible to take three months of the year and say what the other nine months would be. They must take twelve months and make an average. When Dr. Meere left the hospital he took his books with him and unless they knew the number of patients they could not tell the cost.

Mr. JAMES WALTER understood that a resident physician could be got for yen 3,600 a year. What sum over that would be required to run the hospital in a satisfactory way?

Mr. JAMES said the committee would have to know how many patients were to be in the hospital for twelve months.

Mr. DAVIS asked supposing there were no patients what were the expenses.

Mr. JAMES should say about yen 600 a month, and if they were to appoint a resident physician that would add another yen 300.

Rev. W. FIELD doubted whether they could get a thoroughly capable man for yen 300 a month.

The CHAIRMAN here read Mr. Knapp's motion to the meeting.

Mr. F. J. LIAS seconded Mr. Knapp's motion, and pointed out that Mr. Komor's amendment was out of order, as it aimed to make an alteration in the report. The report was the work of the special committee and could not be altered. As to classifying patients, shipping companies had to make class distinctions between officers and seamen, and the hospital could not but

do the same. Another thing seemed to be forgotten by some of the speakers—many firms paid for their employees' medical attendance, etc.

Mr. WALTER agreed with Mr. Knapp, but added that the canvassing committee should be elected first, and go ahead canvassing, so as to relieve the general committee of extra work.

Mr. KESWICK thought canvassing out of the question until potential subscribers could be told what was to be done with the money. Nobody would buy a pig in a poke.

Mr. BUNTING agreed with Mr. Walter that it would be a good thing to let the canvassing committee feel the pulse of the community before going any further.

Mr. KNAPP pointed out that Mr. Komor's amendment, to instruct the committee to engage a resident doctor, would tie the hands of the committee, and might leave them in a hole. They could not engage a man until they had the money question settled.

After a little discussion Mr. KOMOR agreed to withdraw his motion and leave the matter as a suggestion for the committee to bear in mind.

The Rev. W. FIELD asked what would be the position of the Matron if Mr. Komor's idea was adopted. Who would be in authority?

This point was discussed for a few minutes without leading to anything, the Chairman saying the Committee could best consider all such details.

Mr. KNAPP's motion (to adopt the special committee's report and leave all details to the incoming general committee) was then put and carried *nem. con.*

The CHAIRMAN said the next business was to elect the committee. Few names had been sent in:—Messrs. H. W. Buckland, E. W. Frazar, E. Flint Kilby, A. M. Knapp, T. M. Laffin, L. Motter, and M. Schellenberg. Other names had been sent in but these were all who agreed to serve if elected.

Mr. JAMES said—The members of the present Executive Committee feel grateful for the appreciation expressed in the Special Report, and, although they are willing to give the incoming committee all information possible, they cannot (with the exception of Mr. Motter) come forward for re-election. The day before the last general meeting, a paragraph appeared in the daily papers giving a list of names for a new Committee, and stating that they would be voted for at the meeting. No notice of this had been given to the present members of Committee and none of their names appeared on the list. It transpired that the paragraph had been inserted by Mr. W. K. Wilson, at the request of the Ladies Advisory Committee. Now, Ladies and Gentlemen, we had every reason to believe that we were working in accord with the Ladies and their Advisory Committee, and naturally when this was sprung upon us, we considered it a very curious proceeding. If the Ladies or their Advisory Committee had any grievance, they might have consulted us, or stated it at the meeting in a straightforward manner, and not have tried to turn us out of office in the way they did. Our only reason for stating that we were willing to stand for re-election was, that we thought it would be a help to the incoming Committee to have some members who were in touch with the present state of Hospital affairs.

These remarks were received with loud applause.

Mrs. KNAPP—I should like to state that the ladies were not cognisant of these names having been sent in. It was a mistake.—(Applause.)

Mr. JAMES—I am very glad indeed to hear that; but I saw it in writing that these names were sent in "at the request of the Advisory Committee of the Ladies' Fund."

Mr. KILBY—That was in a letter to me, saying "Dear Kilby, I put the notice in the papers at the request of the Ladies, who held a meeting last Wednesday. The gentlemen mentioned had not all been asked if they would serve, but some of them had." Then the letter goes on to private matters, and afterwards mentions some names which the retiring committee were said to be proposing to submit, which names I have learnt are absolutely untrue.

Mr. N. F. SMITH, as a member of the Advisory

Committee (of whom he had consulted some but not all) said that the committee had never suggested nor would have permitted any such thing as putting forward a list like this, and whoever put the article in the papers acted entirely on his own initiative and without consulting the committee.

Mr. KNAPP understood it arose from a simple conversation at a meeting of the ladies which concerned other matters. They never went so far as to make any suggestions, and any publication was entirely unauthorised.

Mr. JAMES—Mr. Smith, I am quite delighted to hear what you have said.

Mr. SMITH—You are quite correct.

Mrs. SWAIN—May I be permitted to say a word, as representing not the Ladies Committee but a number of ladies who are working with them. The one desire of the ladies of Yokohama who have subscribed and have been interested in the hospital, has from the first been to work in harmony with the executive committee of the hospital, and in no sense to let any efforts of theirs hamper or hinder. They have had only one idea, to assist in a quiet way, without obstructing; and the majority of the ladies felt it was a very regrettable incident, and considered that the executive committee ought to have been asked to continue in the management; should it be necessary to add to their number I am sure the ladies would have been glad to see the matter openly canvassed. But that anyone should obstruct or pass reflections on the work of the general committee, who have done so much in the past, is to me quite inconceivable.

Mr. JAMES—Mrs. Swain, I am very much obliged for the kind way you have spoken, and I feel sure the ladies could not have had anything to do with that advertisement.

Mrs. SWAIN—Absolutely nothing!

Mr. KESWICK—I also wish to thank the ladies, on my own behalf, for what they have so kindly said. I must say I thought it was a most extraordinary thing, and I could not for one moment imagine the Ladies Committee doing such a thing, because I know from their work in connection with the hospital that they have done their very best to assist in every possible way. We on our part tried to do what we could, to get it on a proper basis, and the ladies have helped in every way in their power, and so when this notice was put in the papers I was very much surprised, and when I heard that it was said to have come from the Ladies Committee I was still more surprised; in fact, in ordinary parlance, I was rather sick about the matter, knowing how we had done our best. We thought this was not the proper way to be treated, and we said we would not serve again. You may think that was pique, but you can understand the reasons which actuated us. I can say for Mr. Colomb and myself, as Mr. James has said, we are obliged for the ladies' assurance that such a thing as putting that notice in the papers was not and would never have been done on their account at all. I have to thank the ladies' committee and all the people who subscribed to their fund, which has done a tremendous lot to keep the hospital up properly.—(Applause.)

Mrs. SWAIN—I wish to add that I spoke not for the Advisory Committee, as I am not a member of it, but I spoke from personal knowledge of the wish of the majority of the lady subscribers.

Mr. A. H. ATKINSON proposed that, as the majority of the community most fully appreciated the services of the old committee, they be asked and if necessary exhorted to continue their services.—(Applause.)

Mr. KESWICK—We thank you very much: we have considered the matter well, and tried to do our duty, and the special committee whose report you have heard to-day have been in close touch and had the whole of the running of the hospital explained to them, and so (I speak on behalf of the others though I am the junior) while we thank you for your kind words we should be glad if you will leave the work to those who are coming in, and they will have your full confidence.

The CHAIRMAN asked for other nominations.

Mr. ATKINSON proposed Mr. Lias.
Dr. MUNRO proposed Messrs. James, Colomh and Keswick. (Applause.)

Mr. KESWICK—You overwhelm us! We are sufficiently covered with shame already by the pretty things you have all been saying. Please let us have a rest! You have three gentlemen here who know all about it, and you must give us a rest and elect your own committee and do what you like! We have told the special committee all we know about it, and if there is anything that should crop up that they want to ask us about they can always come to us, but kindly let us off as we can't do it now!

The CHAIRMAN called attention to the fact that the special committee's report, now adopted, gave power to the new committee to add to their number.

Mr. LIAS said he would be very pleased to act on the committee but he would be going away in six weeks.

The CHAIRMAN then put to the meeting the names of the seven gentlemen who had been nominated for the Committee, no other names being forthcoming, and nineteen voting for and none against, the committee were declared to be so constituted with power to add two to their number.

Mr. JAMES, before the meeting closed took the opportunity of expressing thanks to Dr. Munro and Dr. Reidhaer for their gratuitous services to the third class and charitable patients up to July 13th. Especially he thanked Dr. Reidhaer who alone had looked after the patients since and had given great attention and constant care. His proficiency as a linguist greatly facilitated his relations with the nursing staff and made him quite a *persona grata* at the hospital.

Dr. MUNRO said he was sorry that illness prevented him from giving such attention to the hospital as he would have liked to give.

A vote of thanks to the Chairman was accorded on the motion of some one as the people were filing out, but the proceedings had already terminated.

SOME EDUCATIONAL QUESTIONS IN GREAT BRITAIN.

(WRITTEN FOR THE "JAPAN MAIL.")

In the House of Commons on June 18th, in the debate on the Scotch Education Vote, Mr. T. Shaw pointed out that in the last thirty years the population had increased 30 per cent., teachers salaries 45 per cent., school accommodation 230 per cent., attendances 200 per cent., and certified teachers 350 per cent. The school board system had been amply justified by results. Sir John Gorst referred to the Sub-Commission appointed by the Commission on Physical Education to inquire into the physical condition of the children before determining what kind of physical training could be given. Dr. Mackenzie and Professor Mathew arranged to take 600 children in Aberdeen and an equal number in Edinburgh. Aberdeen was a fair sample of the rural parts and here 5 per cent. were in poor health; Edinburgh a fair sample for Edinburgh, Glasgow, and Dundee, and 19.17 per cent. were in poor health. In one particular school in Edinburgh—North Canongate—out of 150 children examined, 115 came from families that occupied not more than two rooms, and 38 per cent. suffered from insufficient nutrition. 70 per cent. of the children examined in Edinburgh suffered from some kind of disease or other. The Commissioners said that physical exercise unsupported by adequate food and clothing must result in absolute physiological exhaustion and infirmity. What they said about physical exercise applied more strongly to mental exercise. So it followed that the first thing necessary was to feed the children. Mr. Bryce stated that the facts disclosed about Edinburgh children were not worse than about many schools in the North of England.

New Universities may naturally be expected to develop new ideas. Birmingham University Council has resolved to make a model coal mine, three-quarters of an acre in size, at Bournbrook,

near their new buildings. The purpose of the new mine is to demonstrate in connection with the classes, systems of working coal, methods of timbering, underground surveying and levelling haulage and ventilation. Especial attention will be given to research in ventilation. A metallurgical laboratory not to be excelled by any in Europe or the United States will be established, and the treatment of gold, silver, zinc, tin and copper ores, methods of dressing, &c., will be shown as carried out in actual practice. In summer, visits will be paid to various mining districts, and the programme this summer includes visits to Cleveland, and the coal mines of Northumberland and Durham.

Dr. M. E. Sadler speaking before the "private Schools Conference" at Harrogate (June 19) said that as supplementary to public effort private schools of the right kind would render far more service in the future than ever in the past. Those entrusted with the administration of education should make a careful study of what happened in Denmark in this regard, and also to some extent in other Scandinavian countries. We need, he said, for England, the best education in the world. Not a hurried copy of some foreign system, but a system carefully adapted to English needs—an education which trains the body, opens the mind, and touches the heart, which never forgets that among the most real of the tasks of human life are the spiritual tasks, unselfish service to others, family affection, public duty, and the purging and deepening of belief. We should seek to combine in the unity of a common but wisely varied purpose private effort and public powers.

At the closing ceremony of the Bangor College, Principal Reichel emphasized the different treatment accorded to education in Germany and the United States which were our keenest rivals in national and industrial competition. "The grants made to Universities in the United Kingdom were infinitesimal compared with what was received by Germany and the United States, and no thoughtful man who looked at the facts could doubt that the nation, which in these days of relentless competition, refuses to apply to the whole national activity the resources of a trained national intellect was preparing for itself loss and humiliation and possibly irretrievable disaster."

A Faculty of Commerce is to be instituted at Manchester University in October. £1200 for 5 years has been subscribed and £300 a year is still wanted to make up the income necessary to give it freedom of operation. The promoters are sanguine that the experiment will demonstrate the value of higher education in Commercial Manchester as it did in London.

Sir Richard Jebb, in an address on "Some Aspects of Modern University Education," at Bangor College, compared federal with city universities. The chief advantage of a city university was its concentration of local patriotism. But a federal university had another advantage. To represent Wales was not merely to represent a geographical area and a distinct nationality, it was also to represent a well-known type of national genius characterised by certain intellectual bents, by certain literary aptitudes, by certain gifts of imagination and sympathy, specially manifested in the love of poetry and music; a type of genius which is peculiarly susceptible to the influence of humane studies. A university which was the one academic expression of such a national genius held a position of unique interest and peculiar strength. To have but two would be to divide the national sentiment. With the modern type of universities—the city—there were two dangers. The pressure of local demands might lay undue stress on the technical attainments and relax the requirement in regard to science. The other was that the scientific side might overshadow the literary. The solution might be found in the German plan in the institution of technical high schools where the highest education was given. The ideal of an University was to form not merely an expert but an efficient man.

THE RUSSIAN PRESS.

(SPECIALLY TRANSLATED FOR THE "JAPAN MAIL.")

The following telegram dated Vladivostok June 23, appears in the *Noroe Vremya* of June 25 (July 8):—

The Japanese Government, in view of its present friendly relations with all the other Powers, has resolved not to hurry forward the building of its new armour-clads, in order that it may afterwards be able to raise the funds necessary for the purpose without having to levy new Land Taxes on the people.

The Japanese papers almost all admit that Japan need entertain no apprehensions with regard to Russia as Russia's actions are capable of being interpreted as tending towards the preservation of the peace. The Japanese furthermore see in the demobilization of the Russian fleet assembled at Port Arthur and the distribution of the vessels composing it among different other ports,—Chifu, Nagasaki and Vladivostok—a proof of Russia's peaceful intentions.

MANCHURIAN BREAD.

The *Daily Post* says that some time ago Manchurian bread sold for 20 kopeks a pood (that is five pence for 36.11 lbs. of bread). It declared at the time that if this price was maintained, the world would eventually be fed on Manchurian bread; and jokingly recommended the military authorities to turn loose in Manchuria as many raw recruits as possible. Things have now changed sadly, however, for the price is now about a rouble a pood. In Kharbin it is from 65 to 85 kopeks. Most of it goes to Vladivostok.

MANCHURIA.

The *Nori Krai* foresees a speedy and pacific solution of the Manchurian difficulty, a solution which will enable Russia to lay aside the weapon with which she has had to gird herself up to the present and to turn her attention to the establishment, in concert with the Government, of a civil, pacific régime in Manchuria. The Port Arthur paper regards the establishment of this régime as a complicated problem and cannot yet say in what way it will finally be solved. But all the responsibility of finding a solution for it falls on the high authorities of Kwantung who have up to the present directed in fact the policy hitherto followed in Manchuria and, that is why we believe the moment an opportune one, exclaims the *Nori Krai*, for laying stress on the absolute necessity of putting into the hands of the commander-in-chief of the region the entire direction of all the Russian administrative agents in Manchuria, that is to say, the civil as well as the military administration, the administration of the railways and everything else.*

THE RUSSIANS AND THE POPE.

A very remarkable feature of the latest Siberian papers to hand is the long telegraphic accounts which they contain about the late Pope's illness, the progress of which the Greek Church Russians seem to have watched with as much sympathy as the members of the Roman communion. The latest issue of the *Nori Krai* contains several bulletins giving details of the Pope's temperature, pulse, &c., on different days, as well as of the final scene.

The *Noroe Vremya* also publishes a handsome supplement giving many interesting pictures of the Pope and the Vatican and containing much interesting reading matter.

M. LEVITOFF.

It seems that M. Levitoff—Colonel Levitoff, I believe he is—has returned to Port Arthur, where he will resume the editorship of the *Nori Krai*. This remarkable man speaks our tongue so well that he recently delivered a lecture in London in fluent, correct, English; and, although over sixty, his feats of endurance would put many a younger man to shame. A veritable peripatetic journalist, he at one time went everywhere where anything was happening.

* The *Nori Krai* is Admiral Alexieff's organ and this article was probably intended to pave the way for the Admiral's elevation to the Viceroyalty of "the Far East."—Translator.

accompanying for instance the French expedition to Madagascar.

In one respect M. Levitoff is better off than the average Far Eastern editor inasmuch as he has quite a large European staff. One of the members of his staff is from the *Novoe Vremya* and all are very capable. The business side of the paper, too, is worked with more than American push.

JAPAN THROUGH RUSSIAN GLASSES.

A short time ago the *Novoe Vremya* congratulated the *Novi Krai* on the general excellence of its translations from the Japanese Press, and the praise is deserved, for the Post Arthur paper seems to have gone to the unusual expense—unusual, that is, for a Eastern paper—of stationing in Japan a capable and well-equipped representative with nothing else to do than to watch the Japanese and foreign Press and, more especially, to obtain information which does not appear in the local newspapers. H. B. Mashkevitch seems to be the name of this representative, that is if the name he appends to his articles is his real name. In the course of his latest article he speaks as follows of Marquis Ito:—

"I think that in this decisive moment, Marquis Ito may, by the formation of a new Cabinet, deprive the present Ministry of the amusement of playing with fire and by that means save the State from ruin and the Japanese empire from destruction. My supposition is founded on the fact that Marquis Ito, on meeting with the Mikado, criticized the foreign policy of Japan on this account, that the Minister of Foreign Affairs did not act the correct way towards Russia, by the instructions which he gave to the Japanese Ministers at Peking and at Seoul, Messrs. Uchida and Hayashi, who only excited by their conduct the suspicion that Japan wanted to place obstacles in Russia's path and to impede the growth of Russian interests. Marquis Ito pointed out that it was necessary to at once open negotiations with Russia, and to open them with friendly words and in a trustful and conciliatory manner. It is impossible not to be in harmony with the sympathetic views of Marquis Ito, for a frank exchange of ideas between the Russian and the Japanese Governments might at once disperse the dark clouds that are at present gathering on this Far Eastern horizon and threatening every moment a terrific storm. Such exchange of views would clear the air and leave not the slightest cloud behind."

GREEK CHURCH SONGS.

In the issue of the *Tserkovnii Vestnik* (Church Messenger) dated May 29 (O.S.) there is a short report from Seoul, Korea, according to which Archimandrite Khristauf, chief of the Russian Ecclesiastical Mission in Korea, who recently arrived from Russia, brought with him a fine Russian choir (*prekrasnyi khor pevchikh*) able to render the old songs of the Greek Church in a very beautiful manner. The singing of these songs by the new choir made, says the *Tserkovnii Vestnik*, such an impression on the members of the church that those who had previously been too much occupied outside to be able to spend a few moments in the church every Sunday, were now seen standing in the crowded church Sunday after Sunday till the end of the service, which lasts as a rule from 1 1/2 to 2 hours. Moreover, the church is frequently visited by the Korean Ministers and high officials who all seem to derive much pleasure from the peculiar foreign singing. The writer in the *Tserkovnii Vestnik* pertinently adds that the pleasure of these illustrious visitors would probably be much greater if the songs were translated into and sung in Korean so that they could understand them.

It might be mentioned in this connection that the choir of the Greek Cathedral at Surugadai, Tokio, is well worth going to hear. It consists of about 200 men and women who sing in Japanese without the accompaniment of any instrument, but whose singing is nevertheless a rare treat, calculated to make those who despise the Japanese as vocalists, considerably modify their opinion. This admirable choir is under the direction of the Rev. Deacon D. Liovsky and Mr. Y. Kisu, but as the former gentlemen has gone, I believe, on a visit to Russia and as many mem-

bers of the choir are absent owing to the summer holidays, the present is not a good time to visit the Church in question for the purpose of hearing the singing. But by the beginning of September, all the members of the choir will be in their places again.

FIRES.

A somewhat disastrous fire occurred in Nagoya on the 13th instant. It broke out in the Toyokwan, a large edifice erected in 1896 at a cost of some sixty thousand yen, for purposes of public entertainments. Thirteen or fourteen buildings of more or less importance were destroyed before the flames could be subdued.

A sort of fatality seems to hang over the Bible House at No. 60, Yokohama. Only recently rebuilt after being gutted by fire, a similar misfortune befel it on Sunday evening. Flames were first discovered in the back of the building about half past seven o'clock, and in a very short time they were shooting through the roof. Fortunately the night was windless and so the Fire Brigade had little difficulty in confining the fire within the bounds of the building in which it started. Still for all that the premises of Mr. John W. Hall and Messrs. Prett & Co. again had a narrow escape from being involved in a common catastrophe. An engine arrived on the scene early but half an hour elapsed before it could get into operation.

We learn that the insurance on the premises occupied by the Bible Society and the Vacuum Oil Company, which were burned on Sunday evening, amounted in the total to yen 37,200, being apportioned as follows: yen 13,000 on the building, yen 22,000 on the contents (Bible Society) and yen 2,000 on furniture (Bible Society). The Vacuum Oil Co., which occupied the second storey are insured at home. So far as the Bible Society are concerned, the damage is slight.

About 11 o'clock on the night of Aug. 18th, fire broke out in the upper storey of the Chinese stationers, Kingsell and Co., No. 53, Yokohama. It was immediately extinguished before serious damage was caused.

A fire occurred in a godown in the Railway station at Shimabashi close to Hama detached palace, at a little before seven o'clock on the evening of the 17th Aug. By 7.50 p.m. four godowns had been destroyed and the fire was still burning as our messenger left.

Details as to the damage by the fire which occurred on the evening of Aug. 17th in the compound of the Shimabashi railway station are given by Tokyo papers. The fire began in the 1st working department (150 *tsubo*) and the flames extended to the 2nd working department (60 *tsubo*), the 3rd working department (50 *tsubo*), a stock shed for wood material (200 *tsubo*) and a coal depot (200 *tsubo*) destroying all these buildings. Besides, ten goods cars and a 3rd class passenger car were burned. The damage is estimated at over yen 230,000. The cause has not yet been ascertained, but it is supposed that sparks from a pipe negligently left by a workman may be taken as the origin.

An outbreak of fire occurred, on the night of Aug. 17th in the dwelling of Dr. S. Nagai, a military surgeon, at Ryudo-machi, Azabu, Tokyo. It was put out before damage was caused to the building, but a son of the doctor named Shuji, 8 years old, was killed and another of the family was injured.

A telegram from Shimonoseki states that the steamer *Saikyo Maru* which left there at 3 p.m. on August 19th for Formosa took fire about 4 p.m. while passing Mutsure island. The passengers were at once removed to the O.S.K. steamer *Kasuga Maru*. The origin of the accident is reported to have been ammunition which ignited from friction during the voyage.

Fire occurred about 2 p.m. on Aug. 19th in the office of the Meiji Hat Manufacturing Company, Honjo, Tokyo, destroying four workshops and two other buildings.

CRICKET.

COCKALORUMS V. THINGUMMIES.

The heat on Saturday was very trying, but there are still a sufficient number of men to be found in the Settlement willing to face the ordeal of a blazing sun and much violent physical exertion in the sacred cause of cricket. Not enough to make up two complete elevens, but enough to make a game, and these to the number of a round dozen and three found some compensation in the fun that the meeting of the Cockalorums and the Thingummies would naturally evoke. Play started after 3.30 p.m., when the worst of the heated term had passed. The Cockalorums went first to bat, and when their sixth wicket fell for 119, the captain of the team declared his last man in to be "unkonquerable," so he preferred to close the innings. It speaks well for the endurance of the Cockalorums that their first man, Foster, was not dismissed until 37 runs had been made. Edwards and Maitland carried the score to 41 and then White very neatly bowled Edwards. W. S. Moss joined Maitland and the runs came freely until Maitland, growing over-confident, succumbed to a straight ball from White. The score was now 68. At 60 Moss retired, leaving Ford and H. W. Kilby to keep up the honours. They raised the total to 103, when Ford left for the shelter of the Pavilion. Thompson took his place and though he made but one run, he was kept busily on the move, as Kilby lifted the score to 119—at which figure it remained, as before related.

The Thingummies were evidently the worse for wear when they went in to bat, and with the exception of P. B. Clarke (23) and F. E. White (16) made no stand at all, their score knocking 62 when one of their last batsmen "did a bunk"—as the score-sheet has it.

CHINA PONIES.

A batch of 13 China ponies, which arrived about noon on Friday in the *Kobe Maru*, was landed and drawn for at 6 p.m. in Durand's yard. The following was the result:—

Nos.

- 1.—Mr. Jarmain.
- 2.—127 Mess.
- 3.—Count de Perigny.
- 4.—Mr. Tytherleigh.
- 5.—Mr. Kashiwagi.
- 6.—Mr. Hiranuma.
- 7.—Mr. Yezoye.
- 8.—Mr. Tytherleigh.
- 9.—Mr. Ward.
- 10.—Mr. Werckmeister.
- 11.—Mr. Marshall.
- 12.—Mr. Mori.
- 13.—Mr. Runge.

YACHTING.

Saturday was almost an ideal yachting day—indeed a little less heat and a trifle more wind with the smooth water would have made the weather quite perfect.

Under the auspices of the Yokohama Yacht Club two races were sailed, and the 21-raters of the Mosquito Yacht Club competed for Mr. N. B. Morton's cup, on arbitrary handicap. The cruising class of the former club started at 2 p.m., *Daimyo* being first across, *Asago* next, *Wanderer* third, *Spray* and *Nina* close together, and *Molly* last. They ran out before a moderate south-easterly wind and *Spray* (with her former owner at the tiller) gradually established a considerable lead. She passed the Tsurumi mark first, *Nina*, *Daimyo* and *Asago* following in that order about half a minute apart. In the beating to weather the lightship *Daimyo* by coming well inshore appeared to have been much advantaged for she was close astern of the leader as they passed this mark, and after the windward work to the Widow Buoy was well ahead. Running back to the Lightship *Spray* reduced her lead to about four minutes and all but caught her in beating up the harbour. *Daimyo* might easily have saved a minute by tacking when she could weather the lee end of the line but she held on starboard tack and stood almost parallel with the line till, warned by *Spray* which tacked as soon as practicable, she luffed and got across just three seconds to the good. *Nina* was a bad third but *Wanderer* which came in fourth took first prize on the handicap. Corrected times:—

	h.m.s.
<i>Spray</i>	4:57.58
<i>Wanderer</i>	4:44.25
<i>Daimyo</i>	4:52.55
<i>Nina</i>	4:56.35
<i>Molly</i>	5:11.55
<i>Asago</i>	4:55.20

Wanderer therefore takes first prize, *Daimyo* second with two points, *Asago* receiving one point.

The "Larks" raced outside the harbour the water being smooth and in the end No. 10 (Watt and Drummond) added another to her already long list of wins, No. 11 (F. H. Abbey) being second, and No. 2 (A. L. Manley) third. Their times were

	h.m.s.
No. 10	4:31.45
No. 11	4:33.20
No. 2	4:36.42
No. 1	4:48.25
No. 4	4:37.20
No. 12	4:41.35
No. 13	4:39.55
No. 14	4:39.20

First takes two record points and second one. Mr. Eytton with an allowance of 72 minutes, won the handicap cup.

The Mosquito Club yachts had a race for Mr. Morton's Cup. *Yugao* assumed the lead in running out and was first round the Tsurumi mark, *Pele* second. On the beat to the Lightship, the latter got in front and she led *Sunbeam* round the Lightship and again at the Mandarin Bluff, the order at the latter mark of the other boats being *Edna*, *Chocho*, *Yugao*, and *Vixen*. In the beating home *Edna* ran into second place, but *Pele* won the cup on actual time, finishing at 4h. 51m. 45s., five minutes ahead of the former.

W. C. T. U.

The eighth annual meeting of the Foreign Auxiliary of the Women's Christian Temperance Union in Japan was held in the Union Church, Karuizawa, on Tuesday, Aug. 11th, 1903.

It consisted of an all day conference, the morning session lasting from 9.45 to 2.2; the afternoon session from 3 to 6; while a social and musical evening to which all friends were invited, brought the whole to a pleasant close.

The President, Miss M. A. Spencer, was in the chair during the business sessions.

The Treasurer's report showed a balance in hand of yen 69,165. Interesting reports were received from the Superintendents of the following departments: Social Purity, Schools and

Colleges, Sunday School work, Loyal Temperance Legion, Scientific Temperance Instruction, Anti-narcotics, Unfermented Wine, Sabbath Observance, Health and Heredity, Physical Education, Presswork and Literature, Work among Foreigners, and Mothers' Meetings.

The report of the Executive Committee of the Auxiliary contained the following recommendations:—

RECOMMENDATIONS OF EXECUTIVE COMMITTEE.

1. We recommend that special effort be made to conserve the work already done for children in the interest of the Loyal Temperance Legion and that this work be pushed this year as never before, using the children's total abstinence pledge recently prepared by Miss Smart.

2. We recommend that an effort be made to circulate the purity pledge through the medium of the Y.M.C.A., as well as through all the Temperance Societies in Japan, and that we do our utmost to promote the purity movement as represented by the White Cross and White Shield Branches.

3. We recommend that the use of the monthly programme prepared by the National Committee, and to be obtained through Mrs. Yajima, be urged upon the Local Societies whenever practical.

4. We recommend the introduction of the W. C. T. U. Medal Contests which have proved so successful in arousing interest in America, and the acceptance of help kindly offered by Miss Smart in the preparation of necessary literature.

5. We recommend that a Department of Work for Soldiers and Sailors be adopted, and a superintendent appointed.

6. We recommend the use of the Manual on Parliamentary Law now in preparation to the local societies.

LAW CASES.

INFRINGEMENT OF TRADE-MARK.

Three Japanese bicycle dealers Hasegawa, Iizuka, and Hanayama, Tokyo, who are being prosecuted in the Tokyo District Court by Messrs. Andrews and George, No. 242, Yokohama on a charge of infringing a trade-mark used on bicycles imported by the firm, and who have been under-going preliminary examination, were committed for trial on August 13th.

CLAIM ON A PROMISSORY NOTE.

The hearing of this case instituted by Mr. J. Helm against Mr. G. R. Allen of the Occidental and Oriental Trading Company Claiming on a promissory note for yen 627 began in the Yokohama District Court before Judge Yasuda on Aug. 19th.

Plaintiff was represented by Mr. H. Sato, but defendant was present in person.

Plaintiff's counsel stated that defendant gave plaintiff on July 1st this year, a promissory note for the amount of yen 627, the due day of which was the 30th of the same month. On the due day, defendant declined to redeem the note and subsequently, on the following day, he refused through a bailiff, by a document, to pay it.

Defendant contended that he gave a promissory note for yen 627 for his firm, the Occidental and Oriental Trading Company, but not on his individual account. He was only an employee of the firm and not representative of the company, and therefore he had no responsibility for the claim.

The Judge then examined Mr. Allen as to the relations between him and the firm after which the Court rose, adjourning the case till Aug. 21st when judgement will be delivered.

CLAIM ON STOLEN BONDS.

In the Tokyo District Court, Mr. K. Tokuda, a share-broker, has instituted an action against the Tokyo branch of the 35th Bank claiming repayment of money which plaintiff paid to the defendant bank on receipt of one of the bonds which T. Ikeo is alleged to have stolen from the Department of Finance. Tokyo papers state that as the proceedings in this action will be of interest as to the public confidence in the circulation of bonds, the Minister of State for Finance will ask the Court for leave to participate in the case as an intervenor.

AN "EMPRESS" IN COLLISION.

(SPECIAL TO THE "JAPAN MAIL.")

Kobe, August 20, 10.20 a.m.

A Shanghai telegram dated at 4.42 p.m. on the 19th states that the Chinese cruiser *Huangtai* collided with the *Empress of China* near Swatow on Monday night. The cruiser sank, her captain refusing to leave and going down with her. The *Empress* rescued 184 of her crew and took them to Hongkong. Thirteen are missing.

The Chinese cruiser which is reported to have sunk after collision with the *Empress of India* near Swatow was a vessel of 2,110 tons displacement; 260 feet in length, 36 feet beam and 20 feet in depth with engines of 1,600 indicated horsepower. She carried three 7-in Krupp gun and seven 40-pdrs. Her speed is given as 15 knots, and she had two torpedo tubes.

A cable was sent to Hongkong for information on the subject of the occurrence—the first accident be it noted that has happened in twelve years service to Capt. O. P. Marshall, the greatly respected and popular commander of the *Empress of India*—and an answer was received on Thursday afternoon which makes it evident that the *Empress of India* has not sustained any serious damage. Her schedule stay in Hongkong is only eight days, and this would hardly suffice to make extensive repairs if they were necessary. Yet it is now stated in the Hongkong telegram that she will leave that port on her fixed date, August 26th, so that her departure from Yokohama will doubtless also be the schedule day, Sept. 4th. The fact that there has been a collision is merely confirmed.

TRADE MARK APPEAL.

The authorities of the Patent Bureau, says the *Official Gazette* of August 19th, delivered a decision, on July 30th, as to a protest lodged by Mr. C. J. Hampton, legal representative of Messrs. Perry and Company, No. 36, Lancaster street, Birmingham, England. The representative of the foreign firm claims cancellation of a trade mark No. 14,395 which K. Ichikawa, No. 5, Sojuro-cho, Kyobashi, Tokyo, registered on Jan. 26th, 1900. The petitioner has registered at home two trade marks No. 9,562 and No. 10,381 showing a "Tiger's head" above the words "Spencerian Pen Co., New York" and these marks were provided to be used on pen and pencil. That of the Japanese contains the words "tiger neck, Spencer." The petitioner insisted that this one should be expunged from the registry, in accordance with Art. 2 of the Trade Marks Regulations. The protest was sustained.

In the same office, on the same day another decision was given on a petition by Mr. C. J. Hampton against the same Japanese with reference to a similar trade mark registered on Aug. 24th, 1897; the protest was again sustained.

CUSTOMS DECISION.

The Superintendent of the Yokohama Customs promulgated on August 17th a decision as to a protest filed by the American Trading Co., No. 28, Yokohama. The firm imported a quantity of woolen cloth, with the certificate of origin, on which the appraisers imposed a duty of yen 9.3 per square yard under No. 55-A of the conventional tariff between Japan and Great Britain. The importers protested, contending that the goods in dispute should bear the *ad valorem* duty of 10 per cent. under No. 60-B of the tariff. The protest was, however, dismissed on the ground that the woolen cloth is woven with worsted yarns both warp and woof and its nature is that of a worsted coating but not serge as the importers contended. On similar appeals against the Customs decisions, the Minister of Finance has repeatedly given decisions in which the imposition of No. 55-A is involved.

about four times those of 1853, while exports are practically seven times as large. The table which follows shows the total imports and total exports and the grand total of imports and exports at decennial periods from 1853 to 1903, viz.:

	Imports.	Exports.	Total.
1853	\$263,777,265	\$203,489,382	\$467,266,547
1863	243,335,815	203,964,447	447,300,262
1873	642,136,210	522,479,922	1,164,616,132
1883	723,180,914	823,839,403	1,547,020,316
1893	866,400,922	847,665,194	1,714,066,116
1903	1,025,619,127	1,419,991,290	2,445,610,417

The growth in importations, which is the most striking characteristic of the year's commerce, is very largely in materials for use in manufacturing. Only eleven months' figures are yet available in such detailed form as to show the increase by great groups, but the figures of the eleven months ending with May show that articles in a crude condition for use in manufacturing increased \$62,000,000, or about 20 per cent., as compared with the corresponding months of last year; articles partially manufactured for use in manufacturing increased \$4,000,000, or about 5 per cent.; articles manufactured and ready for consumption increased \$18,000,000, or about 13 per cent., and articles of voluntary use, luxuries, etc., increased \$14,000,000, or about 12 per cent., while articles of food and live animals increased \$15,000,000, or about 8 per cent.

NEWS OF THE WEEK.

A German transport arrived at Tsuruga on August 17th.

H.M.S. *Vengeance* left Hongkong for Weihaiwei on Aug. 8th.

Marquis Ito arrived at Tokyo on Aug. 19th from Oiso.

Mr. J. Shinebu, Consul in Mexico, returned to Tokyo on Aug. 18th.

The British cruiser *Talbot* arrived no Aug. 16th at Chemulpo from Wei-hai-wei.

The Japanese warships *Yoshino* and *Chitose* arrived at Fusan, Korea, on the morning of Aug. 18th.

The aquatic sports of the Yokohama Amateur Rowing Club will be held on Saturday, August 29th.

About four hundred fishers quarrelled seriously on Aug. 19th, off the Mihara district of Awaji island.

A case of cholera was reported on August 17th in Tokyo. The same day, another was reported at Okayama.

The dead body of an infant contained in a small case was found, on Aug. 16th, on the hill-side near Kitagata, Yokohama.

Mr. M. Inagaki, Japanese Minister at Bangkok, arrived at Tientsin on Aug. 18. He will proceed to Peking the following day.

The chartered transport *Laloc* sprang a leak when bound from southern waters to Manila, and will have to go to Hongkong for repairs.

Having obtained a permit the Tokyo Electric Car Company opens its service between Shimabashi and Shinagawa to-day (Aug. 21st).

A bookseller named K. Sakai (35) living at Bakuro-cho, Tokyo, was arrested on August 17th on a charge of having sold indecent pictures.

The introduction of the new dollar in Manila appears to have been attended with some excitement owing to the difficulty of making the people understand its value.

A telegram from Chemulpo, Korea, states that a British steamer arrived there on Aug. 19th bringing 50,000 rails to be used for the Soul and Fusan Railway.

A down train on the Sanyo Railway was derailed on the morning of August 17th in the Chofu tunnel. Fortunately no injury was sustain-

ed by any one and the damage to the permanent way was quickly repaired.

The *Jiji* states that the Nippon Railway Company has decided to carry bicycles free belonging to passengers, and the decision will shortly be put into effect.

During July, the Keelung branch of the Bank of Formosa purchased gold weighing 2,927,670 momme (momme=3.7565 grammes) valued at yen 123,888.99.

The baseball game on Saturday on the new ground at Honmoku, between the U.S. Naval Hospital team and the Y.C. & A.C., ended in a win for the latter by 20 runs to 8.

The Dutch steamer *Wilhelmina* arrived here on Aug. 15th from Cardiff with 5,666 tons of coal for the use of the Japanese Navy. She proceeded at once to the Yokosuka Naval Station.

The *Niroku's* Soul telegram dated Aug. 16th states that a Russian pioneer corps numbering about 200 have arrived at An-tung from Feng-whang. They are expected to reach Wiju shortly.

A telegram from Tokushima states that a suspicious foreigner, who declared himself to be a German, arrived there on the night of Aug. 14th from Sanuki province. He had been at Hiroshima.

A coolie named N. Wada, employed by the Nippon Railway Company, was killed on the evening of Aug. 16th, by a locomotive while was crossing the railway at Ueno station, Tokyo.

The warship *Soko* which stranded off Nemuro, Hokkaido, and has since been undergoing repairs after having been floated, arrived at Yokosuka on August 17th in tow of the warship *Takasago*.

The *Asahi* states that Dr. Morrison, correspondent of *The Times*, arrived at Chemulpo on Aug. 11th from Peking by the Japanese steamer *Santo Maru*. He immediately proceeded to Soul.

K. Yamada, headman of the village of Miyasaki, near Sendai, was arrested on August 16th on a charge of having forged an official document relating to the election of members of the Prefectural Assembly.

Mr. Tsuda, an official of the Hokkaido Government, was arrested on Aug. 19th in connexion with another official named Amano, who is charged with having accepted bribes.

The *Daily Mail* states that Marconi is reported to have discovered an instrument for transmitting messages over the surface of the sea, thus dispensing with the high towers now used.

Prince Kuni returned to Tokyo on August 18th from Kyoto. The same day Prince and Princess Kwacho also returned from Shuzenji, Izu province, accompanied by their children.

Lieutenant T. Hirayama of the 20th regiment of infantry, Fukuchiyama, who was recently appointed to a post in Formosa and was to leave Ujina on August 23rd, committed suicide on the 18th.

The steamer *Tientsin* which has, for ten days, been detained at the Kobe Quarantine station in consequence of the appearance of plague during the voyage between Singapore and Hongkong was released on August 18th.

The Nippon Yusen Kaisha have decided to use the steamer *Yamaguchi Maru* on the service to Shanghai, instead of the steamer *Kobe Maru*, which has been removed from the service. The latter will be used on the line to Vladivostok.

A telegram from Sano, Shimotsuke province, states that a gale visited Kudzumi-machi on August 15th destroying many buildings. Two empty goods cars on the railway were run by the strong wind a distance of over five miles and collided with a train which was leaving

Sano station at the time. The locomotive of the latter sustained severe damage. Four passengers were slightly injured.

According to the crew of the steamer *Santo Maru*, which arrived at Nagasaki on Aug. 14th from Newchwang, the Mitsui branch at that port had received a warning from its head office to made preparations for withdrawing under future orders.

A telegram from the Governor of Nagasaki prefecture has been received in Tokyo saying that rinderpest has appeared among twenty cows and oxen which arrived there on Aug. 16th from Fusan, Korea. The whole number were killed and cremated.

A youth named H. Komiya (19) living at the village of Yaguchi, Tokyo, attempted on Aug. 16th to murder his uncle, inflicting on him several injuries with a hatchet. The culprit gave himself up to the Shinagawa police. The cause is stated to be temporary insanity.

According to the crew of the steamer *Okura Maru*, which arrived at Nagasaki on Aug. 16th, from Vladivostok, six Russian battleships, five cruisers and torpedo-boats arrived on the 4th at the latter port from Port Arthur. These ships are about to be re-painted.

Beri-beri has broken out in the Siamese Navy, and many of the men are down with it. There is also something of an epidemic of this disease among the students in the Royal Military College, where, says the *Bangkok Times*, one would hardly expect to find it, if it is really due to the food eaten.

The Etablissements Orosdi-Back, No. 78, Yokohama, has filed an action in the Tokyo District Court against Messrs. J. Goto, K. Oba and T. Kasawara, administrators of the estate of the Goto Woollen Mill claiming yen 19,500 on promissory notes which have been dishonoured.

There was a contest at Hongkong on Aug. 12th between Mr. H. E. Pollock, K. C., and Mr. E. H. Hewett, Superintendent of the P. and O. S. N. Co., for election to represent the Chamber of Commerce on the Legislative Council. The result of the voting was: Mr. Pollock 63, Mr. Hewett 54, the former being consequently elected.

The former warship *Nisshin*, is to be sold by tender at the Sasebo Naval Station. The term of contract for the sale can be inspected at that office. Tenderers must lodge their tenders before 10 a.m. on Aug. 31st accompanying them, with not less than 5 per cent of the estimated value of the purchase.

Rear-Admiral Yoshida, naval attaché of the Japanese Legation at Peking, and, also of the Legation at Soul, who had been ordered to return, arrived at Kobe on Aug. 16th and left there by the night train for Tokyo. He is expected to return to his post after staying in Tokyo for a few days.

According to the *Jiji*, it is stated at Osaka that the establishment of the Central Bank of Korea was decided on by the Emperor on August 8th, when Li Yong-ik had audience of His Majesty. Sim Sung-tak was selected to be the president of the bank and Li Yong-ik to be the vice-president. The capital will be yen 6,000,000.

According to a foreign passenger who arrived at Nagasaki, on Aug. 14th, by the steamer *Takasago Maru* from Chefoo, says a correspondent of the *Asahi*, the U. S. squadron, consisting of 12 warships, are expected to leave Chefoo for various destinations on Sept. 10th. Two or three of them will visit Yokohama.

Mr. K. Sakuma, of the Toyo Emigration Company, who recently returned from Mexico with an order for 500 emigrants, has applied for passports for the specified number of coolies, to the Department of Foreign Affairs. The conditions of the emigrants were stated by Mr. Sakuma,—among others that the food and lodgings shall be supplied by the employee

in Mexico and that the wages shall be \$8 in gold of the United States. The *Asahi* states that the Government authorities refused to give permission to the applicant on the ground that living in Mexico is rather high and that the emigrants could not make any savings from a wage of \$8 gold.

Princes Tsunehisa and Teruhisa, sons of Prince Kitashirakawa, who were staying in the villa at Hayama, returned to Tokyo on August 15th. Princes Michi and Atsu, sons of the Crown Prince, will remove shortly to the villa of Count Kawamura, at Numazu, from the detached palace at Hakone, where they have been passing the hot season.

Manila papers announce the arrest of Major Simeon Villa, who was formerly Aguinaldo's chief of staff and was "the brains of the insurrection." He was concerned in the murder of Lieutenant Pereira in 1898 under circumstances of ferocious barbarity, and when his companions were arrested he escaped to Japan. His return to Manila has now been followed by his arrest.

A London telegram states that a reconciliation has been effected between the Countess Russell and her husband, William Brown, the footman who married her under the pretence of being Prince Atholbald Stuart de Modena, a natural son of the Emperor of Austria, and who was recently sentenced to two days' imprisonment for breach of the marriage laws by making a false statement.

The London County Council has agreed to give a yearly contribution of £20,000 towards the cost of maintaining a great technical school in London as foreshadowed by Lord Rosebery in his recent letter to the press. The County Council's contribution will be paid when half a million sterling has been subscribed from other sources.

A telegram from Tientsin, says the *Niroku*, states that Viceroy Yuan presented a memorial on Aug. 14th, to the Empress Dowager and the Emperor asking them to despatch telegrams, in the name of the Emperor, to Japan, Great Britain and the United States requesting the three Powers to open negotiations with Russia so as to settle the present crisis.

A telegram to the *Jiji* from Nagasaki states that a case of suspected cholera appeared on August 19th on board the Russian cruiser *Ohtsany* which arrived at the port from Shanghai, the previous day. The ship was detained at Shanghai for seven days in consequence of the appearance of the same disease on the 12th, after which she came to Nagasaki.

The shareholders of the Osaka and Kobe Electric Tramway Company held a meeting on August 17th, when they decided to call up yen 7.50 per share (yen 17.50 already paid) on December and this year, and to commence on Sept. 1st the work of constructing the tramway, at an expense of about yen 500,000. The work is expected to be completed by August next year. The materials for iron bridges, which will weigh about 600 tons, will be supplied by the Mitsui Bussan Kaisha.

In connexion with the text book affair several decisions were, on Aug. 18th, given in the Tokyo Appeal Court. The appeals of two educational officials were dismissed. Another who had been sentenced to two months' imprisonment with hard labour and a fine of yen 7 was discharged on the ground that the evidence against him was insufficient. A fourth whose original sentence was 2½ months' imprisonment with hard labour and a fine of yen 7 had it altered to 1½ months' imprisonment and a fine of yen 5.

Many will read with regret the announcement which we make this morning, of the passing of Mr. John Catto Abell. A resident of Kobe, where the best years of a fairly long and useful life were spent, Mr. Abell had a wide circle of acquaintances in the northern port who will mourn the loss of an upright man of business, a judicious

counsellor in times of emergency, and a sterling friend. Ever unobtrusive, Mr. Abell yet filled when his health permitted one or two public positions with credit and success, but latterly he had withdrawn from everything. To his widow and family are extended sincere condolences in this hour of their bereavement.

A sailor named P. Flain (34) of the U.S. transport *Dix*, which is now in the Uraga Ship-building Yard undergoing repairs assaulted a quartermaster named J. Mark (34) of the same steamer, on Aug. 19th inflicting a severe injury on the abdomen, with a knife, in the compound of the yard. The criminal escaped but was arrested at Yokosuka the same day. The cause seems to have been a drunken quarrel. The preliminary trial will shortly take place in the Yokohama District Court.

The *Spirit of Missions* for July contains an article entitled "How one man lives and works among five hundred thousand Japanese," by the Rev. A. D. Gring, which pleasantly describes the missionary's life on the west coast of Japan. We note that the offerings from Episcopalian congregations in the United States to June 1st are nearly \$79,000 in excess of those at the same period last year. The Rev. H. Scott Jeffreys, we read, retired from the Tokyo Mission as of date May 1st.

Mdlle. Sarkisova, a Russian opera singer, lost five front teeth in an accident on the Transcaucasian railroad. She brought a suit against the railway company, claiming that "the tools of her trade" had been destroyed, and that she was entitled to heavy damages because she would no longer be able to sing. The civil court at St. Petersburg took her own view of the case, and has just awarded her \$50,000 damages. It is not unusual to hear that a singer has a gold mine in her throat but this is perhaps the first time that it has ever been demonstrated that five front teeth were worth so large a sum as \$50,000 (gold).

The *Nagasaki Press* reports that a Russian, I. S. Vovitch by name, aged twenty-eight, who came to Nagasaki from Harbin about one month ago, and has since been staying at the Japan Hotel, was found dead, having committed suicide by hanging himself in his room at the Hotel, on Wednesday last. He used to get up at about 10 o'clock every morning, but on the day mentioned he did not come out of the room, so a boy called him at noon, but received no answer. At 2 o'clock in the afternoon the boy tried again, but as no answer was returned he entered the room through the one adjoining, and found him dead. The cause of his rash act is unknown, but it is said that he owes some money locally, and his pockets were quite empty. The dead body was handed over to the Russian Consul.

An Enquiry was held by Mr. I. H. de Lucy-Fossarieu, the French Consul at Kobe on Friday into the recent disastrous outbreak of fire that occurred on board the S.S. *Tonkin*. The proceedings, which were of quite an informal nature, took place at the French Consulate, says the *Kobe Herald*. Mr. Franklin was called in to give an opinion as to the nature of Chlorate of Potash and the result of the investigation was come to without opposition. The finding was that the fire originated through friction caused by the passage of one of the slings over a portion of the keelson on which some of the chemical had been allowed to collect unobserved owing to the breakage or leakage of one or more of the kegs. Furthermore this friction was in all probability rendered more dangerous owing to it having taken place between the rusty iron hoops with which the kegs were bound and the loose Potash which is known to be very susceptible to the action of rust. Lastly, it was found that there is no blame attaching to either the Captain, officers or any other person, but the unfortunate occurrence was entirely one that no reasonable care or forethought could have averted.

So far as present appearances go they point to the probability of the output of pig iron in

1903 greatly exceeding that of any former year. To begin with, the output in the United States must be on a scale of unprecedented magnitude, and it is probable that the output for the whole year will not be much, if any, short of 20,000,000 tons. Then the output of Germany is also likely to be quite phenomenal, seeing that for the first five months of the year the output was 724,000 tons greater than that of the corresponding output of 1902. If this rate of increase be continued during the rest of the year, reasons the *London Iron and Coal Trades Review*, the total output of Germany for 1903 should be about 1,725,000 tons greater than that of the previous year. This increase, should it be realized, will make 1903 a record year, not only for German output, but for the advance of that output on all previous experience. So far as Great Britain is concerned, there is reason to believe that its present rate of production is quite equal to that of last year, and a very slight spurt would make a material difference for the twelve months in favour of 1903.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

In the *Tetsugaku Zasshi* (No. 196) appears a very long article entitled "The Harmonizing of Oriental and Occidental Thought" by Mr. Koyanagi Shikita, the pith of which we now proceed to give. In ancient times Oriental thought was always ahead of Occidental. The West learnt from the East in religion, philosophy and science. But in recent times the tables have been turned and we Orientals are found sitting at the feet of Western teachers. In this Meiji era our native thought has been transformed by the influence of Western ideas. French democracy, Christian monotheism, English and American utilitarianism, German notions on State authority, European and American socialism—what changes in our world of thought have been brought about by the influence of these ideas! In discussing the question of harmonizing Oriental and Occidental thought the first thing that it is important to do is to define wherein they differ.

(1) *Oriental thought is distinctly religious, Occidental, is distinctly philosophical.** Even those systems of thought that we are wont to call philosophies such as Confucianism, Taoism and the like are in reality religions in character, and that is why they have wielded so much authority in the Eastern world. We have only to compare the influence of a philosopher like Socrates on after-generations with that of Confucius or Laotzu in China to see the difference between the influence exercised over the minds of men by a mere philosopher and that wielded by those who have a great moral message for mankind.

(2) *Oriental learning makes the heart of man its chief study, but Occidental learning is chiefly concerned with nature.*—It is astonishing how little materialism is to be found in the writings of Oriental philosophers† and how relatively unimportant nature seems to them to be. (3) *Oriental learning is deductive and sympathetic, Occidental, inductive and analytic.*—This being the general tendency of the two systems of thought, as a natural consequence doubt is discouraged in the East as being a rebellion against competent authority. The heart of man has been studied by the greatest of men and what they have decided in reference to it is not to be questioned. But when we come to nature the field of ignorance is still large, men have been so often wrong in their interpretation of nature's ways that questioning and doubting are frequently the prelude of great discoveries. Proceeding to
